LASER SENSORS

General terms and conditions...... F-3

■ Glossary of terms / General precautions P.1587 / P.1595

■ Selection guideP.1021~

■ About laser beam......P.1593~

panasonic.net/id/pidsx/global

This product is classified as a Class 2 (specular reflection type: Class 1) Laser Product in IEC / JIS standards and in FDA* regulations. Do not look at the laser beam directly or through optical system such as a lens.

*This product complies with 21 CFR 1040.10 and 1040.11 Laser Notice No. 50, dated June 24, 2007, issued by CDRH (Center for Devices and Radiological Health) under the FDA (Food and Drug Administration).

Introducing the new standard in CMOS laser displacement sensors

This single instrument delivers both high-precision measurement and computer-driven data analysis

High resolution of 0.5 µm 0.020 mil

Thanks to high-precision measurement at a resolution of 0.5 µm 0.020 mil and an LED digital display that provides exceptional ease of use, the HL-G1 series will see use in a variety of applications on production lines worldwide.

uick

Setup is fast and efficient by using the built-in digital display to set measurement parameters such as sampling cycle and output options.

ompact

The HL-G1 series features a compact design despite its built-in controller and digital readout. Thanks to our miniaturization technology, it can easily be installed on robot arms and in confined

riendly

The HL-G1 series now features a userfriendly interface that offers improved ease of use when operating via computer software or HMI unit for more sophisticated operation and analysis.

A total of 8 models accommodate a variety of applications

Diffuse reflection type **HL-G103**

Measurement range: 30 ±4 mm
1.181 ±0.157 in
Resolution: 0.5 µm 0.020 mil
Linearity: ±0.1 % F.S. Linearity: Beam diameter:

0.1 × 0.1 mm 0.004 × 0.004 in

Specular reflection type HL-G103A

Measurement range: 26.3 ±2 mm

1.035 ±0.07 0.5 µm 0.02 ±0.2 % F.S. Resolution: _inearity: Beam diameter: 0.1 × 0.1 mm

Diffuse reflection type

HL-G105

Measurement range: 50 ±10mm
1.969 ±0.394 in
Resolution: 1.5 μm 0.059 mil
Linearity: ±0.1 % F.S.
Beam diameter: 0.5 × 1.0 mm
0.020 × 0.039 in

Specular reflection type HL-G105A

Measurement range: 47.3 ±5 mm 1.862 ±0.197 in 1.5 µm 0.059 mil ±0.2 % F.S. 0.1 × 0.1 mm Resolution: Linearity: Beam diameter:

Diffuse reflection type HL-G108

Measurement range: 85 ±20 mm
3.346 ±0.787 in
Resolution: 2.5 μm 0.098 mil
Linearity: ±0.1 % FS.
Beam diameter: 0.75 ×1.25 mm

Specular reflection type

HL-G108A

Measurement range: 82.9 \pm 10 mm 3.264 \pm 0.394 in Resolution: 2.5 μ m 0.098 mil Linearity: \pm 0.2 % F.S. Beam diameter: 0.2 \times 0.2 \times 0.000 in 0.000 in

Diffuse reflection type

HL-G112

Measurement range: 120 ±60 mm Resolution:

4.724 ±2.362 in 8 μm 0.315 mil ±0.1 % F.S. 1.0 × 1.5 mm Linearity: Beam diameter:

Diffuse reflection type

HL-G125

Measurement range: 250 ±150 mm 9.843 ±5.906 i

Resolution: 20 μm 0.787 mil ±0.3 % F.S.

