## ON Semiconductor ${ }^{\oplus}$

## To learn more about ON Semiconductor, please visit our website at www.onsemi.com

Please note: As part of the Fairchild Semiconductor integration, some of the Fairchild orderable part numbers will need to change in order to meet ON Semiconductor's system requirements. Since the ON Semiconductor product management systems do not have the ability to manage part nomenclature that utilizes an underscore ( $\_$), the underscore ( $\_$) in the Fairchild part numbers will be changed to a dash (-). This document may contain device numbers with an underscore (_). Please check the ON Semiconductor website to verify the updated device numbers. The most current and up-to-date ordering information can be found at www.onsemi.com. Please email any questions regarding the system integration to Fairchild questions@onsemi.com.

## FSA641 - 2:1 MIPI Switch, Featuring 2-Data and 1-Data Lane Configuration

## Features

- Switch Type: 2:1
- Signal Types MIPI, DPHY
- $V_{\text {cc }} 2.65$ to 4.3 V
- Input Signals 0 to $\mathrm{V}_{\mathrm{Cc}}$
- Ron:
- $7 \Omega$ Typical HS MIPI
- $10 \Omega$ Typical LS MIPI
- $\quad \Delta$ Ron: $^{0.75} \Omega$ Typical HS \& LS MIPI
- $I_{c c}: 1 \mu \mathrm{~A}$ Maximum
- OIRR: -50 dB Typical
- $\mathrm{X}_{\text {talk: }}-40 \mathrm{~dB}$ Typical
- Bandwidth: 1 GHz Typical
- Channel-to-Channel Skew: 15 ps Typical
- Con: 8 pF Typical
- Package 20-Lead UMLP

## Applications

- Cellular Phones, Smartphones
- Displays

## Description

The FSA641 is a 2:1 MIPI switch made for 2-data lane and 1-data lane modules. This part is configured as a single-pole, double-throw switch (SPDT) and is optimized for switching between two high-speed or low-power MIPI sources. The FSA641 has specially been designed for the MIPI specification and allows connection to either a CSI or DSI module. The FSA641 features an extremely low on capacitance (Con) of 8 pF . The wide bandwidth ( 1 GHz ) results in signals with minimum edge and phase distortion. Superior channel-to-channel crosstalk minimizes interference.

| Pin \# | Pin Name | Type | Description |
| :---: | :---: | :---: | :--- |
| 20 | CLKP | I/O | Common positive clock path |
| 1 | CLKN | I/O | Common negative clock path |
| 2 | D1P | I/O | Common positive data 1 path |
| 3 | D1N | I/O | Common negative data 1 path |
| 4 | D2P | I/O | Common positive data 2 path |
| 5 | D2N | I/O | Common negative data 2 path |
| 15 | CLKAP | I/O | A-port positive clock path |
| 14 | CLKAN | I/O | A-port negative clock path |
| 13 | DA1P | I/O | A-port positive data 1 path |
| 12 | DA1N | I/O | A-port negative data 1 path |
| 11 | DA2P | I/O | A-port positive data 2 path |
| 10 | DA2N | I/O | A-port negative data 2 path |
| 18 | CLKBP | I/O | B-port positive clock path |
| 19 | CLKBN | I/O | B-port negative clock path |
| 16 | DB1P | I/O | B-port positive data 1 path |
| 17 | DB1N | I/O | B-port negative data 1 path |
| 6 | /OE | Input | Output Enable (Active Low) |
| 7 | GND | Ground | Ground |
| 8 | VCC | Supply | Power; 0.1 $\mu$ F decoupling capacitor to ground recommended |
| 9 | SEL | Input | A-port or B-port Select pin |
| Paddle | n/a | NC | Not Connected |

## Truth Table

| SEL | IOE | Function |
| :---: | :---: | :---: |
| Don't Care | HIGH | Disconnect |
| LOW | LOW | D1, D2, CLK=DA1, DA2, CLKA |
| HIGH | LOW | D1, CLK=DB1, CLKB; D2 OPEN |

## Absolute Maximum Ratings

Stresses exceeding the absolute maximum ratings may damage the device. The device may not function or be operable above the recommended operating conditions and stressing the parts to these levels is not recommended. In addition, extended exposure to stresses above the recommended operating conditions may affect device reliability. The absolute maximum ratings are stress ratings only.

| Symbol | Parameter |  | Min. | Max. | Unit |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $V_{\text {cc }}$ | Supply Voltage |  | -0.50 | +5.25 | V |
| $V_{\text {CNTRL }}$ | DC Input Voltage (SEL, /OE) ${ }^{(1)}$ |  | -0.5 | $\mathrm{V}_{\mathrm{cc}}$ | V |
| $\mathrm{V}_{\text {SW }}$ | DC Switch I/O Voltage ${ }^{(1)}$ |  | -0.5 | $\mathrm{V}_{\mathrm{cc}}+0.3$ | V |
| IIK | DC Input Diode Current |  | -50 |  | mA |
| lout | DC Output Current |  |  | 50 | mA |
| TSTG | Storage Temperature |  | -65 | +150 | ${ }^{\circ} \mathrm{C}$ |
| ESD | Human Body Model, JEDEC: JESD22-A114 | All Pins |  | 6.5 | kV |
|  |  | I/O to GND |  | 8.0 |  |
|  |  | Power to GND |  | 16.0 |  |
|  | Charged Device Model, JEDEC: JESD22-C101 |  |  | 2.0 |  |

