NX-series Analog I/O Unit NX-AD/DA

CSM NX-AD DA DS E 1 1

Analog inputs and outputs to meet all machine control needs, from general purpose to high-speed synchronous control

- Connect to other NX I/O Units and EtherCAT® Coupler Units using the high-speed NX-bus
- Separate modules for voltage and current

Features

- Up to eight analog inputs per unit (NX-AD)
- Up to four analog outputs per unit (NX-DA)
- Free-run refreshing or synchronous I/O refreshing with the NX1P2 CPU Unit or EtherCAT Coupler Unit
- Sampling times down to 10 μs per channel and high resolution of 1/30,000
- Single-ended or differential input (NX-AD)
- Selecting channel to use, moving average, input disconnection detection, over range/under range detection, and user calibration
- Detachable front connector with screwless Push-In Plus terminals for easy installation and maintenance
- Compact with a width of 12 mm per unit
- Connect to the CJ PLC using the EtherNet/IP[™] bus coupler

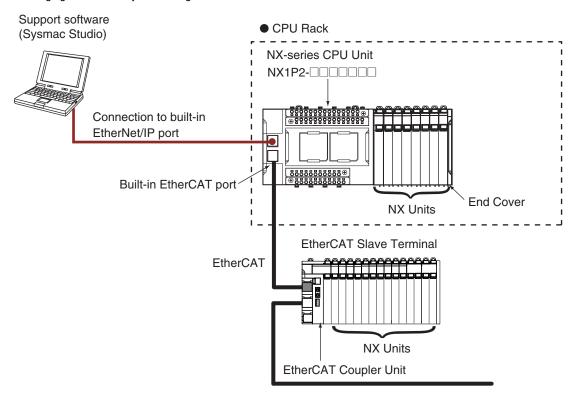

Sysmac is a trademark or registered trademark of OMRON Corporation in Japan and other countries for OMRON factory automation products. EtherCAT® is a registered trademark and patented technology, licensed by Beckhoff Automation GmbH, Germany. EtherNet/IPTM is a trademark of ODVA.

Other company names and product names in this document are the trademarks or registered trademarks of their respective companies.

System Configurations

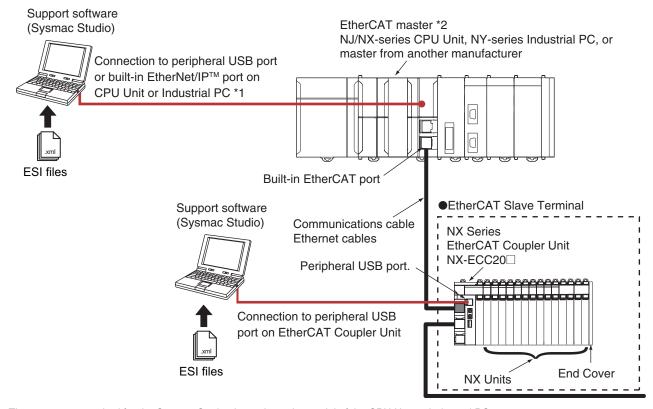

Connected to a CPU Unit

The following figure shows a system configuration when NX Units are connected to an NX-series CPU Unit.

Connected to an EtherCAT Coupler Unit

The following figure shows an example of the system configuration when an EtherCAT Coupler Unit is used as a Communications Coupler Unit.

- *1. The connection method for the Sysmac Studio depends on the model of the CPU Unit or Industrial PC.
- *2. An EtherCAT Slave Terminal cannot be connected to any of the OMRON CJ1W-NC□81/□82 Position Control Units even though they can operate as EtherCAT masters.

Note: To check whether NX Units can be connected to your CPU Unit or Communications Coupler Unit, refer to the user's manual for the CPU Unit or Communications Coupler Unit.

Model Number Structure

(1) Unit type

| No. | Specification | | | | |
|-----|---------------|--|--|--|--|
| AD | Analog input | | | | |
| DA | Analog output | | | | |

(2) Number of points

| No. | Specification | | | | |
|-----|---------------|--|--|--|--|
| 2 | 2 points | | | | |
| 3 | 4 points | | | | |
| 4 | 8 points | | | | |

(3) I/O range

| No. | Specification | | | | |
|-----|---------------|--|--|--|--|
| 1 | | | | | |
| 2 | 4 to 20 mA | | | | |
| 6 | -10 to +10 V | | | | |

(4) Other specifications **Analog Input Units**

| | | | | I/O refreshing method | | | |
|-----|------------|-----------------|--------------|-----------------------------|---|--|--|

