# Large Square-bodied Lighted Pushbutton Switches

- Excellent operating sensitivity.
- Excellent illumination with even surface brightness.
- Three-color models (green, orange, red; chameleon lighting) included in lineup.

Refer to Safety Precautions for All Pushbutton Switches/ Indicators and Safety Precautions on page 22.

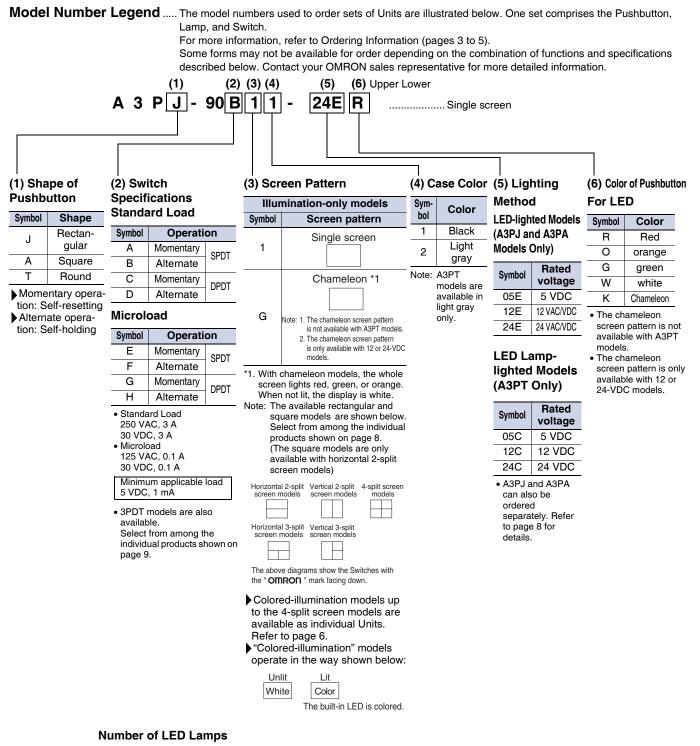

### List of Models

Note: The A3PJ is shown in the figure above as an example.

Specifications: Refer to page 12. Panel cutout: Refer to page 19. Dimensions: Refer to page 16.
 Accessories, replacements, and tools: Refer to pages 10 to 11. Precautions for correct use: Refer to page 22.

### **Model Number Structure**

Individual models: Refer to pages 7 to 11. (The Pushbutton, Lamp, and Switch can be ordered separately.) ■ Specifications: Refer to page 12. ■ Dimensions: Refer to page 16. Accessories: Refer to pages 10 to 11.

### Illumination-only and Colored-illumination LED Models

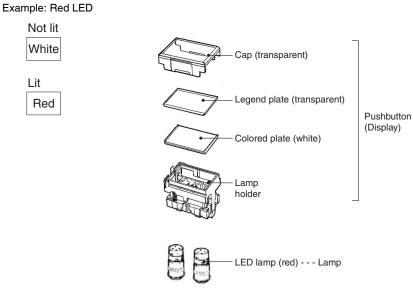

"Illumination only" describes LED models for which the screen color is the same whether the LED is lit or not. The screen simply becomes brighter when the LED lights.

Example: Red LED

Lit

"Colored illumination" describes LED models for which the screen color is white when the LED is not lit and changes to the color of the LED lamp when the LED is lit.

Ordering: With colored-illumination models, order the Pushbutton, Lamp, and Switch as shown in the following table.

