Safety-door Switch

CSM\_D4NS\_DS\_E\_5\_

# Multi-contact, Labor-saving, Environment-friendly, Next-generation Safety-door Switch

- Lineup includes three contact models with 2NC/1NO and 3NC contact forms and MBB models in addition to the previous contact forms 1NC/1NO, and 2NC.
- M12-connector models are available, saving on labor and simplifying replacement.
- Standardized gold-clad contacts provide high contact reliability.

Applicable to both standard loads and microloads.

• Variety of metallic heads available.

Be sure to read the *"Safety Precautions"* on page 10 and the *"Precautions for All Safety Door Switches"*.

# Model Number Structure

## Model Number Legend

## Switch

B:2NC (slow-action) C:2NC/1NO (slow-action) D:3NC (slow-action) E:1NC/1NO (MBB contact) F:2NC/1NO (MBB contact)

## 3. Head Mounting Direction

F:Four mounting directions possible (Front-side mounting at shipping)/plastic

- D:Four mounting directions possible (Front-side mounting at shipping)/metal
- **Note:** An order for the head part or the switch part alone cannot be accepted. (The Operation Key is sold separately.)

### **Operation Key**

- 1. Operation Key Type
  - 1:Horizontal mounting 2:Vertical mounting
  - 2: Vertical mounting
  - 3:Adjustable mounting (Horizontal) 5:Adjustable mounting (Horizontal/Vertical)

: Models with certified direct opening contacts.

# **Ordering Information**

## Switches (Operation Keys are sold separately.)

Consult with your OMRON representative when ordering any models that are not listed in this table.

| Туре                       | Contact         | configuration | Conduit opening/Connector                         | Model      |

| onduit, with               | Slow-action     | 2NC           |   | D4NS-9BF   |
| -Conduit, with<br>onnector | 1               |               | M12 connector                                     | -          |

Note: 1. The recommended models for equipment and machinery being exported to Europe are those with an M20 or Pg13.5 conduit sizes, and for North America, the recommended models are those with a 1/2-14NPT conduit sizes.

2. Resin is used as the material for the D4NS housing and head. Use the metal D4BS Safety-door Switch for applications requiring greater mechanical strength.

\* Models with Korean S-mark certification.

# Specifications

# Standards and EC Directives

## Conforms to the following EC Directives:

- Machinery Directive
- Low Voltage Directive
- EN50047
- EN60204-1
- EN1088
- GS-ET-15

## **Certified Standards**

| Certification body | Standard                                  | File No.   |  |
|--------------------|---|--|--|
| TÜV SÜD            | EN60947-5-1<br>(certified direct opening) | Consult your<br>OMRON representative<br>for details. |  |
| UL *1              | UL508, CSA C22.2 No.14                    | E76675   |  |
| CQC (CCC)          | GB14048.5                                 | 2003010305077330                                     |  |
| KOSHA *2           | EN60947-5-1                               | 2005-197   |  |

**\*1.** Certification for CSA C22.2 No. 14 is authorized by the UL mark. **\*2.** Only certain models have been certified.

## **Certified Standard Ratings**

## TÜV (EN60947-5-1), CCC (GB14048.5)

| Item Utilization category    | AC-15 | DC-13  |
|------------------------------|-------|--------|
| Rated operating current (le) | 3 A   | 0.27 A |
| Rated operating voltage (Ue) | 240 V | 250 V  |

Note: Use a 10 A fuse type gI or gG that conforms to IEC60269 as a short-circuit protection device. This fuse is not built into the Switch.

