

#### Is Now Part of

# ON Semiconductor®

# To learn more about ON Semiconductor, please visit our website at www.onsemi.com

Please note: As part of the Fairchild Semiconductor integration, some of the Fairchild orderable part numbers will need to change in order to meet ON Semiconductor's system requirements. Since the ON Semiconductor product management systems do not have the ability to manage part nomenclature that utilizes an underscore (\_), the underscore (\_) in the Fairchild part numbers will be changed to a dash (-). This document may contain device numbers with an underscore (\_). Please check the ON Semiconductor website to verify the updated device numbers. The most current and up-to-date ordering information can be found at <a href="www.onsemi.com">www.onsemi.com</a>. Please email any questions regarding the system integration to Fairchild <a href="guestions@onsemi.com">guestions@onsemi.com</a>.

ON Semiconductor reserves the right to make changes without further notice to any products herein. ON Semiconductor makes no warranty, representation or guarantee regarding the suitability of its products for any particular purpose, nor does ON Semiconductor assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation special, consequential or incidental damages. Buyer is responsible for its products and applications using ON Semiconductor products, including compliance with all laws, regulations and safety requirements or standards, regardless of any support or applications information provided by ON Semiconductor. "Typical" parameters which may be provided in ON Semiconductor data sheets and/or specifications can and do vary in different applications and actual performance may vary over time. All operating parameters, including "Typicals" must be validated for each customer application by customer's technical experts. ON Semiconductor does not convey any license under its patent rights nor the rights of others. ON Semiconductor products are not designed, intended, or authorized for use as a critical component in life support systems or any EDA Class 3 medical devices or medical devices with a same or similar classification in a foreign jurisdiction or any devices intended for implantation in the human body. Should Buyer purchase or use ON Semiconductor products for any such unintended or unauthorized application, Buyer shall indemnify and hold ON Semiconductor and its officer

January 2016

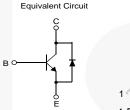

# FJI5603D NPN Silicon Transistor

#### **Applications**

- High Voltage and High Speed Power Switch Application
- · Electronic Ballast Application

#### **Features**

- · Wide Safe Operating Area
- · Small Variance in Storage Time
- Built-in Free Wheeling Diode

#### **Ordering Information**

Part Number	Marking	Package	Packing Method	
FJI5603DTU	J5603D	TO-262 3L (I2PAK)	Rail	

#### **Absolute Maximum Ratings**

Stresses exceeding the absolute maximum ratings may damage the device. The device may not function or be operable above the recommended operating conditions and stressing the parts to these levels is not recommended. In addition, extended exposure to stresses above the recommended operating conditions may affect device reliability. The absolute maximum ratings are stress ratings only. Values are at  $T_A = 25^{\circ}\text{C}$  unless otherwise noted.

Symbol	Parameter	Value	Unit
V <sub>CBO</sub>	Collector-Base Voltage	1600	V
V <sub>CEO</sub>	Collector-Emitter Voltage	800	V
V <sub>EBO</sub>	Emitter-Base Voltage	12	V
I <sub>C</sub>	Collector Current (DC)	3	Α
I <sub>CP</sub>	Collector Current (Pulse) <sup>(1)</sup>	6	Α
I <sub>B</sub>	Base Current (DC)	2	Α
I <sub>BP</sub>	Base Current (Pulse) <sup>(1)</sup>	4	Α
P <sub>C</sub>	Power Dissipation (T <sub>C</sub> = 25°C)	100	W
TJ	Junction Temperature	150	°C
T <sub>STG</sub>	Storage Junction Temperature Range	-65 to +150	°C
EAS	Avalanche Energy (T <sub>J</sub> = 25°C, 8 mH)	3.5	mJ

#### Notes:

1. Pulse test: pulse width = 5 ms, duty cycle  $\leq$  10%

#### Thermal Characteristics(2)

Values are at  $T_A = 25^{\circ}C$  unless otherwise noted.

Symbol	Parameter	Rating	Unit
$R_{ heta JC}$	Thermal Resistance, Junction-to-Case	1.25	°C/W
$R_{ heta JA}$	Thermal Resistance, Junction-to-Ambient	80	°C/W

#### Note:

2. Device mounted on minimum pad size.

#### Electrical Characteristics(3)

Values are at  $T_A = 25$ °C unless otherwise noted.

Symbol	Parameter	Conditions		Min.	Тур.	Max.	Unit	
BV <sub>CBO</sub>	Collector-Base Breakdown Voltage	$I_C = 0.5 \text{ mA}, I_E = 0$	7	1600	1689		V
