## ON Semiconductor ${ }^{\oplus}$

## To learn more about ON Semiconductor, please visit our website at www.onsemi.com

Please note: As part of the Fairchild Semiconductor integration, some of the Fairchild orderable part numbers will need to change in order to meet ON Semiconductor's system requirements. Since the ON Semiconductor product management systems do not have the ability to manage part nomenclature that utilizes an underscore ( $\_$), the underscore ( $\_$) in the Fairchild part numbers will be changed to a dash (-). This document may contain device numbers with an underscore (_). Please check the ON Semiconductor website to verify the updated device numbers. The most current and up-to-date ordering information can be found at www.onsemi.com. Please email any questions regarding the system integration to Fairchild questions@onsemi.com.

## FXL4245

Low-Voltage, Dual-Supply, 8-Bit, Signal Translator with Configurable Voltage Supplies, Signal Levels, and 3-State Outputs

## Features

- Bi-Directional Interface between Two Levels from 1.1 V to 3.6 V
- Fully Configurable, Inputs Track $\mathrm{V}_{\mathrm{Cc}}$ Level
- Non-Preferential Power-up; Either Vcc May Be Powered-up First
- Outputs Remain in 3-State until Active $\mathrm{V}_{\mathrm{CC}}$ Level is Reached
- Outputs Switch to 3-State if Either $\mathrm{V}_{\mathrm{CC}}$ is at GND
- Power-Off Protection
- Control Inputs (T/R, $\overline{\mathrm{OE}}$ ) Levels are Referenced To $V_{\text {CCA }}$ Voltage
- Packaged in 24-Pin MLP
- ESD Protection Exceeds:
- 4 kV Human Body Model (per JESD22-A114 \& Mil Std 883e 3015.7)
- 8 kV Human Body Model I/O to GND (per JESD22-A114 \& Mil Std 883e 3015.7)
- 1 kV Charge Device Model (per ESD STM 5.3)
- 200 V Machine Model
(per JESD22-A115 \& ESD STM5.2)

## Description

The FXL4245 is a configurable dual-voltage-supply translator designed for bi-directional voltage translation of signals between two voltage levels. The device allows translation between voltages as high as 3.6 V to as low as 1.1 V . The A port tracks the $\mathrm{V}_{\mathrm{CCA}}$ level and the $B$ port tracks the $\mathrm{V}_{\text {CcB }}$ level. Both ports are designed to accept supply voltage levels from 1.1 V to 3.6 V . This allows for bi-directional voltage translation over a variety of voltage levels: 1.2 V, 1.5 V, $1.8 \mathrm{~V}, 2.5 \mathrm{~V}$, and 3.3 V .

The device remains in 3-state until both $\mathrm{V}_{\mathrm{cc}} \mathrm{S}$ reach active levels, allowing either $\mathrm{V}_{\mathrm{CC}}$ to be powered-up first. The device also contains power-down control circuits that place the device in 3-state if either $\mathrm{V}_{\mathrm{Cc}}$ is removed.

The Transmit/Receive ( $\mathrm{T} / \overline{\mathrm{R}}$ ) input determines the direction of data flow through the device. The OE input, when HIGH, disables both the A and B ports by placing them in a 3-state condition. The FXL4245 is designed with the control pins (T/R and OE) supplied by $\mathrm{V}_{\text {CCA }}$.

## Ordering Information

| Part Number | Package | Packing Method |
| :---: | :---: | :---: |
| FXL4245MPX | 24-Pin Molded Leadless Package (MLP), JEDEC MO-220, 3.5 $\times 4.5 \mathrm{~mm}$ | Tape and Reel |

## Pin Configuration

Figure 1. Pin Configuration (Top Through View)

## Pin Definitions

| Pin \# | Name | Description |
| :---: | :---: | :--- |
| 1 | $\mathrm{~V}_{\mathrm{CCA}}$ | Side-A Power Supply |
| 2 | $\mathrm{~T} / \mathrm{R}$ | Transmit / Receive Input |
| $3,4,5,6,7,8,9,10$ | $\mathrm{~A}_{0}, \mathrm{~A}_{1}, \mathrm{~A}_{2}, \mathrm{~A}_{3}, \mathrm{~A}_{4}, \mathrm{~A}_{5}, \mathrm{~A}_{6}, \mathrm{~A}_{7}$ | Side-A Inputs or 3-State Outputs |
| $11,12,13$ | GND | Ground |
| $14,15,16,17,18,19,20,21$ | $\mathrm{~B}_{7}, \mathrm{~B}_{6}, \mathrm{~B}_{5}, \mathrm{~B}_{4}, \mathrm{~B}_{3}, \mathrm{~B}_{2}, \mathrm{~B}_{1}, \mathrm{~B}_{0}$ | Side-B Inputs or 3-State Outputs |
| 22 | $\overline{\mathrm{OE}}$ | Output Enable Input |
| 23,24 | $\mathrm{~V}_{\mathrm{CCB}}$ | Side-B Power Supply |
| DAP | No Connect | No Connect |