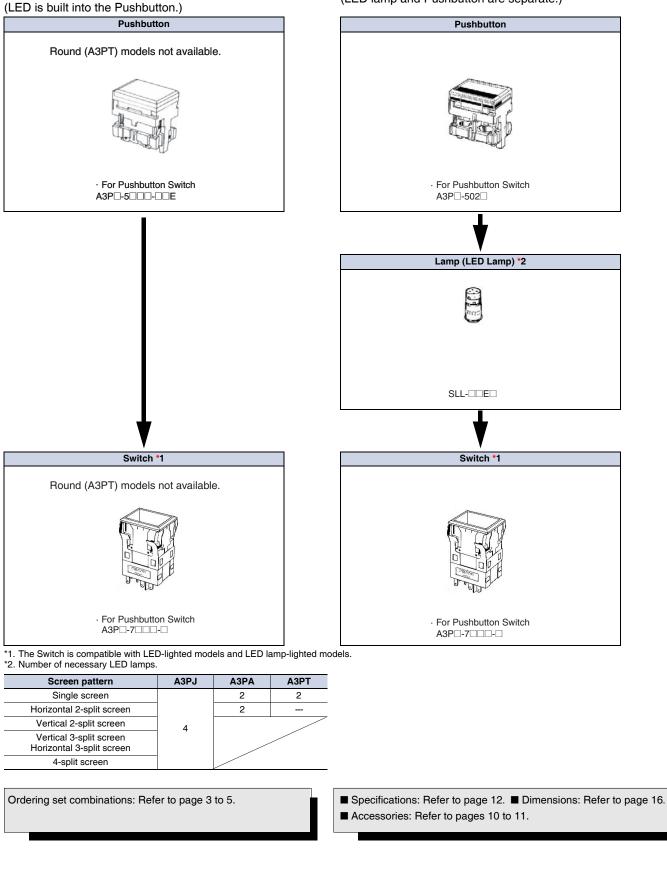

Pushbutton	Lamp	Switch
Select the LED lamp-lighted model required from the selection on page 8. Each assembly includes the number of white colored plates re- quired to enable colored illumination for the corresponding screen-split configuration. For example, 4-split screen models include 4 white colored plates.	Select the LED lamps to suit your desired col- oration from the selection on page 9. Number of necessary LED lamps (standard) A3PJ (rectangular): 4 A3PA (square): 2 A3PT (round): 2	Select from the Switches on page 9.

Ordering Individually ...... Pushbuttons, Lamps, and Switches can be ordered separately. Combinations that are not available as sets can be created using individual Units. Also, store the parts as spares for maintenance and repairs.

### LED-lighted (Single screen models only)/ Chameleon Models

### LED Lamp-lighted Models

(LED lamp and Pushbutton are separate.)

### Ordering Individually ......Pushbuttons, Lamps, and Switches can be ordered separately. Combinations that are not available as

sets can be created using individual Units. Also, store the parts as spares for maintenance and repairs.

### LED-lighted Models (LED is built-in.)

Appearance	Split-screen color (color symbol)				Orange (O)	Selection precautions	
Rectangular models	Single screen		A3PJ-5701 -□□E	A3PJ-5702 -□□E	A3PJ-5703 -□□E	A3PJ-5706 -□□E	<ul> <li>Enter the voltage to be used in the at the end of the model number.</li> <li>Examples of voltages used: 5V=0.5 E</li> </ul>
Square models	Single screen		A3PA-5701 -⊡E	A3PA-5702 -□□E	A3PA-5703 -□□E	A3PA-5706 -□□E	<ul> <li>12V=12 E 24V=2 4 E</li> <li>For the color of the shaded part, select the model ac- cording to the colors given at the top of the table.</li> </ul>

Note: 1. A cap, legend plate (transparent), colored plate, white plunger case, and LED (with a current-limiting resistor) are built into the standard lighting unit.
2. Split-screen coloring configurations are given with the OMRON mark on the Switch facing down.
3. The LED is built-in and cannot be replaced individually.

### LED Lamp-lighted Models (LED is not built-in.)

	Rectangular models		Square mo	odels	Round mo	dels					
Appearance			Ć				Selection precautions		ons	IS	
Screen pattern	Screen	Model	Screen	Model	Screen	Model					
Single screen		A3PJ-5021		A3PA-5021	$\bigcirc$	A3PT-5021	Parts included: Colored plates (white, red, green, and or- ange), a legend plate (transparent), and a light baffle (split-screen models only) are in-				
Horizontal 2- split screen		A3PJ-5022		A3PA-5022 cluded. Use the appropriate combination for the LED coloring required. • The number of white colored plates required to enable colored illumination for the corre- sponding screen-split configuration is include							equired corre-
Vertical 2-split screen		A3PJ-5023					<ul> <li>ed. (For example, 4-split screen models include 4 white colored plates).</li> <li>The number of colored plates included for each model are shown in the following table.</li> </ul>				
Horizontal 3-split	A3						Screen pattern	White	Red	Green	Orange
screen			A3PJ-5024					Single screen	1	1	1
Vertical 3-split		A3PJ-5025					Horizontal 2- split screens Vertical 2-split screens	2	1	1	1
4-split screen		A3PJ-5026					Horizontal 3- split screens Vertical 3-split screens *	3	2	2	2
							4-split screen	4	1	1	1

\* The following types of colored plates are included with Horizontal and Vertical 3-splitScreen Switches.

