Smart Sensors

ZX Series

The Continuing Evolution of Smart Sensors

Presenting a New Laser-type ZX-LDA□-N Amplifier Unit

Smart Style!

realizing

Smart Style... from OMRON

I am a S

What's Smart?

A host of remarkable functions inside a compact body. OMRON combined these with an Amplifier display and easy operation to take Sensor detection to a whole new level. OMRON's sensing platform meets a wide range of diverse applications by offering a broad selection of heads employing different detection methods.

What's the Platform?

The ZX-LD-N integrates internal data for the entire ZX Series. This was achieved through technological advancements that vastly improve data communications between Amplifiers and enable calculations between different Sensor Heads. Welcome to the ever-expanding Smart World of sensing.

New Sensor Proposals for IT Applications

Smart Monitor V3 NEW

PC Connection Takes Full Advantage of Sensor Performance

Use of the PC screen greatly enhances the panel display. Unlike conventional systems, the detection results from applications such as waveform monitoring and data logging can also be easily processed.

Flexible Quality Control

Data logging

The ability to log detection data and manage the system history enables efficient and effective quality control, and aids in determining necessary countermeasures. Also displays data in waveform during logging.

The screen image may differ from that of the actual product.

List Display Simplifies Setup

Complicated settings can be easily made with only the Amplifier panel while referring to function menus. Settings can also be imported and exported as text data.

Waveform Monitoring

Easy waveform monitoring replaces the conventional oscilloscope. Drag & drop threshold setting and other easy-to-use functions further enhance operation.

Waveform monitoring

Waveforms on up to 5 channels can be drawn with the new ZX-LDA-N.

One-shot waveform

High-speed waveforms can be obtained and displayed in one-shot operation.

PC Software Specifications

Monitoring Digital Values

- Setting differential direct threshold values
- Teaching settings

Waveform Monitoring

- Waveform collection
- Waveform observation
- Waveform saving and loading

Data Logging

- Compilation settings
- Microsoft Excel compatible (See note 2.)

Configurator Functions

- Setting Amplifier functions (actual measurement scaling, input scaling, etc.)
- Saving and loading Amplifier setting conditions

Note 1: Smart Monitor V3 is compatible with the ZX-L-N, ZX-L, ZX-E, and ZX-T.

Note 2: Microsoft Excel is a registered trademark of the Microsoft Corporation.

Note 3: System Requirements

- OS: Windows 98 or 2000
- CPU Unit: Celeron 400 MHz or better
- RAM: 64 MB min.
- Available hard disk space: 50 MB min.
- Display screen: 800 x 600 dots and 256 colors min.
- Baud rate: 38,400 bps min.

Note 4: Use an RS-232C crossover cable to connect to the computer. If the computer does not have an RS-232C port, use a USB-Serial Conversion Cable (CS1W-CF31 made by OMRON).

to Smart Style

ZX-LDA-N NEW Laser Sensors

Easy as Smart Style

Advanced Functions Made Simple. That is the Essence of Smart Style.

The World's Smallest and Lightest

*As of October 1, 2001

In addition to the obvious size difference, the ZX Series offers the world's lightest Sensors. Approximately the same size as a photoelectric sensor, the compact ZX Sensors contribute considerably to space-saving efforts on production sites. Naturally, response speed is also equivalent to that of a photoelectric sensor.

*High-speed sampling: 0.15 ms (response speed: 0.3 ms)

Flexible Mounting Direction

Install a Side-view Attachment (sold separately) for additional installation possibilities.

8 Reflective Types and 3 Through-beam Types Available

Reflective Sensors Class 2 visible light laser *For 4,096 sampling cycles

Select the model according to the application. Use a spot beam to detect small items, or a line beam for ordinary workpieces. Measurement distance also ranges from 28 to 500 mm, enabling seamless coverage for various detection applications.

Spot form
Two-spot Sensors

Distance range (resolution)

Through-beam Sensors Class 1 visible light laser *For 64 sampling cycles

Use a 1-mm-dia. spot for precise positioning, or a 5- to 10-mm-wide screen beam for area detection.

