NS

Real Value and Flexible Application

Provides the Functions Sought in New Displays.
This Powerful Lineup Showcases OMRON's Unique Value.

SERIES

NS-series Value

What's New

- Even Simpler Equipment Operation with Outstanding Synergy..... **P 6**
- The Expanded Lineup Supports an Even Wider Range of Applications. **P 8**
- The NS15 Can Do All of This. **P 10**
- NS series Supports SYSMAC CJ2.
- Full access to CPU memory and tag access with EtherNet/IP..... **P12**
- Greatly Improved Ladder Monitor.
Enhanced Visibility and Ease of Use. **P14**
- Further Enhancement of Basic Functions. **P16**

Best Match

Demonstrates excellent matching with OMRON control devices. Greatly reduces the cost and effort required to connect all kinds of components, such as PLCs. Provides a wide variety of useful functional aspects of the same manufacturer.

- Eliminates Programming and Screen Designing..... P18
- SAP Library..... P19
- Single Port Multi Access (SPMA)..... P20
- Ladder Monitor..... P20
- PLC Data Trace..... P21
- PLC Troubleshooter..... P21
- Direct Connection to Temperature Controllers..... P21
- Face Plate Auto-Builder for NS..... P22
- 260,000-color Video Display..... P22

NS Series Lineup

This powerful lineup showcases OMRON's unique value.
Choose from 3 types to match your application and requirements.

NS Series Plentiful screen variations and diverse functions allow use in a wide variety of applications.

Standard Models

15 inches

NS15-TX01 Color TFT

- USB Slave
- USB Master
- Ethernet
- RS-232C x 2
- Controller Link
- Ladder Monitor
- Video (RGB input only)
- Memory Card
- RS-422A/485
- Brightness adjustment
- RGB output

- 32,768 colors ●XGA 1,024 x 768 pixels
- Screen memory size: 60 MB
- Analog touch panel method
- Silver or black models are available.

5.7 inches

- USB Slave
- USB Master
- Ethernet
- RS-232C x 2
- Controller Link
- Ladder Monitor
- Video
- Memory Card

NS5-MQ Monochrome STN

- 16 monochrome gradations
- QVGA 320 x 240 pixels
- Screen memory size: 60 MB

NS5-SQ Color TFT

- 32,768 colors ●QVGA 320 x 240 pixels
- Screen memory size: 60 MB

NS5-TQ Color High-luminance TFT

- 32,768 colors ●QVGA 320 x 240 pixels
- Screen memory size: 60 MB

8.4 inches

- USB Slave
- USB Master
- Ethernet
- RS-232C x 2
- Controller Link
- Ladder Monitor
- Video
- Memory Card

NS8-TV Color TFT

- 32,768 colors ●VGA 640 x 480 pixels
- Screen memory size: 60 MB

10.4 inches

- USB Slave
- USB Master
- Ethernet
- RS-232C x 2
- Controller Link
- Ladder Monitor
- Video
- Memory Card

NS10-TV Color TFT

- 32,768 colors ●VGA 640 x 480 pixels
- Screen memory size: 60 MB

12.1 inches

- USB Slave
- USB Master
- Ethernet
- RS-232C x 2
- Controller Link
- Ladder Monitor
- Video
- Memory Card

NS12-TS Color TFT

- 32,768 colors ●SVGA 800 x 600 pixels
- Screen memory size: 60 MB

NS-Runtime

NS-NSRCL□

This software enables PLC communications from a personal computer by manipulating PT screens created using the CX-Designer.

Page 36

Optional Products NS-series functions, such as image processing and networking, have been expanded.

Video Input Unit
NS-CA001

- NTSC/PAL video inputs (4 channels)

RGB/Video Input Unit
NS-CA002

- NTSC/PAL (2 channels)
- RGB input (1 channel)

Controller Link Interface Unit
NS-CLK21

RS-232C/RS-422A Conversion Unit
NS-AL002

- Transmission distance: 500 m max.

Communications Cable
XW2Z-S002

USB relay cable (IP65 oil-resistant type)
NS-USBEXT-1M

What's New

Even Simpler Equipment Operation with Outstanding Sync

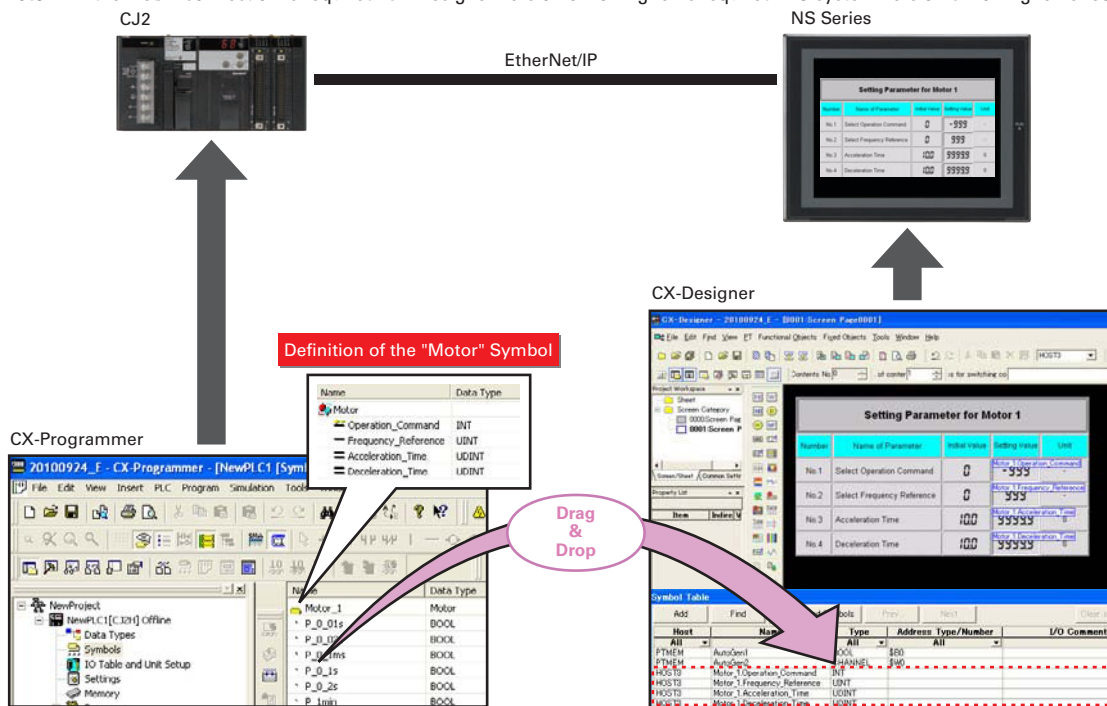

Supported Devices **CJ2** **CS1/CJ1** **CP1** **Multi-vendor Support**

Support for CJ2 Data Structures
Program the PLC and Create PT Screens Using the Same Data Structures

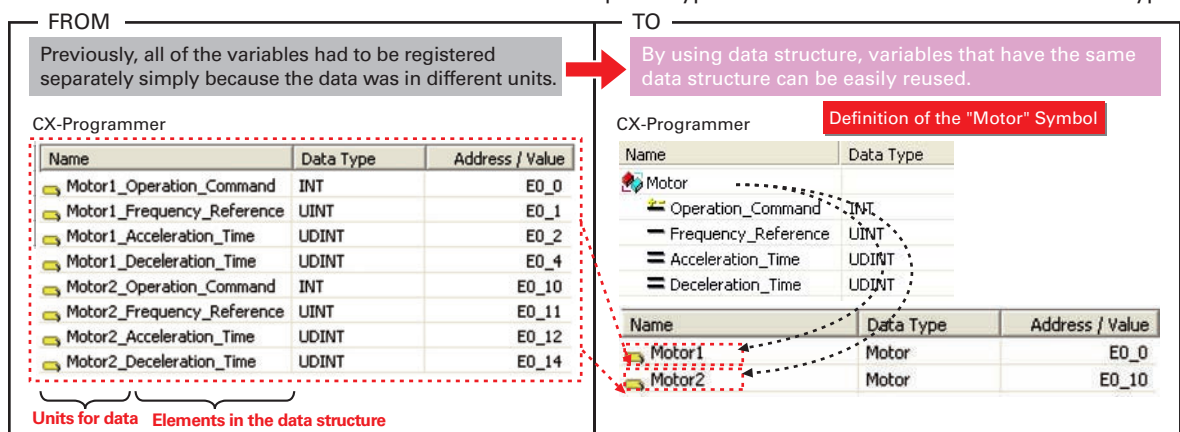

Greatly Increase Design Efficiency and Reduce Work over the Entire System

This special feature is made possible by combining an OMRON CJ2 PLC with an NS-series PT. The data structures that you define on the CX-Programmer can be used on the CX-Designer simply by dragging and dropping them.

Note: An EtherNet/IP connection is required. CX-Designer version 3.2 or higher is required. NS system version 8.4 or higher is required.

What is data structure? Data which is made of plural types of variables and treated as one data type.

NS with LED backlight

LED backlight is newly installed for NS5 color-type models (SQ/TQ models)*

*LotNo.1520 or later

LED backlight allows backlight brightness adjustment of up to 32 levels.

The brightness can be adjusted from the operation screens; it is favorable for ship and vessel applications

< Conventional three-level adjustment >

< New 32-level adjustment >

What's New

Supported Devices: **CJ2** **CS1/CJ1** **CP1** **Multi-vendor Support**

Program-free, Macro-free W009,01 W009,02

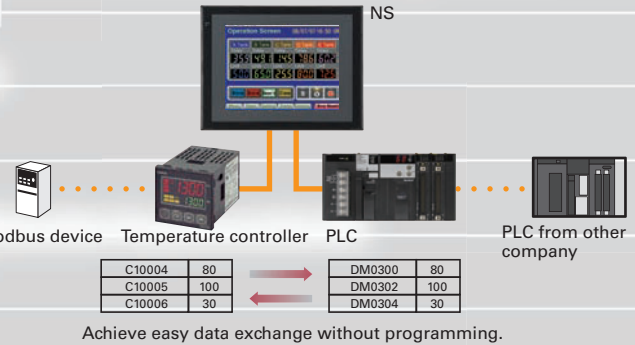

Easy Data Exchange between the PLC and Components (See note 1 and 2.)

Easy Data Exchange

For example, temperature controller alarm values can be transferred to the DM Area of the PLC's CPU Unit. No communications programming or macros are required.

Multi-vendor Support

Devices from multiple vendors are supported. Data can be easily exchanged with PLCs from other companies and Modbus devices.

Easy Settings

To make the settings, simply specify the device and addresses of the transfer source and transfer destination in the CX-Designer. Settings can be made using the same procedure as for setting the addresses for normal components.

CX-Designer
Select Device Data Transfer Setting from the PT Menu.

Make the settings simply by specifying the addresses of the transfer source and transfer destination as well as the number of data items.

Easier Operation when Combining SAP Library Objects

SAP data can also be exchanged. SAP data can be exchanged by checking the address of the SAP data in the dialog box of the SAP object pasted in the CX-Designer and specifying that address as the transfer source address.

Note 1: EtherNet/IP tags are not supported. **Note 2:** CX-Designer version 3.1 or higher is required. NS system version 8.2 or higher is required.

15 Inches XGA 1,024 x 768 Pixels, Analog Touch Panel

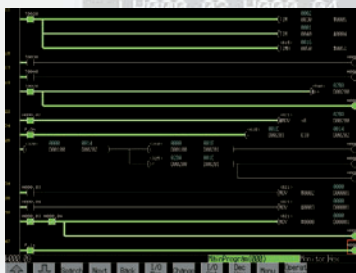

NS15-TX01

A Large Display and High Resolution Provide...

Greater Visibility and Easy Operation

A 15-inch XGA display provides even greater visual expressions. The display size is 1.5 times larger and the number of pixels is 1.6 times greater than the NS12.

With the Ladder Monitor, ladder diagrams can be displayed on the full screen (1,024 x 768 pixels), allowing a program segment of up to 22 rows and 21 columns to be displayed.

NS12
17 rows x 16 columns max.
SVGA (800 x 600 pixels)

NS15
22 rows x 21 columns max.
XGA (1,024 x 768 pixels)

Using an analog touch panel enables even more detailed operations and inputs.

What's New

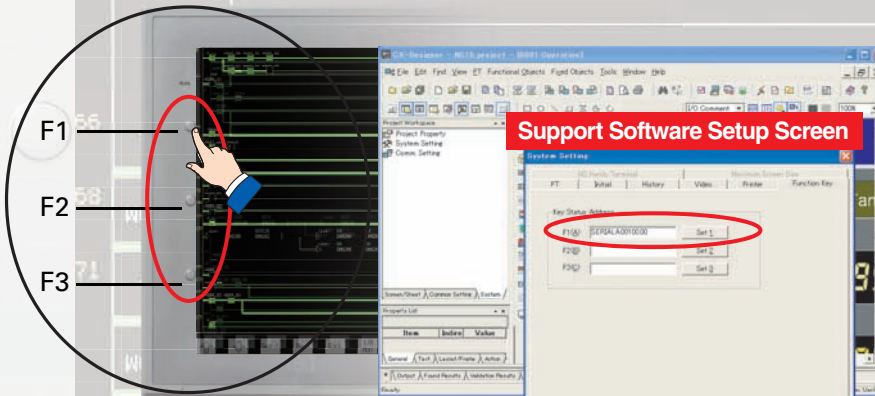

The NS15 Can Do All of This.

External Function Keys Enable...

