Safety Precautions

Crimping Method

Always use the specified Crimping Tool or Applicator to wire the crimped contacts.

Refer to the instruction sheet that is provided separately for details.

Contact Insertion Method

Confirm the orientation of the crimped contacts and then insert them all the way to the back of the Socket. After insertion, confirm that the lances are securely set in the lance holes on the socket housing.

Contact Replacement Method

To remove contacts that have been incorrectly inserted, always use the XY2E-0003 Contact Removal Tool.

1. Insert the end of the Removal Tool into the lance hole in the socket housing and press the lance all the way inside the socket housing.
2. While pressing in on the lance, pull out the Contact.
3. Insert a new Contact.

Note: Do not use any Contacts that have been removed.

Attaching the Lock Levers

Attach the holes in the Lock Levers to the protrusions on both sides of the housing and make sure that they are set securely.

Precautions for Correct Use

When mating the Sockets with XG4C Box Plugs, always use the XG5U-0001 Lock Levers. Otherwise the Connectors may become disconnected due to vibration or shock.

Storage

1. Do not store the Sockets in locations subject to dust or high humidity.
2. Do not store the Sockets in locations close to sources of gasses such ammonia gas or sulfide gas.
