# 74AC109, 74ACT109 Dual JK Positive Edge-Triggered Flip-Flop

## **Features**

- I<sub>CC</sub> reduced by 50%
- Outputs source/sink 24mA
- ACT109 has TTL-compatible inputs

## **General Description**

The AC/ACT109 consists of two high-speed completely independent transition clocked  $J\overline{K}$  flip-flops. The clocking operation is independent of rise and fall times of the clock waveform. The  $J\overline{K}$  design allows operation as a D-Type flip-flop (refer to AC/ACT74 data sheet) by connecting the J and  $\overline{K}$  inputs together.

## Asynchronous Inputs:

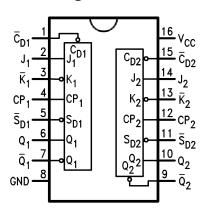

- LOW input to SD (Set) sets Q to HIGH level
- LOW input to  $\overline{C}_D$  (Clear) sets Q to LOW level
- Clear and Set are independent of clock
- Simultaneous LOW on  $\overline{C}_D$  and  $\overline{S}_D$  makes both Q and  $\overline{Q}$  HIGH

## **Ordering Information**

Order Number	Package Number	Package Description
74AC109SC	M16A	16-Lead Small Outline Integrated Circuit (SOIC), JEDEC MS-012, 0.150" Narrow
74AC109SJ	M16D	16-Lead Small Outline Package (SOP), EIAJ TYPE II, 5.3mm Wide
74AC109MTC	MTC16	16-Lead Thin Shrink Small Outline Package (TSSOP), JEDEC MO-153, 4.4mm Wide

Please note that this diagram is provided only for the understanding of logic operations and should not be used to estimate propagation delays.

## **Absolute Maximum Ratings**

Stresses exceeding the absolute maximum ratings may damage the device. The device may not function or be operable above the recommended operating conditions and stressing the parts to these levels is not recommended. In addition, extended exposure to stresses above the recommended operating conditions may affect device reliability. The absolute maximum ratings are stress ratings only.

## **Recommended Operating Conditions**

The Recommended Operating Conditions table defines the conditions for actual device operation. Recommended operating conditions are specified to ensure optimal performance to the datasheet specifications. Fairchild does not recommend exceeding them or designing to absolute maximum ratings.