## UL/CSA (UL508, CSA C22.2 No. 14)

## A300

| Rated   | Carry current | Current (A) |       | Volt-amperes (VA) |       |
|---------|---------------|-------------|-------|-------------------|-------|
| voltage | Carry current | Make        | Break | Make              | Break |
| 120 VAC | 10 A          | 60          | 6     | 7.200             | 720   |
| 240 VAC | 10 A          | 30          | 3     | 7,200             | 720   |

## Q300

| Rated   | Carry current | Current (A) |       | Volt-amperes (VA) |       |
|---------|---------------|-------------|-------|-------------------|-------|
| voltage | Carry current | Make        | Break | Make              | Break |
| 125 VDC | 2.5 A         | 0.55        | 0.55  | 69                | 69    |
| 250 VDC | 2.5 A         | 0.27        | 0.27  | 69                | 69    |

## **Characteristics**

| Vibration resistance                     | Malfunction   | 10 to 55 Hz, 0.75 mm single amplitude                      |  |  |
| Shock resistance                         | Destruction   | 1,000 m/s <sup>2</sup> min.                                |  |  |
|  | Malfunction   | 300 m/s <sup>2</sup> min.                                  |  |  |
| Conditional short-circ                   | cuit current  | 100 A (EN60947-5-1)  |  |  |
| Conventional free air                    | thermal current (Ith)   | 10 A (EN60947-5-1)   |  |  |
| Ambient operating te                     | mperature   | -30 to 70°C (with no icing)                                |  |  |
| Ambient operating hu                     | umidity   | 95% max.   |  |  |
| Weight                                   |   | Approx. 96 g (D4NS-1CF)                                    |  |  |
|  |   |  |  |  |

Note: 1. The above values are initial values.

2. The Switch contacts can be used with either standard loads or microloads. Once the contacts have been used to switch a load, however, they cannot be used to switch smaller loads. The contact surfaces will become rough once they have been used and contact reliability for smaller loads may be reduced.

\*1. The degree of protection is tested using the method specified by the standard (EN60947-5-1). Confirm that sealing properties are sufficient for the operating conditions and environment beforehand. Although the switch box is protected from dust or water penetration, do not use the D4NS in places where foreign material may enter through the key hole on the head, otherwise Switch damage or malfunctioning may occur.

\*2. The durability is for an ambient temperature of 5 to 35°C and an ambient humidity of 40% to 70%. For more details, consult your

OMRON representative. **\*3.** Do not pass the 3 A, 250 VAC load through more than 2 circuits.

**\*4.** These figures are minimum requirements for safe operation.

\*5. This value will vary with the switching frequency, environment, and reliability level. Confirm that correct operation is possible with the actual load beforehand.

## **Structure and Nomenclature**

## Structure

## D4NS-OAO, D4NS-OBO, D4NS-OEO

Note: The 2-conduit models have the same terminal arrangement.

## **Contact Form**

Diagrams Show State with Key Inserted.

| * Always maintain the above operating characteristic |  |  |  |  |

cs

## **1-Conduit Connector Models**

Operating characteristics Model D4NS-9□F Key insertion force 15 N max. Key extraction force 30 N max. Pretravel (PT) 6±3 mm Total travel (TT) (28 mm) Direct opening force \* Direct opening stroke \* 60 N min. 10 mm min

\* Always maintain the above operating characteristics for safe use.

Note: 1. Unless otherwise specified, a tolerance of  $\pm 0.4$  mm applies to all dimensions.

2. There are fluctuations in the contact ON/OFF timing for Switches with multiple poles (2NC, 2NC/1NO, or 3NC). Confirm performance before application.

Note: Unless otherwise specified, a tolerance of  $\pm 0.4$  mm applies to all dimensions.

## With Operation Key Inserted (Relationship between Insertion Radius and Key Hole)

Note: Unless otherwise specified, a tolerance of ±0.4 mm applies to all dimensions.

Note: Unless otherwise specified, a tolerance of  $\pm 0.4$  mm applies to all dimensions.

# **Safety Precautions**

Electric shock may occasionally occur.

Do not use metal connectors or metal conduits.