White: One colored plate for a 2-split screen and two colored plates for a 4-split screen.

Red, green, or orange: One colored plate for a 2-split screen and one colored plates for a 4-split screen.

Ordering set combinations: Refer to page 3 to 5.

Specifications: Refer to page 12. Dimensions: Refer to page 16.
 Accessories: Refer to pages 10 to 11.

### Ordering Individually ...... Pushbuttons, Lamps, and Switches can be ordered separately. Combinations that are not available as

sets can be created using individual Units. Also, store the parts as spares for maintenance and repairs. Pushbutton (For information on mounting of LED lamps, refer to page 23.)

### Chameleon Models (with Built-in LED)

Appearance	Rated voltage	Chameleon pushbutton switch
Rectangular	12 VDC	A3PJ-5800-12E
	24 VDC	A3PJ-5800-24E
Square	12 VDC	A3PA-5800-12E
	24 VDC	A3PA-5800-24E

Note: 1. With chameleon models the whole screen lights red, green, or orange (i.e., red and green simultaneously).

2. A cap, legend plate (transparent), white colored plate, and LED (with a current-limiting resistor) are built into the Pushbutton.

#### LED Lamp

Voltage	5 VDC	12 VDC	24 VDC	Applicable cap (color)	Selection precautions
Color	Model (DC only)	Model (DC only)	Model (DC only)	(colored plate)	Selection precautions
Red	SLL-05ER	SLL-12ER	SLL-24ER	Red	
Yellow	SLL-05EY	SLL-12EY	SLL-24EY	Orange	In the standard setup, 4 LED lamps are used with A3PJ models and 2 LED lamps are
Green	SLL-05EG	SLL-12EG	SLL-24EG	Green	used with A3PA and A3PT models.

Extractor			A3PJ-5080	<ul> <li>Use to extract components when replacing the Pushbutton.</li> <li>You can use the same Sockets for the A3P Ultra Bright Lighted Push- button Switches.</li> </ul>

### Specifications

### **Approved Standard Ratings** UL (File No. E41515), CSA (File No. LR45258)

Standard Load:	5 A at 125 VAC
	3 A at 250 VAC
Microload:	0.1 A at 125 VAC

0.1 A at 30 VDC Note: 1. Certification has been obtained for the Switch Unit. For detailed information on individual products that have received certification, consult your supplier.

2. Only Switch output 1c and 2c are certified.

### CCC (GB14048.5)

Standard Load:	3 A at 250 VAC
	4 A at 30 VDC
Microload:	0.1 A at 125 VAC
	0.1 A at 30 VDC

Note: Only Switch output 1c and 2c are certified.

### Ratings **Contact Ratings**

### Silver Alloy Contacts (for Standard Loads)

Rated	Non-inductive load (A)				Inductive load (A)			
voltage	Resisti	ve load	Lamp load		Inductive load		Motor load	
(V)	NC	NO	NC	NO	NC	NO	NC	NO
125 VAC 250 VAC	5 3		0.7 0.5		3 2		1.3 0.8	
8 VDC 14 VDC 30 VDC 125 VDC 250 VDC		-		53	4 4 3 0.4 0.2		3 3 0.0 0.0	

Note: 1. The above values are for steady-state currents.

- 2. Inductive load: Power factor = 0.4; time constant = 7 ms.
- The lamp load has an inrush current of 10 times the steady-state current.
   The motor load has an inrush current of 6 times the steady-state current.

Standard testing condition

(1) Ambient temperature:  $20 \pm 2^{\circ}C$ 

(1) Ambient temperature: 20 ± 2 °C
(2) Ambient humidity: 65 ± 5%RH
(3) Operating frequency: 20 times/min.