Measuring width and distance range (4-μm resolution)

Regular reflection (displacement) Class 2 visible light laser

Ideal for detecting mirror surfaces.
Distance range (0.25 μm resolution)
One range

ZX-LDA-N NEW New Laser Type

Advanced to Smart Stage

Advanced Functions Respond to Evolving Needs

More User Friendly New Function

Zero Reset Time Display

A reference value other than zero can be set as the zero reset value.

Present Value Display

The sub-digital display shows present values when the hold function is enabled. This makes it easy to check whether a measurement is within range.

Linear Output Correction

Various factors, such as conversion errors occurring with connected devices, may cause the output value displayed on the Amplifier to differ from the actual output from a voltmeter. Adjusting the Amplifier display while monitoring the actual output on a voltmeter can eliminate the difference between the two values.

Automatic Teaching

Maximum and minimum measurement values can be set as thresholds when automatic teaching is executed. It is useful for setting threshold values from actual measurements while the workpiece is moving.

Enhanced Hold Function New Function

Average hold and delay hold functions were added to enable accurate assessment of changes and the desired measurement position.

Delay Hold/Average Hold

The delay hold function measures only signals within the desired sampling time after a specified time delay from the trigger. The newly added average hold function is especially useful for measuring large workpieces with uneven surfaces.

Previous Value Comparison Function

Gradual changes in measurements due to machine temperature changes or other factors can be ignored in certain situations, such as when detecting foreign matter around bearings. The previous value comparison function effectively detects any changes between previous and present values.

Multiple-point Measurements Computed Using 1 Point

The result computed for one point can be used as a basis for the output for every other point. This is especially useful for multiple-point measurements.

- *1. Beam size: The beam size is defined by 1/e² (13.5%) of the strength of the beam at the beam center (measured value). Incorrect detection may occur if there is light leakage outside the defined spot and the material around the sensing object is more reflective than the sensing object.
- *2. Resolution: The resolution is the deviation (±3σ) in the linear output when connected to the ZX-LDA Amplifier Unit. (The resolution is measured with the standard reference object (white ceramic), at the measurement point with the ZX-LDA set for an average count of 4,096 per period.) The resolution is given at the repeat accuracy for a stationary workpiece, and is not an indication of the distance accuracy. The resolution may be adversely affected under strong electromagnetic fields.
- *3. Linearity: The linearity is given as the error in an ideal straight line displacement output when measuring the standard reference object. The linearity and measurement values vary with the object being measured.
- *4. Temperature characteristic: The temperature characteristic is measured at the measurement point with the Sensor and reference object (OMRON's standard reference object) secured with an aluminum jig.

Note: Highly reflective objects can result in incorrect detection by causing out-of-range measurements.

■ Sensor Heads (Through-beam)

Item	Model	ZX-LT001	ZX-LT005	ZX-LT010
Optical system		Through-beam		
Light source (wave length)		Visible-light semiconductor laser with a wavelength of 650 nm; JIS class1		
Maximum output		0.2 mW max.	0.35 mW max.	
Measurement width		1-mm dia.	1- to 2.5-mm dia.	5 mm, 10 mm
Measurement distance		0 to 500 mm	500 to 2,000 mm	0 to 500 mm
Minimum sensing object		8-μm dia. (opaque)	8- to 50-μm dia. (opaque)	0.05-mm dia. (opaque), 0.1-mm dia. (opaque)
Resolution*1		4 μm *2	---	4 μm *3
Temperature characteristic		0.2% FS/°C		
Ambient illumination		Incandescent lamp: 10,000 lx max. (on light-receiving side)		
Ambient temperature		Operating: 0 to 50°C, Storage: -25 to 70°C (with no icing or condensation)		
Degree of protection		IEC60529, IP40		
Connection method		Connector relay (standard cable length: 500 mm)		
Weight (packed state)		Approx. 220 g		
Cable length		Extendable up to 10 m with special extension cable.		
Materials		Case: Polyetherimide, Case cover: Polycarbonate, Unit cover: Glass		
Tightening torque		0.3 N-m max.		
Accessories		Optical axis adjustment seal, sensor head-amplifier connection cable (1.5 m), instruction sheet		

- *1. This value is obtained by converting the deviation (±3σ) in the linear output that results when the sensor head is connected to the amplifier unit, into the measurement width.
- *2. For an average count of 64. The value is 5 μm for an average count of 32. This is the value that results when a minimum sensing object blocks the light near the center of the 1-mm measurement width.
- *3. For an average count of 64. The value is 5 μm for an average count of 32.