Standard Feature

Simultaneous Two-point Pressing

Contacts can be allocated to external function keys. This makes it possible, for example, to support applications which will not operate unless two points are pressed simultaneously.

Addresses can be easily allocated to function keys using Support Software.

Automatic Screen Enlargement Is Supported During Conversion to...

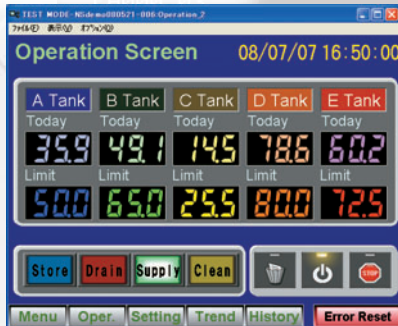

Greatly Reduce Revisions for Each Screen

Standard Feature

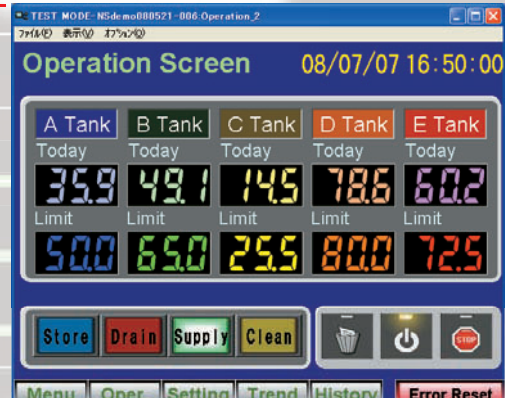

Not only can legacy NS5/8/10/12 screen data be reused, but, for example, objects can be automatically enlarged to match the screen size when converting to the NS15. This can greatly reduce the time involved in modifying screens. Automatic enlargement is also enabled when converting between earlier models, such as from the NS5 to the NS8, NS10, or NS12. In addition, NS-Runtime screens can now be converted to NS-series PT screens.

NS12 (800 x 600 pixels)

NS15 (1,024 x 768 pixels)

Convert

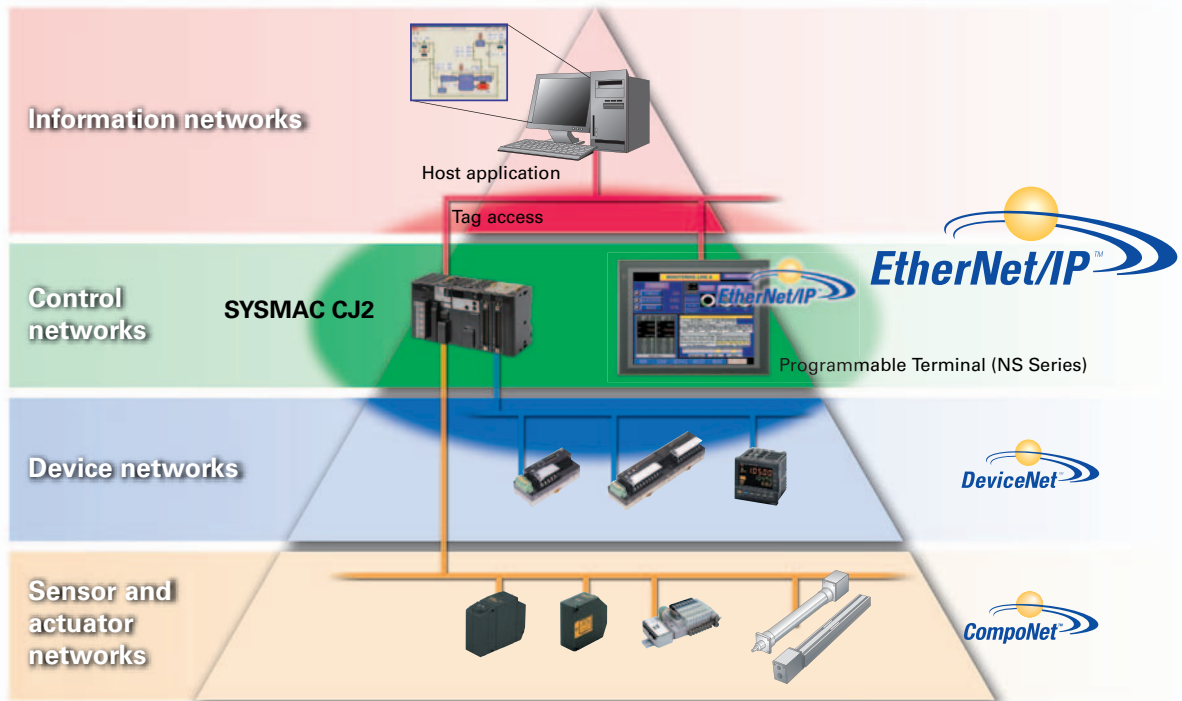

Screen objects are automatically enlarged.

Note: Font sizes must be adjusted manually.

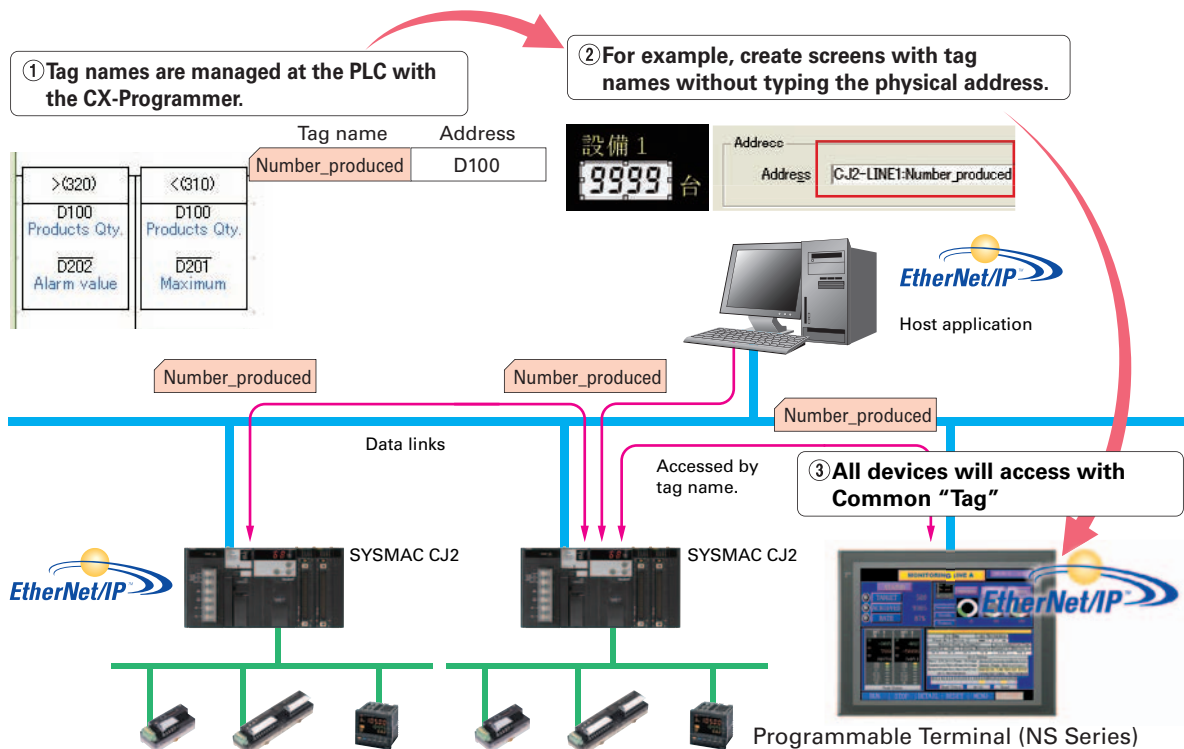

What's New

NS series Supports SYSMAC CJ2. Full access to CPU memory and tag access with EtherNet/IP.

What is tag access with EtherNet/IP?

A tag is a name given to an address. Tags are managed in the CJ2 CPU Unit, where they are defined as network symbols. The common user-defined tag names are used from Programmable Terminals and host applications to access memory in a CJ2 CPU Unit without knowing the physical address.

What's New

Greatly Improved Ladder Monitor.
Thoroughly focused on Visibility and Ease of Use.

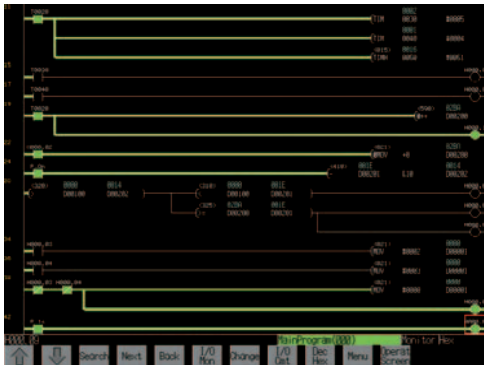

Standard Feature
 (See note.)

Note: Not supported for the 5.7-inch model.

The Ladder Diagram can be fully displayed on the entire screen,
so it is easier to see and work.

The ability to change the color and size in which the Ladder Monitor is displayed greatly improves visibility. The ladder diagram can be displayed on the entire screen (800 x 600 dots) even for the NS12 with a maximum display of 17 rows and 16 columns of a ladder diagram.

The ladder diagram is easy to see display in black and green.

The cursor is displayed with a red frame. This is useful to specify the program section, execute a search, and to display the search results.

Up to three lines can be used for comments. The comment display can be selected from three lines, one line, or no comments.

I/O comments can be read directly from the PLC in a single operation,
so no extra work to show I/O comments.

Read I/O comments directly from the PLC. I/O comments do not have to be stored in a Memory Card.

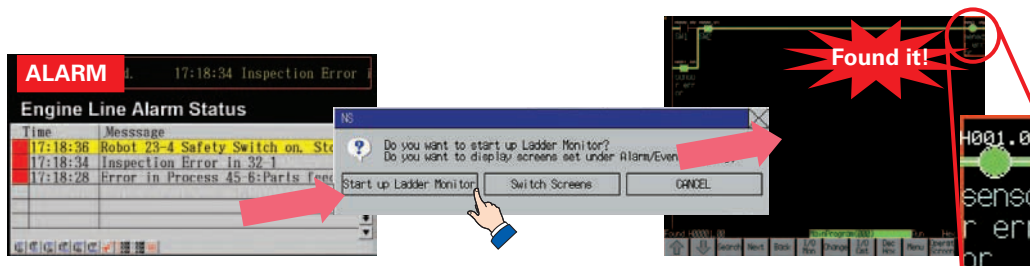

Select Read I/O Comment Reading from the Menu.

The I/O comments are displayed.

Automatically jumping from the alarm message
Easy checking the alarm bit and shortens searching time.

When an alarm occurs, touch the message to automatically search for the alarm bit (output bit) for the alarm. This enables you to quickly check the alarm address and investigate why the bit turned ON.

What's New

Further Enhanced Basic Functions

Monitor and Record Input Operations on the Control Panel

Supported Devices: **CJ2** | **CS1/CJ1** | **CP1** | **Multi-vendor Support**

What Was Touched When? can be recorded with Operating log.

Functionality has been improved with the addition of a log to record operators' use of the panels. It is now possible to record and display the time, date, and operation details for buttons (i.e., hardware switches) pressed on the control panel in addition to operations on the touch panel. The operation log can be saved in a CSV file on a Memory Card mounted in the NS-series PT.

Switch directly from the user screen to the log operation display screen.

Multiple operation log files can be saved on a Memory Card with date and time data.

Operat_080520_173000.csv
Operat_080521_173000.csv
Operat_080522_173000.csv

Memory Card

The files can be opened in Excel.

A comment of up to 32 characters can be set and displayed for each operation to provide easy-to-understand information about what type of operation was performed.

For example, with a control panel comprised of the NS-series PT, hardware switches, and an emergency stop button, you can even record and display operation of the emergency stop button.

Multi-vendor Support

In addition to the previously supported models, it is possible to connect to Mitsubishi Q-series PLCs and QnA-series PLCs, Siemens PLCs, and Rockwell PLCs. Connection can also be made with the RTU mode of Modbus devices. And connection is possible to the FA-M3(R) Series of PLCs from Yokogawa Electric. For details on the connection methods, refer to the list of connectable models on page 52.