## Refer to the "Precautions for All Switches" and "Precautions for All Safety Door Switches".

## 

Â

## **Precautions for Safe Use**

- Do not use the Switch submersed in oil or water or in locations continuously subject to splashes of oil or water. Doing so may result in oil or water entering the Switch. (The IP67 degree of protection of the Switch specifies the amount of water penetration after the Switch is submerged in water for a certain period of time.)
- Always attach the cover after completing wiring and before using the Switch. Also, do not turn ON the Switch with the cover open. Doing so may result in electric shock.
- Do not switch circuits for two or more standard loads (250 VAC, 3 A). Doing so may adversely affect insulation performance.

## **Stopper Installation**

Do not use a Switch as a stopper. Be sure to install a stopper as shown in the following illustration to ensure that the base of the Operation Key does not strike the Head, and adjust the stopper to be within the setting zone (0.5 to 3 mm) of the base of the Operation Key. Do not subject the Switch to a shock that exceeds the Switch's shock resistance of 1,000 m/s<sup>2</sup>.

### Precautions for Correct Use

The Switch contacts can be used with either standard loads or microloads. Once the contacts have been used to switch a load, however, they cannot be used to switch smaller loads. The contact surfaces will become rough once they have been used and contact reliability for smaller loads may be reduced.

## **Mounting Method**

### Appropriate Tightening Torque

• Loose screws may result in malfunction. Tighten the screws to the specified torques.

| Terminal screw                       | 0.6 to 0.8 N⋅m                    |
|--------------------------------------|-----------------------------------|
| Cover mounting screw                 | 0.5 to 0.7 N⋅m                    |
| Head mounting screw                  | 0.5 to 0.6 N⋅m                    |
| Operation Key mounting screw         | 2.4 to 2.8 N·m                    |
| Body mounting screw                  | 0.5 to 0.7 N⋅m                    |
| One was the stand M10 and a standard | 1.8 to 2.2 N·m (except 1/2-14NPT) |
| Connector and M12 adaptor            | 1.4 to 1.8 N·m (1/2-14NPT)        |
| Cap screw                            | 1.3 to 1.7 N·m                    |

• When loosening a screw with an electrical screwdriver or similar tool while pressing down on the screw head, do not continue turning the screw past the point where the threads disengage. Doing so may strip the end of the threads.

#### **Mounting Holes**

- Use M4 screws and spring washers to mount the Switch and Operation Key, and tighten the screws to a suitable torque. To ensure safety, use screws that cannot be easily removed or another means to prevent the Switch and Operation Key from easily being removed.
- As shown below, two studs with a maximum height of 4.8 mm and a diameter of 4<sup>-0.05</sup><sub>-0.15</sub> mm can be provided, the studs inserted into the holes on the bottom of the Switch, and the Switch secured at four locations to increase the mounting strength.

#### Switch Mounting Holes and Studs • 1-Conduit Modules • Horizontal/Vertical Mounting

 Horizontal/Vertical Mounting (D4DS-K1/-K2)

wo, M4

2-Conduit Modules

 Horizontal/Vertical Adjustable Mounting (D4DS-K5)

 Set the Operation Key so that it is within 1 mm of the center of the key hole. If the Operation Key is offset or at an angle, accelerated wear or breaking may result.

• Observe the specified insertion radius for the Operation Key and insert it in a direction perpendicular to the key hole.

#### **Head Direction**

- The rotation of the Switch head may be adjusted to any of the four directions by loosening the head mounting screws at the four corners of the head. Make sure that no foreign materials enter through the head.
- Do not insert or remove the Operation Key with the Switch head removed. Doing so may make it impossible to insert the Operation Key.

#### Securing the Door

When the door is closed (with the Operation Key inserted), the Operation Key may exceed the set zone because of, for example, the door's own weight, machine vibration, or the door cushion rubber. Secure the door with a stopper so that the Operation Key remains within the set zone.