## Truth Table

| Inputs |  | Description |
| :---: | :---: | :--- |
| $\overline{\mathbf{O E}}$ | $\mathbf{T} / \overline{\mathbf{R}}$ |  |
| LOW Voltage Level | LOW Voltage Level | Bus A Data to Bus B |
| LOW Voltage Level | HIGH Voltage Level | 3-State |
| HIGH Voltage Level | Don't Care |  |

## Absolute Maximum Ratings

Stresses exceeding the absolute maximum ratings may damage the device. The device may not function or be operable above the recommended operating conditions and stressing the parts to these levels is not recommended. In addition, extended exposure to stresses above the recommended operating conditions may affect device reliability. The absolute maximum ratings are stress ratings only.

| Symbol | Parameter | Conditions |  | Min. | Max. | Unit |

## Note:

1. I/O absolute maximum ratings must be observed.

## Recommended Operating Conditions

The Recommended Operating Conditions table defines the conditions for actual device operation. Recommended operating conditions are specified to ensure optimal performance to the datasheet specifications. Fairchild does not recommend exceeding them or designing to Absolute Maximum Ratings.

| Symbol | Parameter |  | Conditions | Min. | Max. | Unit |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\mathrm{V}_{\mathrm{Cc}}$ | Power Supply | Operating $\mathrm{V}_{\text {CCA }}$ or $\mathrm{V}_{\mathrm{CCB}}$ |  | 1.1 | 3.6 | V |
| $V_{1}$ | Input Voltage | Port A |  | 0 | 3.6 | V |
|  |  | Port B |  | 0 | 3.6 |  |
|  |  | Control Inputs (T/ $\overline{\mathrm{R}}, \overline{\mathrm{OE}}$ ) |  | 0 | $\mathrm{V}_{\text {CCA }}$ |  |
| $\mathrm{IOH}_{\mathrm{O}} / \mathrm{IOL}_{\mathrm{OL}}$ | Output Current | $\mathrm{V}_{\mathrm{Cco}}$ | 3.0 V to 3.6 V |  | $\pm 24$ | mA |
|  |  |  | 2.3 V to 2.7 V |  | $\pm 18$ |  |
|  |  |  | 1.65 V to 1.95 V |  | $\pm 6$ |  |
|  |  |  | 1.40 V to 1.65 V |  | $\pm 2$ |  |
|  |  |  | 1.1 V to 1.4 V |  | $\pm 0.5$ |  |
| $\mathrm{T}_{\text {A }}$ | Operating Temperature, Free Air |  |  | -40 | +85 | ${ }^{\circ} \mathrm{C}$ |
| $\Delta \mathrm{V} / \Delta \mathrm{t}$ | Minimum Input Edge Rate | $\mathrm{V}_{\text {CCA/B }}=1.1 \mathrm{~V}$ to 3.6 V |  |  | 10 | ns/V |

## Note:

2. All unused inputs must be held at $\mathrm{V}_{\mathrm{CCI}}$ or GND .

10. For $\mathrm{V}_{\mathrm{MI}} \mathrm{V}_{\mathrm{CCO}}=\mathrm{V}_{\mathrm{CCA}}$ for control pins $\mathrm{T} / \overline{\mathrm{R}}$ and $\overline{\mathrm{OE}}$ or $\mathrm{V}_{\mathrm{CCA}} / 2$.

## Functional Description

## Power-Up/Power-Down Sequencing

FXL translators offer an advantage in that either $\mathrm{V}_{\mathrm{cc}}$ may be powered up first. This benefit derives from the chip design. When either $\mathrm{V}_{\mathrm{Cc}}$ is at 0 V , outputs are in a High-impedance state. The control inputs (T/R and $\overline{O E}$ ) are designed to track the $\mathrm{V}_{\mathrm{CCA}}$ supply. A pull-up resistor tying $O E$ to $\mathrm{V}_{\mathrm{CCA}}$ should be used to ensure that bus contention, excessive currents, or oscillations do not occur during power-up/power-down. The size of the pullup resistor is based upon the current-sinking capability of the OE driver.

The recommended power-up sequence is:

1. Apply power to either $\mathrm{V}_{\mathrm{Cc}}$.
2. Apply power to the $T \bar{R}$ input (logic HIGH for A-to-B operation; logic LOW for B-to-A operation) and to the respective data inputs (A port or B port). This may occur at the same time as step 1.
3. Apply power to the other $\mathrm{V}_{\mathrm{Cc}}$.
4. Drive the OE input LOW to enable the device.

The recommended power-down sequence is:

1. Drive $\overline{\mathrm{OE}}$ input HIGH to disable the device.
2. Remove power from either $\mathrm{V}_{\mathrm{cc}}$.
3. Remove power from the other $\mathrm{V}_{\mathrm{cc}}$.

