Amplifier Built-in

Ultra-minute Photoelectric Sensor

EX-ZSERIES

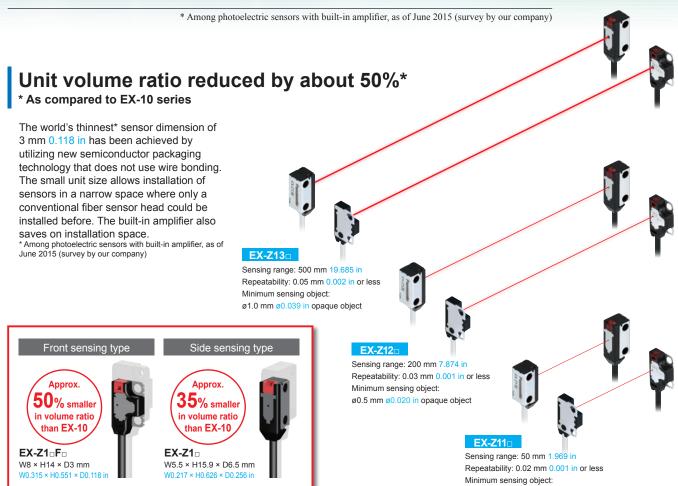

EX-Z SERIES

Ultra-minute Photoelectric Sensor Amplifier Built-in

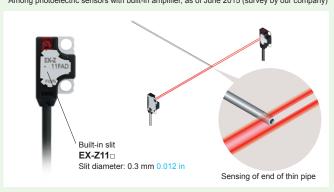

The World's Smallest* Size

Small-object sensing capability

Capable of sensing an extremely small ø0.3 mm n object without slit EX-Z11

A slit is provided on the front side of the main sensor body. The sensor can detect a Ø0.3 mm Ø0.012 in object (the smallest-object sensing capability in the industry*) without using an optional slit. * Among photoelectric sensors with built-in amplifier, as of June 2015 (survey by our company)

Capability to sense a small ø1.0 mm ø0.039 in object over long distance EX-Z130

Ø0.3 mm Ø0.012 in opaque object

The high-brightness 4-element red LED provides strong light emission stably over a long period of time. In spite of the extremely small size, both front sensing and side sensing units can sense a small ø1.0 mm ø0.039 in object from a long distance of 500 mm 19.685 in. Since the spotlight is clearly visible, the sensing position can be easily confirmed.

A wide range of applications

Inflection resistant cable type available for all models

Inflection resistant cable type with improved flex resistance is available for all models. Select the model suitable for your specific application. The standard type comes with lead wires with the same diameter as previous models, but the outside diameter of the cable is 2.0 mm 0.079 in and thinner than the cables of the **EX-10** series. This facilitates cable routing.

IP67 protective structure

The sensors features an IP67 protective structure to allow their use in process lines where water is used or splashed.

Rust-resistant stainless steel sensor mounting brackets and screws are available.

Note: If water splashes on the sensor during sensing operation, it may sense water as an object.

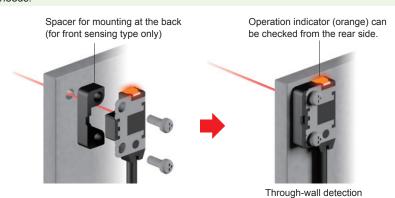

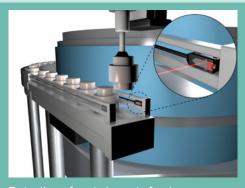

Options

A variety of mounting brackets are available!

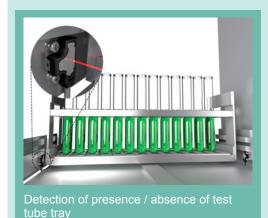

A spacer for mounting at the back (1 type) for through-wall sensing and sensor mounting brackets (3 types) are available to meet a diversity of sensor installation needs.

Examples of applications

Detection of parts in parts feeder

Note: Mounting bracket is not supplied with the sensor. Please select from the range of optional sensor mounting brackets (MS-EXZ-□).

Note: The model No. with "E" shown on the label affixed to the thru-beam type sensor is the emitter, "D" shown on the label is the receiver.

OPTIONS

Designation	Model No.	Description		
	MS-EXZ-1	L-shaped mounting bracket (SUS304) for front sensing and side sensing typ (2 sets are required)		
Sensor mounting bracket	MS-EXZ-2 Mounting bracket (SUS304) for front sensing type (2 sets are required)			
	MS-EXZ-3	Mounting bracket (SUS304) for side sensing type (2 sets are required)		
Spacer for mounting at the back	MS-EXZ-4	Spacer for mounting at the back (polyacetal) for front sensing type		

(SUS304)

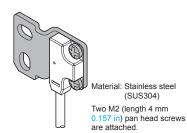

Sensor mounting bracket

• MS-EXZ-1

Material: Stainless steel (SUS304)

Two M2 (length 4 mm 0.157 in) pan head screws and two M2 (length 8 mm 0.315 in) pan head screws are attached. • MS-EXZ-2

• MS-EXZ-3

Material: Stainless steel (SUS304) Two M2 (length 8 mm 0.315 in) pan head screws are attached.

Spacer for mounting at the back

• MS-EXZ-4

Material: Polyacetal M2 (length: 10 mm 0.394 in) screws, nuts, spring washers and flat washers are attached. (20 pieces each)

Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +23°C 73°F.

2) Model Nos. having the "-P" are PNP output type and model Nos. having the "-R" are inflection resistant cable type.

3) The inflection resistant cable type has a 0.1 mm² 3-core (thru-beam type emitter: 2-core) flexible cabtyre cable, 2 m 6.562 ft long.

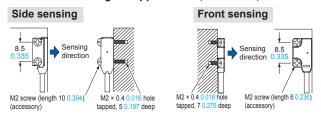

PRECAUTIONS FOR PROPER USE

- Never use this product as a sensing device for personnel protection.
- In case of using sensing devices for personnel protection, use products which meet laws and standards, such as OSHA, ANSI or IEC etc., for personnel protection applicable in each region or country.

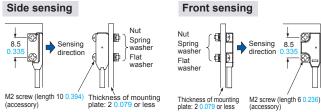

Mounting

• In case of mounting on tapped holes (Unit: mm in)

The tightening torque should be 0.2 N·m or less.

• In case of using attached screws and nuts (Unit: mm in)

The tightening torque should be 0.2 N·m or less.

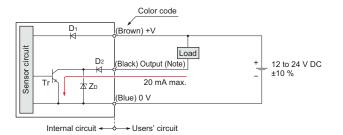

Other

• Do not use during the initial transient time (0.5 sec. approx.) after the power supply is switched on.

EX Family Products

Ultra-thin dimension

- Only 3.5 mm 0.138 in thick
- Long sensing range of 1 m 3.281 ft
- · High speed response of 0.5 ms

Ultra-compact Photoelectric Sensor Amplifier Built-in EX-20 SERIES Ver.2

Easy installation with M3 screws

- Equipped with sensitivity adjuster
 Long sensing range of 2 m 6.562 ft
- Red spotlight for easy confirmation of sensing point

One-point mounting

- Simple design with sensing axis corresponding with mounting hole
- Can be installed using the same thread size (M4 for thru-beam type, M6 for reflective type) as that of standard fiber