General Specifications

| | Item | Specification | | | |
|-----------------------|-------------------------------|--|--|--|--|
| Enclosure | | Mounted in a panel | | | |
| Grounding m | ethod | Ground to 100 Ω or less | | | |
| | Ambient operating temperature | 0 to 55°C | | | |
| | Ambient operating humidity | 10% to 95% (with no condensation or icing) | | | |
| | Atmosphere | Must be free from corrosive gases. | | | |
| | Ambient storage temperature | −25 to 70°C (with no condensation or icing) | | | |
| | Altitude | 2,000 m max. | | | |
| | Pollution degree | 2 or less: Conforms to JIS B3502 and IEC 61131-2. | | | |
| Operating environment | Noise immunity | 2 kV on power supply line (Conforms to IEC61000-4-4.) | | | |
| environment | Overvoltage category | Category II: Conforms to JIS B3502 and IEC 61131-2. | | | |
| | EMC immunity level | Zone B | | | |
| | Vibration resistance | Conforms to IEC 60068-2-6. 5 to 8.4 Hz with 3.5-mm amplitude, 8.4 to 150 Hz, acceleration of 9.8 m/s², 100 min each in X, Y, and Z directions (10 sweeps of 10 min each = 100 min total) | | | |
| | Shock resistance | IConforms to IEC 60068-2-27. 147 m/s², 3 times each in X, Y, and Z directions | | | |
| Applicable sta | andards * | cULus: Listed (UL508), ANSI/ISA 12.12.01, EU: EN 61131-2, C-Tick or RCM, KC Registration, NK, LR | | | |

Version Information

Connected to a CPU Unit

Refer to the user's manual for the CPU Unit details on the CPU Units to which NX Units can be connected.

| NX Unit | | Corresponding versions * | |
|---------|--------------|--------------------------|--------------------|
| Model | Unit version | CPU Unit Sysmac Studio | |
| NX-AD | Ver.1.0 | Ver.1.13 or later | Ver.1.17 or higher |

^{*} Some Units do not have all of the versions given in the above table. If a Unit does not have the specified version, support is provided by the oldest available version after the specified version. Refer to the user's manuals for the specific Units for the relation between models and versions.

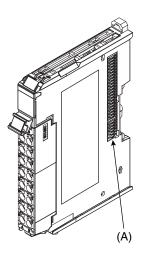

Connected to a Communications Coupler Unit

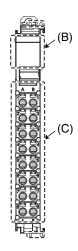

| NX Unit | | Corresponding versions * | | | | | | |
|---------|---------|--------------------------------|---|--------------------|--------------------------------|--------------------|--|--|
| | Unit | | EtherCAT | EtherNet/IP | | | | |
| Model | version | Communications Coupler Unit | NJ/NX-series CPU Unit or NY-series Industrial PC | Sysmac Studio | Communications Coupler Unit | Sysmac Studio | | |
| NX-AD | Ver.1.0 | Ver.1.0 or later | Ver.1.05 or later | Ver.1.06 or higher | Ver.1.0 or later | Ver.1.10 or higher | | |

^{*} Some Units do not have all of the versions given in the above table. If a Unit does not have the specified version, support is provided by the oldest available version after the specified version. Refer to the user's manuals for the specific Units for the relation between models and versions.

External Interface

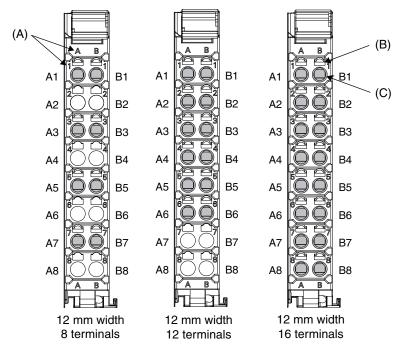

Screwless Clamping Terminal Block Type 12 mm Width

| Letter | Item | Specification | | | |
|--------|------------------|---|--|--|--|
| (A) | NX bus connector | This connector is used to connect to another Unit. | | | |
| (B) | Indicators | The indicators show the current operating status of the Unit. | | | |
| (C) | Terminal block | The terminal block is used to connect to external devices. The number of terminals depends on the Unit. | | | |

Terminal Blocks

| Letter | Item | Specification |
|--------|----------------------------|---|
| (A) | Terminal number indication | The terminal number is identified by a column (A through D) and a row (1 through 8). Therefore, terminal numbers are written as a combination of columns and rows, A1 through A8 and B1 through B8. The terminal number indication is the same regardless of the number of terminals on the terminal block. |
| (B) | Release hole | A flat-blade screwdriver is inserted here to attach and remove the wiring. |
| (C) | Terminal hole | The wires are inserted into these holes. |

Applicable Terminal Blocks for Each Unit Model

| | Terminal Blocks | | | | | | | |
|------------|------------------------|----|-----------------------------|----------------------|---------------------------|--|--|--|
| Unit model | Model No. of terminals | | Terminal number indications | Ground terminal mark | Terminal current capacity | | | |
| NX-AD2□□□ | NX-TBA082 | 8 | A/B | None | 10 A | | | |
| NX-AD3□□□ | NX-TBA122 | 12 | A/B | None | 10 A | | | |
| NX-AD4□□□ | NX-TBA162 | 16 | A/B | None | 10 A | | | |
| NX-DA2□□□ | NX-TBA082 | 8 | A/B | None | 10 A | | | |
| NX-DA3□□□ | NX-TBA122 | 12 | A/B | None | 10 A | | | |

Applicable Wires

Using Ferrules

If you use ferrules, attach the twisted wires to them.