■ PLC

Manufacturer	Series	CPU	Connection form

	3G3JV (Varispeed)	

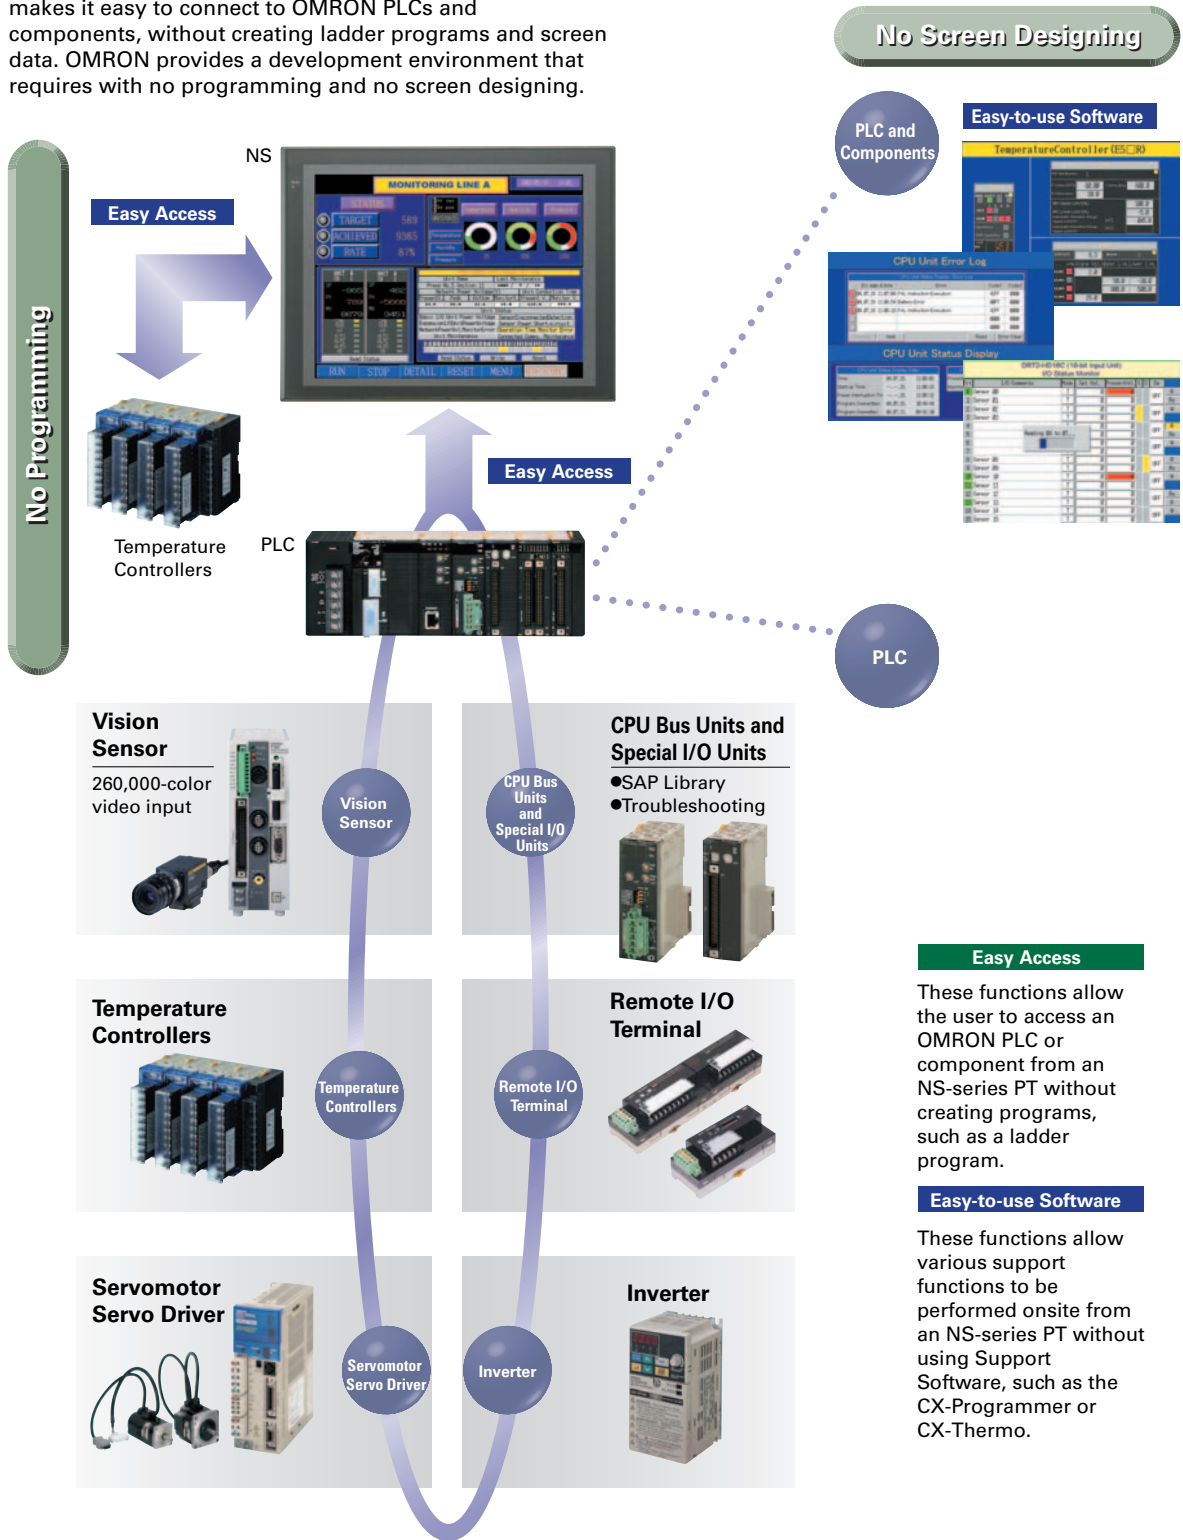

■ Modbus Devices

Connection is now possible with Modbus devices (RTU mode).

Best Match

Best Match with OMRON Products, Eliminates Programming and Screen Designing

The Smart Active Parts (SAP Library) for the NS Series makes it easy to connect to OMRON PLCs and components, without creating ladder programs and screen data. OMRON provides a development environment that requires with no programming and no screen designing.

Single Port Multi Access (SPMA)

Easy Access

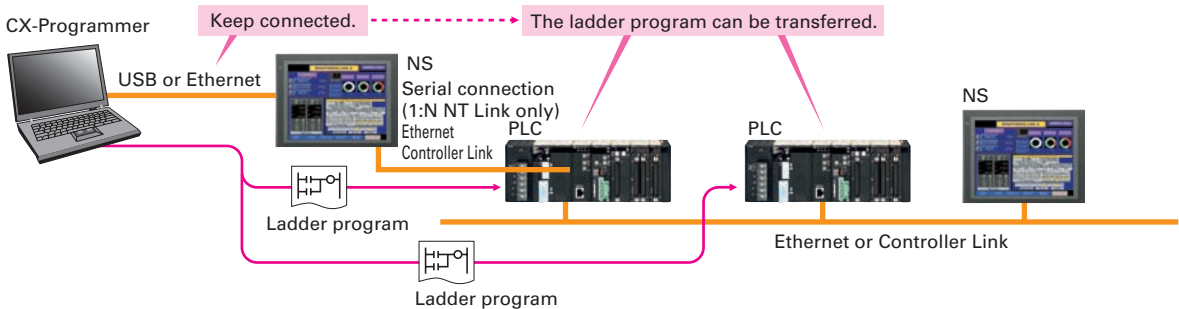

Standard Feature

The ladder program and screen data can be transferred from a single port!

The ladder program can be transferred through the PLC and the PT's screen data can also be transferred, all while the computer remains connected to the PT's port (such as a USB port).

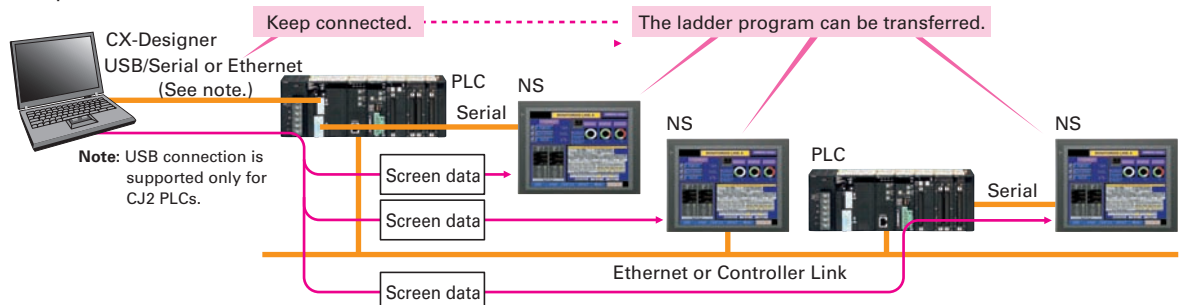

The PT can transfer data over network levels by the following routes.

Computer (Serial/USB) → NS-series PT (Ethernet) → PLC (Ethernet or Controller Link) → PLC

SPMA significantly improves maintenance efficiency when the NS-series PT and PLC are some distance apart.

Computer (Serial) → PLC (Ethernet or Controller Link) → NS-series PT

Note: SPMA can be used in CS/CJ-series PLCs with lot number 030201 or later.

Note: SPMA via a PLC is not supported when a CP-series PLC is connected. (SPMA via an NS-series PT is supported with a CP-series PLC.)

Ladder Monitor

Easy Support Tools

Standard Feature

The ladder program can be monitored onsite without a laptop!

Ladder programs with I/O comments can be monitored on the PT's screen and the ladder program can also be edited with the Programming Console function.

Note: The Ladder Monitor function is not supported by the 5.7-inch models.

Note: The ladder monitor function is not supported for connection with a CP1E PLC. It is also not supported by the CJ2M.

Operation screen

CS/CJ/CP-series PLC

Also meets the requirements of users who need to display devices onsite, instead of the ladder program.

Easy Support Tools

Standard Feature

[Switch Box Function]

The operator can check the PLC status by displaying just the I/O comments and status.

[Device Monitor Function]

Displays the device's contents, allowing settings to be input and checked and making startup operations more efficient.

Note: The machine monitor function, and switch box function are not supported when a CP1E PLC is connected.

Switch Box Function

Device Monitor Function

User-friendly Screen Creation

So easy to use, anyone can master it.

Without screen creation and ladder programming, the CX-Designer Screen Design Software is so easy-to-use that anyone can master it. Quickly create the required screen by dragging and dropping objects. OMRON's unified development environment lets you drastically reduce the work required to create screens.

All addresses and comments can be managed using a single Symbol Table.

Shows a list of addresses, names, and comments used in project screen data. Addresses, names, and I/O comments for the CX-Programmer can also be imported.

Host	Name	Type	Address	Type/Number	I/O Comment	Tag
All	All	All	All	All	All	All
HOST3	STOP	BOOL			STOP SWITCH	Network Variable
HOST3	RUN	BOOL			RUN SWITCH	Network Variable
HOST3	AutoGen3	CHANNEL	00000			None
SERIAL.A	LEFT	BOOL	00001.00		LEFT SWITCH	None
SERIAL.A	RIGHT	BOOL	00001.00			
SERIAL.A	AUTO	BOOL	W000000.00			
SERIAL.A	PAUSE	BOOL	00000.00			
PTMEM	AutoGen2	CHANNEL	\$40			
PTMEM	AutoGen1	BOOL	\$80			

Improved Icons and Help

The screenshot shows the CX-Designer software interface. At the top left, a 'Symbol Table' window displays a list of symbols. The main workspace shows a project tree on the left, a screen editor in the center, and an output window at the bottom. The screen editor displays a screen titled 'Fijar La Pantalla' with various controls and numerical displays. The output window shows search results for 'NUM0011'.

The project Workspace enables the user to look through the entire project.

- Screens you want to edit can be opened right away.
- Perform screen management, such as copying or deleting screens, by simply right-clicking.
- Reusing screens from other projects is easy with the CX-Designer.
- Settings for alarms, data logs, communications, and other functions can be easily accessed.

Drastically reduce the number of clicks in the project.

Just click on the object once to display or change properties. Multiple objects can be selected to display and change shared properties all at once.

The Output Window shows search results.

In addition to addresses and I/O comments used in screen data, labels can also be used as search strings and the results can be displayed.

Note: The same type of Project Workspace and Output Window as in the CX-Programmer are provided for the user interface.

Reading Another Project's Screens and Objects

Easily reuse screen resources by dragging and dropping them.

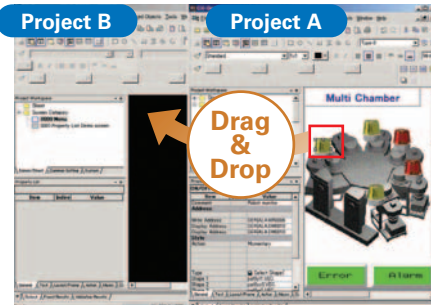

Resources from another project can be easily reused by just selecting the screen or objects that you want to read and dragging and dropping it, so screens can be created intuitively.

[Example screen 1]

Select the screen that you want to read, drag it to the destination, and drop it.

[Example screen 2]

Select the part that you want to read, drag it to the destination, and drop it.

Reading CAD Files

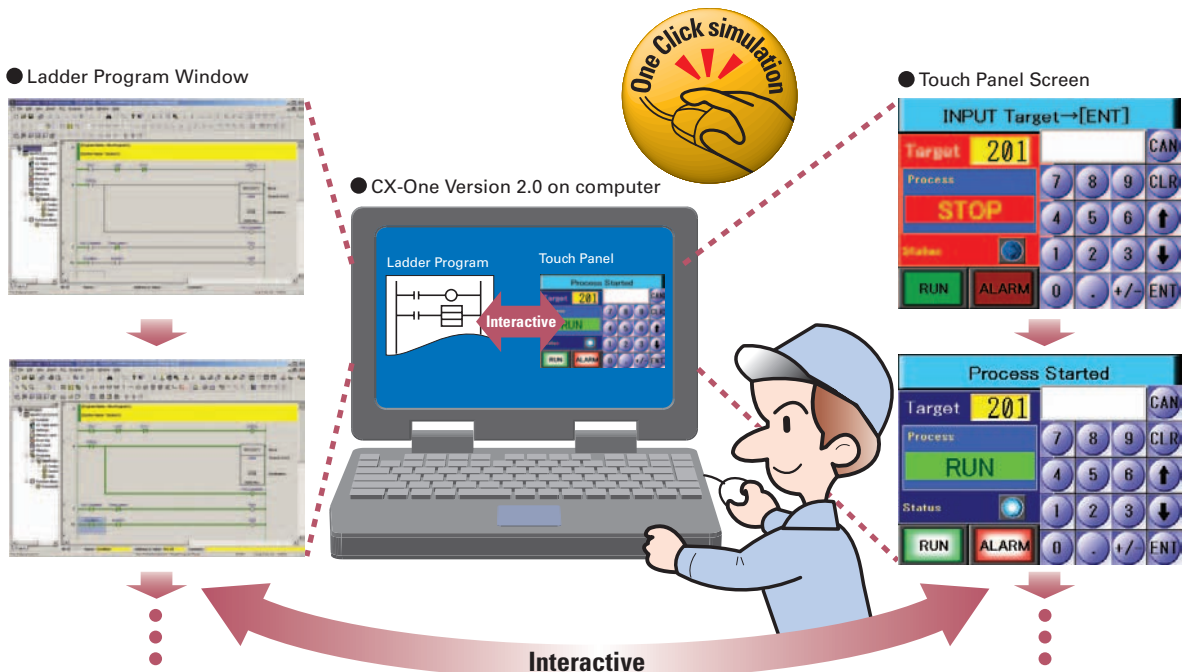

It is possible to import DXF files by dragging and dropping them. The files are read as a diagram, and so less capacity is used than with images. It is also easy to customize the diagram by changing the shape or color.