#### **Gold Alloy Contacts (for Microloads)**

	0.1 A at 30 VDC (resistive load); 0.1 A at 125 VAC (resistive load)
Minimum applicable load	1 mA at 5 VDC

### LED Ratings LED for LED-lighted Models Single screen

	Model	A3PJ/M2PJ			A3PA/M2PA		
	Current			Current			
Applied voltage	Rated voltage	Red, white	Orange	Green	Red, white	Orange	Green
5 VDC±5%	5 VDC	Approx. 40 mA	Approx. 20 mA	Approx. 16 mA	Approx. 20 mA	Approx. 10 mA	Approx. 9 mA
12 VAC/VDC ±5%	12 VAC/ VDC	Approx. 20 mA	Approx. 10 mA	Approx. 8 mA	Approx. 10 mA	Approx. 5 mA	Approx. 4 mA
24 VAC/VDC ±5%	24 VAC/ VDC	Approx. 10 mA	Approx. 5 mA	Approx. 4 mA	Approx. 10 mA	Approx. 5 mA	Approx. 4 mA

### LED for Chameleon Models

Applied voltage	Rated voltage	Cur	rent
Applied Voltage	nateu vonage	Green	Red
12 VDC±5%	12 VDC	Approx.26 mA	Approx.20 mA
24 VDC±5%	24 VDC	Approx.13 mA	Approx.10 mA

#### LED Lamp (for LED Lamp-lighted Models)

Туре	Applied voltage	Rated voltage	Current	Model	
DC only	5 VDC±5%	5 VDC	Approx. 30 mA	SLL-05E	
	12 VDC±5%	12 VDC	Approx. 15 mA	SLL-12E	
	24 VDC±5%	24 VDC	Approx. 12.5 mA	SLL-24E	

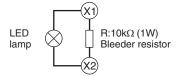

Mis-lighting of the LED

The LED lights with approx. 0.1 mA or less of micro-current. Take a countermeasure like adding a resistor to prevent mis-lighting in parallel to the LED.

The micro-current varies with the machine (leak current or stray capacity between cables, etc.). Select resistance value and allowable power consumption that meet the actual current.

#### (Circuit example)

In case of using 24 VAC/VDC, Direct lighting

### Characteristics

Operating frequency	Mechanical	120 operations/minute max. *1		
operating nequency	Electrical	30 operations/minute max.		
Insulation resistance		100 MΩ min. (at 500 VDC)		
Contact resistance	Standard load	40 mΩ max. (initial value)		
contact resistance	Microload	40 mΩ max. (initial value)		
	Between terminals of same polarity	1,000 VAC, 50/60 Hz for 1 minute *2		
	Between terminals of different polarity	2,000 VAC, 50/60 Hz for 1 minute		
Dielectric strength	Between current-carrying metal part and ground	2,000 VAC, 50/60 Hz for 1 minute		
Biologino onongin	Between each terminal and non-current-carrying metal part	2,000 VAC, 50/60 Hz for 1 minute		
	Between lamp terminals	1,000 VAC, 50/60 Hz for 1 minute *3		
Vibration resistance	Malfunction	10 to 55 Hz, 1.5 mm double amplitude (1 ms max.)		
Shock resistance	Destruction	500 m/s <sup>2</sup> max.		
Shock resistance	Malfunction	200 m/s <sup>2</sup> max. (1 ms max.)		
Life expectancy	Mechanical	Momentary operation models: 1,000,000 operations min. Alternate operation models: 200,000 operations min. (One operation consists of set and reset operations.)		
	Electrical	100,000 operations min.		
Weight		Approx. 30 g		
Inrush current	NC	Silver contact: 10 A max.		
inrush current	NO	Silver contact: 10 A max.		
Ambient operating temperature	•	LED-lighted models: -10°C to 40°C (with no icing or condensation)		
Ambient operating humidity		35% to 85%RH		
Ambient storage temperature		-25°C to 65°C		
Degree of protection		IP40		
Electric shock protection class		Class II		
PTI (proof tracking index)		175		
Pollution degree		3 (IEC947-5-1)		