Observe the application instructions for your ferrules for the wire stripping length when attaching ferrules.

Always use plated one-pin ferrules. Do not use unplated ferrules or two-pin ferrules.

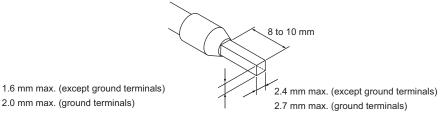

The applicable ferrules, wires, and crimping tool are given in the following table.

| Terminal type | Manufacturer | Ferrule model | Applicable wire (mm² (AWG)) | Crimping tool | | |
|--------------------------|-----------------|---------------|-----------------------------|--|--|--|
| Terminals other | Phoenix Contact | AI0,34-8 | 0.34 (#22) | Phoenix Contact (The figure in parentheses is the applicable wire size.) | | |
| than ground terminals | | AI0,5-8 | 0.5 (#20) | CRIMPFOX 6 (0.25 to 6 mm ² , AWG24 to 10) | | |
| terminais | | AI0,5-10 | | | | |
| | | AI0,75-8 | 0.75 (#18) | | | |
| | | AI0,75-10 | | | | |
| | | AI1,0-8 | 1.0 (#18) | | | |
| | | AI1,0-10 | † | | | |
| | | AI1,5-8 | 1.5 (#16) | | | |
| | | Al1,5-10 | 1 | | | |
| Ground terminals | | Al2,5-10 | 2.0 * | | | |
| Terminals other | Weidmuller | H0.14/12 | 0.14 (#26) | Weidmuller (The figure in parentheses is the applicable wire size.) | | |
| than ground terminals | | H0.25/12 | 0.25 (#24) | PZ6 Roto (0.14 to 6 mm², AWG 26 to 10) | | |
| terminais | | H0.34/12 | 0.34 (#22) | | | |
| | | H0.5/14 | 0.5 (#20) | | | |
| | | H0.5/16 | | | | |
| | | H0.75/14 | 0.75 (#18) | | | |
| | | H0.75/16 | | | | |
| | | H1.0/14 | 1.0 (#18) | | | |
| | | H1.0/16 | | | | |
| | | H1.5/14 | 1.5 (#16) | | | |
| | | H1.5/16 | | | | |

^{*} Some AWG 14 wires exceed 2.0 mm² and cannot be used in the screwless clamping terminal block.

When you use any ferrules other than those in the above table, crimp them to the twisted wires so that the following processed dimensions are achieved.

Finished Dimensions of Ferrules

Using Twisted Wires/Solid Wires

2.0 mm max. (ground terminals)

If you use the twisted wires or the solid wires, use the following table to determine the correct wire specifications.

| Terminals | | Wire type | | | | | 0 | |
|---------------------------------------|-------------------------------------|---------------|----------|-----------------|-------------|--|-------------------------------------|--|
| | | Twisted wires | | Solid wire | | Wire size | Conductor length (stripping length) | |
| Classification | Current capacity | Plated | Unplated | Plated | Unplated | | (outphing longin) | |
| | 2 A or less | | Possible | Possible | Possible | 0.08 to 1.5 mm ² AWG28 to 16 | 8 to 10 mm | |
| All terminals except ground terminals | Greater than 2 A and 4 A or less | Possible | Not | Possible *1 | Not | | | |
| ground terminals | Greater than 4 A | Possible *1 | | Not Possible | Possible | AWG20 to 10 | | |
| Ground terminals | | Possible | Possible | Possible *2 | Possible *2 | 2.0 mm ² | 9 to 10 mm | |

^{*1.} Secure wires to the screwless clamping terminal block. Refer to the Securing Wires in the USER'S MANUAL for how to secure wires.

^{*2.} With the NX-TB□□□1 Terminal Block, use twisted wires to connect the ground terminal. Do not use a solid wire.

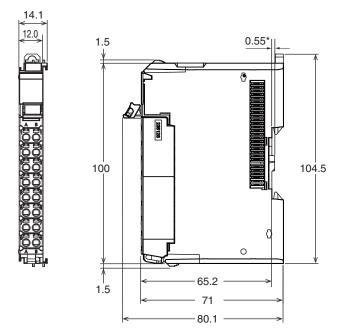

Conductor length (stripping length)

< Additional Information > If more than 2 A will flow on the wires, use plated wires or use ferrules.

Dimensions (Unit/mm)

Screwless Clamping Terminal Block Type

12 mm Width

^{*} The dimension is 1.35 mm for Units with lot numbers through December 2014.

Terms and Conditions Agreement

Read and understand this catalog.

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

Warranties.

- (a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.
- (b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED. ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE

PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.

Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty.

See http://www.omron.com/global/ or contact your Omron representative for published information.

Limitation on Liability; Etc.

OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.

Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

Suitability of Use.

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

Programmable Products.

Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof

Performance Data.

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

Change in Specifications.

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

Errors and Omissions. Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.

2017 2

In the interest of product improvement, specifications are subject to change without notice.