Integrated Simulation with the PLC Ladder Program

The screen data and ladder program can be checked simultaneously in the computer.

The CX-Designer and CX-Programmer interconnects the test functions in the computer through the CX-Simulator. The screens and ladder program checks are performed simultaneously, which significantly increases debugging efficiency. The CX-Programmer also has a new button for integrated simulation. And, work efficiency is further improved with the ability to keep required work screens pinned on front and to zoom in or out as desired.

Plenty of Basic Functions

Multi-language Support

There are 42 languages* supported and useful label switch functions are also built into the PT. Unicode is supported and 42 Asian and European languages can be combined in screens. Also, it is possible to switch between up to 16 labels using the label switching function, so it is possible to support up to 16 languages in a single screen just by specifying the language to be displayed in each label. (*Refer to page 44 for details.)

NS Series

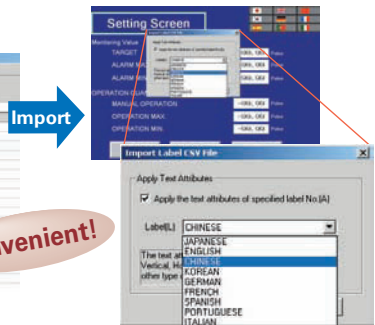

ราชอาณาจักรไทย
Thai Displays Also Supported

[The labels' text attributes can also be reflected when importing.]

When screen data is imported, text attributes can be applied to the specified labels and attributes such as the font and text color can be reflected to other languages labels.

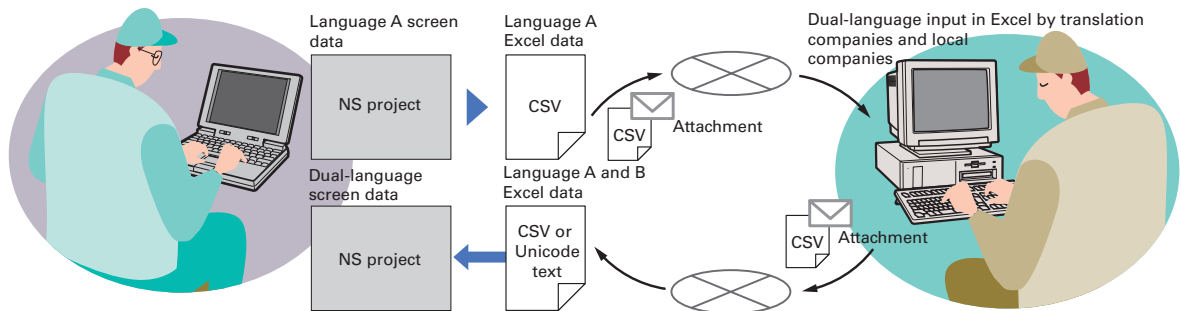

Multi-language CSV data

Convenient!

Multi-language conversion has become much easier.

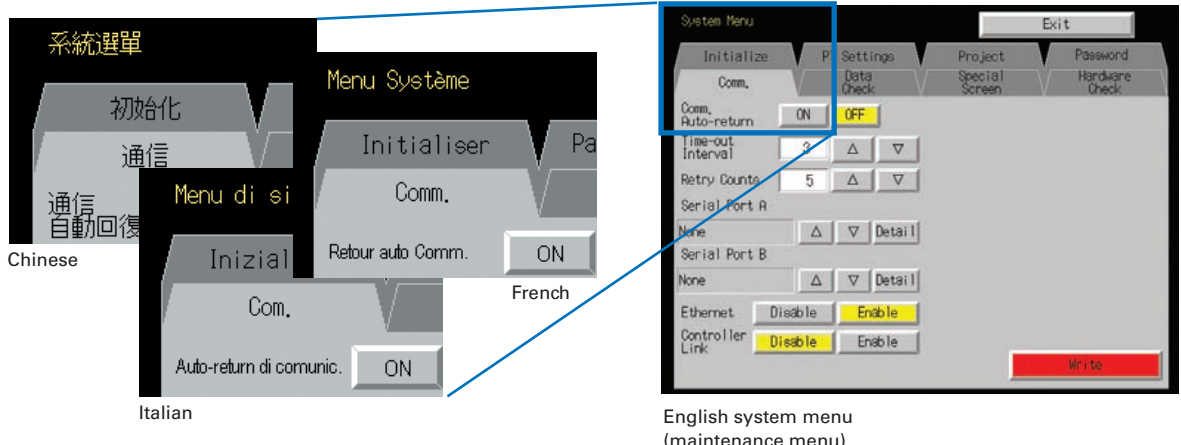

The screen data in the source language is exported to a CSV file and sent to a translation agency by e-mail for translation. Later, the translated CSV file is just imported to easily provide multi-language support.

Note: Windows XP (Service Pack3 or higher), Vista or 7 is required for multi-language support.

Multi-language System Messages Eight Languages Supported as Standard Feature

The system program of NS-series PTs supports Chinese and European languages. All eight languages are a standard feature, including Chinese (traditional and simplified), Spanish, Italian, German, and French, in addition to the previous Japanese and English. Along with maintenance menus, messages for communications errors, communications settings, and screen transfers can be displayed in any of eight languages. Maintenance can be performed in the desired language. The language can be easily set using the NS-series PT or screen data.

English system menu (maintenance menu)

Easier Design of Machine Error Screens

You can easily make a machine troubleshooter without making similar error screens.

Individual error screens that were previously made for each error can now be integrated into one. It is possible to switch only the error details (text and screen) without ladder programming in conjunction with the alarm bit.

With this system, this frame is shared, and the error details in the pink frames are switched with an alarm or other item as the trigger.

● Text selection ● Image selection

■ For example, in conjunction with an alarm bit (See note.)

Alarm bit 10.01 ON (no paper)

Alarm bit 10.02 ON (printing error)

Note: Alarms, PLC/PT memory, and other items can be selected for the switching trigger.

Easy-to-Use Multifunction Objects

Multiple functions can be executed on-screen with one button without macros.

Multifunction Objects combine the functions of multiple objects into one object. Multiple functions can be executed by pressing one button without using troublesome macros. Setup is easy. For example, a setting can be made on-screen using the Support Software to turn ON a bit to start a machine, set a value, and then change the screen.

Multifunction execution with one object

Easy On-screen Setup with Support Software!

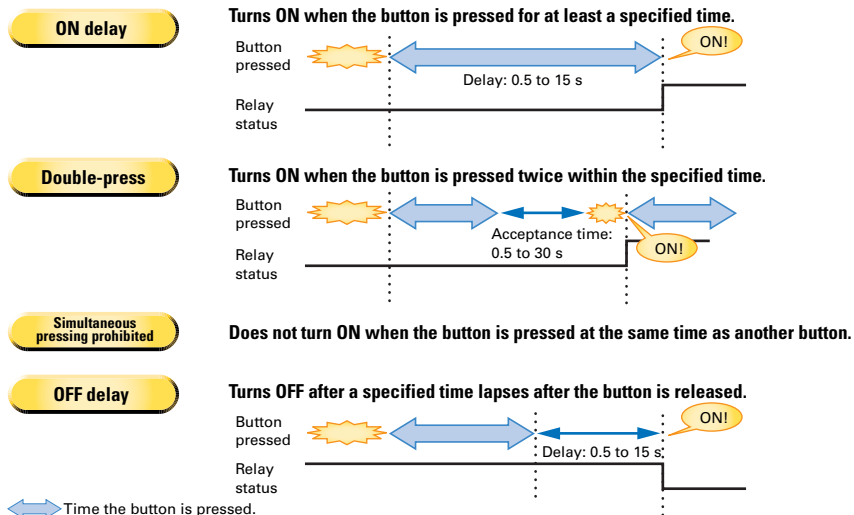

Execute multiple functions with one button.

Multifunction Objects support four safety functions.

Switches that do not immediately operate when touched can be easily made without ladder programming.

Screen Data Security Functions

Protect important screen data with a password.

If password protection is set in the data transfer security settings when the screen data is designed, a password must be entered to download or upload the screen data, so important screen data can be protected.

A password between 4 and 64 characters long can be set. The download/upload will start if the user inputs the password that was set when the screen was designed. (Password input will be disabled if the wrong password is input 3 times in a row.)

If a password has been set, the password is required to transfer screen data (download or upload) with the Memory Card.

Security password

User Security Functions

Operator access rights and the operating format can be set to one of five password levels.

Each operator can be given one of 5 password levels using the User Security (level authentication) function. A password level can be set for each object, so various objects can be made inoperable or hidden based on the operator's access level.

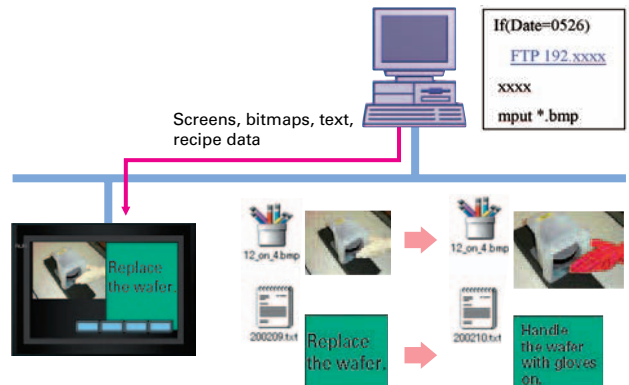

Operator passwords are managed in 5 levels. Passwords can be up to 16 characters long and the access rights increase as the level number increases.

The operator cannot manipulate objects with a password level (authentication level) higher than the operator's login level.

FTP Function

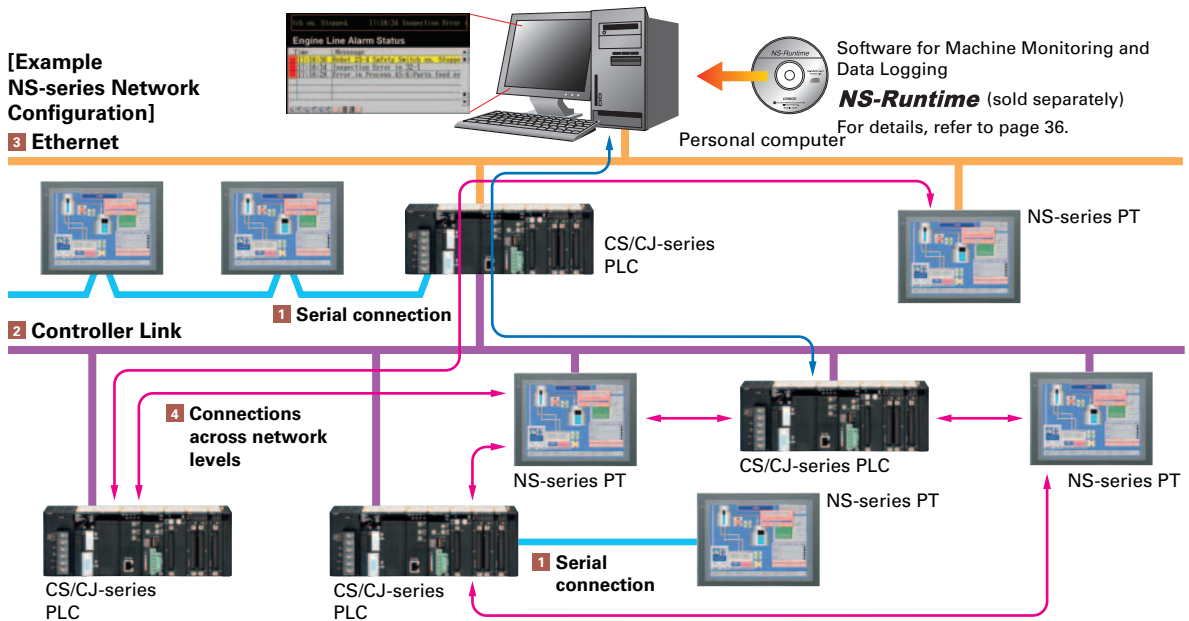

You can partially replace text and pictures from your computer.

FTP (File Transfer Protocol) has been added! Texts, lists, and recipes can be replaced with the put/get command from your computer! You can even replace BMP files from your computer easily.

Connect! Expand! Feel the NS Series, the power of networking.

Provides serial NT Link communications supporting both 1:1 and 1:N connections. The NT Link has more efficient communications than Host Link and its capabilities are especially apparent in applications with multiple PTs connect to the PLC. The NS-series PTs can also support communications with multiple PLCs and multiple NS-series PTs through Controller Link and Ethernet connections, so the network can be configured freely to match the requirements and scale of the application. In addition, using the NS-Runtime makes it possible to monitor machine status and log data from the host.