■ Amplifier Units

Item	Model	ZX-LDA11-N	ZX-LDA41-N
Measurement period		150 μs	
Possible average count settings*1		1, 2, 4, 8, 16, 32, 64, 128, 256, 512, 1,024, 2,048, or 4,096	
Temperature characteristic		When connected to a Reflective Sensor Head: 0.01% FS/°C, When connected to a Through-beam Sensor Head: 0.1% FS/°C	
Linear output*2		4 to 20 mA/FS, Max. load resistance: 300 Ω, ±4 V (± 5 V, 1 to 5 V *3), Output impedance: 100 Ω	
Judgement outputs (3 outputs: HIGH/PASS/LOW)*1		NPN open-collector outputs, 30 VDC, 50 mA max. Residual voltage: 1.2 V max.	PNP open-collector outputs, 30 VDC, 50 mA max. Residual voltage: 2 V max.
Laser OFF input, zero reset input, timing input, reset input		ON: Short-circuited with 0-V terminal or 1.5 V or less OFF: Open (leakage current: 0.1 mA max.)	ON: Supply voltage short-circuited or supply voltage within 1.5 V OFF: Open (leakage current: 0.1 mA max.)
Functions		Measurement value display, set value/light level/resolution display, scaling, display reverse, display OFF mode, ECO mode, number of display digit changes, sample hold, peak hold, bottom hold, peak-to-peak hold, self-peak hold, self-bottom hold, intensity mode, zero reset, initial reset, ON-delay timer, OFF-delay timer, one-shot timer, deviation, previous value comparison, sensitivity adjustment, keep/clamp switch, direct threshold value setting, position teaching, 2-point teaching, automatic teaching, hysteresis width setting, timing inputs, reset input, monitor focus, (A-B) calculations*4, (A+B) calculations*4, mutual interference*4, laser deterioration detection, zero reset memory, key lock	
Indications		Operation indicators: High (orange), pass (green), low (yellow), 7-segment main display (red), 7-segment subdisplay (yellow), laser ON (green), zero reset (green), enable (green)	
Power supply voltage		12 to 24 VDC ±10%, Ripple (p-p): 10% max.	
Current consumption		140 mA max. with power supply voltage of 24 VDC (with Sensor connected)	
Ambient temperature		Operating: 0 to 50°C, Storage: -15 to 60°C (with no icing or condensation)	
Ambient humidity		Operating and storage: 35% to 85% (with no condensation)	
Insulation resistance		20 MΩ min. at 500 VDC	
Dielectric strength		1,000 VAC, 50/60 Hz for 1 min	
Vibration resistance (destruction)		10 to 150 Hz, 0.7-mm double amplitude 80 min each in X, Y, and Z directions	
Shock resistance (destruction)		300 m/s ² 3 times each in six directions (up/down, left/right, forward/backward)	
Connection method		Prewired (standard cable length: 2 m)	
Weight (packed state)		Approx. 350 g	
Materials		Case: PBT (polybutylene terephthalate), Cover: Polycarbonate	
Accessories		Instruction sheet	

*1. The response speed of the linear output is calculated as the measurement period × (average count setting + 1) (with fixed sensitivity).
The response speed of the judgement outputs is calculated as the measurement period × (average count setting + 1) (with fixed sensitivity).

*2. The output can be switched between a current output and voltage output using a switch on the bottom of the Amplifier Unit.

*3. Setting is possible via the monitor focus function.

*4. A Calculating Unit (ZX-CAL2) is required.

Note: For operating details, refer to the operation manual (Cat. No. Z157).

