2.5V / 3.3V Differential 2 X 2 Crosspoint Switch with LVPECL Outputs

Multi-Level Inputs w/ Internal Termination

Description

The NB6L72 is a clock or data high-bandwidth fully differential 2 x 2 Crosspoint Switch with internal source termination and LVPECL output structure, optimized for low skew and minimal jitter. The differential inputs incorporate internal 50 Ω termination resistors and will accept LVPECL, CML, LVDS, LVCMOS, or LVTTL logic levels. The SELECT inputs are single-ended and can be driven with LVCMOS/LVTTL.

The differential LVPECL outputs provide 800 mV output swings when externally terminated with a 50 Ω resistor to V_{CC} — 2.0 V.

The device is offered in a small 3 mm x 3 mm 16-pin QFN package. The NB6L72 is a member of the ECLinPS MAX[™] family of high

performance clock and data management products.
