Evaluation Board User's Manual for NB4N855S

ON Semiconductor®

<http://onsemi.com>

EVAL BOARD USER'S MANUAL

Description

ON Semiconductor has developed an evaluation board for the NB4N855S device as a convenience for the customers interested in performing their own device engineering assessment. This board provides a high bandwidth 50 Ω controlled impedance environment. The pictures in Figure 1 show the top and bottom view of the evaluation board, which can be configured in several different ways.

This NB4N855S evaluation board manual contains:

- Appropriate Lab Setup
- Assembly Instructions
- Bill of Materials

This manual should be used in conjunction with the NB4N855S device data sheet, which contains full technical details on the device specifications and operation.

Board Lay-Up

The NB4N855S evaluation board is implemented in four layers with split (dual) power supplies (Figure 6, Evaluation Board Lay-up). For standard lab setup, a split (dual) power supply is essential to enable the 50 Ω internal impedance in the oscilloscope as a devices termination. The first layer or primary trace layer is 0.005" thick Rogers RO4003 material, which is designed to have equal electrical length on all signal traces from the device under the test (DUT) to the sense output. The second layer is the 1.0 oz copper ground plane. The FR4 dielectric material is placed between second and third layer and between third and fourth layer. The third layer is also 1.0 oz copper ground plane. The fourth layer is the secondary trace layer.

Figure 1. Top and Bottom View of the NB4N855S Evaluation Board

4-LAYER STACKUP

Figure 2. Evaluation Board Lay-up

Connecting Power and Ground Planes

The side launch 9 pin power supply connector is wired as shown in Figure 3. Test points can be soldered on the top of

the PCB to accommodate easier connections. Exact values that need to be applied can be found in Table 1.

Table 1. Power Supply Levels

Power Supply Span	V _{CC} (Pin 10)	V _{EE} / GND (Pin 5)	DUT_GND (PCB SMA Ground))
3.0 V	1.75 V	-1.25 V	0 V
3.3 V	2.05 V	-1.25 V	0 V
3.6 V	2.35 V	-1.25 V	0 V

Figure 3. Power Supply Connector – 9 Pin Side View (Left) and PCB Top View (Right)

Stimulus (Generator) Termination

All ECL outputs need to be terminated to V_{TT} (V_{TT} = V_{CC} - 2.0 V = GND) via a 50 Ω resistor. The current board design utilizes the space for placement of the external termination resistors. (More information on termination is provided in AN8020). The 0402 chip resistor pads are provided on the

bottom side of the evaluation board. Solder the chip resistors to the bottom side of the board between the appropriate input of the device pin pads and the ground pads as shown in Figure 4 (for split power supply setup, PCB is assembled in this configuration).

NB4N855SMEVB

Figure 4. Expanded Bottom View

Likewise for CML outputs, CML stimulus signal need to be terminated to V_{CC} via a $50\ \Omega$ resistor. To accomplish this configuration the external termination resistor has to be moved from DUT_GND ring to V_{CC} ring on the bottom of the board.

For the LVDS configuration Input pin pads of the D0 or D1 input has to be shorted using $100\ \Omega$ resistor across differential lines.

DUT Termination

For standard lab setup and test, a split (dual) power supply is required enabling the $50\ \Omega$ internal impedance in the

oscilloscope to be used as a termination of the signals (in split power supply setup DUT_GND is the system ground, V_{CC} is varied, and V_{EE} is $-1.25\ \text{V}$; see Table 1, Power Supply Levels).

Board Components Configuration

The NB4N855SMEVB evaluation board requires eight side SMA connectors. Placement locations are described in the Table 2 below.

Table 2. SMA Connectors and Jumpers Placement

Device	J1/D0	J2/D0b	J3/D1	J4/D1b	J5	J6/Q1b	J7/Q1	J8/Q0	J9/Q0b	J10
Pin #	1	2	3	4	5	6	7	8	9	10
Connector	Yes	Yes	Yes	Yes	No	Yes	Yes	Yes	Yes	No
Resistor (bottom)	0402 $50\ \Omega$	0402 $50\ \Omega$	0402 $50\ \Omega$	0402 $50\ \Omega$	0402 $0.01\ \mu\text{F}$	No	No	No	No	0402 $0.01\ \mu\text{F}$
Wire	No	No	No	No	to V_{EE}/GND	No	No	No	No	to V_{CC}

NB4N855SMEVB

Figure 5. Lab Setup

1. Connect appropriate power supplies to V_{CC} , V_{EE}/GND and DUT_GND (See Table 1)
2. Connect a signal generator to the input SMA connectors via matched cables. Setup input signal according to the device data sheet.
3. Connect a test measurement device on the device output SMA connectors via matched cables.

