## NCN1154

## DP3T Data Switch, USB 2.0 High Speed / Audio, with Negative Swing Capability

The NCN1154 is a DP3T switch for combined true-ground audio, USB 2.0 high speed data, and UART applications. It allows portable systems to use a single port to pass either high speed data or audio signals from an external headset; the 3 channels being compliant to USB 2.0, USB 1.1 and USB 1.0.

The switch is capable of passing signals with negative voltages as low as 2 V below ground. The device features shunt resistors on the audio ports. These resistors are switched in when the audio channel is off and provide a safe path to ground for any charge that may build up on the audio lines. This reduces Pop \& Click noise in the audio system.

The NCN1154 is housed in a space-saving, ultra low profile $2.0 \times 1.7 \times 0.5 \mathrm{~mm}, 12$ pin UQFN package.

## Features

- 3:1 High Speed Switch
- USB 2.0, USB $1.1 \&$ USB 1.0 Capable on all Channels
- High Bandwidth of 820 MHz on D+/D-
- Capable of Passing Negative Swing Signals Down to -2 V on R/L Channel
- 1.8 V Compatible Control Pins for $2.7 \mathrm{~V} \leq \mathrm{V}_{\mathrm{CC}} \leq 4.2 \mathrm{~V}$
- Audio Channel Shunt Resistors for Pop \& Click Noise Reduction
- Ultra Low THD in Audio Mode: $0.01 \%$ into $16 \Omega$ Load
- 5.25 V Tolerant Common Pins
- This is a $\mathrm{Pb}-$ Free Device

## Typical Applications

- Micro or Mini USB Applications
- Shared High Speed Data or Audio on a Single Connector
- Mobile Phones
- Tablets
- Bar Code Scanners
- Portable Devices

## OPERATING CONDITIONS

MAXIMUM RATINGS

| Symbol | Pins | Parameter | Value | Unit |
| :---: | :---: | :---: | :---: | :---: |
| $\mathrm{V}_{\text {CC }}$ | $V_{C C}$ | Positive DC Supply Voltage | -0.5 to +6.0 | V |
| $\mathrm{V}_{\text {IS }}$ | R, L, D+, D-, Rx, Tx | Analog I/O | -2.5 to $\mathrm{V}_{\mathrm{CC}}+0.5$ | V |
|  | COM + , COM - |  | -2.5 to +6.0 |  |
| $\mathrm{V}_{\text {IN }}$ | IN1, IN2 | Control Input Voltage | -0.5 to +6.0 | V |
| ICC | $\mathrm{V}_{\mathrm{CC}}$ | Positive DC Supply Current | 50 | mA |
| $\mathrm{T}_{\text {S }}$ |  | Storage Temperature | -65 to +150 | ${ }^{\circ} \mathrm{C}$ |
| IIs_CON | COM + , COM-, R, L, D+, D-, Rx, Tx | Analog Signal Continuous Current-Closed Switch | $\pm 100$ | mA |
| IIS_PK | COM + , COM-, R, L, D+, D-, Rx, Tx | Analog Signal Continuous Current 10\% Duty Cycle | $\pm 500$ | mA |
| In | IN1, IN2 | Control Input Current | 1.0 | mA |

Stresses exceeding those listed in the Maximum Ratings table may damage the device. If any of these limits are exceeded, device functionality should not be assumed, damage may occur and reliability may be affected
NOTE: These devices have limited built-in ESD protection. The leads should be shorted together or the device placed in conductive foam during storage or handling to prevent electrostatic damage.