APPLICATIONS

Controlling the height of a dispenser nozzle

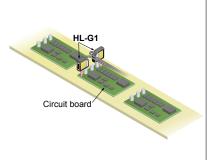

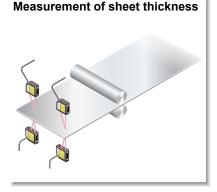

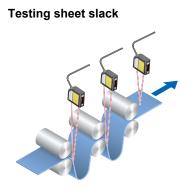

Measuring the eccentricity of

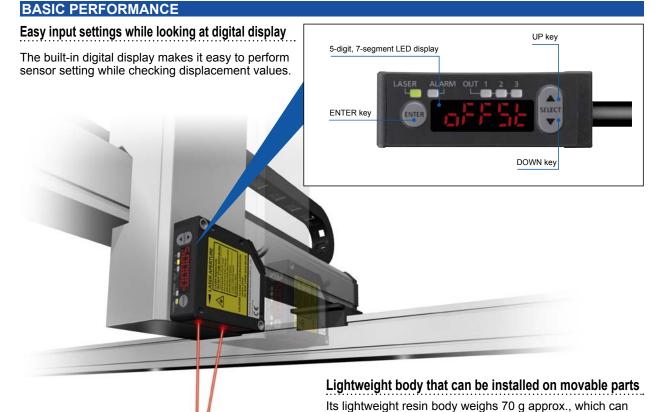

be installed on moving parts such as sliders and robot arms. Cable with superior flexibility is fitted as standard.

HL-D3

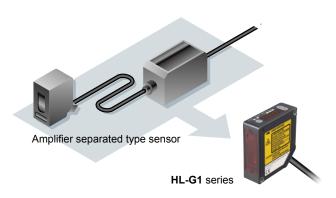

Compact

Compact size despite the built-in controller and digital read out.

Easy to embed in machines and production lines

Controller installation and mounting space is not required because controller function is included in sensor unit.

IP67 protective enclosure protects from water and dust

Thanks to its IP67 protective enclosure, the **HL-G1** can be used in the presence of water and dust. Mounting holes are lined with metal sleeves, allowing the instrument to be tightened securely in place with up to $0.8~N\cdot m$ of torque.

FUNCTIONS

Timing input and multi input

In addition to timing input select the desired input according to your application:

- · Zero set on / off
- Laser control
- Dasat
- Teaching
- Memory switching
- Saving

Support for both NPN and PNP polarity GLOBAL SUPPORT

A single model number accommodates both NPN and PNP wiring polarity, reducing the number of model numbers that must be registered for maintenance purposes.

Featuring 3 outputs and an analog 2 outputs

With three outputs, the **HL-G1** can be used to generate HI / GO / LOW judgment output or alarm output. The analog output can be used in both current and voltage modes.

Memory switching function

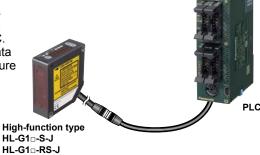

Up to four groups of sensor settings can be stored for fast recall. Easy switching among setting groups allows smooth setup changes.

HIGH FUNCTION TYPE (HL-G1 - S-J / HL-G1 - RS-J)

The integrated communications interface lets the sensor communicate with upstream devices such as PLCs.

Sensors and other devices can be connected in a 1:1 manner using RS-422, or up to 16 **HL-G1** series sensors can be connected using RS-485, enabling them to return measured values in response to messages from the PLC. When using one of our PLCs*, you can use the PLC's data write / read instructions (F145 and F146) to easily configure **HL-G1** series settings and acquire measurement output.

* Supported PLCs from Panasonic Industrial Devices SUNX: FP0R, FPΣ, FP-X

Software tool for sensor configuration and evaluation (Free download available)

In addition to configuring up to 16 sensors at once, this free tool makes it easy to gather data needed for analysis, such as received light waveform monitoring and data buffering. The interface language can be selected at the time of installation.

Data buffering

Stores and displays measurement data, which can be superimposed on previously recorded data for easy comparison and analysis.

- Received light waveform display
 Displays the amount of light received by cell from light-receiving element.
- Measured value display
 Displays measured values as well as the output state for each terminal.

HMI screen (Free download available)

The GT02 / GT12 series HMI can be used in combination with the HL-G1 to allow easy confirmation of sensor status and configuration of sensor settings from a remote location. Japanese, English, Chinese, and Korean are supported. For more information about the GT02 / GT12 series, visit

our website.

