

Multiple I/O is a Configurable I/O System that Allows Field-Based I/O Devices to Communicate to a DeviceNet Master. All I/O Modules Interface to DeviceNet via the Communications Unit.

- Accommodates up to 8 I/O Modules and configures up to 256 local I/O with a single node address
- Flexible I/O options allow users to choose 8-, 16- and 32-point densities in both NPN and PNP types
- Mix and match 8-point analog inputs or 4-point analog outputs with discrete I/O
- Easy set-up of node address and baud rate through dip switches
- Use Omron's DeviceNet Configuration Tool to configure and maintain your complete network

Ordering Information

Item	Part number
Multiple I/O Communications Unit	DRT1-COM
16 point terminal block-type digital NPN input	GT1-ID16
16 point terminal block-type digital NPN output	GT1-OD16
16 point terminal connector-type NPN digital input	GT1-ID16MX
16 point terminal connector-type NPN digital output	GT1-OD16MX
32 point terminal connector-type NPN digital input	GT1-ID32ML
32 point terminal connector-type NPN digital output	GT1-OD32ML
8 point relay output	GT1-ROP08
1 m I/O connecting cable	GCN1-100
16 point terminal block-type digital PNP input	GT1-ID16-1
16 point terminal block-type digital PNP output	GT1-OD16-1
16 point terminal connector-type PNP digital input	GT1-ID16MX-1
16 point terminal connector-type PNP digital output	GT1-OD16MX-1
32 point terminal connector-type PNP digital input	GT1-ID32ML-1
32 point terminal connector-type PNP digital output	GT1-OD32ML-1
8 point analog input	GT1-AD08MX
4 point analog output	GT1-DA04MX

Application Example

THE DEVICENET MULTIPLE I/O SYSTEM CONNECTS, EXPANDS AND SPEEDS UP YOUR DEVICE-LEVEL NETWORK

Master Module
(SYSMAC C200HX/HG/HE, C200HS, CV Series)

Connect up to 8 multiple I/O Modules to a single Comm Unit

Total length of 3 m (1m between Modules)