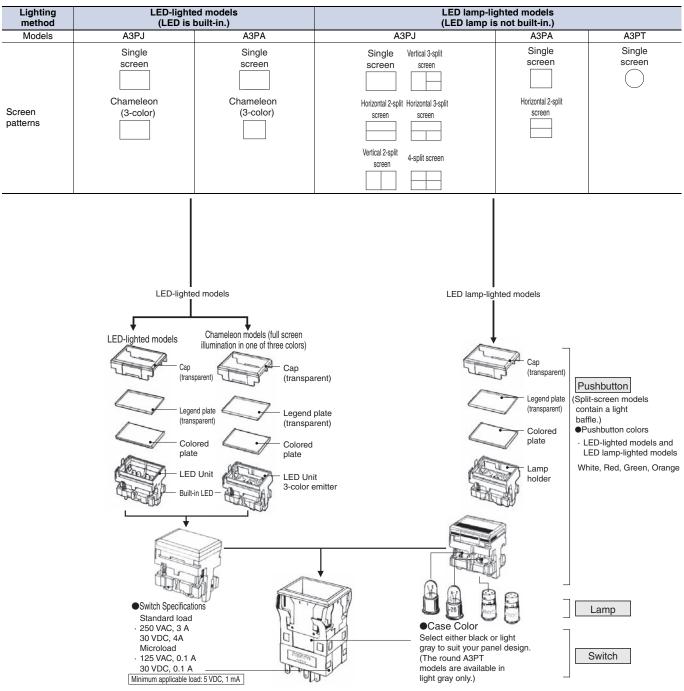

\*1. With alternate operation models, 60 operations/minute max. One operation cycle consists of set and reset operations.
\*2. 600 VAC for microloads.
\*3. With no LED lamp mounted.

### **Operating Characteristics**

	Model	A3PJ series		A3PA series		A3PT series	
Operating Characteristics		Momentary operation models	Alternate operation models	Momentary operation models	Alternate operation models	Momentary operation models	Alternate operation models
Operating force	OF max.	5.88 N	6.86 N	5.88 N	6.86 N	3.92 N	4.90 N
Releasing force	RF min.	0.39 N	0.29 N	0.39 N	0.29 N	0.39 N	0.29 N
Total travel	Π	Approx. 3.5 mm					
Pretravel	PT max.	3 mm					
Lock travel alternate	LTA min.		0.5 mm		0.5 mm		0.5 mm

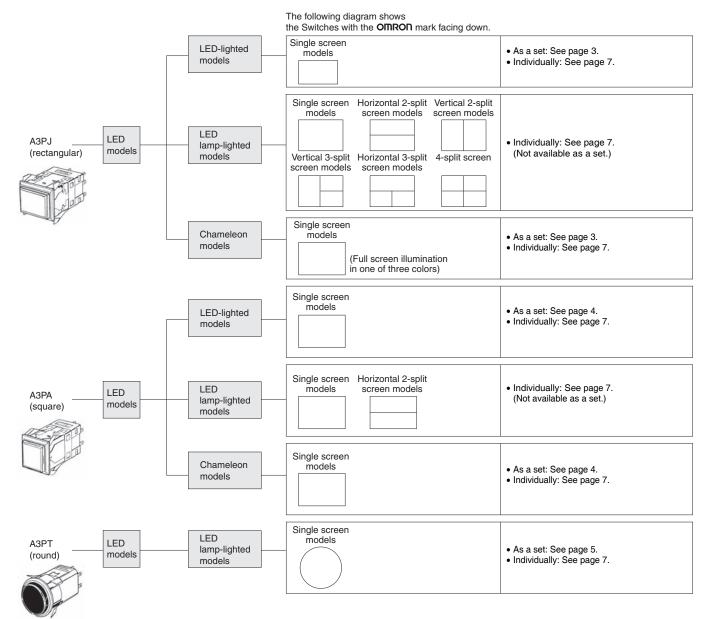

### Nomenclature

### **Model Structure**

### Nomenclature

### A3P Lighting Method Diagram

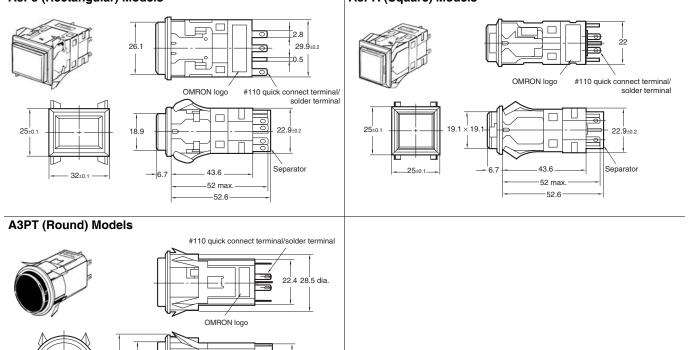

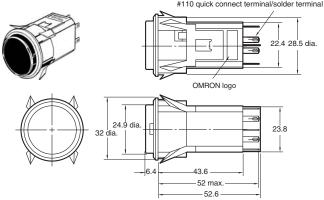

(Unit: mm)

### Dimensions The Dimension shows switch output 2c.

### A3PJ (Rectangular) Models

### A3PA (Square) Models

Note: The thickness of tab terminals #110 and solder terminals is 0.5 mm.