Select from the following HMI operator panels:

Power supply: 24 V Communication port: RS-422 / RS-485

- AIG02GQ14D
- AIG02MQ15D
- AIG12GQ14D / AIG12GQ15D
- AIG12MQ14D / AIG12MQ15D

Multilingualization

GLOBAL SUPPORT

Software tool and HMI screen data support not only Japanese and English, but also Chinese and Korean, providing a new level of support for devices and equipment in use worldwide.

Software is available for download.

Sensor configuration and evaluation software tool, HMI screen data, function blocks, etc.

Terms of use

Panasonic Industrial Devices SUNX offers no warranty for this software and is not liable for any loss or damage suffered as a result of its use or operation, whether direct, indirect, incidental, consequential, or unforeseen.

ACCE.	essory						ng label: 1 set	ollows: supply volta			

Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were as follows: supply voltage 24 V DC, ambient temperature +20 °C +68 °F, sampling rate 500 μs, average number of samples: 1024, measurement center distance, object measured is made of white ceramic

⁽specular reflection type: an aluminum vapor deposition surface reflection mirror) and analog measurement values.

2) This product complies with 21 CFR 1040.10 and 1040.11 Laser Notice No. 50, dated June 24, 2007, issued by CDRH (Center for Devices and Radiological Health) under the FDA (Food and Drug Administration).

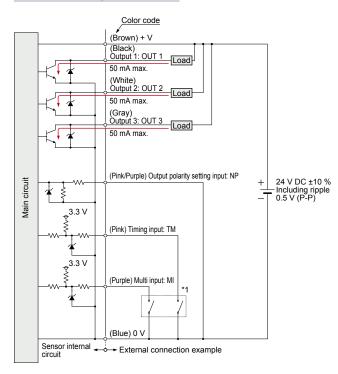

3) This beam diameter is the size at the measurement center distance. These values were defined by using 1/e² (13.5 %) of the center light intensity. The results may be affected if there is a slight leakage of light outside the normal spot diameter and if the periphery surrounding the sensing point has a higher reflectivity than the sensing point itself.

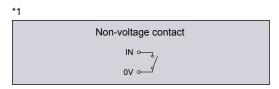

⁴⁾ The fluctuation by ambient illuminance is ± 0.1 % F.S. or less.

I/O CIRCUIT AND WIRING DIAGRAMS

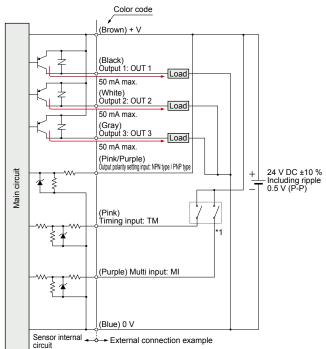

I/O circuit diagrams

When selecting NPN output

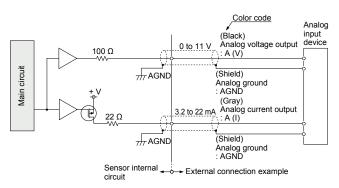

When selecting PNP output

Non-voltage contact or PNP open-collector transistor output

IN OTHER OF THE POPEN OF THE POPEN

Analog output (common in NPN output type and PNP output type)

Notes: 1) Analog output is not equipped with the short-circuit protection.

Do not short-circuit or apply voltage to them.

2) Use shielded wires for analog outputs.

I/O CIRCUIT AND WIRING DIAGRAMS

Communication specifications (High function type)

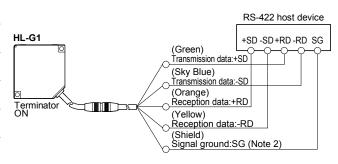

Communication method	RS-422	RS-485			
Communication method	Full duplex	Half duplex			
Synchronization method	Asynchronous com	munication method			
Transmission code	AS	CII			
Baud rate	9,600 / 19,200 / 38,400 / 115,200 / 230,400 / 460,800 / 921,600 bps				
Data length	8 bits				
Stop bit length	1 bit				
Parity check	None				
BCC	Yes				
Termination code	CR				

The HL-G1 can be connected to upper devices of RS-422/485.

When upper device sends the request command, the **HL-G1** series send the response command.