RECOMMENDED OPERATING CONDITIONS

| Symbol | Pins | Parameter | Min | Max | Unit |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $\mathrm{V}_{\text {CC }}$ | $\mathrm{V}_{\mathrm{CC}}$ | Positive DC Supply Voltage | 2.7 | 5.0 | V |
| $\mathrm{V}_{\text {IS }}$ | $\mathrm{D}+$ to $\mathrm{COM}+$, $\mathrm{D}-$ to $\mathrm{COM}-$ | Analog Signal Voltage (Note 1) | GND | $\mathrm{V}_{\text {CC }}$ | V |
|  | L to COM + , R to COM- |  | -2.0 | $\mathrm{V}_{\text {CC }}$ |  |
|  | Tx to COM + , Rx to COM- |  | GND | $\mathrm{V}_{\mathrm{CC}}$ |  |
| $\mathrm{V}_{\text {IN }}$ | IN1, IN2 | Control Input Voltage | GND | $\mathrm{V}_{\text {CC }}$ | V |
| $\mathrm{T}_{\text {A }}$ |  | Operating Temperature | -40 | +85 | ${ }^{\circ} \mathrm{C}$ |

Functional operation above the stresses listed in the Recommended Operating Ranges is not implied. Extended exposure to stresses beyond the Recommended Operating Ranges limits may affect device reliability.

1. In USB mode, any signal supplied to the off-state audio inputs $\mathrm{R}, \mathrm{L}$ may not swing below ground or above 1.5 V .

## DC ELECTRICAL CHARACTERISTICS

CONTROL INPUT Min and Max apply for $\mathrm{T}_{\mathrm{A}}$ between $-40^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$ and $\mathrm{T}_{J}$ up to $+125^{\circ} \mathrm{C}$ (Unless otherwise noted). Typical values are referenced to $\mathrm{T}_{\mathrm{A}}=+25^{\circ} \mathrm{C}, \mathrm{V}_{\mathrm{CC}}=3.3 \mathrm{~V}$.

ON Semiconductor and ON are trademarks of Semiconductor Components Industries, LLC dba ON Semiconductor or its subsidiaries in the United States and/or other countries. ON Semiconductor reserves the right to make changes without further notice to any products herein. ON Semiconductor makes no warranty, representation or guarantee regarding the suitability of its products for any particular purpose, nor does ON Semiconductor assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation special, consequential or incidental damages. ON Semiconductor does not convey any license under its patent rights nor the disclaims any and
rights of others.
onsemi, OnSeMi., and other names, marks, and brands are registered and/or common law trademarks of Semiconductor Components Industries, LLC dba "onsemi" or its affiliates and/or subsidiaries in the United States and/or other countries. onsemi owns the rights to a number of patents, trademarks, copyrights, trade secrets, and other intellectual property. A listing of onsemi's product/patent coverage may be accessed at www.onsemi.com/site/pdf/Patent-Marking.pdf. onsemi reserves the right to make changes at any time to any products or information herein, without notice. The information herein is provided "as-is" and onsemi makes no warranty, representation or guarantee regarding the accuracy of the information, product features, availability, functionality, or suitability of its products for any particular purpose, nor does onsemi assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation special, consequential or incidental damages. Buyer is responsible for its products and applications using onsemi products, including compliance with all laws, regulations and safety requirements or standards, regardless of any support or applications information provided by onsemi. "Typical" parameters which may be provided in onsemi data sheets and/or specifications can and do vary in different applications and actual performance may vary over time. All operating parameters, including "Typicals" must be validated for each customer application by customer's technical experts. onsemi does not convey any license under any of its intellectual property rights nor the rights of others. onsemi products are not designed, intended, or authorized for use as a critical component in life support systems or any FDA Class 3 medical devices or medical devices with a same or similar classification in a foreign jurisdiction or any devices intended for implantation in the human body. Should Buyer purchase or use onsemi products for any such unintended or unauthorized application, Buyer shall indemnify and hold onsemi and its officers, employees, subsidiaries, affiliates, and distributors harmless against all claims, costs, damages, and expenses, and reasonable attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that onsemi was negligent regarding the design or manufacture of the part. onsemi is an Equal Opportunity/Affirmative Action Employer. This literature is subject to all applicable copyright laws and is not for resale in any manner.
