Subminiature Basic Switch

## Subminiature Switch with Superb Flux Resistance

- One-piece terminal construction to keep out flux.
- High operating-position accuracy ( $\pm 0.25 \mathrm{~mm}$ ) enables easy peripheral design and positioning. Use of pin plunger also allows horizontal operation.

## RoHS Compliant

## Precautions

غ Please refer to "Basic Switches Common Precautions" for correct use.
Cautions

## -Soldering

When using automatic soldering baths, we recommend soldering at $260 \pm 5^{\circ} \mathrm{C}$ within 5 seconds. Make sure that the liquid surface of the solder does not flow over the edge of the board.
When soldering terminals manually, complete the soldering at the iron tip temperature between 350 to $400^{\circ} \mathrm{C}$ within 3 seconds, and do not apply any external force for 1 minute after soldering. When applying solder, keep the solder away from the case of the Switch and do not allow solder or flux to flow into the case.

## Correct Use

- Mounting

Use M2.3 mounting screw with plane washers or spring washers to securely mount the Switch. Tighten the screws to a torque of 0.23 to $0.26 \mathrm{~N} \cdot \mathrm{~m}\{2.3$ to $2.7 \mathrm{kgf} \cdot \mathrm{cm}\}$.

## -Using Micro Loads

Using a model for ordinary loads to open or close the contact of a micro load circuit may result in faulty contact. Use models that operate in the following range. However, even when using micro load models within the following operating range, if inrush current occurs when the contact is opened or closed, it may increase the contact wear and so decrease durability. Therefore, insert a contact protection circuit where necessary. The N-level reference value applies for the minimum applicable load. This value indicates the malfunction reference level for the reliability level of $60 \%$ ( $\lambda_{60}$ ).
(JIS C5003)
The equation, $\lambda_{60}=0.5 \times 10^{-6} /$ operations indicates that the estimated malfunction rate is less than $\frac{1}{2,000,000}$ operations with a reliability level of $60 \%$.