1 Serial connection

1:1 NT Link or Host Link

- NS:PLC = 1:1

Connecting with the PLC through port A or port B

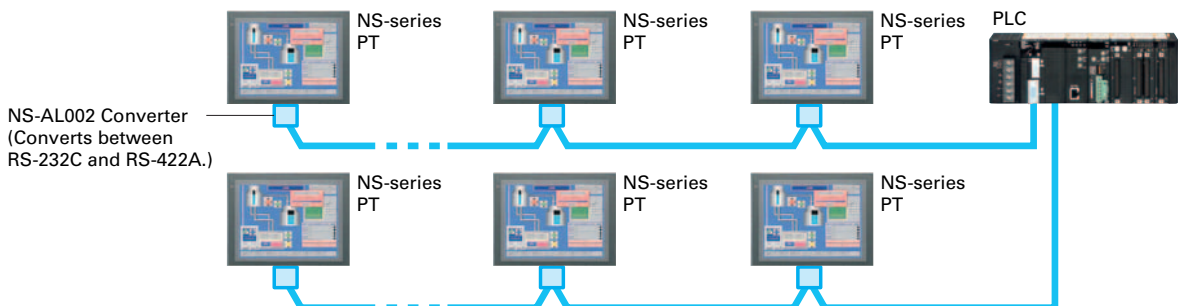

- NS:PLC = 1:2

1:N NT Link

- NS:PLC ratio = 8:1 max. Up to 8 NS-series PTs can be connected to each of the PLC's RS-232C/RS-422A ports.

NS-Runtime

Achieve machine/line monitoring and data logging on your office computer.

Note: To convert screens from an NS-series PT, the system version must be 8.1 or lower. Screens with system version 8.2 cannot be converted to NS-Runtime.

Machine Viewer

Machine monitoring in an office environment.

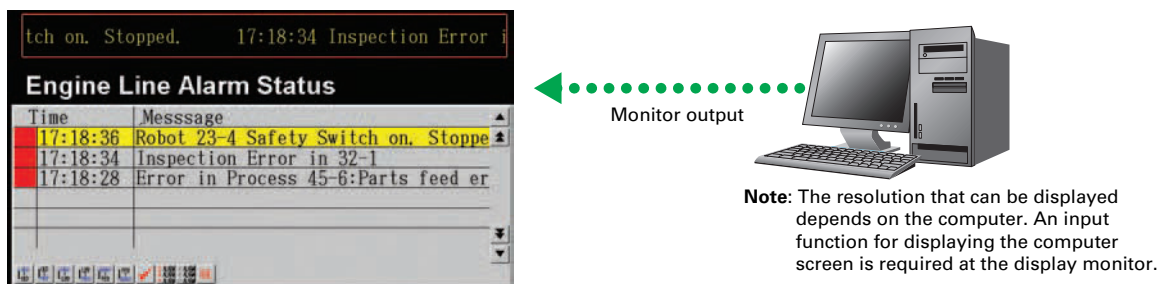

There is no need to create complex host applications. Moreover, when an alarm occurs, a PDF file can be displayed as maintenance information. NS Series screens can be reused on the computer, and screens can be also newly created independently of touch panels at the production site.

Wide Screen

Computer output can be displayed on another wide-screen monitor.

XGA (1,024 x 768 dots) and up to a maximum screen size of 3,840 x 2,400 is supported. Alarms occurring in devices or the line can be monitored.

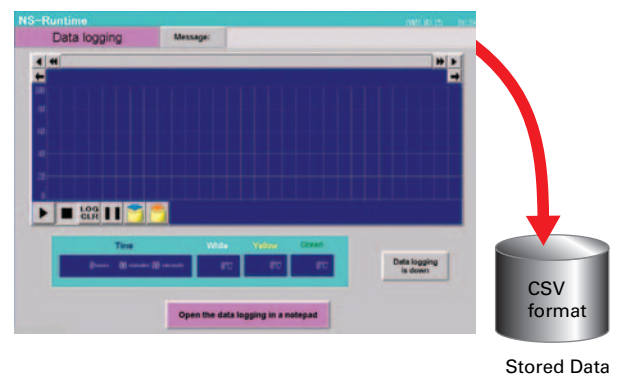

Data Logger

Log large amounts of data using a personal computer.

Data can be logged through background processing, with up to 160,000 points stored in one file. The logged data is stored in CSV format, and data can be displayed on data log graphs.

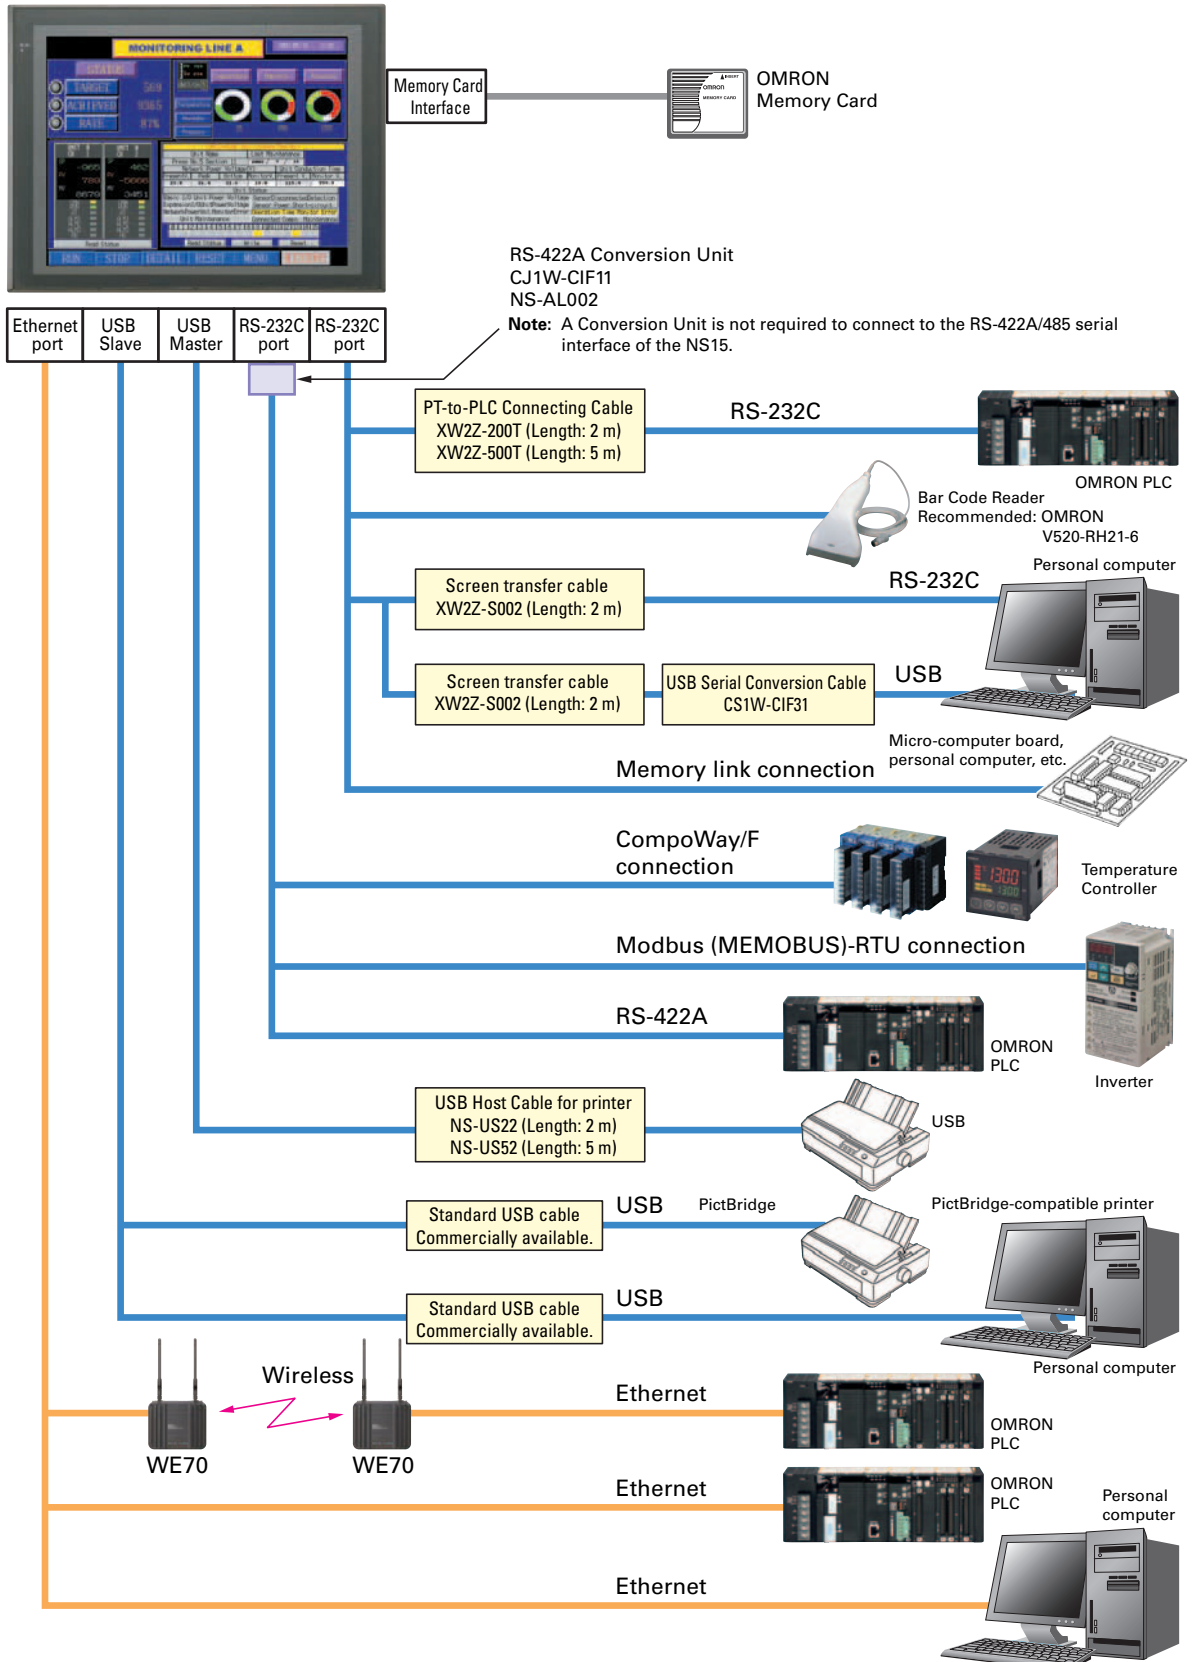

Example: 160,000 Points

Data can be logged for approximately 7.4 days, assuming data is logged every two seconds for 12 hours a day. By using automatic file saving, data logging can be continued even longer than 7.4 days.

