

OMRON

Created to meet real-world production site needs.

For Easier, More Accurate Quality Contr

We need stable data reading.

We want to improve process changeovers on multi-product lines.

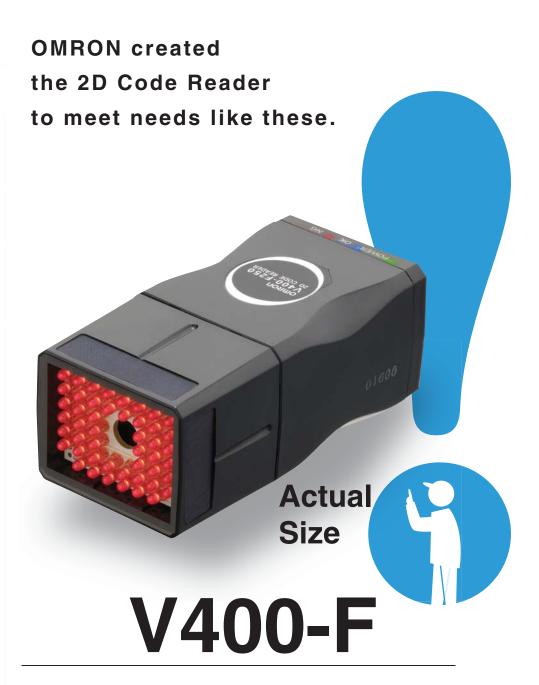

It takes time to make adjustments whenever there's an increase in the number of different workpieces. With direct marking, reading stability can be lowered by the condition of the material or workpiece.

We want to reduce our startup time.

The camera, lens, and lighting changes that are needed for each workpiece lower efficiency.

ol

In the V400-F, we have listened carefully to user demands and worked hard to achieve high levels of simplicity and reliability in a code reader that virtually anybody can install, operate, and adjust.

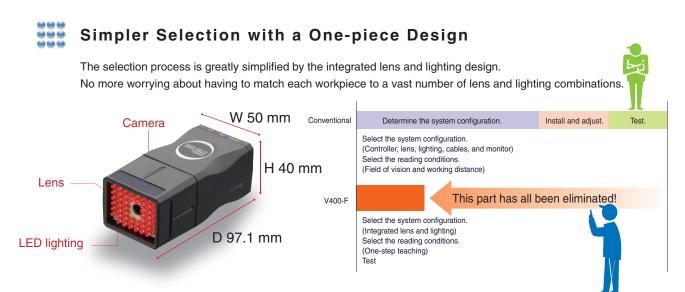

We also pursued highly accurate reading of directly marked 2D codes, in addition to printed codes.

The V400-F is a new 2D Code Reader that makes production sites considerably "smarter" in a wide range of environments.

Simplicity and High Performance in Response to User Needs

Simplified Setup...

For Faster Startups

Easier Initial Adjustments

★ Teaching functions that anybody can use.

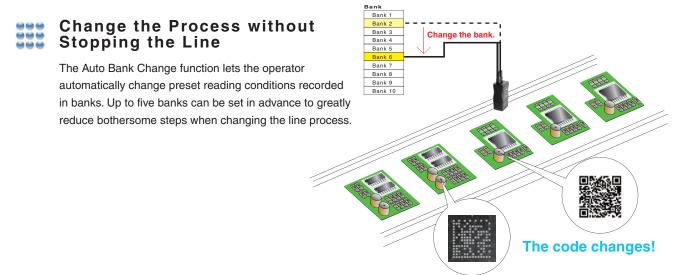

Easy, one-step teaching lets you set the reading parameters instantly. Naturally, adjustments are also possible using commands from external devices.

*Support Software is also available for setting the parameters from a personal computer. (Ask your OMRON representative or dealer for details.)

High Performance...

For Stable Reading

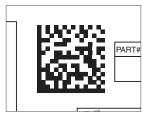

Stable, Accurate Reading for Any Workpiece

We have achieved high accuracy for directly marked codes by combining the industry's most advanced reading algorithm with lighting control that is optimized for data reading. Even directly marked 2D codes printed onto materials with varying reflectivity, such as metals, printed wiring boards, and glass, can be read with excellent accuracy.

Three Types to Choose from for Each Application

There are three 2D Code Readers to choose from to match your application. This enables flexible response to different workpieces and production site conditions. Use the C-mount model when specific settings are necessary for the lighting or lens.

Appea- rance				
Type	Narrow field of vision	Wide field of vision	C-mount	
Model	V400-F250	V400-F350	V400-F050	
Field of vision	14 × 18 mm	31 × 42 mm	On the control of the	
Working distance	100 mm	200 mm	Can be varied using a C-mount lens. External 2-channel	
Cell size *1	0.2 to 0.3 mm	0.4 to 0.7 mm		
Code size *1	2 to 9 mm	4 to 21 mm	lighting. *2	

Sensitive Response to Workpiece Changes

The Retry and Preprocess Filtering functions allow stable reading even under harsh conditions. They eliminate the effects of printing conditions and workpiece changes, such as oil, ambient light, and varying substrate types.

Retry Function

Multiple readings can be taken while changing the exposure time and adjusting the brightness of the light.