## Note:

1. The input and output negative ratings may be exceeded if the input and output diode current ratings are observed.

## Recommended Operating Conditions

The Recommended Operating Conditions table defines the conditions for actual device operation. Recommended operating conditions are specified to ensure optimal performance to the datasheet specifications. Fairchild does not recommend exceeding them or designing to Absolute Maximum Ratings.

| Symbol | Parameter | Min. | Max. | Unit |
| :---: | :--- | :---: | :---: | :---: |
| $\mathrm{V}_{\mathrm{CC}}$ | Supply Voltage | 2.65 | 4.30 | V |
| $\mathrm{~V}_{\mathrm{CNTRL}}$ | Control Input Voltage (SEL, /OE) $)^{(2)}$ | 0 | $\mathrm{~V}_{\mathrm{CC}}$ | V |
| $\mathrm{V}_{\mathrm{SW}}$ | Switch I/O Voltage | -0.5 | $\mathrm{~V}_{\mathrm{CC}}-1 \mathrm{~V}$ | V |
| $\mathrm{~T}_{\mathrm{A}}$ | Operating Temperature | -40 | +85 | ${ }^{\circ} \mathrm{C}$ |

## Note:

2. The control input must be held HIGH or LOW; it must not float.

## DC Electrical Characteristics

All typical values are $\mathrm{T}_{\mathrm{A}}=25^{\circ} \mathrm{C}$ unless otherwise specified.

| Symbol | Parameter | Conditions | $\mathrm{V}_{\mathrm{cc}}(\mathrm{V})$ | $\mathrm{T}_{\mathrm{A}}=-40$ to $+85^{\circ} \mathrm{C}$ |  |  | Units |

## LIFE SUPPORT POLICY

FAIRCHID'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WTHOUT THE EXPRESS MRITTEN APPROVAL OF FAIRCHID SEMICONDUCTOR CORPORATION.
As used herein:

1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body or (b) support or sustain life, and (c) whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury of the user.
2. A critical component in any component of a life support, device, or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.

## ANTI-COUNTERFEITING POLICY

Fairchild Semiconductor Comoration's Anti-Counterfeiting Policy. Fairchild's Anti-Counterfeiting Policy is also stated on our extemal website, whw.fairchildsemi.com, under Sales Support.
Counterfeiting of semiconductor parts is a growing problem in the industry. All manufacturers of semiconductor products are experiencing counterfeiting of their parts. Customers who inadvertently purchase counterfeit parts experience many problems such as loss of brand reputation, substandard performance, failed applications, and increased cost of production and manufacturing delays. Fairchild is taking strong measures to protect ourselves and our customers from the proliferation of counterfeit parts. Fairchild strongly encourages customers to purchase Fairchild parts either directly from Fairchild or from Authorized Fairchild Distributors who are listed by country on our web page cited above. Products customers buy either fromFairchild directly or from Authorized Fairchild Distributors are genuine parts, have full traceability, meet Fairchild's quality standards for handling and storage and provide access to Fairchild's full range of up-to-date technical and product information. Fairchild and our Authorized Distributors will stand behind all warranties and will appropriately address any warranty issues that may arise. Fairchild will not provide any warranty coverage or other assistance for parts bought from Unauthorized Sources. Fairchild is committed to combat this global problem and encourage our customers to do theirpart in stopping this practice by buying direct or from authorized distributors.

#### Abstract

ON Semiconductor and ON are trademarks of Semiconductor Components Industries, LLC dba ON Semiconductor or its subsidiaries in the United States and/or other countries. ON Semiconductor owns the rights to a number of patents, trademarks, copyrights, trade secrets, and other intellectual property. A listing of ON Semiconductor's product/patent coverage may be accessed at www.onsemi.com/site/pdf/Patent-Marking.pdf. ON Semiconductor reserves the right to make changes without further notice to any products herein. ON Semiconductor makes no warranty, representation or guarantee regarding the suitability of its products for any particular purpose, nor does ON Semiconductor assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation special, consequential or incidental damages. Buyer is responsible for its products and applications using ON Semiconductor products, including compliance with all laws, regulations and safety requirements or standards, regardless of any support or applications information provided by ON Semiconductor. "Typical" parameters which may be provided in ON Semiconductor data sheets and/or specifications can and do vary in different applications and actual performance may vary over time. All operating parameters, including "Typicals" must be validated for each customer application by customer's technical experts. ON Semiconductor does not convey any license under its patent rights nor the rights of others. ON Semiconductor products are not designed, intended, or authorized for use as a critical component in life support systems or any FDA Class 3 medical devices or medical devices with a same or similar classification in a foreign jurisdiction or any devices intended for implantation in the human body. Should Buyer purchase or use ON Semiconductor products for any such unintended or unauthorized application, Buyer shall indemnify and hold ON Semiconductor and its officers, employees, subsidiaries, affiliates, and distributors harmless against all claims, costs, damages, and expenses, and reasonable attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that ON Semiconductor was negligent regarding the design or manufacture of the part. ON Semiconductor is an Equal Opportunity/Affirmative Action Employer. This literature is subject to all applicable copyright laws and is not for resale in any manner.