■ Calculating Unit

Item	ZX-CAL2
Applicable Amplifier Units	ZX-LD11-N/41-N, ZX-EDA11/41, ZX-TDA11/41
Current consumption	12 mA max. (supplied from the Smart Sensor Amplifier Unit)
Ambient temperature	Operating: 0 to 50°C, Storage: -15 to 60°C (with no icing or condensation)
Ambient humidity	Operating and storage: 35% to 85% (with no condensation)
Connection method	Connector
Dielectric strength	1,000 VAC, 50/60 Hz for 1 min
Insulation resistance	100 MΩ (at 500 VDC)
Vibration resistance (destructive)	10 to 150 Hz, 0.7-mm double amplitude 80 min each in X, Y, and Z directions
Shock resistance (destructive)	300 m/s ² 3 times each in six directions (up/down, left/right, forward/backward)
Materials	Display: Acrylic, Case: ABS resin
Weight (packed state)	Approx. 50 g
Accessories	Instruction sheet

■ ZX-series Communications Interface Unit

Item	ZX-SF11	
Current consumption	60 mA max. (supplied by the Amplifier Unit)	
Applicable Amplifier Units	ZX Series	
Applicable Amplifier Unit versions	ZX-LDA□1-N Ver. 1.000 or higher ZX-EDA□1 Ver. 1.100 or higher ZX-TDA□1 Ver. 1.000 or higher	
Max. No. of Amplifier Units	5	
Communications functions	Communications port	RS-232C port (9-pin D-Sub Connector)
	Communications protocol	CompoWay/F*
	Baud rate	38,400 bps
Data configuration	Data bits: 8, Parity: none, Start bits: 1, Stop bits: 1, Flow control: none	
Indicators	Power supply: green, Sensor communications: green, Sensor communications error: red, External terminal communications: green, External terminal communications error: red	
Protective circuits	Reverse polarity protection	
Ambient temperature	Operating: 0 to 50°C, storage: -15 to 60°C (with no icing or condensation)	
Ambient humidity	Operating and storage: 35% to 85% (with no condensation)	
Insulation resistance	20 MΩ min. (at 500 VDC)	
Dielectric strength	1,000 VAC, 50/60 Hz for 1 min, Leakage current: 10 mA max.	
Materials	Case: PBT (polybutylene terephthalate), Cover: Polycarbonate	
Accessories	Instruction sheet, 2 clamps

ZX-EDA Inductive Displacement Sensors

Variation for Smart Object

Inductive Displacement Sensors for Even More Applications

Wide Selection of Sensor Heads

Smallest Heads in Its Class at 3 Dia.

Small Sensor Heads are perfect for detecting the height of small objects and for applications where multiple Sensor Heads are used.

Sensors with stainless steel Protective Spiral Tubes are also available.

New Flat and Heat-resistant Sensors Broaden Application Possibilities

The temperature characteristic ranks at the top in the industry at 0.1% FS/°C for heat-resistant sensors, and it ranges up to 200°C for flat sensors.

More Efficient Maintenance

Complete Compatibility between Sensor Heads and Amplifier Units

The Amplifier Unit can be used as is when replacing damaged Sensor Heads or changing the Sensor Head for different detection distances.

Sensor Head Cords Extendable to 10 m

The distance between the Amplifier Units the Sensor Heads can be extended to 3 m, 6 m, or 10 m using a ZX-XC□A Cable (sold separately).

Sensors with stainless steel Protective Spiral Tubes are also available.

New Flat and Heat-resistant Sensors Broaden Application Possibilities

The temperature characteristic ranks at the top in the industry at 0.1% FS/°C for heat-resistant sensors, and it ranges up to 200°C for flat sensors.

More Efficient Maintenance

Complete Compatibility between Sensor Heads and Amplifier Units

The Amplifier Unit can be used as is when replacing damaged Sensor Heads or changing the Sensor Head for different detection distances.

Sensor Head Cords Extendable to 10 m

The distance between the Amplifier Units the Sensor Heads can be extended to 3 m, 6 m, or 10 m using a ZX-XC□A Cable (sold separately).

