## ON Semiconductor ${ }^{\oplus}$

## To learn more about ON Semiconductor, please visit our website at www.onsemi.com

Please note: As part of the Fairchild Semiconductor integration, some of the Fairchild orderable part numbers will need to change in order to meet ON Semiconductor's system requirements. Since the ON Semiconductor product management systems do not have the ability to manage part nomenclature that utilizes an underscore ( $\_$), the underscore ( $\_$) in the Fairchild part numbers will be changed to a dash (-). This document may contain device numbers with an underscore (_). Please check the ON Semiconductor website to verify the updated device numbers. The most current and up-to-date ordering information can be found at www.onsemi.com. Please email any questions regarding the system integration to Fairchild questions@onsemi.com.

## FPF2895

## 28 V / 5 A Rated Current Limit Switch with OVP and TRCB

## Features

- 28 V / 5 A Capability
- Wide Input Voltage Range: $4 \mathrm{~V} \sim 22 \mathrm{~V}$
- Ultra Low On-Resistance
- Typ. $27 \mathrm{~m} \Omega$ at 5 V and $25^{\circ} \mathrm{C}$
- Adjustable Current Limit with external RSET
- 500 mA ~ 5 A
- Selectable OVLO with OV1 and OV2 Logic Input
$-5.95 \mathrm{~V} \pm 50 \mathrm{mV}$
$-10 \mathrm{~V} \pm 100 \mathrm{mV}$
$-14 \mathrm{~V} \pm 280 \mathrm{mV}$
$-23 \mathrm{~V} \pm 460 \mathrm{mV}$
- Selectable ON Polarity
- Selectable Over-Current Behavior
- Auto-Restart Mode
- Current Source Mode
- True Reverse Current Block
- Thermal Shutdown
- Open Drain Fault FLAGB Output
- UL60950-1 \& IEC 60950-1 Certification 5 A Max Loading
- Robust ESD Capability
- $\quad 2$ kV HBM \& 1 kV CDM
- 15 kV Air Discharge \& 8 kV Contact Discharge under IEC 61000-4-2

## Description

The FPF2895 features a 28 V and 5 A rated current limit power switch, which offers Over-Current Protection (OCP), Over-Voltage Protection (OVP), and True Reverse Current Block (TRCB) to protect system. It has low On-resistance of typical $27 \mathrm{~m} \Omega$ with WL-CSP can operate over an input voltage range of 4 V to 22 V .

The FPF2895 supports $\pm 10 \%$ of current limit accuracy, over-current range of 500 mA to 5 A , flexible operations such as selectable OVP, selectable ON polarity and selectable OCP behavior, which can be optimized according to system requirements.
The FPF2895 is available in a 24-bump, $1.67 \mathrm{~mm} \times$ 2.60 mm Wafer-Level Chip-Scale Package (WL-CSP) with 0.4 mm pitch.

## Applications

- Laptop, Desktop Computing and Monitor
- Power Accessories

| GND | B1, B4 | GND | Device Ground |

## Note:

1. To avoid external noise influence when floating, recommend to connect these pins to a certain level.

## Absolute Maximum Ratings

Stresses exceeding the absolute maximum ratings may damage the device. The device may not function or be operable above the recommended operating conditions and stressing the parts to these levels is not recommended. In addition, extended exposure to stresses above the recommended operating conditions may affect device reliability. The absolute maximum ratings are stress ratings only.

## Recommended Operating Conditions

The Recommended Operating Conditions table defines the conditions for actual device operation. Recommended operating conditions are specified to ensure optimal performance to the datasheet specifications. ON does not recommend exceeding them or designing to Absolute Maximum Ratings.

| Symbol | Parameter | Min. | Max. | Unit |
| :---: | :--- | :---: | :---: | :---: |

## Note:

3. Guaranteed by characterization and design, not production test.

## Setting Current Limit

FPF2895 current limit is set with an external resistor connected between $I_{\text {SET }}$ and GND. This resistor is selected using the following equation:

$$
\begin{equation*}
\mathrm{R}_{\mathrm{SET}}[\mathrm{k} \Omega]=4448.6 / \mathrm{I}_{\mathrm{LIM}}[\mathrm{~mA}] \tag{1}
\end{equation*}
$$
