## ON Semiconductor ${ }^{\oplus}$

## To learn more about ON Semiconductor, please visit our website at www.onsemi.com

Please note: As part of the Fairchild Semiconductor integration, some of the Fairchild orderable part numbers will need to change in order to meet ON Semiconductor's system requirements. Since the ON Semiconductor product management systems do not have the ability to manage part nomenclature that utilizes an underscore ( $\_$), the underscore ( $\_$) in the Fairchild part numbers will be changed to a dash (-). This document may contain device numbers with an underscore (_). Please check the ON Semiconductor website to verify the updated device numbers. The most current and up-to-date ordering information can be found at www.onsemi.com. Please email any questions regarding the system integration to Fairchild questions@onsemi.com.

## FSA8049

## Audio Jack Detection and Configuration，MIC／GND Cross Point Switch

Features

| Detection | Audio Plug GND \＆MIC Polarity |
| :---: | :---: |
| $V_{\text {D }}$ | 2.5 to 4.4 V |
| THD（MIC） | 0．002\％Typical |
| ESD（IEC 61000－4－2） <br> （Air Gap） | 15 kV |
| Operating Temperature | $-40^{\circ} \mathrm{C}$ to $85^{\circ} \mathrm{C}$ |
| Package | 9－Ball WLCSP $3 \times 3$ Array， 0.4 mm Terminal Pitch， $250 \mu \mathrm{~m}$ Ball |
| Top Mark | M3 |
| Ordering Information | FSA8049UCX |

## Applications

－Cellular Phones，Smart Phones
－MP3 and Portable Multimedia Player

## Description

The FSA8049 is an audio jack detection switch for 3－or 4－pole accessories．The FSA8049 detects the locations of ground（GND）and microphone（MIC）poles on the audio plug and automatically routes them to the appropriate connections．This allows the end user to plug accessories， such as headsets with different audio pole configurations， into the mobile device and have them operate correctly．
－Detects 3－or 4－pole audio accessories
－Detects polarity of GND and MIC on 4－pole plugs
－Automatically routes GND and MIC to audio jack terminals

## Related Resources

－For evaluation boards and questions，please contact： Analog．Switch＠fairchildsemi．com．

## Typical Application

Figure 1．Mobile Phone Example

## Pin Configuration

Figure 2. Pin Assignments

## Note:

1. GND and GNDA can be shorted together if the system does not utilize an FM antenna on the handset ground. If the system utilizes an FM antenna on the handset ground; separate GND and GNDA, place the FM-decoupling inductor and capacitor on GNDA only, and connect GND to a low-impedance path to battery ground.

## States of Pins after Audio Jack Detection

State of pins GND/MIC1, GND/MIC2, and MIC after detection time ( $\mathrm{t}_{\mathrm{DET}}$ ) is complete.

| GND/MIC1 | GND/MIC2 | Switch Configuration | Accessory Connected |
| :---: | :---: | :--- | :--- |
| 0 (GND) | 0 (GND) | GND/MIC1=GND, GND/MIC2=GND, MIC=GND | 3-Pole Headphones |
| 0 (GND) | 1 (MIC Attached) | GND/MIC1=GND, GND/MIC2=MIC | 4-Pole Headset with Microphone |
| 1 (MIC Attached) | 0 (GND) | GND/MIC1=MIC, GND/MIC2=GND | 4-Pole Headset with Microphone |

## Absolute Maximum Ratings

Stresses exceeding the absolute maximum ratings may damage the device. The device may not function or be operable above the recommended operating conditions and stressing the parts to these levels is not recommended. In addition, extended exposure to stresses above the recommended operating conditions may affect device reliability. The absolute maximum ratings are stress ratings only.

| Symbol | Parameter |  | Min. | Max. | Unit |
| :---: | :---: | :---: | :---: | :---: | :---: |
| v | Supply Voltage from Battery |  | -0.5 | 6.0 | V |
| $\mathrm{V}_{\text {Sw }}$ | Switch I/O Voltage |  | -0.5 | $\mathrm{V}_{\mathrm{CC}}+0.5$ | V |
| $1{ }_{\text {IK }}$ | Input Clamp Diode Current |  | -50 |  | mA |
| Isw | Switch I/O Current (Continuous) ${ }^{(2)}$ |  |  | 50 | mA |
| TSTG | Storage Temperature Range |  | -65 | +150 | ${ }^{\circ} \mathrm{C}$ |
| $\mathrm{T}_{J}$ | Maximum Junction Temperature |  |  | +150 | ${ }^{\circ} \mathrm{C}$ |
| TL | Lead Temperature (Soldering, 10 Seconds) |  |  | +260 | ${ }^{\circ} \mathrm{C}$ |
| ESD | IEC 61000-4-2 System ESD | Air Gap | 15 |  | kV |
|  |  | Contact | 8 |  |  |
|  | Human Body Model, JEDEC JESD22-A114 | GND/MIC ${ }_{n}$ vs. GND | 11 |  |  |
|  |  | VDD vs. GND | 16 |  |  |
|  |  | All Pins | 7 |  |  |
|  | Charged Device Model, JEDEC JESD22-C101 | All Pins | 1.5 |  |  |

## Note:

2. The input and output negative ratings may be exceeded if the input and output diode current ratings are observed.

## Recommended Operating Conditions

The Recommended Operating Conditions table defines the conditions for actual device operation. Recommended operating conditions are specified to ensure optimal performance to the datasheet specifications. Fairchild does not recommend exceeding them or designing to Absolute Maximum Ratings.