System Configuration

System Configuration Diagram

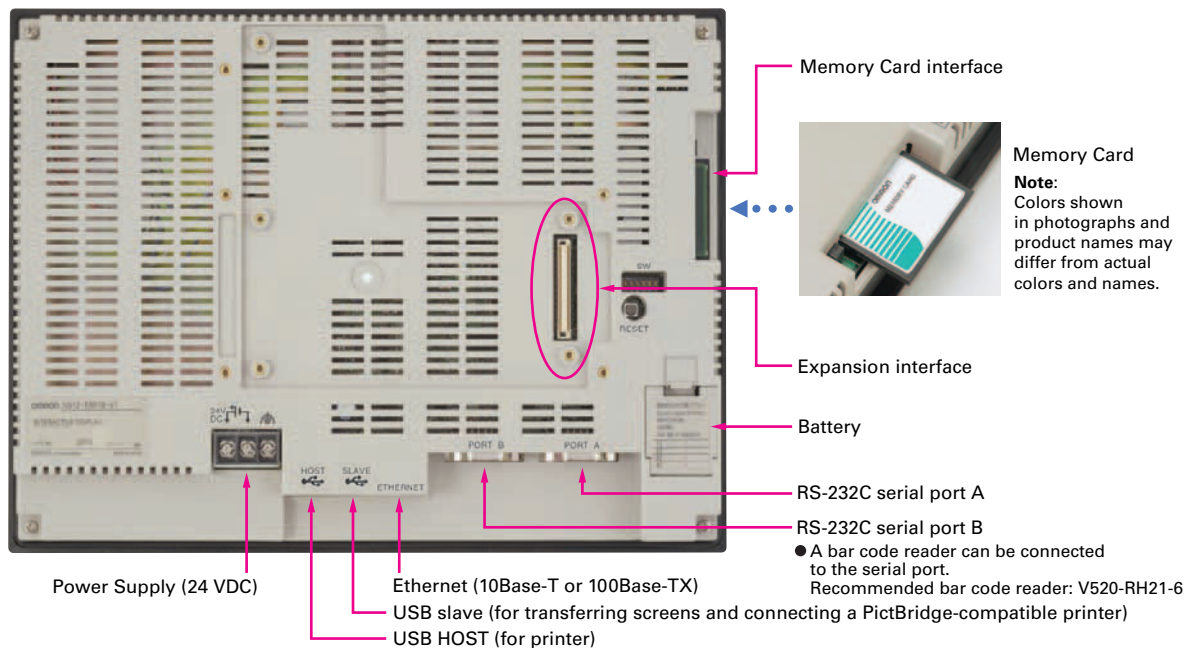

Component Names and Options

High-reliability and Advanced Functions in the Industry's Slimmest PT

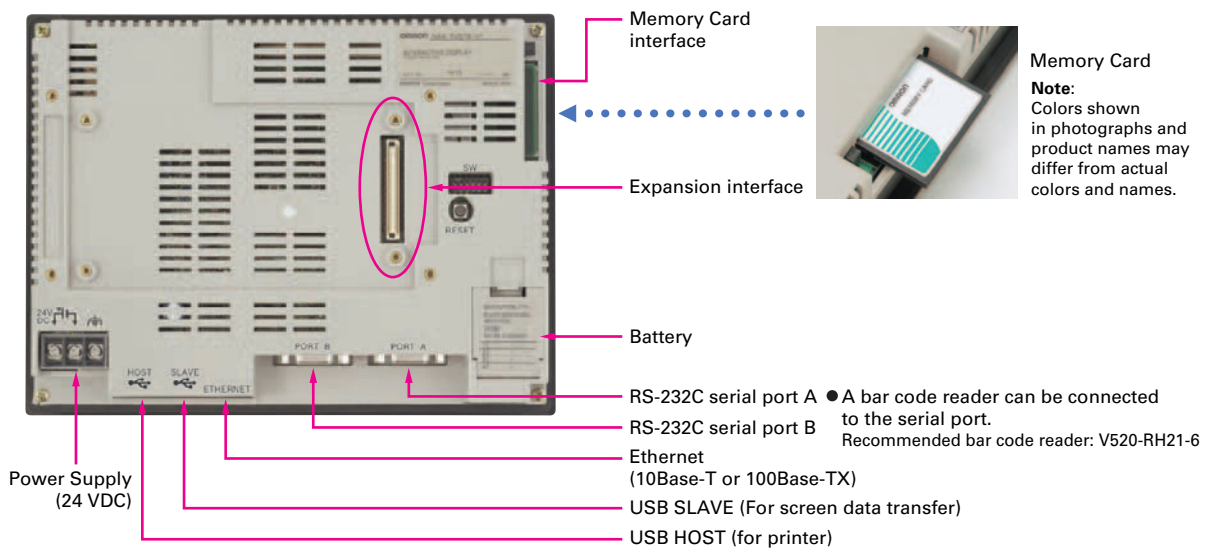

Super-thin 48.5-mm Body for a Slimmer Control Panel

This thin-profile model has few protrusions so it can be incorporated easily into a panel or machine. The PT can help save space when space is at a premium.

■ NS12, NS10

■ NS8

● Built-in Expansion Interface

The NS-series PTs have a built-in Expansion Interface for future expandability.

● USB Ports

A printer can be connected to the USB port. Refer to page 49 for recommended printers.

NSH5 Series

A hand-held version of the NS5 is now available to perform operations at the production site. The NS-series PT's have a complete set of functions that can be used at the production site, such as the SAP Library, multi-language support, and Programming Console functions.

Function Switches
Use the ten functions switches.
F1, F2, F6, F7: Wired outputs
F3 to F5, F8 to F10: Communications outputs

Memory Card Interface and USB Slave Connector.
Easily transfer screens or save logs at high speed using a USB connection.

Emergency Stop Switch.
3PST-NC Structure
DPST-NC: Increase safety (wired outputs).
SPST-NC: Input to internal NSH5 memory, output to a lamp for emergency stop switch operation, or output via communications, e.g., to a PLC.

Water Resistance to IP65
The water-resistant structure is equivalent to IP65 on all surfaces.
Note: The PT may not be suitable for use in environments with long-term water exposure.

PT and Cable Sold Separately
Select the Cable according to the application (RS-232C/RS-422A).
Connector-loose wires, UL connector, 3 m or 10 m.

3-Position Enable Switch
Increased safety with DPST-NO structure (wired outputs).

● Precautions for Emergency Stop Switches

When using a hand-held NSH5 that will be installed and removed from a control panel or Removable Box, always use the specified Stop Switch (Gray/NSH5-SQG10B-V2) to conform to Safety Standards (EN 60204-1).

● Options

■ Removable Box

A separate external circuit is not required because the Removable Box has been configured so that the emergency stop switch line will not turn OFF (i.e., so that the emergency stop circuit will operate) even when the NSH5 is removed.

■ Visor

Use when the NSH5 is in direct sunlight. Installing a visor also helps protect the Emergency Stop Switch and prevents improper operation from occurring inadvertently when the PT is put down.

■ Mounting Bracket

Use to attach the NSH5 to a control panel.

				Black (Stop button: Gray)	NSH5-SQG10B-V2			

Note: As of July 2008, the image memory has been increased to 60 MB.

■ NS-Runtime

Product name	Specifications	Media	Model number	Standards	
NS-Runtime	NS-Runtime Installer, PDF manual, hardware key (See note.)	1 license	CD	NS-NSRCL1	---
		3 licenses		NS-NSRCL3	
		10 licenses		NS-NSRCL10	

Note: A hardware key (USB dongle) is required for NS-Runtime operation.

● System Requirements

Item	Specifications
OS	Windows XP (Service Pack 3 or higher), Vista, or 7 (Support 64-bit version for only Windows 7.)
CPU	Celeron, 1.3 GHz or higher (Recommended)
Memory size	HDD: 50 MB min., RAM: 512 MB min. (Windows 7: 1 GB min.). 50 MB is required for the Runtime alone. (An additional 280 MB is required if CX-Server is not already installed.)

■ Programming Devices

Model name	Specifications	Number of licenses	Media	Model number	Standards
CX-One FA Integrated Tool Package Ver. 4.□	The CX-One is a comprehensive software package that integrates Support Software for OMRON PLCs and components. CX-One runs on the following OS. OS: Windows XP (Service Pack 3 or higher), Vista or 7. Note: Except for Windows XP 64-bit version. CX-One Ver.4.□ includes CX-Designer Ver.3.□. For details, refer to the <i>CX-One catalog</i> (Cat. No. R134).	1 license (See note 2.)	DVD (See note 3.)	CXONE-AL01D-V4	---
	The CX-Designer can also be ordered individually using the following model number.				
CX-Designer Ver.3.□	Screen Designer for NS Series OS: Windows XP (Service Pack 3 or higher), Vista or 7. Note: Except for Windows XP 64-bit version. The Ladder Monitor Software is included with CX-Designer version 3.□. Note: The Ladder Monitor Software is used to monitor CS/CJ/CP-series PLC ladder programs from an NS-series PT. A Memory Card and Memory Card Adapter (both sold separately) are required to use the Ladder Monitor Software with the NS8-V1, NS10-V1, or NS12-V1, or with the NS8-V2, NS10-V2, or NS12-V2 with system program version 6.6 or lower.	1 license	CD	NS-CXDC1-V3	---

Note 1. CX-Designer version 3.008 or higher is required to use the NS15. Users who purchase CX-One version 3.□ can use the auto-update to update the version.

2. Multi licenses are available for the CX-One (3, 10, 30, or 50 licenses).

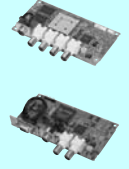

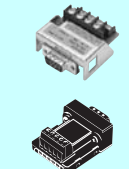

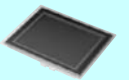

3. The CX-One is also available on CD (CXONE-AL□□-V4).

Standard Models

Model name	Specifications	Model number	Standards
Cable (See note.) 	Screen transfer cable for DOS/V (CX-Designer ↔ PT)	Length: 2 m XW2Z-S002	---
	USB Host Cable (For a printer)	Length: 5 m NS-US52	
	USB Host Cable (For a printer)	Length: 2 m NS-US22	
	USB-Serial Conversion Cable	Length: 0.5 m CS1W-CIF31	N
	USB relay cable	Length: 1 m NS-USBEXT-1M	---
NSH5 Cables	RS-422A cable (loose wires + D-Sub 9-pin)	Length: 10 m NSH5-422CW-10M	
	RS-232C cable (loose wires + D-Sub 9-pin)	Length: 3 m NSH5-232CW-3M	
	RS-232C cable (loose wires + D-Sub 9-pin)	Length: 10 m NSH5-232CW-10M	
UL-compliant NSH5 Cable	RS-422A cable (loose wires)	Length: 10 m NSH5-422UL-10M	CU
	RS-232C cable (loose wires + relay cable)	Length: 3 m NSH5-232UL-3M	
	RS-232C cable (loose wires + relay cable)	Length: 10 m NSH5-232UL-10M	
PT-to-PLC Connecting Cable	PT connection: 9 pins PLC connection: 9 pins	Length: 2 m XW2Z-200T	---
		Length: 5 m XW2Z-500T	
	PT connection: 9 pins PLC peripheral port	Length: 2 m XW2Z-200T-2	
		Length: 5 m XW2Z-500T-2	
NSH5 Removable Box Cable	RS-232C Cable (connectors)	Length: 3 m NSH5-232CN-3M	---
		Length: 10 m NSH5-232CN-10M	
NSH5 Removable Box	---	NSH5-AL001	
NSH5 Wall-mounting Bracket	---	NSH5-ATT02	
NSH5 Visor	---	NSH5-ATT01	

Note: Use an OMRON USB Host Cable to connect an NS-series PT to a printer.
Use a standard USB cable to connect the NS-series PT to a PictBridge-compatible printer.

Options

Model name	Specifications	Model number	Standards	
Video Input Unit 	Inputs: 4 channels Signal type: NTSC/PAL	NS-CA001	UC1, CE	
	Input channels: 2 video channels and 1 RGB channel (See note 1.) Signal type: NTSC/PAL	NS-CA002		
Special Cable for the Console	Cable length: 2 m	F150-VKP (2 m)	---	
	Cable length: 5 m	F150-VKP (5 m)		
Controller Link Interface Unit 	For Controller Link Communications	NS-CLK21	UC1, CE	
RS-422A Adapter 	Transmission distance: 500 m total length Note: Use this model when connecting PT models without a V□ suffix. Note: PT models with the V□ suffix can also be connected.	NS-AL002	---	
	Transmission distance: 50 m total length Note: Only PT models with a suffix of V□ are connectable. Use the NS-AL002 to connect models without a V□ suffix.	CJ1W-CIF11	UC1, N, L, CE	
Sheet/Cover (See note 2.) 	Anti-reflection Sheets (5 surface sheets)	NS15	NS15-KBA04	---

Backlight <small>Note: Contact your nearest OMRON representative to replace the backlight.</small>	Service life	50,000 hours min.				75,000 hours min.				50,000 hours min.				Note: This is the estimated time before brightness is reduced by half at room temperature and humidity. It is not a guaranteed value. The service life will be dramatically shortened if PT is used at low temperatures. For example, using the PT at temperatures of 0°C will reduce the service life to approximately 10,000 hours (reference value).			
	Brightness adjustment	There are 3 levels that can be set with the touch panel. Note: The brightness cannot be adjusted much.				Three-level or 32-level brightness adjustment from the touch panel screen. Note: 32-level adjustment is supported from the LotNo.15Z0.				There are 3 levels that can be set with the touch panel. Note: The brightness cannot be adjusted much.							
	Backlight error detection	Error is detected automatically, and the RUN indicator flashes green as notification. Note: This function does not indicate that the service life has been reached. It detects when the backlight is not lit due to a disconnection or other errors. Backlight error detection indicates that all backlights (2) are OFF.															
Touch panel (matrix type)	Method	Matrix resistive membrane															
	Number of switches/resolution	300 (20 horizontal × 15 vertical) 16 × 16 dots for each switch												768 (32 horizontal × 24 vertical) 20 × 20 dots for each switch			
	Input	Pressure-sensitive															
	Service life	1,000,000 touch operations.															
Display text	Labels	Can be specified in CX-Designer. Font, style, and size can be specified.															
	Numerals, alarms, and character strings	Scalable Gothic: Magnification: 6 to 255 points Rough: Magnification: 1 × 1, 1 × 2, 2 × 1, 2 × 2, 3 × 3, 4 × 4, 8 × 8 Standard: Magnification: 1 × 1, 1 × 2, 2 × 1, 2 × 2, 3 × 3, 4 × 4, 8 × 8 Fine: Magnification: 1 × 1, 1 × 2, 2 × 1, 2 × 2, 3 × 3, 4 × 4, 8 × 8 7-segment display: Can display only numerals, dates, and times.															
	Supported languages (42 languages)	Scalable Gothic, rough, standard, and fine can be used for 42 languages. Japanese, simplified Chinese, traditional Chinese, Korean, English, French, German, Italian, Portuguese, Spain, Swedish, Dutch, Finnish, Norwegian, Basque, Catalan, Danish, Albanian, Croatian, Czech, Hungarian, Polish, Romanian, Slovak, Slovenian, Bulgarian, Belarusian, Russian, Serbian, Macedonian, Ukrainian, Georgian, Icelandic, Afrikaans, Faroese, Indonesian, Greek, Turkish, Estonian, Latvian, Lithuanian, Thai (supported only with scalable Gothic font)															
Text attributes	Color	Monochrome, 16 gradations				256 colors											
	Font style (only when vector font is specified)	Bold or italic															
	Vertical alignment	Top, center, or bottom															
	Horizontal alignment	Left-justified, centered, or right-justified															
Flicker	Objects supporting flicker	Functional objects: Select from up to 10 types of registered flicker settings. The flicker speed and flicker range can be set. Fixed objects: Select from three flicker types.															

Note 1. NS5-TQ series (high luminance TFT) luminance is better than that of NS5-SQ series by about 110cd/m².