Mix & Match a variety of I/O to match your application

High density I/O to accommodate high I/O counts

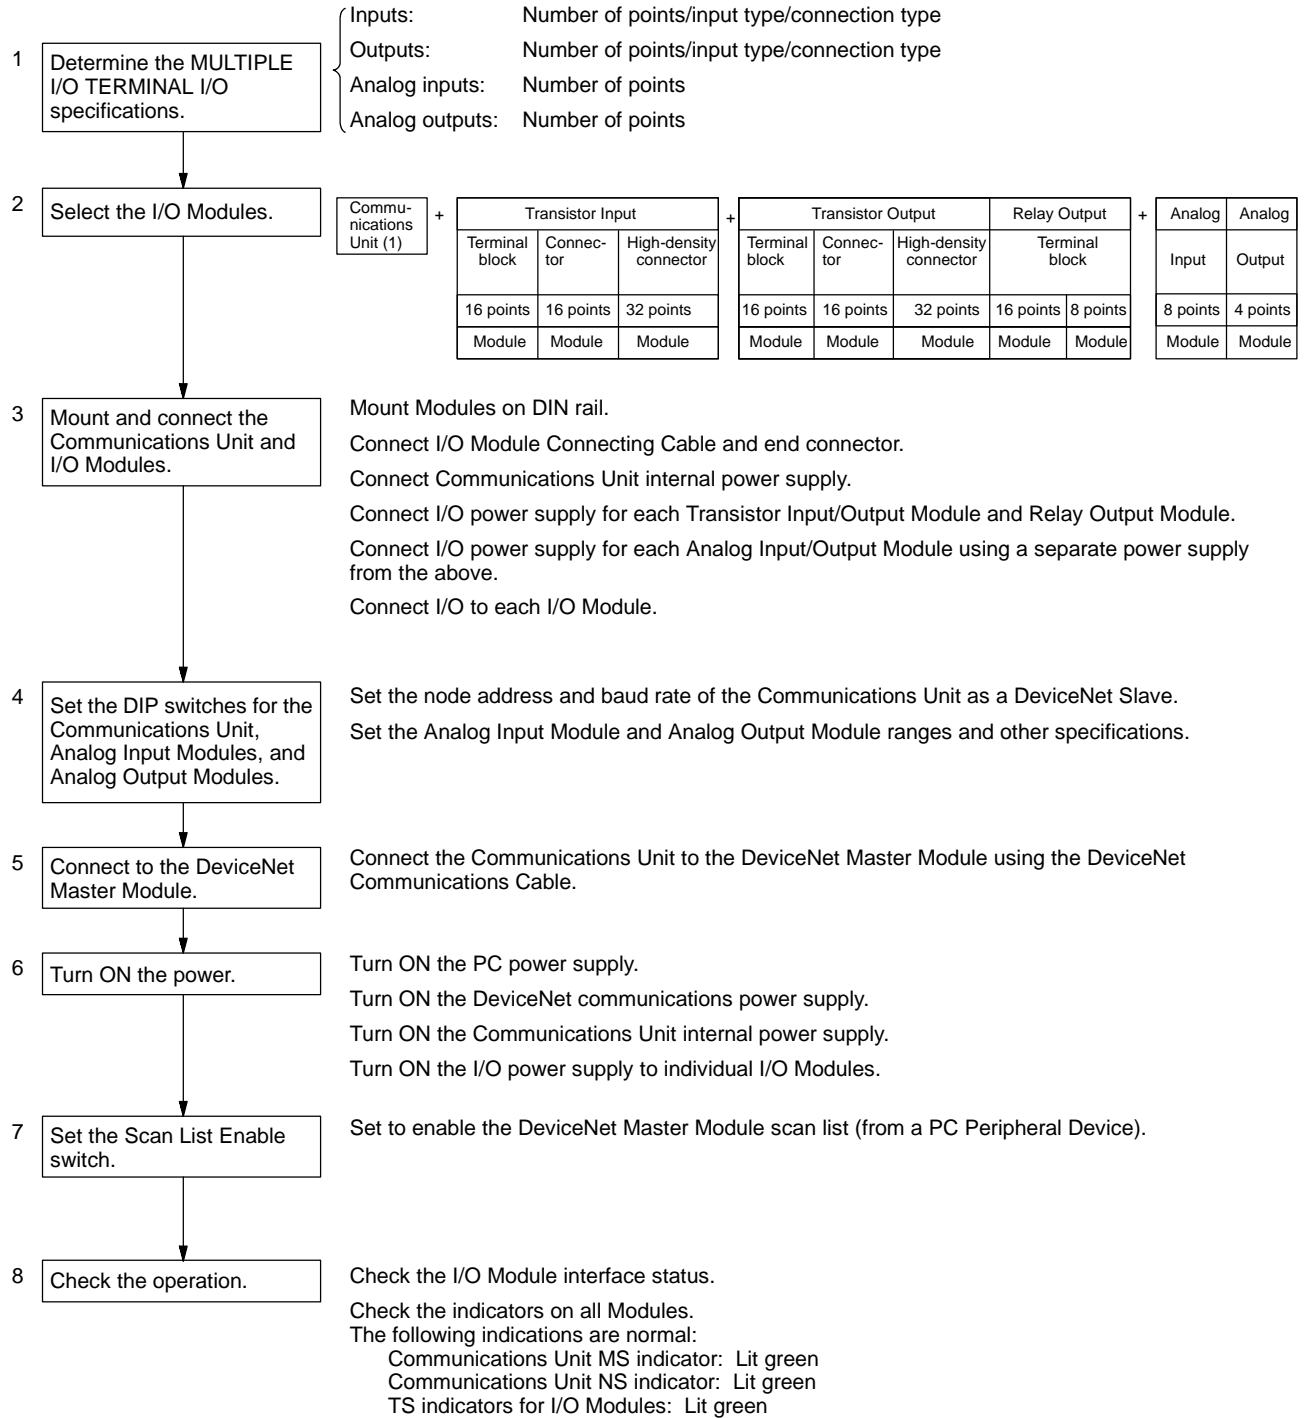

Molex connectors make it easy to remove and install I/O Devices

TYPICAL CONFIGURATION

I/O Module Connecting Cables
Included with module: 40 mm
GCN1-100: 1 m (sold separately)

Configuration Flowchart

General Specifications

	Analog Output Module	4 outputs	0 words	4 words				GT1-DA04MX	Outputs: 0 to 5 V, 1 to 5 V, 0 to 10 V, -10 to 10 V