### **Terminal connections**

### LED-lighted Models

(The terminal arrangement diagram shows switch output 1c. Connections to terminals from the lighting block are the same for switch output 2c.)

Model	Rated voltage Screen pattern	5 VDC	12 VAC/VDC	24 VAC/VDC

# Terminal Arrangement and Coloring Chameleon Models

	LC+	LC+	LC+
Wiring	L1–	L2-	L1– and L2– shorted
Coloring	Green	Red	Orange

Panel Cutout (If using a Switch Guard or Seal Cover, refer to the panel cutout diagrams on page 21.) A3PJ (Rectangular) Models

Note: 1. n: Number of Units

2. Recommended panel thickness: 1 to 5 mm

3. Mount the panel before mounting the Switch Guard.

4. If the panel is to be finished (e.g., coated), make sure that the panel meets the specified dimensions after the coating.

#### A3PA (Square) Models

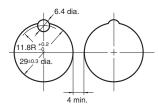

Clas	ssification	Mounting design	Panel cutout	Remarks	
Flange mount models	Individual mounting	25±0.1	23.5±0.3	Panel cutout spacing between rows of Units:	
	Multiple mounting		23.5±0.3	6 min. +	
Barrier mount models	Individual mounting	27	23.5±0.3 27.8±0.3	Panel cutout spacing between rows of Units: (Dotted line indicates the position of each mounting barrier.) 1.3 <u>1.3 6 min</u> .	
	Multiple mounting	27 1 2 n 26n+6.5±1	23.5±0.3	6 min.	

Note: 1. n: Number of Units

2. Recommended panel thickness: 1 to 5 mm

Mount the panel before mounting the Switch Guard.
 If the panel is to be finished (e.g., coated), make sure that the panel meets the specified dimensions after the coating.

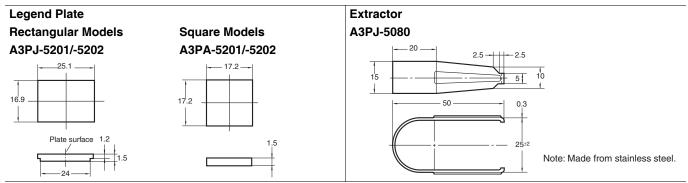

### A3PT (Round) Models

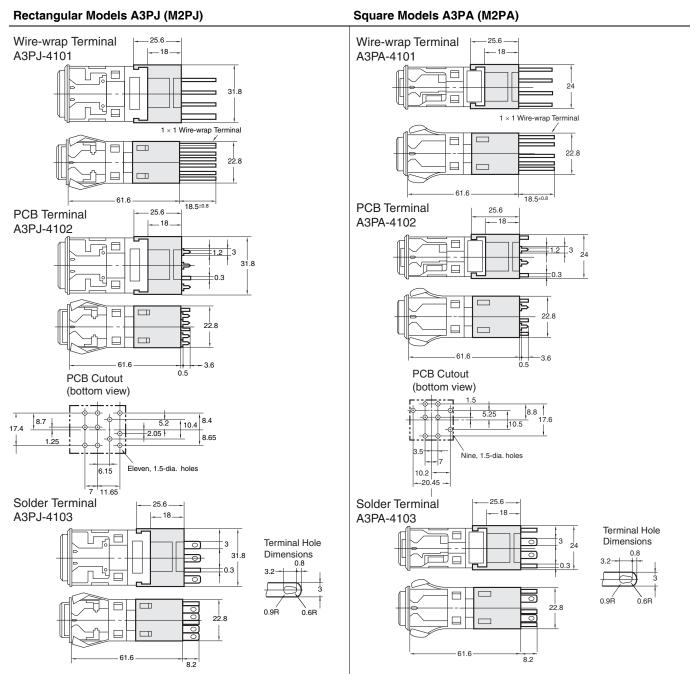

Note: 1. Recommended panel thickness: 1 to 5 mm

2. If the panel is to be finished (e.g., coated), make sure that the panel meets the specified dimensions after the coating.