Performance/Specifications

Series		NS5-V2		
Type		5.7-inch Monochrome STN	5.7-inch Color	5.7-inch Color (High-luminance)
Numerical units and scale settings		1,000 max.		
Alarm/event settings		5,000 max.		
Memory Card	Interface	One ATA-Compact Flash interface slot		
	Functions	Used to transfer and store screen data, store logging data, and store history data. (Alarm/Event History, Operation Log, and Error Log generated during Macro execution).		
Expansion interface		For Expansion Interface Units		
Serial Communications	Port A	Connector	Conforms to EIA RS-232C. D-Sub female 9-pin connector 5-V output (250 mA max.) through pin 6 (See note.) Note: The 5-V outputs of serial ports A and B cannot be used at the same time.	
		Functions	Host (PLC) access: 1:N NT Links (connections with CS/CJ/CP-series PLCs and C200HX/HG/HE(-Z) PLCs), 1:1 NT Links, or Host Link (connections with C Series or CVM1/CV-series PLCs) Direct access to Temperature Controllers using Smart Active Parts: CompoWay/F and bar code reader connections (Read directly from display.)	
	Port B	Connector	Conforms to EIA RS-232C. D-Sub female 9-pin connector 5-V output (250 mA max.) through pin 6 (See note.) The 5-V outputs of serial ports A and B cannot be used at the same time. Note: The 5-V outputs of serial ports A and B cannot be used at the same time.	
		Functions	Host (PLC) access: 1:N NT Links (connections with CS/CJ/CP-series PLCs and C200HX/HG/HE(-Z) PLCs) or 1:1 NT Links (connections with C Series or CVM1/CV-series PLCs) Direct access to Temperature Controllers using Smart Active Parts: CompoWay/F and bar code reader connections (Read directly from display.)

General Specifications

Series		NS5-V2		
Type		5.7-inch Monochrome STN	5.7-inch Color	5.7-inch Color (High-luminance)
Rated power supply voltage		24 VDC		
Allowable voltage range		20.4 to 27.6 VDC (24 VDC ±15%)		
Power consumption		25 W max. (15 W max. for the NS5)		
Ambient operating temperature		0 to 50°C (See note on the next page.) Note: The ambient operating temperature is subject to the following restrictions according to the mounting angle. Mounting angle of 0 to 30° to the horizontal: •When no Expansion Units are mounted, the operating temperature range is 0 to 45°C. •When a Video Input Unit or a Controller Link Interface Unit is mounted, the ambient operating temperature is 0 to 35°C. Mounting angle of 30 to 90° to the horizontal: Operating temperature range of 0 to 50°C		
Storage temperature		-20 to 60°C (See note on the next page.)		
Ambient operating humidity		35 to 85% (0 to 40°C) 35 to 60% (40 to 50°C) (with no condensation)		
Operating environment		No corrosive gases.		
Noise immunity		Conforms to IEC61000-4-4, 2 kV (power lines).		
Vibration resistance (during operation)		10 to 57 Hz, 0.075 mm amplitude, 57 to 150 Hz, 9.8 m/s ² 30 min each in X, Y, and Z directions		
Shock resistance (during operation)		147 m/s ² 3 times each in direction of X, Y, and Z		
Weight		1.0 kg max.		
Degree of protection		Front operating panel: Equivalent to IP65 oil-proof type and NEMA4 UL type 4. (Only to NS5) Note: May not be applicable in locations with long-term exposure to oil.		
Ground		Ground to 100 Ω or less.		
Battery life		5 years (at 25°C): Replace battery within 5 days after the battery runs low (indicator lights orange).		
Applicable standards		Certified for conformance to UL 508, UL 1604, EMC Directive, NK, and LR Standards.		

Note: Operate the PT within the temperature and humidity ranges shown in the right diagram.

Performance/Specifications

Series	NSH5-V2	
Type	5.7-inch Color TFT (Hand-held Version)	
Appearance	 <p>Emergency stop button (Red)</p>	 <p>Stop button (Gray)</p>
Case color	Black	
Built-in Ethernet port	No	
Model number	NSH5-SQR10B-V2 (Emergency stop button: Red)	NSH5-SQG10B-V2 (Stop button: Gray)
Rated power supply voltage	24 VDC	
Allowable voltage range	20.4 to 27.6VDC (24 VDC \pm 15%)	
Power consumption	10 W max.	
Ambient operating temperature	0 to 40°C	
Storage temperature	-20 to 60°C	
Ambient operating humidity	35% to 85% (0 to 40°C) with no condensation	
Operating environment	No corrosive gases.	
Noise immunity	Common mode: 1,000 Vp-p (between power supply terminals and panel) Normal mode: 300 Vp-p Pulse width: 100 ns to 1 μ s, Rise time: 1-ns pulse	
Vibration resistance (during operation)	10 to 57 Hz, 0.075 mm amplitude, 57 to 150 Hz, 9.8 m/s ² 30 min each in X, Y, and Z directions	
Shock resistance (during operation)	147 m/s ² 3 times each in direction of X, Y, and Z	
Weight	1 kg max.	
Degree of protection	Equivalent to IP65.	
Ground	Ground to 100 Ω or less.	
Battery life	5 years (at 25°C): Replace battery within 5 days after the battery runs low (indicator lights orange).	
Applicable standards	Certified for conformance to UL 508, EMC Directive, and EN 60204-1.	

■ Supported PLCs

● Link Connection

PLC series	PLC model name	Model number	Specifications
C Series	CQM1	CQM1-CPU□□-V1	With RS-232C connector (9-pin type)
	CQM1H	CQM1H-CPU□□	
	CPM1	CPM1-□□CDR-□+CPM1-CIF01	Connect to peripheral port.
	CPM1A	CPM1A-□□CD□-□+CPM1-CIF01	
	CPM2A	CPM2A-□□CD□□-□+CPM1-CIF01	Connect to RS-232C or peripheral port.
	CPM2C	CPM2C-10/20□□□□□□-□ (See note 2.)	
	C200HS	C200HS-CPU□□	With RS-232C connector (9-pin type)
	C200HE(-Z)	C200HE-CPU□□(-Z) (See note 3.)	
C200HG(-Z)	C200HG-CPU□□(-Z) (See note 3.)		
C200HX(-Z)	C200HX-CPU□□(-Z) (See note 3.)		
CVM1/CV Series	CV500/1000/2000	CV500/1000/2000-CPU□□-V1	With RS-232C connector (switching/9-pin type)
	CVM1	CVM1-CPU□□-V2	

Note 1. NS-Runtime is supported for only the CS/CJ/CP/CV-series PLCs (Peripheral Bus (toolbus), Host Link, and Ethernet) and the CJ2 (Peripheral Bus (toolbus) and Ethernet). It is not supported for an EtherNet/IP connection.

- Use an Adapter Cable (CPM2C-CN111 or CS1W-CN114/118), CPM1-CIF01 RS-232C Adapter, or CPM1-CIF11 RS-422A Adapter to connect.
- A C200HW-COM02(-V1), C200HW-COM04(-V1), C200HW-COM05(-V1), or C200HW-COM06(-V1) Communications Board is required.

● 1:N NT Link Connection

PLC series	PLC model name	Model number	Specifications
CS series	CS1G	CS1G-CPU□□(-V1) (See note 2.)	With RS-232C connector (9-pin type)
		CS1G-CPU□□H (See note 2.)	
	CS1H	CS1H-CPU□□(-V1) (See note 2.)	
		CS1H-CPU63H/CPU64H/CPU65H/CPU66H/CPU67H (See note 2.)	
CS1D	CS1D-CPU□□H (See note 2.)		
CJ series	CJ1G	CJ1G-CPU□□H (See note 3.)	
	Loop-control CPU Unit	CJ1G-CPU□□P	
	CJ1H	CJ1H-CPU□□H (See note 3.)	
	CJ1M	CJ1M-CPU□□ (-ETN)	
	CJ2H	CJ2H-CPU64/CPU65/CPU66/CPU67/CPU68(-EIP)	
CP series	CJ2M	CJ2M-CPU1□	Mount CP1W-CIF01/CIF11/CIF12 Serial Option Board.
	CJ2M	CJ2M-CPU3□	
	CP1H	CP1H-□□ (See note 4.)	
C series	CP1L	CP1L-M□□/L□□ (See note 4.)	With RS-232C connector (switching/9-pin type)
	CP1E	CP1E-N□□□□-□ (See notes 4 and 5.)	
	CQM1H	CQM1H-CPU61/51 with a CQM1H-SCB41 Serial Communications Board	
C series	C200HE(-Z)	C200HE-CPU32(-Z) (See note 6.)/CPU42(-Z)	
	C200HG(-Z)	C200HG-CPU33(-Z) (See note 6.)/CPU43(-Z)/CPU53(-Z) (See note 6.)/CPU63(-Z)	
	C200HX(-Z)	C200HX-CPU34(-Z) (See note 6.)/CPU44(-Z)/CPU54(-Z) (See note 6.)/CPU64(-Z)/CPU65-Z/CPU85-Z	
	C200HX(-Z)	C200HX-CPU34(-Z) (See note 6.)/CPU44(-Z)/CPU54(-Z) (See note 6.)/CPU64(-Z)/CPU65-Z/CPU85-Z	

Note 1. NS-Runtime is supported for only the CS/CJ/CP/CV-series PLCs (Peripheral Bus (toolbus), Host Link, and Ethernet) and the CJ2 (Peripheral Bus (toolbus) and Ethernet).

- Connection is also possible to a CS1W-SCB□□-V1 Serial Communications Board or CS1W-SCU□□-V1 Serial Communications Unit.
- Connection is also possible to the CJ1W-SCU□□-V1 Serial Communications Unit.
- SPMA via a PLC is not supported when a CP-series PLC is connected. (SPMA via an NS-series PT is supported with a CP-series PLC.)
- The machine monitor function and switch box function are not supported when a CP1E PLC is connected.
- A C200HW-COM02/COM04/COM05/COM06(-V1) Communications Board is required.

● Connecting by Host Link

PLC series	PLC model name	Model number	Specifications
C series	CPM1	CPM1-□□CDR-□/CPM1A-□□CD□-□	RS-232C or RS-422A adapter connected to peripheral port
	CPM2A	CPM2A-□□CD□□-□	With RS-232C connector (9-pin type)
	CPM2C	CPM2C-10/20□□□□□□-□	Communications connectors include both a peripheral port and RS-232C port (branching possible through CPM2C-CN111 Conversion Cable). Used as separate peripheral and RS-232C ports through CS1WCN114/118 Conversion Cable.
	CQM1	CQM1-CPU□□-V1	With RS-232C connector (9-pin type)
	CQM1H	CQM1H-CPU□□	With RS-232C connector (9-pin type) (CQM1H-CPU11: peripheral port only)
	C200HS	C200HS-CPU□□	With RS-232C connector (switching/9-pin type)
	C200HE(-Z)	C200HE-CPU□□(-Z) (See note 2.)	
	C200HG(-Z)	C200HG-CPU□□(-Z) (See note 2.)	
C200HX(-Z)	C200HX-CPU34 (-Z) (See note 2.)/CPU44 (-Z)/CPU54 (-Z) (See note 2.)/CPU64 (-Z)/CPU65-Z/CPU85-Z		
CS series	CS1G	CS1G-CPU□□(-V1) (See note 3.)	With RS-232C connector (9-pin type)
		CS1G-CPU□□H (See note 3.)	
	CS1H	CS1H-CPU□□(-V1) (See note 3.)	
		CS1H-CPU□□H (See note 3.)	
CJ series	CJ1G	CJ1G-CPU□□H (See note 4.)	
	Loop-control CPU Unit	CJ1G-CPU□□P	
	CJ1H	CJ1H-CPU□□H (See note 4.)	
	CJ1M	CJ1M-CPU□□ (-ETN)	
	CJ2H	CJ2H-CPU64/CPU65/CPU66/CPU67/CPU68(-EIP)	
CP series	CJ2M	CJ2M-CPU1□	Mount CP1W-CIF01/CIF11/CIF12 Serial Option Board.
	CJ2M	CJ2M-CPU3□	
	CP1H	CP1H-□□	
CVM1/CV series	CP1L	CP1L-M□□/L□□	With RS-232C connector (9-pin type)
	CP1E	CP1E-N□□□□-□	
	CV500/1000/2000	CV500-CPU01-V1/CV1000-CPU01-V1/CV2000-CPU01-V1	
CVM1	CVM1-CPU□□-V2	With RS-232C connector (switching/9-pin type)	

Note 1. NS-Runtime is supported for only the CS/CJ/CP/CV-series PLCs (Peripheral Bus (toolbus), Host Link, and Ethernet) and the CJ2 (Peripheral Bus (toolbus) and Ethernet).

- A C200HW-COM02/COM04/COM05/COM06(-V1) Communications Board is required.
- Connection is also possible to a CS1W-SCB□□-V1 Serial Communications Board or CS1W-SCU□□-V1 Serial Communications Unit.
- Connection is also possible to the CJ1W-SCU□□-V1 Serial Communications Unit.