NOTE: The test measurement device must contain 50 Ω termination.

SOLDERING FOOTPRINT*

*For additional information on our Pb-Free strategy and soldering details, please download the ON Semiconductor Soldering and Mounting Techniques Reference Manual, SOLDERRM/D.

onsemi, **Onsemi**, and other names, marks, and brands are registered and/or common law trademarks of Semiconductor Components Industries, LLC dba "**onsemi**" or its affiliates and/or subsidiaries in the United States and/or other countries. **onsemi** owns the rights to a number of patents, trademarks, copyrights, trade secrets, and other intellectual property. A listing of **onsemi**'s product/patent coverage may be accessed at www.onsemi.com/site/pdf/Patent-Marking.pdf. **onsemi** is an Equal Opportunity/Affirmative Action Employer. This literature is subject to all applicable copyright laws and is not for resale in any manner.

The evaluation board/kit (research and development board/kit) (hereinafter the "board") is not a finished product and is not available for sale to consumers. The board is only intended for research, development, demonstration and evaluation purposes and will only be used in laboratory/development areas by persons with an engineering/technical training and familiar with the risks associated with handling electrical/mechanical components, systems and subsystems. This person assumes full responsibility/liability for proper and safe handling. Any other use, resale or redistribution for any other purpose is strictly prohibited.

THE BOARD IS PROVIDED BY ONSEMI TO YOU "AS IS" AND WITHOUT ANY REPRESENTATIONS OR WARRANTIES WHATSOEVER. WITHOUT LIMITING THE FOREGOING, ONSEMI (AND ITS LICENSORS/SUPPLIERS) HEREBY DISCLAIMS ANY AND ALL REPRESENTATIONS AND WARRANTIES IN RELATION TO THE BOARD, ANY MODIFICATIONS, OR THIS AGREEMENT, WHETHER EXPRESS, IMPLIED, STATUTORY OR OTHERWISE, INCLUDING WITHOUT LIMITATION ANY AND ALL REPRESENTATIONS AND WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, AND THOSE ARISING FROM A COURSE OF DEALING, TRADE USAGE, TRADE CUSTOM OR TRADE PRACTICE.

onsemi reserves the right to make changes without further notice to any board.

You are responsible for determining whether the board will be suitable for your intended use or application or will achieve your intended results. Prior to using or distributing any systems that have been evaluated, designed or tested using the board, you agree to test and validate your design to confirm the functionality for your application. Any technical, applications or design information or advice, quality characterization, reliability data or other services provided by **onsemi** shall not constitute any representation or warranty by **onsemi**, and no additional obligations or liabilities shall arise from **onsemi** having provided such information or services.

onsemi products including the boards are not designed, intended, or authorized for use in life support systems, or any FDA Class 3 medical devices or medical devices with a similar or equivalent classification in a foreign jurisdiction, or any devices intended for implantation in the human body. You agree to indemnify, defend and hold harmless **onsemi**, its directors, officers, employees, representatives, agents, subsidiaries, affiliates, distributors, and assigns, against any and all liabilities, losses, costs, damages, judgments, and expenses, arising out of any claim, demand, investigation, lawsuit, regulatory action or cause of action arising out of or associated with any unauthorized use, even if such claim alleges that **onsemi** was negligent regarding the design or manufacture of any products and/or the board.

This evaluation board/kit does not fall within the scope of the European Union directives regarding electromagnetic compatibility, restricted substances (RoHS), recycling (WEEE), FCC, CE or UL, and may not meet the technical requirements of these or other related directives.

FCC WARNING – This evaluation board/kit is intended for use for engineering development, demonstration, or evaluation purposes only and is not considered by **onsemi** to be a finished end product fit for general consumer use. It may generate, use, or radiate radio frequency energy and has not been tested for compliance with the limits of computing devices pursuant to part 15 of FCC rules, which are designed to provide reasonable protection against radio frequency interference. Operation of this equipment may cause interference with radio communications, in which case the user shall be responsible, at its expense, to take whatever measures may be required to correct this interference.

onsemi does not convey any license under its patent rights nor the rights of others.

LIMITATIONS OF LIABILITY: **onsemi** shall not be liable for any special, consequential, incidental, indirect or punitive damages, including, but not limited to the costs of requalification, delay, loss of profits or goodwill, arising out of or in connection with the board, even if **onsemi** is advised of the possibility of such damages. In no event shall **onsemi**'s aggregate liability from any obligation arising out of or in connection with the board, under any theory of liability, exceed the purchase price paid for the board, if any.

The board is provided to you subject to the license and other terms per **onsemi**'s standard terms and conditions of sale. For more information and documentation, please visit www.onsemi.com.