I/O Module Interface Specifications

■ SPECIFICATIONS

Item	Specification	
Communications method	Special protocol	
Number of I/O Module	8 Modules max.	
Maximum number of points	Total inputs/outputs: 256 points	
Communications distance	Total length	3 m max.
	Between Modules	1 m max. (Cable included with Module is 40 mm.)
Communications power supply	Supplied from the Communications Unit to the I/O Module (0.4 A max.)	
Relationship to DeviceNet	After the I/O Module interface is established, DeviceNet communications continue normally, even if an error occurs on the I/O Module interface.	
Addresses	Automatically recognized when the power to the Communications Unit is turned ON.	
I/O configuration	Automatically recognized when the power to the Communications Unit is turned ON. If the configuration is changed while the power supply is ON, a configuration error will occur.	
Self-diagnostic functions	Configuration errors	The I/O Module configuration is constantly checked while power is supplied. If a mismatch occurs while the power is turned ON, I/O refreshing for all I/O Modules is stopped.
	Special I/O Module errors	Errors are detected in the Special I/O Module (Analog Input and Analog Output Module) on the I/O Module interface.
	I/O Module interface errors	Communications stop when there is no communications response from an I/O Module. Communications stop when there is no specific response from the last I/O Module (terminator). Communications stop when nine or more I/O Modules are connected.
	Power supply overload to I/O Modules	The power supply to the I/O Module and I/O refreshing for all I/O Modules are stopped when the power supply to the I/O Modules through the Communications Unit exceeds 0.4 A.
Error detection	Frame error check; CRC-CCITT check	

■ I/O CURRENT CONSUMPTION

I/O Module	I/O interface current consumption
GT1-ID16(-1)	35 mA
GT1-OD16(-1)	35 mA
GT1-ID16MX(-1)	35 mA
GT1-OD16MX(-1)	35 mA
GT1-ID32ML(-1)	55 mA
GT1-OD32ML(-1)	65 mA
GT1-ROP08	40 mA
GT1-AD08MX	50 mA
GT1-DA04MX	50 mA

Communications Unit

■ SPECIFICATIONS

Item	Specification	
Model	DRT1-COM	
DeviceNet communications power supply	Voltage range	11 to 25 VDC (supplied from the DeviceNet communications connector)
	Module current consumption	30 mA max.
Internal power supply	Voltage range	20.4 to 26.4 VDC (24 VDC $+10\%$ / -15%)
	Module current consumption	110 mA max. (at 24 VDC)
	Maximum current	0.6 A (with maximum output to I/O Module)
	Inrush current	30 A max.
I/O Module interface	Number of Modules connected	8 Modules max.
	Total number of inputs/outputs	Total inputs (IN) and outputs (OUT): 1,024 points max.
	Rated output current	0.4 A max.
	Overcurrent protection function	105% of rated current or higher. When an overcurrent occurs, the power supply to the I/O Modules will remain OFF until the power supply is turned ON again.
Noise immunity	1,500 V p-p Pulse width 0.1 to 1 μ s Pulse rise time: 1 ns (via noise simulator)	
Vibration resistance	10 to 150 Hz, 1.0-mm double amplitude or 70 m/s ²	
Shock resistance	200 m/s ²	
Dielectric strength	500 VAC (between isolated circuits)	
Ambient temperature	-10°C to 55°C (14°F to 131°F)	
Ambient humidity	25% to 85% (with no condensation)	
Operating atmosphere	No corrosive gases	
Storage temperature	-25°C to 65°C (-13°F to 149°F)	
Safety standards	UL508, CSA22.2	
EMC directives	EN50081-2, EN50082-2	
Mounting	DIN 35-mm rail	
Mounting strength	100 N	
Terminal strength	100 N	
I/O Module interface connector lock strength	50 N	
Weight	Approx. 135 g	

This product has been tested in the test laboratory of a third party authorized by ODVA and has been approved as conforming to ODVA Conformance Software Ver. 2.0-1.00.

■ COMPONENTS

DeviceNet Indicators (MS, NS Indicators)
Indicate the status of the Slave and the network.

DeviceNet Communications Connector
Connects to the DeviceNet communications cable.
The communications power supply is also connected via this connector.