Ordering Information

■ Sensors

Sensor Heads

Shape	Dimensions	Sensing distance	Resolution *1	Model
Cylindrical	3 dia. x 18 mm	0.5 mm	1 μm	ZX-EDR5T
	5.4 dia. x 18 mm	1 mm		ZX-ED01T *2
	8 dia. x 22 mm	2 mm		ZX-ED02T *2
Screw-shaped	M10 x 22 mm			ZX-EM02T *2
	M18 x 46.3 mm	7 mm		ZX-EM07MT *2
Flat	30 x 14 x 4.8 mm	4 mm		ZX-EV04T *2 *3
Heat-resistant, cylindrical	M12 x 22 mm	2 mm	ZX-EM02HT *4	

*1. For an average count of 4096.

*2. Models with Protective Spiral Tubes are also available. Add a suffix of “-S” to the above model numbers when ordering.
(Example: ZX-ED01-S)

*3. Be sure to use ZX-EDA□ Amplifier Unit version 1,200 or later with the ZX-EV04T.

*4. Be sure to use ZX-EDA□ Amplifier Unit version 1,300 or later with the ZX-EM02HT.

Specifications

■ Sensor Heads

Model		ZX-EDR5T	ZX-ED01T	ZX-ED02T/ EM02T	ZX-EM07MT	ZX-EV04T	ZX-EM02HT
Measurement range		0 to 0.5 mm	0 to 1 mm	0 to 2 mm	0 to 7 mm	0 to 4 mm	0 to 2 mm
Sensing object		Magnetic metals (Measurement ranges and linearities are different for non-magnetic metals.)					
Standard reference object		18 × 18 × 3 mm		30 × 30 × 3 mm	60 × 60 × 3 mm		45 × 45 × 3 mm
		Material: ferrous (S50C)					
Resolution *1		1 μm					
Linearity *2		±0.5% F.S.					±1.0% F.S. *5
Linear output range		Same as measurement range.					
Temperature characteristic *3 (including Amplifier Unit)		0.15% F.S./°C	0.07% F.S./°C				0.1% F.S./°C
Ambient temperature	Operating *4	0 to 50°C (with no icing or condensation)	-10 to 60°C (with no icing or condensation)				-10 to 200°C
	Storage *4	0 to 50°C (with no icing or condensation)	-20 to 70°C (with no icing or condensation)				-20 to 200°C
Ambient humidity		Operating and storage: 35% to 85% (with no condensation)					
Insulation resistance		50 MΩ min. (at 500 DC)					
Dielectric strength		1,000 VAC, 50/60 Hz for 1 min between charged parts and case					
Vibration resistance (destruction)		10 to 55 Hz with 1.5-mm double amplitude for 2 h each in X, Y, and Z directions					
Shock resistance (destruction)		500 m/s ² , 3 times each in X, Y, and Z directions					
Degree of protection (Sensor Head)		IEC60529, IP65		IEC60529, IP67			IEC60529, IP60 *6
Connection method		Connector relay (standard cable length: 2 m)					
Weight (packed state)		Approx. 120 g	Approx. 140 g		Approx. 160 g	Approx. 130 g	Approx. 160 g
Materials	Sensor Head	Brass	Stainless steel	Brass		Zinc (nickel-plated)	Brass
	Sensing surface	Heat-resistant ABS					PEEK
	Preamplifier	PES					
Accessories		Amplifier Mounting Brackets (ZX-XBE1), Instruction Manual					

*1. Resolution: The resolution is the deviation (±3 s) in the linear output when connected to the ZX-EDA Amplifier Unit. The above values indicate the deviations observed 30 minutes after the power is turned ON.

(The resolution is measured with OMRON's standard reference object at 1/2 of the measurement range with the ZX-EDA set for the maximum average count of 4096.)

The resolution is given at the repeat accuracy for a stationary workpiece, and is not an indication of the distance accuracy. The resolution may be adversely affected under strong electromagnetic fields.

*2. Linearity: The linearity is given as the error in an ideal straight line displacement output when measuring the standard reference object. The linearity and measurement values vary with the object being measured.

*3. Temperature characteristic: The temperature characteristic is measured with OMRON's standard reference object at 1/2 of the measurement range.

*4. The ambient temperature given is only for the sensor head. It is -10 to 60°C for the preamp.

*5. The value given is for an ambient temperature of 25°C.

*6. Do not use in moist environments because the case is not waterproof.