Connectable Devices

● Connecting to Another Company's PLC

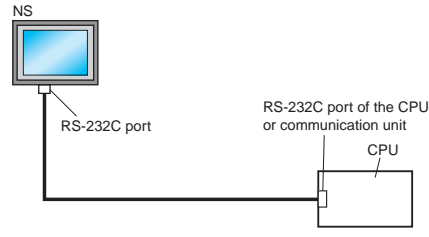

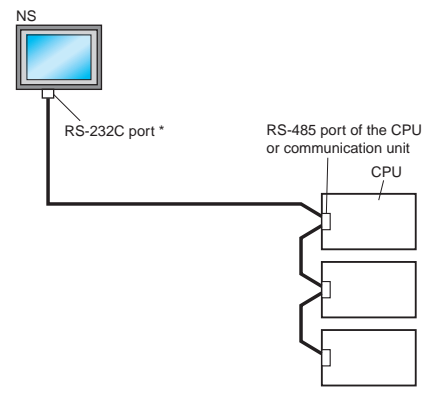

Manufacturer	Series	CPU	Communication Unit/Adapter/Board	Connection diagram	
Mitsubishi Electric	A Series	A1SHCPU A2USCPU A2USHCPU-S1	Computer Link Unit A1SJ71UC24-R□ A1SJ71UC24-PRF		1:1

■ Connectable Motion Controllers

● Trajexia

Series	CPU	Communication Unit	Connection
Trajexia	TJ1-MC16 TJ1-MC04	Ethernet port on the Controller	Ethernet

● Connecting to Another Company's Motion Controllers

Manufacturer	Series	CPU	Communications Unit/Adapter/Board	Connection
Yaskawa Electric	MP900 Series	MP920	(Use the RS-232C port or RS-485 port on the Machine Controller)	<p>RS-232C</p>  <p>1:1</p>
	MP2000 Series	MP2200	Serial Communication Module 2171F-01	<p>RS-485</p>  <p>1:N</p>

■ Connectable Inverters

Series	Communication Unit	Connection
3G3MV (Varispeed)	(Use the RS-422/485 terminal on the Inverter)	RS-422/RS-485 (4-wire)/RS-485 (2-wire)
3G3JV (Varispeed)	3G3JV-PSI485J	

■ Connectable Temperature Controllers

The following Temperature Controllers can be connected directly to an NS-series PT (See note.).

Unit name	Series	Model	Remarks
Modular Temperature Controller	EJ1	EJ1-EDU End Unit	SAP screens are available.
Modular Temperature Controller	E5ZN	E5ZN-SCT24S Terminal Unit	
Digital Controller	E5AR	E5AR-□□□□□□□□-FLK	
	E5ER	E5ER-□□□□□□□□-FLK	
Temperature Controller (Digital Controller)	E5AN/E5EN/E5CN (Basic Model)	E5CN-□□□□□T-FLK Multi-input (Thermocouple/Resistance Thermometer) Type	
		E5CN-□□□□□L-FLK Analog Input Type	
		E5EN-□□□□□T-FLK Multi-input (Thermocouple/Resistance Thermometer) Type	
		E5EN-□□□□□L-FLK Analog Input Type	
		E5AN-□□□□□T-FLK Multi-input (Thermocouple/Resistance Thermometer) Type	
		E5AN-□□□□□L-FLK Analog Input Type	
	E5AN-H/E5EN-H/E5CN-H (Advanced Model)	E5CN-H□□□□□□□□-FLK Universal-input Model	
		E5EN-H□□□□□□□□-FLK Universal-input Model	
		E5AN-H□□□□□□□□-FLK Universal-input Model	
		E5GN	E5GN-□□□□TC-FLK Thermocouple Input Type
		E5GN-□□□□P-FLK Resistance Thermometer Input Type	

Note: The NS-Runtime cannot be connected directly to a Temperature Controller.

Connection Configurations

■ Transferring Screens (Connecting the CX-Designer and PT)

● Connecting to the Computer's RS-232C Port

Use a XW2Z-S002 Cable for screen transfers.

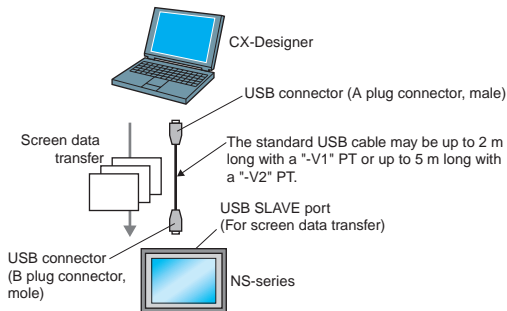

Connecting to the Computer's USB Port

Use a CS1W-CIF31 USB-Serial Conversion Cable and XW2Z-S002 Cable for screen transfers.

A commercially available USB cable can be used as well. *

* Commercially available USB cables cannot be used for the NS main units of which the lot. No. is prior to 0325 (made on Feb. 3, 2005).

● Connecting to the Computer's LAN (Ethernet) Port

Connecting Directly (1:1) to the Computer

Connecting to the Computer through a Hub

Note: An NS-series PT can also connect to a network configured for 10Base-5 when using a hub and transceiver set for 10Base-5 communications.

● Connecting through a PLC

If the PLC is a CS/CJ-series PLC, screen data can be transferred to an NS-series PT through the PLC. *

Using a Serial → Serial Connection

Using an Ethernet → Serial Connection

* Not available for the CPU units of which the lot No. is prior to 03020.

Connection Configurations

■ Operation (Connection between NS-series PT and PLC)

● Using a Serial Connection

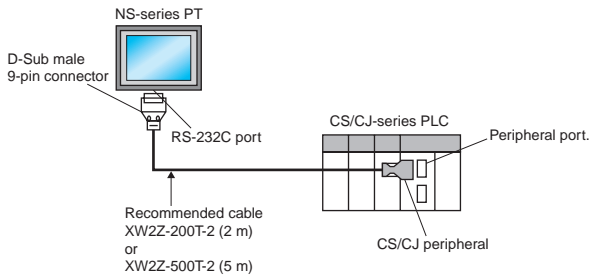

When connecting to a CS/CJ-series PLC's RS-232C port

Use an XW2Z-200T/500T Cable between the PT and PLC.

When connecting to a CS/CJ-series PLC's peripheral port

Use an XW2Z-200T-2/500T-2 Cable between the PT and PLC.

● Using an Ethernet Connection

Connecting Directly (1:1) to the Computer

Connecting to the Computer via a Hub

Note: An NS-series PT can also connect to a network configured for 10Base-5 when using a hub and transceiver set for 10Base-5 communications.

In addition, the NS-series PT can be connected through Controller Link by mounting an NS-CLK21 Controller Link Interface Unit to the PT.

Smart Active Parts (SAP) Library Contents

■ For monitor setting

More than 3,000 Library parts (Smart Active Parts) are available, which can directly access OMRON PLCs and components. The objects can just be pasted from the Smart Active Parts (SAP Library) Library to the screen; it is completely unnecessary to create screens and ladder programming.

The following Smart Active Parts are provided on the CX-One/CX-Designer.

● For CS/CJ CPU Unit

Error Log Monitor, Online Battery Change Button, etc.

● For Serial Communications Boards/Units

Communications Status Displays (Error Monitor), Ports Settings, etc.

● For Ethernet Units/CLK Units

Network Status Displays (Error Monitor and Network Node Status), etc.

● For MC/MCH Unit

JOG Running, Search Zero Position, Program Running, Error Displays, I/O Status Monitor, PV Monitor, etc.

● For NC/NCF Unit

JOG Running, Direct Running, Memory Running (NC Only), Error Displays I/O Status Monitor, PV Monitor, etc.

● For Wireless Terminals for WT30

Monitoring Slave Operating Status in a Wireless Environment

● For Servo (R88D-WT, R7D-AP) (See note 1.)

PV Monitor, Parameter Settings, Error Displays, Driver Information Displays, I/O Status Monitor, etc.

● For Inverters (See note 1.)

Rotation Speed/Monitoring Output Frequency, Other Parameter Settings, etc.

● For DeviceNet DRT2

DRT2 Maintenance/Status Information, IN/OUT Information, etc.

● For Temperature Controllers (E5□R, E5ZN, E5□N, EJ1 and CJ1W-TC) (See note 2.)

Operation Monitor, PID Settings, SP Settings, Alarm Settings, Input Shift Settings, etc.

● For Sensors (E3X-DRT)

Threshold Settings, Monitoring Light Reception Levels, etc.

● For the SmartSlice GRT1 Series

Communications Unit Status, Warning/Alarm Flags, Network Joining/Leaving Status

● For CompoNet

Master/Slave Monitor, Maintenance Information, Analog I/O Monitor, IN/OUT Information Monitor, etc.

● For Multi-point Power Controllers (G3ZA)

Process Variable Read, Status Read, Heater Current Read, Manipulated Variable Write, etc.

● For NE1A Safety Network Controllers and DST1 Safety I/O Terminals

Maintenance Information, IN/OUT Information Monitor, Error Status Information, etc.

Note 1. Smart Active Parts require a Serial Communications Units/Boards (version 1.2 or later).

Note 2. The NS-Runtime cannot be connected directly to a Temperature Controller.

■ For Troubleshooter

A Troubleshooter SAP Library is available to troubleshoot each Unit in the PLC. When an error occurs in a Unit, the Troubleshooter SAP Library provides an easy-to-understand explanation of the cause of the error as well as the countermeasures.

The CX-One/CX-Designer includes the following Troubleshooter SAP library as standard.

● DeviceNet unit

● NC unit

● NCF unit

● Standard I/O unit

● Analog Input / Output / I/O unit

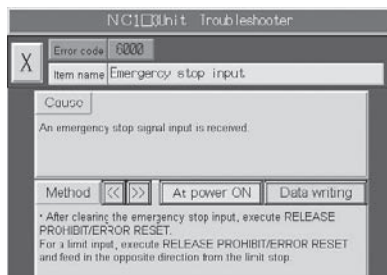

● SCU unit

● High speed counter unit

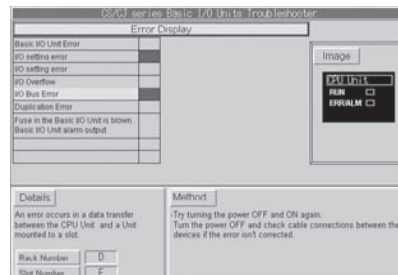

● CLK unit

● ID sensor unit

Troubleshooter SAP for a Position Control Unit

Troubleshooter SAP for Basic I/O Unit

Ordering Information

● International Standards

- The standards are abbreviated as follows: U: UL, U1: UL (Class I Division 2 Products for Hazardous Locations), C: CSA, UC: cULus, UC1: cULus (Class I Division 2 Products for Hazardous Locations), CU: cUL, N: NK, L: Lloyd, and CE: EC Directives.
- Contact your OMRON representative for further details and applicable conditions for these standards.

● EC Directives

The EC Directives applicable to PTs include the EMC Directives. OMRON complies with these directives as described below.

● EMC Directives

Applicable Standards EMI: EN61131-2
EN61000-6-4
EMS: EN61131-2
EN61000-6-2

PTs are electrical devices that are incorporated in machines and manufacturing installations. OMRON PTs conform to the related EMC standards so that the devices and machines into which they are built can more easily conform to EMC standards. The actual PTs have been checked to ensure conformity to EMC standards. Whether these standards are satisfied for the actual system, however, must be checked by the customer.

EMS-related performance will vary depending on the configuration, wiring, and other conditions of the equipment or control panel in which the PT is installed. The customer must, therefore, perform final checks to confirm that the overall machine or device conforms to EMC standards.

The applicable EMS standards depends on the product.

Read and Understand this Catalog

Please read and understand this catalog before purchasing the product. Please consult your OMRON representative if you have any questions or comments.

Warranty and Limitations of Liability

WARRANTY

OMRON's exclusive warranty is that the products are free from defects in materials and workmanship for a period of one year (or other period if specified) from date of sale by OMRON.

OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, REGARDING NON-INFRINGEMENT, MERCHANTABILITY, OR FITNESS FOR PARTICULAR PURPOSE OF THE PRODUCTS. ANY BUYER OR USER ACKNOWLEDGES THAT THE BUYER OR USER ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE. OMRON DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED.

LIMITATIONS OF LIABILITY

OMRON SHALL NOT BE RESPONSIBLE FOR SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED ON CONTRACT, WARRANTY, NEGLIGENCE, OR STRICT LIABILITY.

In no event shall the responsibility of OMRON for any act exceed the individual price of the product on which liability is asserted.

IN NO EVENT SHALL OMRON BE RESPONSIBLE FOR WARRANTY, REPAIR, OR OTHER CLAIMS REGARDING THE PRODUCTS UNLESS OMRON'S ANALYSIS CONFIRMS THAT THE PRODUCTS WERE PROPERLY HANDLED, STORED, INSTALLED, AND MAINTAINED AND NOT SUBJECT TO CONTAMINATION, ABUSE, MISUSE, OR INAPPROPRIATE MODIFICATION OR REPAIR.

Application Considerations

SUITABILITY FOR USE

OMRON shall not be responsible for conformity with any standards, codes, or regulations that apply to the combination of the product in the customer's application or use of the product.

Take all necessary steps to determine the suitability of the product for the systems, machines, and equipment with which it will be used.

Know and observe all prohibitions of use applicable to this product.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

PROGRAMMABLE PRODUCTS

OMRON shall not be responsible for the user's programming of a programmable product, or any consequence thereof.

Disclaimers

CHANGE IN SPECIFICATIONS

Product specifications and accessories may be changed at any time based on improvements and other reasons. Consult with your OMRON representative at any time to confirm actual specifications of purchased product.

DIMENSIONS AND WEIGHTS

Dimensions and weights are nominal and are not to be used for manufacturing purposes, even when tolerances are shown.

PERFORMANCE DATA

Performance data given in this catalog is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of OMRON's test conditions, and the users must correlate it to actual application requirements. Actual performance is subject to the OMRON Warranty and Limitations of Liability.

Note: Do not use this document to operate the Unit.