I/O Module Interface Indicator (TS Indicator)
Shows the communications status of the I/O Module interface.
Normal communications: Lit green
I/O Module interface error: Lit red
Special I/O Module error: Flashing green
During initialization: Not lit

Power Terminals
Connect to the power supply for operation (internal circuit power supply).

I/O Module Interface Communications Connector
Connects to the I/O Module interface communications cable.

DIP Switch
Set the pins as follows:
Pins 1 to 6: DeviceNet node address
Pins 7 and 8: DeviceNet baud rate
Pin 9: Not used
Pin 10: Hold/clear outputs for communications errors (I/O Modules with separate settings, such as Analog Output Modules, do not follow this setting; they follow their own setting.)

DIN rail Mounting Hooks
Used when mounting the Module to DIN rail.

Storage temperature	-25°C to 65°C (-13°F to 149°F)	
Safety standards	UL508, CSA22.2	
EMC directives	EN50081-2, EN50082-2	
Mounting	DIN 35-mm rail	
Mounting strength	100 N	
Terminal strength	100 N	
I/O Module interface connector lock strength	50 N	
Weight	Approx. 330 g	

Input Specifications

Item	Specification
ON voltage	15 VDC min. (between each input terminal and V, and each input terminal and G)
OFF voltage	5 VDC max. (between each input terminal and V, and each input terminal and G)
OFF current	1 mA max.
Input current	6 mA max./point at 24 VDC (between each input terminal and V and each input terminal and G)
ON delay time	1.5 ms max.
OFF delay time	1.5 ms max.
Insulation resistance	20 M Ω min. at 250 VDC (between isolated circuits)
Isolation method	Photocoupler
Number of circuits	16 points
Number of simultaneous ON inputs	12 points max.

■ COMPONENTS

TS Indicator

Shows the communications status of the I/O Module interface.
 Normal communications: Lit green
 I/O Module interface error: Lit red
 During initialization, or with no power supply: Not lit

I/O Module Interface Communications Connector

Connects to the I/O Module interface communications cable (on the Communications Unit side).

Input Indicators

Display the status of the inputs.
 Lit when an input is ON.

I/O Module Interface Communications Connector

Connects to the I/O Module interface communications cable (on the terminator side).

DIN rail Mounting Hook

Used when mounting the Module to a DIN rail.

Terminal Block

Connects to the input power supply, or input devices such as switches and sensors.

Mounting	DIN 35-mm rail	
Mounting strength	100 N	
Terminal strength	100 N	
I/O Module interface connector lock strength	50 N	
Weight	Approx. 405 g (with on-board relay)	

Output specifications

Item	Specification
Relay	Power relay: G2R-1-SN
Rated load	250 VAC at 5 A/ 30 VDC at 5 A (Resistive load)
Rated overcurrent	5 A
Maximum switching voltage	250 VAC/125 VDC
Maximum switching current	5 A
Insulation resistance	1,000 MΩ

COMPONENTS

I/O Module Interface

Communications Connector

Connects to the I/O Module interface communications cable (on the Communications Unit side).

Power Relays

In each relay, there is an indicator that displays the status of the output, and it is lit when the output is ON.

I/O Module Interface Communications Connector

Connects to the I/O Module interface communications cable (on the terminator side).

Terminal Block

Connects to the output power supply or output devices, such as lamps and solenoids.

DIN rail Mounting Hook

Used when mounting the Module to a DIN rail.

TS Indicator

Shows the communications status of the I/O Module interface.

Normal communications: Lit green

I/O Module interface error: Lit red

During initialization, or with no power supply: Not lit

Item	Specification		
	Voltage inputs	Current inputs	
Input signal range	0 to 5 V, 1 to 5 V, 0 to 10 V, or -10 to 10 V	0 to 20 mA or 4 to 20 mA	
Max. signal input	±15 V	±30 mA	
Input impedance	1 MΩ min.	Approx. 250 Ω	
Resolution	1/6000 (FS)		
Accuracy	25°C (77°F)	±0.3% FS	±0.4% FS
	-10°C to 55°C (14°F to 131°F)	±0.6% FS	±0.8% FS
Conversion time	With 8 inputs: 8 ms/8 points With 4 inputs: 4 ms/4 points (Select using the DIP switch.)		
Converted output data (Binary)	Binary (4-digit hexadecimal) -10-V to 10-V range: F448 to 0 to 0BB8 full scale Other signal ranges: 0000 to 1770 full scale		
Averaging function	Settable (via DIP switch)		
Open circuit detection	Provided (with a range of 1 to 5 V or 4 to 20 mA)		
Dielectric strength	500 VAC; detected current 1 mA (between communications section and analog input, and between internal power supply and analog input)		
Isolation method	Photocoupler insulation (between communications part and analog input) (no insulation between analog inputs)		

