# Safety Mats & Area Guarding MC Controllers

# MC3, MC4 and MC6 Series Safety Mat Controllers

The MC Series safety mat controllers are used in conjunction with a four-wire, normally open, safety mat where perimeter guarding is required. These control reliable controllers send a stop signal to the guarded machine when an object of sufficient weight is detected on the active mat area.

The MC Series controllers, when combined with a four-wire UM or UMQ series mat, provide access guarding and improved productivity. The work area is fully visible and accessible.

The controller meets the requirement of EN 1760-1:1998, EN 954, ANSI/RIA 15.06-1999, ANSI B11.19-2003, OSHA 1910-217C. CSA and UL508.

#### MC6

- Universal power input
- Up to 6 mat zone inputs
- Six mat zone status indicator LEDs
- Select from Automatic Start, Start/Restart Interlock or Start Interlock operating modes
- MPCE monitoring
- Remote access to reset functions
- 2-digit numeric display for fault diagnostics
- Surface mount, lockable metal enclosure

#### Options

- Lid-mounted reset key switch
- Quick disconnect for incoming power and relay outputs
- · Quick disconnects up to 6 mat zone inputs
- Solid-state safety output module
- · Safety relay output module

#### Description

#### MC3

The MC3 DIN mount controller may be used in applications that do not require the feature set of the MC6 controller. The MC3 single zone mat controller has removable terminal blocks and operates only on 24 VDC.

#### MC4

The MC4 is a NEMA 4, 12 rated single zone mat controller. This controller may be used in applications when the diagnostic features of the MC6 may not be required. The MC4 may be ordered in either 24 VDC or the universal auto-selecting power supply for 100-240 VAC.

#### MC6

The MC6 is a NEMA 4, 12 controller with six individual mat zone indicators and is designed to be backward compatible with the MC4. Both units are dimensionally identical. This is where the similarities stop: The MC6 has full featured diagnostics with a 24 VDC and an optional universal power supply (100-240 VAC autoselecting). It is a controller that can be used anywhere in the world.

#### Additional Guarding Requirements

A safety mat system is often only one part of a machine guarding solution. If the safety mat does not protect all access to the point of operation, additional guarding must be used. Safety mat systems should only be used to detect the presence, not the absence, of a force.

#### Perimeter Guarding Requirements

For perimeter guarding installations, the guarded machine or robot controller must be wired such that any stop signal generated by the safety mat system will cause an immediate stop of the hazardous motion. The machine or robot must only be restarted by the actuation of a manual reset switch. This reset switch must be located outside the area of hazardous motion and positioned such that the hazardous area can be observed by the switch operator. The purpose of this arrangement is to prevent a machine or robot from automatically restarting once the sensing weight is no longer detected by the safety mat sensing area.

### Specifications

Controller Specifications	MC3	MC4	MC6	
Performance		1	1	
Category 3 Safety Device:	Yes			
Max Input Resistance:	8 ohm per input channel			
Response Time:	< 30 msec			
Indications:	1 - Green = Run 1 - Red = Stop 1 - Green = Mat Clear		1 - 2 Digit Diagnostic Display 1 - Green = Run 1 - Red = Stop 1 - Green = Mat Clear 1 - Yellow = Interlock 6 - Red = Mat Zones	
Operational Modes: (Selectable)	Automatic Start, Start/Restart Interlock		DIP Switch Selected, Automatic Start, Start/Restart Interlock Start Interlock

#### **Rapid Delivery Products**

The following models are readily available for shipment today or at least within 3 days. Please consider these for all new applications.

Model	Part Number	Description			
MC3 Controller					
MC3	43767-0010	Din - 24 VDC			
MC4 Controllers					
MC4-0004	43815-0004	NEMA 24, VDC, 4 mat connectors			
MC4-0010	43815-0010	NEMA 24 VDC or 100-240 VAC, No connector			
MC4-0011	43815-0011	NEMA 24 VDC or 100-240 VAC, 1 mat connector			
MC4-0012	43815-0012	NEMA 24 VDC or 100-240 VAC, 2 mat connectors			
MC4-0013	43815-0013	NEMA 24 VDC or 100-240, VAC, 3 mat connectors			
MC4-0014	43815-0014	NEMA 24 VDC or 100-240, VAC, 4 mat connectors			
MC6 Controllers					
MC6AC-0016	43938-0016	NEMA 24 VDC or 100-240 VAC, 6 mat connectors			
MC6DC-0012	43939-0012	NEMA 24 VDC, 2 mat connectors			
MC6DC-0016	43939-0016	NEMA 24 VDC, 6 mat connectors			

= Highlighted Rapid Delivery products are available for shipment today or within THREE days.

#### Safety Standards and Precautions

A Safety Mat controller is a general purpose, safety mat control device and is not designed for any specific type, model or brand of machine. All safety-related functions of the guarded machine controls including pneumatic, electric, logic or hydraulic controls must be control reliable.

A Safety Mat controller when combined with a four-wire safety mat meets ANSI/RIA R15.06-1999, ANSI B11.19-2003 and the following applicable OSHA standards. When used with mechanical power presses, OSHA standard 1910.217(c) applies. For other applications the requirements of section 1910.212 apply.

Only use a Safety Mat controller and four-wire safety mat system on machinery that stops consistently and immediately anywhere in its cycle or stroke. Never use a Safety Mat controller and four-wire safety mat system on a full-revolution clutched press or machine. Access to the point of operation or hazardous machine area not protected by the Safety Mat controller and four-wire safety mat system must be guarded by fencing, barriers or other appropriate methods.

The purchaser, installer and employer are responsible for meeting all local state and federal government laws, rules, codes or regulations relating to the proper use, installation, operation and maintenance of this control and the guarded machine. See Installation and Operation Manual for details.

All application examples described are for illustration purposes only. Actual installations may differ from those indicated.