### Wiring Wiring

• When connecting with insulation tubes and M3.5 crimp terminals, connect the terminals as shown in the following figure and wire without overriding to the case and the cover. Adequate conductor size is AWG 20 to AWG18 (0.5 to 0.75 mm<sup>2</sup>). Prepare lead wires using the lengths given in the following diagrams. If lead wires are too long, they will press against the

cover causing the cover to not close properly.

2-Conduit Models with 3 Poles

- · Do not push the crimp terminal and the likes into the opening between the parts to prevent the case from being broken and deformed.
- Use terminals having the thickness of 0.5 mm or less to avoid the contact between the terminal and the Switch case inside.

#### <Reference>

The crimp terminals listed below have a thickness of 0.5 mm or less.

### **Contact Arrangement**

• The contact arrangements are shown below.

2 4

3

D4NS-9EF (1NC/1NO (MBB)) Zb — 2 (12) → 3 (33) --4 (34) Pin No. (Terminal No.)

• Suitable socket is XS2F-D421 series (OMRON).

- 2 (12) 🕀

4 (32) 🔿

1

3 (31)

Refer to the Connector Catalog for corresponding Socket pin numbers and lead wire colors.

#### Socket Tightening (Models with Connectors)

- Turn the tightening screws on the Socket by hand and tighten them until the gap between the Socket and Plug essentially disappears.
- Make sure that the Socket's connector is tightened securely, otherwise the rated degree of protection (IP67) of the D4NS may not be maintained, or the Socket connector may be loosened by vibration.

#### **Conduit Opening**

- When using 1/2-14NPT conduits, apply sealing tape between the connector and conduit opening to maintain the degree of protection (IP67) of the Switch.
- Use cables with suitable diameters for the connector being used.
- · When wiring, place the enclosed cap screw on unused conduit openings (for 2-Conduit Switches) and tighten them to the suitable tightening torque.

### **Recommended Connectors**

Use the connector with thread section of 9 mm long or less. If a connector with a longer thread section is used, the protruding part may interfere with the other parts inside the body. Use the connectors listed below to ensure IP67 degree of protection.

| Size          | Manufacture | Model                     | Applicable cable<br>diameter |
|---------------|-------------|---------------------------|------------------------------|
| G1/2          | LAPP        | ST-PF1/2<br>5380-1002     | 6.0 to 12.0 mm               |
| Pg13.5        | LAPP        | S-13.5<br>5301-5030       | 6.0 to 12.0 mm               |
| M20           | LAPP        | ST-M20 × 1.5<br>5311-1020 | 7.0 to 13.0 mm               |
| 1/2-<br>14NPT | LAPP        | ST-NPT1/2<br>5301-6030    | 6.0 to 12.0 mm               |

When use LAPP's products, use together with a Seal Packing which is sold separately (Type names, JPK-16, GP-13.5, or GPM20) and tighten with proper tightening torque.

- LAPP is a German manufacturer.
- Before using a 2-conduit type 1/2-14NPT connector, attach the enclosed adapter to the Switch, and used the above connector.

# **Production Discontinuation**

Following the release of the D4NS, production of the D4DS was discontinued.

## **Date of Production Discontinuation**

Production of the D4DS Series was discontinued as of the end of March 2006.

## **Recommended Substitute Product**

Sale of the D4NS Series commenced in July 2003.

## **Product Substitution**

1. Dimensions

The D4DS and D4NS have basically the same structure, and use the same mounting method, Operation Keys, mounting hole and Operation Key insertion positions. The multi-contact structure and the extra 4 mm in length, however, are different.

- 2. Terminal Numbers
- For the 2-contact model, the terminals 21, 22, 23, and 24 on the D4DS are 31, 32, 33, and 34 on the D4NS.
- 3. Recommended Terminals

If the recommended terminals are not used, the Switch may not be compatible. Make sure that the Switch is compatible with the terminals.