COMPONENTS

TS Indicator

Shows the communications status of the I/O Module interface.
 Normal communications: Lit green
 I/O Module interface error: Lit red
 During initialization, or with no power supply: Not lit

Terminal Arrangement

Connector Pin Arrangement

The following diagram shows the pin arrangement for the connector.

■ DIMENSIONS

Unit: mm (inch)

Analog Output Module

■ SPECIFICATIONS

General Specifications

Item	Specification	
Model	GT1-DA04MX	
I/O connections	Connectors (made by MOLEX)	
Number of outputs	4 outputs (allocated four words in the Master Module)	
Internal power supply	Voltage range	20.4 to 26.4 VDC (24 VDC $+10\%$ / -15%)
	Current consumption in Module (inrush current)	100 mA max. (inrush current 30 A max.)
Current consumption (I/O Module interface)	50 mA max.	
Noise immunity	1,500 V p-p Pulse width: 0.1 to 1 μ s Startup pulse: 1 ns (via noise simulator)	
Vibration resistance	10 to 150 Hz, 1.0-mm double amplitude or 70 m/s ²	
Shock resistance	200 m/s ²	
Dielectric strength	500 VAC (between isolated circuits)	
Ambient temperature	-10°C to 55°C (14°F to 131°F)	
Ambient humidity	25% to 85% (with no condensation)	
Operating atmosphere	No corrosive gases	
Storage temperature	-25°C to 65°C (-13°F to 149°F)	
Safety standards	UL508, CSA22.2	
EMC directives	EN50081-2, EN50082-2	
Mounting	DIN 35-mm rail	
Mounting strength	100 N	
Terminal strength	100 N	
Connector lock strength	I/O Module interface connector: 50 N Analog input connector: 50 N	
Weight	Approx. 180 g	

Characteristics

Item	Specification	
Output signal range	0 to 5 V, 1 to 5 V, 0 to 10 V, or -10 to 10 V	
Allowable external output load resistance	5 K Ω min.	
External output impedance	0.5 Ω max.	
Resolution	1/6000 (full scale)	
Accuracy	25°C (77°F)	$\pm 0.4\%$ FS
	-10°C to 55°C (14°F to 131°F)	$\pm 0.8\%$ FS
Conversion time	4 ms/4 points	
Converted output data (Binary)	Binary -10-V to 10-V range: F448 to 0 to 0BB8 full scale Other signal ranges: 0000 to 1770 full scale	
Dielectric strength	500 VAC; detected current 1 mA (between communications section and analog output, and between internal power supply and analog output)	
Isolation method	Photocoupler insulation (between communications part and analog output) (no insulation between analog outputs)	

■ COMPONENTS

TS Indicator

Shows the communications status of the I/O Module interface.
 Normal communications: Lit green
 I/O Module interface error: Lit red
 During initialization, or with no power supply: Not lit

PWR Indicator

Internal power being supplied: Lit green
 No internal power supply: Not lit

U.ERR Indicator

Module error: Lit red
 Module normal: Not lit

I/O Module Interface Communications Connector

Connects to the I/O Module interface communications cable (on the Communications Unit side).

I/O Module Interface Communications Connector

Connects to the I/O Module interface communications cable (on the terminator side).

Analog Output Connectors (made by MOLEX)

Connect to an analog output devices.

DIP Switch

Sets the output ranges and the output method when a communications error occurs.

DIN rail Mounting Hook

Used when mounting the Module to a DIN rail.

Internal Power Supply Terminals

Connect to the operations power supply.

■ DIMENSIONS

Unit: mm (inch)

NOTE: DIMENSIONS SHOWN ARE IN MILLIMETERS. To convert millimeters to inches divide by 25.4.