■ Amplifier Units

Model	ZX-EDA11	ZX-EDA41
Measurement period	150 μs	
Possible average count settings *1	1, 2, 4, 8, 16, 32, 64, 128, 256, 512, 1,024, 2,048, or 4,096	
Linear output *2	Current output: 4 to 20 mA/F.S., Max. load resistance: 300 Ω Voltage output: ±4 V (± 5 V, 1 to 5 V *3), Output impedance: 100 Ω	
Judgement outputs (3 outputs: HIGH/PASS/LOW)	NPN open-collector outputs, 30 VDC, 50 mA max. Residual voltage: 1.2 V max.	PNP open-collector outputs, 30 VDC, 50 mA max. Residual voltage: 2 V max.
Zero reset input, timing input, reset input, judgement output hold input	ON: Short-circuited with 0-V terminal or 1.5 V or less OFF: Open (leakage current: 0.1 mA max.)	ON: Supply voltage short-circuited or supply voltage within 1.5 V OFF: Open (leakage current: 0.1 mA max.)
Function	<ul style="list-style-type: none"> - Measurement value display - Linearity adjustment (materials selection) - Display reverse - Number of display digit changes - Bottom hold, peak-to-peak hold - Average hold - Initial reset - OFF-delay timer - Non-measurement setting - Automatic teaching - Reset input - Linear output correction - K-(A+B) calculation *4 - Sensor disconnection detection - Key lock 	
Indications	<ul style="list-style-type: none"> - Present value/set value/output value/resolution display - Scaling - Display OFF mode - Sample hold - Self-peak hold - Delay hold - Linearity initialization - One-shot timer - Direct threshold value setting - Hysteresis width setting - Judgement output hold input - (A-B) calculations *4 - Mutual interference prevention *4 - Zero reset memory - Zero reset indicator - ECO mode - Peak hold - Self-bottom hold - Zero reset - ON-delay timer - Previous value comparison - Position teaching - Timing inputs - Monitor focus - (A+B) calculations *4 	
Voltage influence (including Sensor)	0.5% F.S. of linear output value at ±20% of power supply voltage	
Power supply voltage	12 to 24 VDC ±10%, Ripple (p-p): 10% max.	
Current consumption	140 mA max. with power supply voltage of 24 VDC (with Sensor connected)	
Ambient temperature	Operating and storage: 0 to 50°C (with no icing or condensation)	
Ambient humidity	Operating and storage: 35% to 85% (with no condensation)	
Insulation resistance	20 MΩ min. (at 500 DC)	
Dielectric strength	1,000 VAC, 50/60 Hz for 1 min	
Vibration resistance (destruction)	10 to 150 Hz with 0.7-mm double amplitude for 80 min each in X, Y, and Z directions	
Shock resistance (destruction)	300 m/s ² , 3 times each in 6 directions (up, down, left, right, forward, backward)	
Connection method	Prewired (standard cable length: 2 m)	
Weight (packed state)	Approx. 350 g	
Materials	Case: PBT (polybutylene terephthalate), Cover: Polycarbonate	
Accessories	Instruction Manual	

*1. The response speed of the linear output is calculated as the measurement period × (average count setting + 1).

The response speed of the judgement outputs is calculated as the measurement period × (average count setting + 1).

*2. The output can be switched between a current output and voltage output using a switch on the bottom of the Amplifier Unit.

*3. A Calculating Unit (ZX-CAL2) is required. Setting is possible via the monitor focus function.

*4. A Calculating Unit (ZX-CAL2) is required.

Note: For operating details, refer to the operation manual (Cat. No. Z166).

ZX-TDA High-precision Contact Sensors

Small & High Accuracy for Smart State

Highest Level of Detection Performance in the Industry

Thinnest Level of Sensor Head in the Industry

With some of the thinnest Sensor Heads in the industry at just 6 mm in diameter, these Sensors are ideal for use in confined spaces and for multiple-point measurements.

Highest Level of Resolution in the Industry

The long-stroke ZX-TDS04□ (4-mm measurement distance) achieves precise measurements with a maximum linearity of 0.3% FS and a resolution of 0.1 μm that ranks in the top class in the industry.