## DISCLAIMER

FAIRCHILD SEMICONDUCTOR RESERVES THE RIGHT TO MAKE CHANGES WITHOUT FURTHER NOTICE TO ANY PRODUCTS HEREIN TO IMPROVE RELIABILITY, FUNCTION, OR DESIGN. FAIRCHILD DOES NOT ASSUME ANY LIABILITY ARISING OUT OF THE APPLICATION OR USE OF ANY PRODUCT OR CIRCUIT DESCRIBED HEREIN; NEITHER DOES IT CONVEY ANY LICENSE UNDER ITS PATENT RIGHTS, NOR THE RIGHTS OF OTHERS. THESE SPECIFICATIONS DO NOT EXPAND THE TERMS OF FAIRCHILD'S WORLDWIDE TERMS AND CONDITIONS, SPECIFICALLY THE WARRANTY THEREIN WHICH COVERS THESE PRODUCTS.

## LIFE SUPPORT POLICY

FAIRCHILD'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF FAIRCHILD SEMICONDUCTOR CORPORATION.
As used herein:

1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body or (b) support or sustain life, and (c) whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury of the user.
2. A critical component in any component of a life support, device, or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.

## ANTI-COUNTERFEITING POLICY

Fairchild Semiconductor Corporation's Anti-Counterfeiting Policy. Fairchild's Anti-Counterfeiting Policy is also stated on our extemal website, www.fairchildsemi.com, under Sales Support.
Counterfeiting of semiconductor parts is a growing problem in the industry. All manufacturers of semiconductor products are experiencing counterfeiting of their parts. Customers who inadvertently purchase counterfeit parts experience many problems such as loss of brand reputation, substandard performance, failed applications, and increased cost of production and manufacturing delays. Fairchild is taking strong measures to protect ourselves and our customers from the proliferation of counterfeit parts. Fairchild strongly encourages customers to purchase Fairchild parts either directly from Fairchild or from Authorized Fairchild Distributors who are listed by country on our web page cited above. Products customers buy either from Fairchild directly or from Authorized Fairchild Distributors are genuine parts, have full traceability, meet Fairchild's quality standards for handling and storage and provide access to Fairchild's full range of up-to-date technical and product information. Fairchild and our Authorized Distributors will stand behind all warranties and will appropriately address any warranty issues that may arise. Fairchild will not provide any warranty coverage or other assistance for parts bought from Unauthorized Sources. Fairchild is committed to combat this global problem and encourage our customers to do their part in stopping this practice by buying direct or from authorized distributors.

#### Abstract

ON Semiconductor and ON are trademarks of Semiconductor Components Industries, LLC dba ON Semiconductor or its subsidiaries in the United States and/or other countries. ON Semiconductor owns the rights to a number of patents, trademarks, copyrights, trade secrets, and other intellectual property. A listing of ON Semiconductor's product/patent coverage may be accessed at www.onsemi.com/site/pdf/Patent-Marking.pdf. ON Semiconductor reserves the right to make changes without further notice to any products herein. ON Semiconductor makes no warranty, representation or guarantee regarding the suitability of its products for any particular purpose, nor does ON Semiconductor assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation special, consequential or incidental damages. Buyer is responsible for its products and applications using ON Semiconductor products, including compliance with all laws, regulations and safety requirements or standards, regardless of any support or applications information provided by ON Semiconductor. "Typical" parameters which may be provided in ON Semiconductor data sheets and/or specifications can and do vary in different applications and actual performance may vary over time. All operating parameters, including "Typicals" must be validated for each customer application by customer's technical experts. ON Semiconductor does not convey any license under its patent rights nor the rights of others. ON Semiconductor products are not designed, intended, or authorized for use as a critical component in life support systems or any FDA Class 3 medical devices or medical devices with a same or similar classification in a foreign jurisdiction or any devices intended for implantation in the human body. Should Buyer purchase or use ON Semiconductor products for any such unintended or unauthorized application, Buyer shall indemnify and hold ON Semiconductor and its officers, employees, subsidiaries, affiliates, and distributors harmless against all claims, costs, damages, and expenses, and reasonable attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that ON Semiconductor was negligent regarding the design or manufacture of the part. ON Semiconductor is an Equal Opportunity/Affirmative Action Employer. This literature is subject to all applicable copyright laws and is not for resale in any manner.