### **Accessory Mounting Dimensions**

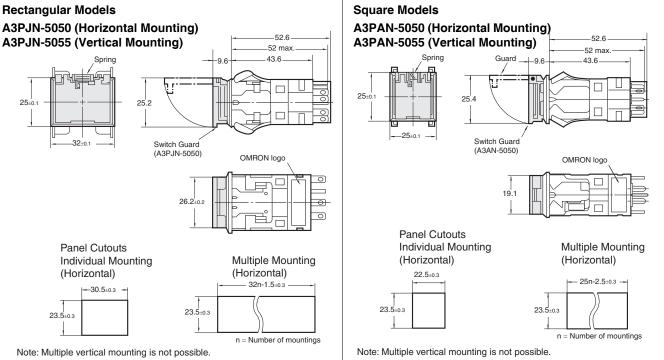

### **Socket-mounting Dimensions**

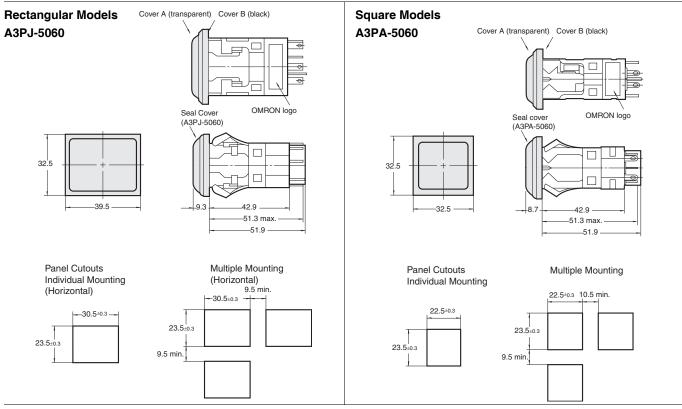

Note: PCB cutout dimensions show the switch mounted to the socket with the OMRON logo facing down.

### **Seal Cover Mounting Dimensions**

Note: 1. Recommended panel thickness: 1 to 5 mm

2. Unless otherwise specified, a tolerance of  $\pm$  0.4 mm applies to all dimensions.

### Refer to Safety Precautions for all Pushbutton Switches/Indicators.

### Caution

Do not apply a voltage higher than the maximum rated operating voltage between the lamp terminals, as there is a risk that LED will be damaged, and the Pushbutton will be ejected.

### Precautions for Correct Use

- Always make sure that the power is turned OFF before mounting, removing, or wiring the Switch, or performing maintenance. Electric shock or fire may occur.
- 2. After wiring the Switch, make sure that there is a suitable isolation distance.

#### Wiring

• Solder quickly and correctly at 350°C max and for 3 s or less. Wait for one minute after soldering before exerting any external force on the solder.

### **Operating Environment**

 Do not use in locations that are subject to dust, oil, or metal filings as these may penetrate the interior of the Switch and cause malfunction.

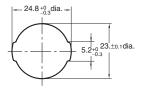

#### LED (for VDC)

- Check the terminal polarity when wiring.
- The rated voltage is shown on the plate on the back of the lighting unit, so be sure to use within the voltage shown.
- An LED current-limiting resistor is built in, so there is no need to mount an external resistor.

### Character Plate (Character Film)

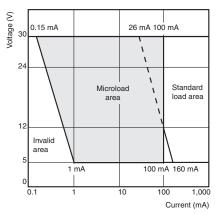

• If preparing the character plate separately, use a heat-resistant film with a thickness of 0.1 to 0.3 mm.

### **Using Microloads**

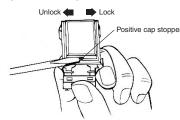

• Using a standard load switch when a microload circuit is opened or closed may cause contact failure on the contacts. Use the switch within the operating range. (Refer to the diagram below.) Even when using microload models within the operating range shown below, if inrush current occurs when the contact is opened or closed, it may cause the contact surface to become rough, and so decrease life expectancy. Therefore, insert a contact protection circuit where necessary. The minimum applicable load is the N-level reference value. This value indicates the malfunction reference level for the reliability level of 60% ( $\lambda$  60) (conforming to JIS C5003). The equation,  $\lambda$  60 = 0.5 x 10<sup>-6</sup>/time indicates that the estimated malfunction rate is less than 1/2,000,000 with a reliability level of 60%.

