*3. The maximum electrical response speed is determined by the resolution and maximum response frequency as follows:

Maximum electrical response speed (rpm) = <u>
Maximum response frequency</u> <u>
Resolution</u> × 60

Resolution

* This means that the Rotary Encoder will not operate electrically if its speed exceeds the maximum electrical response speed.

🔥 WARNING

This product is not designed or rated for ensuring safety of persons either directly or indirectly. Do not use it for such purposes.

Precautions for Correct Use

Do not use the Encoder under ambient conditions that exceed the ratings.

Adjustment

Reading the Output Code

Read the code after the LSB (output 2°) of the code changes for the E6F-AB3C and E6F-AB3C-C.

• Wiring

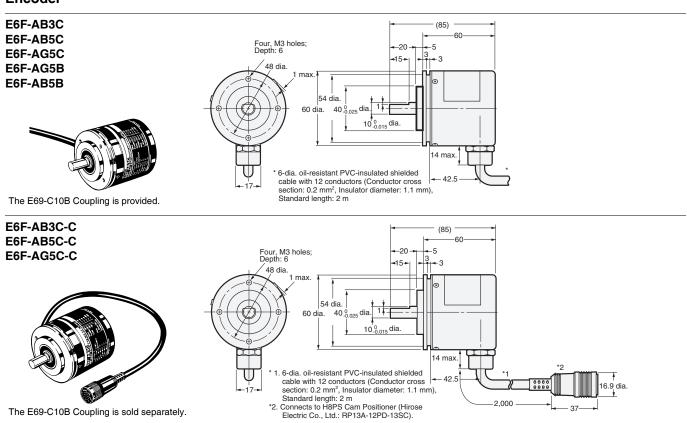

Spurious pulses may be generated when power is turned ON and OFF. Wait at least 0.1 s after turning ON the power to the Encoder before using the connected device, and stop using the connected device at least 0.1 s before turning OFF the power to the Encoder. Also, turn ON the power to the load only after turning ON the power to the Encoder.