## Physical Dimensions

Figure 6. 24-Pin Molded Leadless Package (MLP), JEDEC MO-220, $3.5 \times 4.5 \mathrm{~mm}$
Package drawings are provided as a service to customers considering Fairchild components. Drawings may change in any manner without notice. Please note the revision and/or date on the drawing and contact a Fairchild Semiconductor representative to verify or obtain the most recent revision. Package specifications do not expand the terms of Fairchild's worldwide terms and conditions, specifically the warranty therein, which covers Fairchild products.

Always visit Fairchild Semiconductor's online packaging area for the most recent package drawings: http://www.fairchildsemi.com/packagingl.

## LIFE SUPPORT POLICY

FAIRCHID'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WTHOUT THE EXPRESS WRITIEN APPROVAL OF FAIRCHID SEMICONDUCTOR CORPORATION.
As used herein:

1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body or (b) support or sustain life, and (C) whose failure to perform when propenty used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury of the user.
2. A critical component in any component of a life support, device, or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.

## ANTI-COUNTERFEITING POLICY

Fairchild Semiconductor Corporation's Anti-Counterfeiting Policy. Fairchild's Anti-Counterfeiting Policy is also stated on our extemal website, whw.fairchildserri.com, under Sales Support
Counterfeiting of semiconductor parts is a growing problem in the industry. All manufacturers of semioonductor products are experiencing counterfeiting of their parts. Customers who inadvertently purchase counterfeit parts experience many problems such as loss of brand reputation, substandard performance, failed applications, and increased cost of production and manufacturing delays. Fairchild is taking strong measures to protect ourselves and our customers from the proliferation of counterfeit parts. Fairchild strongly encourages customers to purchase Fairchild parts either directly from Fairchild or from Authorized Fairchild Distributors who are listed by country on our web page cited above. Products customers buy either from Fairchild directly or from Authorized Fairchild Distributors are genuine parts, have full traceability, meet Fairchild's quality standards for handling and storage and provide access to Fairchild's full range of up-to-date technical and product information. Fairchild and our Authonzed Distributors will stand behind all warranties and will appropriately address any warranty issues that may arise. Fairchild will not provide any warranty coverage or other assistance for parts bought from Unauthorized Sources. Fairchild is committed to combat this global problem and encourage our customers to do their part in stopping this practice by buying direct or from authorized distributors

## PRODUCT STATUS DEFINITIONS

Definition of Terms

| Datasheet Identification | Product Status | Definition |
| :---: | :---: | :--- |
| Advance Information | Formative / In Design | Datasheet contains the design specifications for product development. Specifications may change <br> in any manner without notice. |
| Preliminary | First Production | Datasheet contains preliminary data; supplementary data will be published at a later date. Fairchild <br> Semiconductor reserves the right to make changes at any time without notice to improve design. |
| No Identification Needed | Full Production | Datasheet contains final specifications. Fairchild Semiconductor reserves the right to make <br> changes at any time without notice to improve the design. |
| Obsolete | Not In Production | Datasheet contains specifications on a product that is discontinued by Fairchild Semiconductor. <br> The datasheet is for reference infomation only. |

#### Abstract

ON Semiconductor and ON are trademarks of Semiconductor Components Industries, LLC dba ON Semiconductor or its subsidiaries in the United States and/or other countries. ON Semiconductor owns the rights to a number of patents, trademarks, copyrights, trade secrets, and other intellectual property. A listing of ON Semiconductor's product/patent coverage may be accessed at www.onsemi.com/site/pdf/Patent-Marking.pdf. ON Semiconductor reserves the right to make changes without further notice to any products herein. ON Semiconductor makes no warranty, representation or guarantee regarding the suitability of its products for any particular purpose, nor does ON Semiconductor assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation special, consequential or incidental damages. Buyer is responsible for its products and applications using ON Semiconductor products, including compliance with all laws, regulations and safety requirements or standards, regardless of any support or applications information provided by ON Semiconductor. "Typical" parameters which may be provided in ON Semiconductor data sheets and/or specifications can and do vary in different applications and actual performance may vary over time. All operating parameters, including "Typicals" must be validated for each customer application by customer's technical experts. ON Semiconductor does not convey any license under its patent rights nor the rights of others. ON Semiconductor products are not designed, intended, or authorized for use as a critical component in life support systems or any FDA Class 3 medical devices or medical devices with a same or similar classification in a foreign jurisdiction or any devices intended for implantation in the human body. Should Buyer purchase or use ON Semiconductor products for any such unintended or unauthorized application, Buyer shall indemnify and hold ON Semiconductor and its officers, employees, subsidiaries, affiliates, and distributors harmless against all claims, costs, damages, and expenses, and reasonable attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that ON Semiconductor was negligent regarding the design or manufacture of the part. ON Semiconductor is an Equal Opportunity/Affirmative Action Employer. This literature is subject to all applicable copyright laws and is not for resale in any manner.