Complete Compatibility between Sensor Heads and Amplifier Units

The Amplifier Unit can be used as is when replacing damaged Sensor Heads or changing the Sensor Head for a different measurement distance.

Built for Longer Life

The unique linear ball bearing structure ensures longer life. It has sliding parts that move smoothly and a rubber boot that keeps dust out. Short and Standard Sensors feature IP67 environmental resistance.

*1. The resolution is given as the minimum value that can be read when a ZX-TDA□1 Amplifier Unit is connected. This value is taken 15 minutes after turning ON the power with the average number of operations set to 256.

*2. The linearity is given as the error in an ideal straight line displacement output.

*3. These figures are representative values that apply for the measurement mid-point, and are for when the provided actuator is used, with the actuator moving downwards. If the actuator moves horizontally or upwards, the operating force will be reduced. Also, if an actuator other than the standard one is used, the operating force will vary with the weight of the actuator itself.

*4. These figures are representative values that apply for the mid-point of the measurement range.

Precautions

■ Design Precautions

Conform to the specified ratings and performance. Refer to the *Specifications* for each product on the following pages.

ZX-L: Pages 13 and 14

ZX-E: Pages 21 and 22

ZX-T: Pages 31 and 32

Environment

Do not operate the product in locations subject to flammable or explosive gases.

In order to ensure safe operation and maintenance, do not install the product in the vicinity of high-voltage devices or power equipment.

■ Correct Use

This product consists of precision parts that may fail if it is dropped.

Design Precautions

Compatibility

Sensors and Amplifier Units are mutually compatible. Sensors can be added or replaced individually.

Influence of High-frequency Electromagnetic Fields

Using the product in the vicinity of devices that generate high-frequency electromagnetic fields, such as ultrasonic cleaning equipment, high-frequency generators, transceivers, mobile phones, and inverters, may result in malfunction.

Wiring

Wiring Check

After wiring is completed, before turning ON the power, confirm that the power supply is connected correctly, that there are no faulty connections, such as load short-circuits, and that the load current is correct. Incorrect wiring may result in failure.

Cable Extension

Do not extend the cable for the Sensor and the Amplifier Unit to a length exceeding 10 m. Use a ZX-XC□A Extension Cable (sold separately) to extend the Sensor's cable. Extend the Amplifier Unit's cable using a shielded cable of the same type.

Wiring

Do not use the product at voltages exceeding the rated values. Doing so may result in damage.

Do not connect the product to an AC power supply or connect the power supply in reverse.

Do not short loads connected to open-collector outputs.

Do not lay the cable for the product together with or in the same duct as high-voltage lines or power lines. Doing so may result in incorrect operation or damage due to induction.

Other Precautions

Do not attempt to disassemble, repair, or modify the product.

Dispose of the product using standard procedures for industrial waste.

Do not connect combinations of ZX-L□□-, ZX-E□□-, and ZX-T□□- series Smart Sensors.

Power Supply

When using a commercially available switching regulator, ground the FG (frame ground) terminal.

If the power supply line is subject to surges, connect a surge absorber that meets the conditions of the operating environment.

Calculating Unit

When using a Calculating Unit, connect the linear output ground of the corresponding Amplifier Unit.

Connectors

Do not connect or disconnect connectors while the power is ON.

Be sure hold to connectors by the cover when connecting or disconnecting.

Installation Location

Do not install the product in the following locations.

- Locations subject to temperatures outside the specified range
- Locations subject to condensation due to sudden temperature changes
- Locations subject to humidity levels outside range 35% to 85%
- Locations subject to corrosive or flammable gases
- Locations subject to dust, salts, or metallic powder.
- Locations directly subject to vibrations and shocks
- Locations subject to splashes of water, oil, or chemicals
- Locations subject to strong electromagnetic or electrical fields

Maintenance and Inspection

- Be sure to turn OFF the power supply before adjusting or removing the Sensor Head.
- Cleaning:
Do not use thinners, benzene, acetone, or kerosene for cleaning.

...more!

This document provides information mainly for selecting suitable models. Please read the User's Manual carefully for information that the user must understand and accept before purchase, including information on warranty, limitations of liability, and precautions.