## **Comparison with Discontinued Products**

| Model                     | D4NS-                   |
|---------------------------|-------------------------|
| Switch color              | Very similar            |
| Dimensions                | Very similar            |
| Wiring/connection         | Significantly different |
| Mounting method           | Completely compatible   |
| Ratings/performance       | Very similar            |
| Operating characteristics | Very similar            |
| Operating method          | Completely compatible   |

## **Dimensions (Unit: mm)**

## Discontinued Products and Recommended Substitute Products

## Switch

| Discontinued Product | Recommended Substitute Product |

#### **Read and Understand This Catalog**

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

#### Warranty and Limitations of Liability

#### WARRANTY

OMRON's exclusive warranty is that the products are free from defects in materials and workmanship for a period of one year (or other period if specified) from date of sale by OMRON.

OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, REGARDING NON-INFRINGEMENT, MERCHANTABILITY, OR FITNESS FOR PARTICULAR PURPOSE OF THE PRODUCTS. ANY BUYER OR USER ACKNOWLEDGES THAT THE BUYER OR USER ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE. OMRON DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED.

#### LIMITATIONS OF LIABILITY

OMRON SHALL NOT BE RESPONSIBLE FOR SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED ON CONTRACT, WARRANTY, NEGLIGENCE, OR STRICT LIABILITY.

In no event shall the responsibility of OMRON for any act exceed the individual price of the product on which liability is asserted.

IN NO EVENT SHALL OMRON BE RESPONSIBLE FOR WARRANTY, REPAIR, OR OTHER CLAIMS REGARDING THE PRODUCTS UNLESS OMRON'S ANALYSIS CONFIRMS THAT THE PRODUCTS WERE PROPERLY HANDLED, STORED, INSTALLED, AND MAINTAINED AND NOT SUBJECT TO CONTAMINATION, ABUSE, MISUSE, OR INAPPROPRIATE MODIFICATION OR REPAIR.

#### **Application Considerations**

#### SUITABILITY FOR USE

OMRON shall not be responsible for conformity with any standards, codes, or regulations that apply to the combination of products in the customer's application or use of the products.

At the customer's request, OMRON will provide applicable third party certification documents identifying ratings and limitations of use that apply to the products. This information by itself is not sufficient for a complete determination of the suitability of the products in combination with the end product, machine, system, or other application or use.

The following are some examples of applications for which particular attention must be given. This is not intended to be an exhaustive list of all possible uses of the products, nor is it intended to imply that the uses listed may be suitable for the products:

- Outdoor use, uses involving potential chemical contamination or electrical interference, or conditions or uses not described in this catalog.
- Nuclear energy control systems, combustion systems, railroad systems, aviation systems, medical equipment, amusement machines, vehicles, safety equipment, and installations subject to separate industry or government regulations.
- Systems, machines, and equipment that could present a risk to life or property.

Please know and observe all prohibitions of use applicable to the products.

NEVER USE THE PRODUCTS FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCTS ARE PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

#### PROGRAMMABLE PRODUCTS

OMRON shall not be responsible for the user's programming of a programmable product, or any consequence thereof.

#### Disclaimers

#### CHANGE IN SPECIFICATIONS

Product specifications and accessories may be changed at any time based on improvements and other reasons.

It is our practice to change model numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the products may be changed without any notice. When in doubt, special model numbers may be assigned to fix or establish key specifications for your application on your request. Please consult with your OMRON representative at any time to confirm actual specifications of purchased products.

#### DIMENSIONS AND WEIGHTS

Dimensions and weights are nominal and are not to be used for manufacturing purposes, even when tolerances are shown.

#### PERFORMANCE DATA

Performance data given in this catalog is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of OMRON's test conditions, and the users must correlate it to actual application requirements. Actual performance is subject to the OMRON Warranty and Limitations of Liability.

#### ERRORS AND OMISSIONS

The information in this document has been carefully checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical, or proofreading errors, or omissions.

2009.8