RS-422 1-to-1 connection

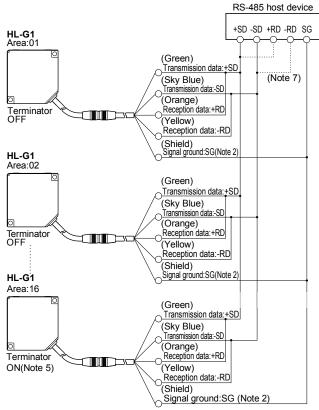

Notes: 1) The transmission data cable and reception data cable are both twisted-pair cables.

- The shield is connected to the 0 V side of the power supply line inside the sensor.
- Be sure to connect the signal ground.
- 4) The sensor is of non-isolated type. Make sure that the potential difference between the sensor and RS-422 connecting device does not exceed 4 V. A difference in potential in excess may cause the connecting device or the sensor to malfunction.

RS-485 1-to-N connection

- Connectable up to 16 units.
- Please set the prefix with no duplication.

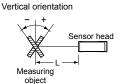

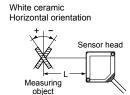

- Notes: 1) The transmission data cable and reception data cable are both twisted-pair cables.
 - The shield is connected to the 0 V side of the power supply line inside the sensor.
 - 3) Be sure to connect the signal ground.
 - 4) The sensor is of non-isolated type. Make sure that the potential difference between the sensor and RS-485 connecting device does not exceed 4 V. A difference in potential in excess may cause the connecting device or the sensor to malfunction.
 - 5) The sensor has a built-in terminating resistor. Be sure to turn ON the terminating resistor of the terminating sensor.
 - 6) Perform transition wiring for the transmission path.
 - 7) Connect the wires according to the specification of the equipment.

PRECAUTIONS FOR PROPER USE

Refer to p.1595 for general precautions and p.1593~ for information about laser beam.

- Never use this product as a sensing device for personnel protection.
- In case of using sensing devices for personnel protection, use products which meet laws and standards, such as OSHA, ANSI or IEC etc., for personnel protection applicable in each region or country.

described in the instruction manual included with each product.

Control or adjustment through procedures other than the ones
specified may cause hazardous laser radiation exposure.

The following labels are attached to the product. Handle the

product according to the instruction given on the warning label.

Do not operate products using methods other than the ones

The Japanese, English, Chinese, Korean warning labels are included in the package of the diffuse reflection type (HL-G1□-S-J / HL-G1□-A-C5).

HL-G1_□-S-J / HL-G1_□-A-C5

 This product is classified as a Class 2 Laser Product in IEC / JIS standards and FDA* regulations. Do not look at the laser beam directly or through optical system such as a lens.

HL-G1_A-RS-J / HL-G1_A-RA-C5

 This product is classified as a Class 1 Laser Product in IEC / JIS standards and FDA* regulations. Do not look at the laser beam through optical devices such as a lens.

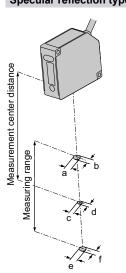

*This product complies with 21 CFR 1040.10 and 1040.11 Laser Notice No. 50, dated June 24, 2007, issued by CDRH (Center for Devices and Radiological Health) under the FDA (Food and Drug Administration).

Sensor mounting direction

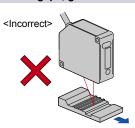

• To obtain the greatest precision, the sensor head should be oriented facing the direction of movement of the object's surface, as shown in the figure below.

Object with variations in material or color

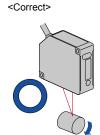

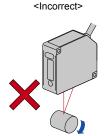

Object that has large differences in gaps, grooves and colors

Rotating object

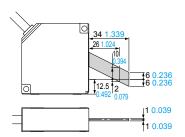

PRECAUTIONS FOR PROPER USE

Refer to p.1595 for general precautions and p.1593~ for information about laser beam.

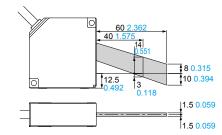

Mutual interference (Unit: mm in)

• When installing two or more sensor heads side by side, mutual interference will not occur if the laser spots from other sensor heads do not fall within the shaded areas in the figure below.