Preprocess Filtering Function

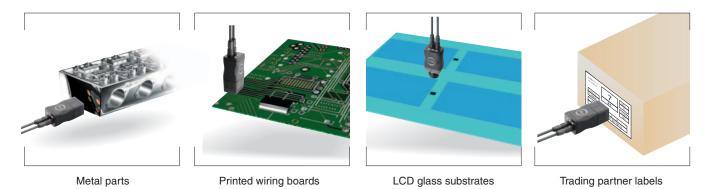

Three of the following four types of filtering can be used for images that have been taken: Smoothing, Dilation, Erosion, and Median.

Ordering Information

■ 2D Code Readers

Name	Model Field of vision			
	V400-F250	14 ´ 18 mm		
Special Lighting Lens	V400-F350	31 ´ 42 mm		
C-Mount	V400-F050	Changes according to the lens.		

Accessories (Order Separately) and Cables

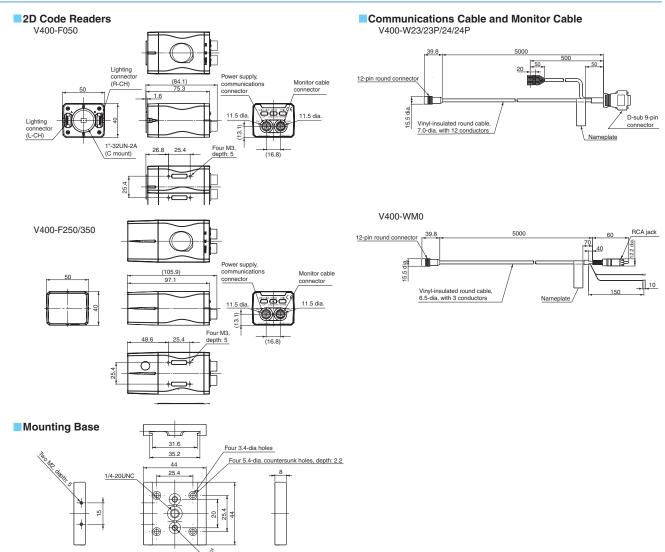

Name	Model	Cable length	Remarks
	V400-W23 5M (NPN)	F ***	For connection to SYSMAC Series
Communications Cable	V400-W23P 5M (PNP)		PLC (includes power line)
Communications Cable	V400-W24 5M (NPN) 5 m		For connection to an IBM PC/AT or
	V400-W24P 5M (PNP)		compatible (includes power line)
Monitor Cable	V400-WM0 5M	5 m	

^{*}Use only the specified cable.

Specifications

Model	V400-F050	V400-F250	V400-F350	
Dimensions	40 ´ 50 ´ 75.3 mm	40 ´ 50 ´ 97.1 mm		
Working distance (WD)	Depends on the lens.	Approx. 100 mm	Approx. 200 mm	
Field of vision	Depends on the lens.	Approx. 14 ´ 18 mm	Approx. 31 ´ 42 mm	
Lighting	Up to two can be directly powered.	Red LED		
Applicable codes	Data Matrix, ECC200, 10 ´ 10 to 64 ´ 64, 8 ´ 18 to 16 ´ 48,			
Applicable dedec	QR Code (Models 1, 2), 21 ´21 to 57 ´57 (Versions 1 to 10)			
Image sensor	1/3" CCD			
Effective pixels	640 ´ 480 pixels			
Power supply voltage	24 VDC ±10%			
Power consumption	0.5 A max. (power consumption for monitor, not included)			
Insulation resistance	20 MΩ min.			
Withstand voltage	1,000 VAC for 1 min			
Leakage current	0.25 mA max.			
Noise resistance	Power line: 2 kVp-p, Pulse width: 50 ns, Rise time: 5 ns, Consecutive burst time: 15 ms, Cycle: 300 ms			
Applicable standards	CE: EN 61326:1997, +A1:1998, +A2:2001 (EMI: Class A)			
Vibration resistance	10 to 150 Hz, 0.35-mm half-amplitude (maximum acceleration: 50 m/s²) 10 times for 8 minutes each in 3 directions			
Shock resistance	150 m/s ² 3 times each in 6 directions			
Ambient humidity	Operating: 0 to 45°C, Storage: -25 to 65°C			
Ambient temperature	Operating/storage: 25% to 85% (with no icing or condensation)			
Ambient environment	No corrosive gasses			
Degree of protection	None	IEC 60529 IP67		
Weight	Approx. 130 g	Approx. 150 g		

Dimensions (Unit: mm)

A Handy, LCD-equipped 2D Code Reader Capable of Reading Directly Marked Codes V400-H111/211

Excellent

reading

performance

The V400-H achieves a high level of accuracy by combining the industry's most advanced reading algorithm with an optical system that is optimized for reading directly marked codes.

Read while

viewing

the LCD

Use the LCD monitor to check the codes as you read them. The information that is read is displayed on the screen, facilitating confirming operation.

> Model with Narrow Field of Vision (V400-H111): 5- to 10-mm field of vision

Model with Wide Field of Vision (V400-H211): 15- to 30-mm field of vision

Applications: Reading codes on metal parts,

LCD wafers, printed wiring board substrates

Refer to the catalog for details (Cat. No. Q146).

This document provides information mainly for selecting suitable models. Please read the Z242 carefully for information that the user must understand and accept before purchase, including information on warranty, limitations of liability, and precautions.

Note: Do not use this document to operate the Unit.
