Single, Dual, Quad Low-Voltage, Rail-to-Rail Operational Amplifiers

LMV321, NCV321, LMV358, LMV324

The LMV321, LMV321I, NCV321, LMV358/LMV358I and LMV324 are CMOS single, dual, and quad low voltage operational amplifiers with rail-to-rail output swing. These amplifiers are a cost-effective solution for applications where low power consumption and space saving packages are critical. Specification tables are provided for operation from power supply voltages at 2.7 V and 5 V. Rail-to-Rail operation provides improved signal-to-noise preformance. Ultra low quiescent current makes this series of amplifiers ideal for portable, battery operated equipment. The common mode input range includes ground making the device useful for low-side current-shunt measurements. The ultra small packages allow for placement on the PCB in close proximity to the signal source thereby reducing noise pickup.

Features

- Operation from 2.7 V to 5.0 V Single-Sided Power Supply
- LMV321 Single Available in Ultra Small 5 Pin SC70 Package
- No Output Crossover Distortion
- Rail-to-Rail Output
- Low Quiescent Current: LMV358 Dual 220 μA, Max per Channel
- No Output Phase–Reversal from Overdriven Input
- NCV Prefix for Automotive and Other Applications Requiring Unique Site and Control Change Requirements; AEC-Q100 Qualified and PPAP Capable
- These Devices are Pb–Free, Halogen Free/BFR Free and are RoHS Compliant

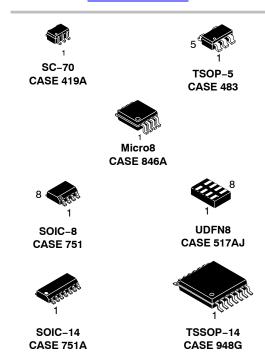

Typical Applications

- Notebook Computers and PDA's
- Portable Battery-Operated Instruments
- Active Filters

Stresses exceeding those listed in the Maximum Ratings table may damage the device. If any of these limits are exceeded, device functionality should not be assumed, damage may occur and reliability may be affected.

^{1.} Continuous short–circuit operation to ground at elevated ambient temperature can result in exceeding the maximum allowed junction temperature of 150°C. Output currents in excess of 45 mA over long term may adversely affect reliability. Shorting output to either V+ or V- will adversely affect reliability.

^{2.} NCV prefix is qualified for automotive usage.