- The application examples provided in this catalog are for reference only. Check functions and safety of the equipment before use.
- Never use the products for any application requiring special safety requirements, such as nuclear energy control systems, railroad systems, aviation systems, medical equipment, amusement machines, vehicles, safety equipment, or other application involving serious risk to life or property, without ensuring that the system as a whole has been designed to address the risks, and that the OMRON products are properly rated and installed for the intended use within the overall equipment or system.

Read and Understand This Catalog

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

Warranty and Limitations of Liability

WARRANTY

OMRON's exclusive warranty is that the products are free from defects in materials and workmanship for a period of one year (or other period if specified) from date of sale by OMRON.

OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, REGARDING NON-INFRINGEMENT, MERCHANTABILITY, OR FITNESS FOR PARTICULAR PURPOSE OF THE PRODUCTS. ANY BUYER OR USER ACKNOWLEDGES THAT THE BUYER OR USER ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE. OMRON DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED.

LIMITATIONS OF LIABILITY

OMRON SHALL NOT BE RESPONSIBLE FOR SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS, OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED ON CONTRACT, WARRANTY, NEGLIGENCE, OR STRICT LIABILITY.

In no event shall responsibility of OMRON for any act exceed the individual price of the product on which liability is asserted.

IN NO EVENT SHALL OMRON BE RESPONSIBLE FOR WARRANTY, REPAIR, OR OTHER CLAIMS REGARDING THE PRODUCTS UNLESS OMRON'S ANALYSIS CONFIRMS THAT THE PRODUCTS WERE PROPERLY HANDLED, STORED, INSTALLED, AND MAINTAINED AND NOT SUBJECT TO CONTAMINATION, ABUSE, MISUSE, OR INAPPROPRIATE MODIFICATION OR REPAIR.

Application Considerations

SUITABILITY FOR USE

OMRON shall not be responsible for conformity with any standards, codes, or regulations that apply to the combination of products in the customer's application or use of the product.

At the customer's request, OMRON will provide applicable third party certification documents identifying ratings and limitations of use that apply to the products. This information by itself is not sufficient for a complete determination of the suitability of the products in combination with the end product, machine, system, or other application or use.

The following are some examples of applications for which particular attention must be given. This is not intended to be an exhaustive list of all possible uses of the products, nor is it intended to imply that the uses listed may be suitable for the products:

- Outdoor use, uses involving potential chemical contamination or electrical interference, or conditions or uses not described in this catalog.
- Nuclear energy control systems, combustion systems, railroad systems, aviation systems, medical equipment, amusement machines, vehicles, safety equipment, and installations subject to separate industry or government regulations.
- Systems, machines, and equipment that could present a risk to life or property.

Please know and observe all prohibitions of use applicable to the products.

NEVER USE THE PRODUCTS FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

Disclaimers

CHANGE IN SPECIFICATIONS

Product specifications and accessories may be changed at any time based on improvements and other reasons.

It is our practice to change model numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the product may be changed without any notice. When in doubt, special model numbers may be assigned to fix or establish key specifications for your application on your request. Please consult with your OMRON representative at any time to confirm actual specifications of purchased product.

DIMENSIONS AND WEIGHTS

Dimensions and weights are nominal and are not to be used for manufacturing purposes, even when tolerances are shown.

ERRORS AND OMISSIONS

The information in this catalog has been carefully checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical, or proofreading errors, or omissions.

PERFORMANCE DATA

Performance data given in this catalog is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of OMRON's test conditions, and the users must correlate it to actual application requirements. Actual performance is subject to the OMRON Warranty and Limitations of Liability.

PROGRAMMABLE PRODUCTS

OMRON shall not be responsible for the user's programming of a programmable product, or any consequence thereof.

COPYRIGHT AND COPY PERMISSION

This catalog shall not be copied for sales or promotions without permission.

This catalog is protected by copyright and is intended solely for use in conjunction with the product. Please notify us before copying or reproducing this catalog in any manner, for any other purpose. If copying or transmitting this catalog to another, please copy or transmit it in its entirety.

X-ON Electronics

Largest Supplier of Electrical and Electronic Components
