Precautions

★Please refer to "Common Precautions" for correct use.

Caution

●Soldering

- Terminal connection
When soldering, make sure that the temperature of the soldering iron tip is not higher than 280°C, and complete the soldering within 3 seconds. Leave it for 1 minute without applying any external force to the terminal after the soldering. Soldering at an excessively high temperature or soldering for more than 3 s may deteriorate the characteristics of the Switch.

Correct Use

●Mounting

Use M2.3 mounting screw with plane washers or spring washers to securely mount the Switch. Tighten the screws to a torque of 0.2 to 0.29 N·m {2 to 3 kgf·cm}.