#### Others

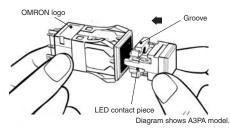

• If the panel is to be finished (e.g., coated), make sure that the panel meets the specified dimensions after the coating.

### Assembly/Disassembly A3PJ/M2PJ (Rectangular Models), A3PA/M2PA (Square Models) Locking/Unlocking Positive Cap Lock Mechanism M

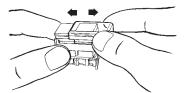

#### Mounting Pushbutton

- Be sure to mount the Pushbutton with the correct orientation. Align the groove on the Pushbutton, the projections in the Switch, and the LED contact piece before pushing the Pushbutton into the Switch.
- When dismounting the Pushbutton, use the Extractor (A3PJ-5080) for easy dismounting.

### **Removing/Mounting Cap**

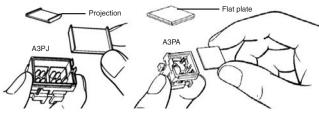

Insert the A3PA from the open side into the theft-prevention stopper.

### Mounting Colored Plate

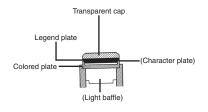

Place the colored plate on the plunger case with the dull side of the colored plate facing downward.

With A3PJ split-screen models, be sure that the projections on the upper surface of the colored plate face outward. For the A3PA, make sure that the flat plate is facing upwards.

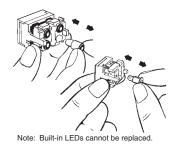

# Mounting Character Plate (Character Frame) and Legend Plate

Mount the legend plate for the A3PJ under the layered surfaces and mount the cap, as shown below.

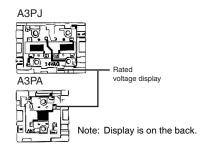

#### Mounting and Replacing LED Lamps

If using a square model with one LED lamp, insert the lamp in the center hole.

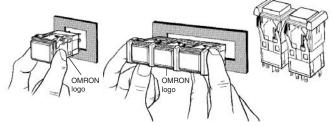

#### LED Rated Voltage Display (LED Models Only)

The LED rated voltage is shown between the built-in resistors on the back of the lighting unit. Use within a range of  $\pm$  5%.

### Mounting Switch onto Panel

- Individual Mounting and Barrier Mounting When mounting the Switch, push it into the panel cutout from the front of the mounting panel by holding it with the logo mark
   "OMRON" facing downward.
- Multiple Barrier Mounting (A3PJ) When mounting a number of Switches in line on the panel, link the Switches with spacing barriers in between, attach mounting barriers at both sides of this block of Switches and, pushing in on the mounting barriers at the side, insert the Switches into the panel cutout together.

#### Mounting Barriers

Mount each part by pushing it in the direction of the arrow shown in the corresponding illustration below.

#### **Mounting Seal Cover**

After mounting the seal cover onto the flange of the Switch, push the Switch into the panel cutout.

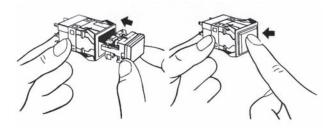

#### Inscribing the Legend Plate

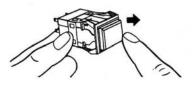

- Inscribe the legend plate to a depth of 0.5 mm max.
- The legend plate is made from polycarbonate resin. To coat the legend plate, use an alcohol-based coating such as melamine, phthalic acid, or acrylic.

#### Maintenance Lock

 First, when you insert the transparent lens while pressing the center, the maintenance lock mechanism will be activated, and the Switch will not operate. Lamp replacement and other maintenance can be performed without turning OFF the power supply to devices and equipment. Use an insertion force of 4 kg.

2. Next, when you remove your finger from the Switch, the lock will be released.

3. The Switch will start to operate when the lighting unit is pressed the second time.

Read and understand this catalog.

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

Warranties.

(a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.

(b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE

PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.

Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warrantv.

See http://www.omron.com/global/ or contact your Omron representative for published information.

### Limitation on Liability; Etc.

OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.

Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

#### Suitability of Use.

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

#### Programmable Products.

Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

#### Performance Data.

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

#### Change in Specifications.

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

Errors and Omissions. Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.

In the interest of product improvement, specifications are subject to change without notice.
