L-C LCD and Camera EMI Filter Array with ESD Protection

CM1693-04DE, CM1693-06DE, CM1693-08DE

ON Semiconductor®

Product Description

The CM1693 is a family of pi−style EMI filter arrays with ESD protection, which integrates four, six or eight filters (C–L–C) into a small−form factor, uDFN 0.40 mm pitch package. Each EMI filter channel is implemented as a 3−pole L–C filter, where the component values are 10 pF−26 nH−12 pF. The CM1693's roll−off frequency at −6 dB attenuation is 300 MHz and can be used in applications where the data rates are as high as 140 Mbps. The CM1693 also provides greater than −30 dB attenuation over the 800 MHz to 6 GHz frequency range. The device includes ESD diodes on every pin that provide a very high level of protection for sensitive electronic components against possible electrostatic discharge (ESD). The ESD protection diodes connected to the filter ports are designed and characterized to safely dissipate ESD strikes of ±18 kV, which is beyond the maximum requirement of the IEC61000−4−2 international standard.

This device is particularly well suited for wireless handsets, mobile LCD modules and PDAs because of its small package format and easy−to−use pin assignments. In particular, the CM1693 is ideal for EMI filtering and protecting data and control lines for the LCD display and camera interface in mobile handsets.

The CM1693 is housed in space saving, low profile, 0.40 mm pitch uDFN packages in a RoHS compliant, Pb−Free format.

Features

- 4, 6 or 8 Channels of EMI Filtering with Integrated ESD Protection
- Pi−Style EMI Filters in a Capacitor−Inductor−Capacitor (C−L−C) Network
- +18 kV ESD Protection on Each Channel (IEC 61000−4−2 Level 4, Contact Discharge)
- Greater than −35 dB Attenuation (Typical) at 1GHz
- uDFN Lead−Free Package with 0.40 mm Lead Pitch:
  - 4−Ch. = 8−Lead uDFN
  - 6−Ch. = 12−Lead uDFN
  - 8−Ch. = 16−Lead uDFN
- uDFN Package size:
  - 8−Lead: 1.70 mm x 1.35 mm
  - 12−Lead: 2.50 mm x 1.35 mm
  - 16−Lead: 3.30 mm x 1.35 mm
- Increased Robustness Against Vertical Impacts During Manufacturing Process
- These Devices are Pb−Free and are RoHS Compliant

Applications

- LCD and Camera Data Lines in Mobile Handsets
- I/O Port Protection for Mobile Handsets, Notebook Computers, PDAs etc.
- Handheld PCs/PDAs
- LCD and Camera Modules
- EMI Filtering for Data Ports in Cell Phones, PDAs or Notebook Computers.
- Wireless Handsets

SPECIFICATIONS

Table 2. ABSOLUTE MAXIMUM RATINGS

Parameter	Rating	Units
Storage Temperature Range	−65 to +150	°C
Current per Inductor	30	mA
DC Package Power Rating	500	mW

Stresses exceeding those listed in the Maximum Ratings table may damage the device. If any of these limits are exceeded, device functionality should not be assumed, damage may occur and reliability may be affected.

Table 3. STANDARD OPERATING CONDITIONS

Parameter	Rating	Units
Operating Temperature Range	−40 to +85	°C

1. $T_A = 25°C$ unless otherwise specified.
2. ESD applied to input and output pins with respect to GND, one at a time.
3. Clamping voltage is measured at the opposite side of the EMI filter to the ESD pin (i.e. if ESD is applied to pin A1 then clamping voltage is measured at pin C1). Unused pins are left open.
4. These parameters are guaranteed by design and characterization.
