Protection structure IP67

New version with improved environmental
resistance performance

Robust type SF4B-□G<V2>

Advanced light curtains at the forefront of the industry

Protection structure IP67 is achieved in such size

Improved environmental resistance performance and easier operability New structure

A seamless structure with least seam area possible is newly developed. The inner unit is protected by a cylindrical inner case. Seams such as unit and lens surfaces have been greatly reduced, so that particles such as oil mists and dust are prevented from getting in, rising its environmental resistance performance.

SF4B series has passed the tests of IP65 and IP67 as specified by IEC / JIS standards. (Ver.2 only)

IEC / JIS	Description	
IP65	No harmful effect due to direct water jet from any direction	
IP67	No water penetration due to immersion in water under specified conditions	

* Refer to each standard for details of test conditions.

Cylindrical inner case protects the internal unit.

This new structure does not use adhesive or double-sided tape on the joints like with the previous models. There is no need to worry about water immersion or corrosion such as a coolant causing the adhesive to strip off.

Error details can be understood at a glance

Equipped with a digital error indicator

The system constantly checks the light curtain for problems such as incorrect cable wiring, disconnection, short-circuits, internal circuit problems, and incoming light problems. Details of any electrical problems such as at equipment startup will appear on the digital display. The inconvenience of counting the number of LED blinks is no longer needed.

Error number notification means smooth support via telephone

Normal operation

Breaking out error

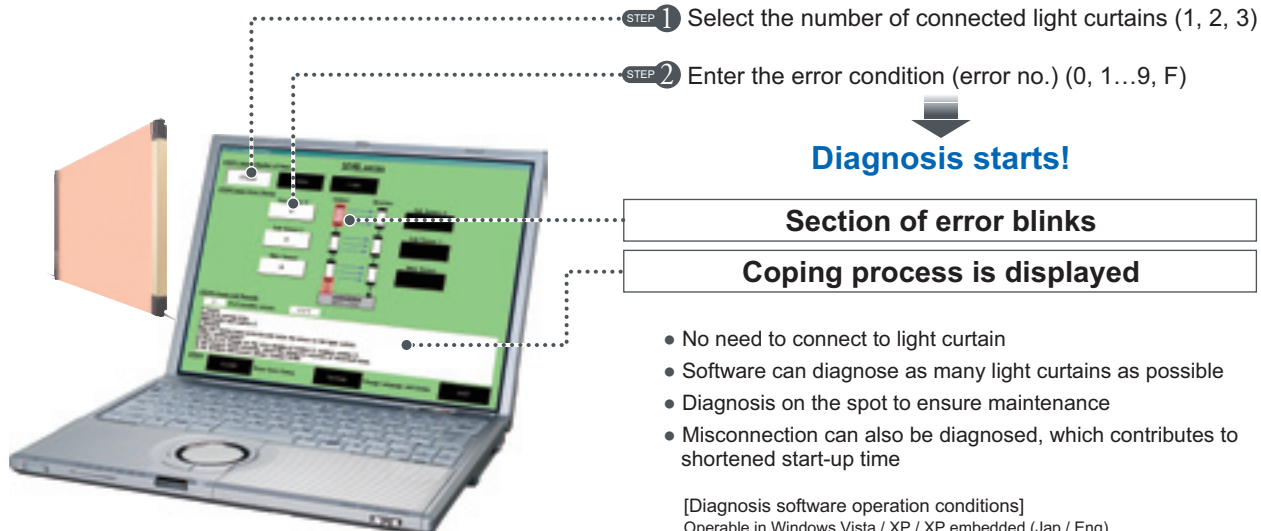

Achieving protection structure IP67 while keeping its slim body.

Locate problems easily and quickly

Light curtain diagnosis software

Free download available from our website.

Simply select the error no. that is displayed on the light curtain on the PC screen, and the section of error will be displayed visually. Coping process is also displayed for a quick resolution of the problem.

[Diagnosis software operation conditions]
Operable in Windows Vista / XP / XP embedded (Jap / Eng).
Approx. 1.5 MB of free space is required.

* Windows® is a registered trademark of Microsoft Corporation in the United States and other countries.

Resistant to impact, lessening damage to workpiece

Robust type SF4B-□G<V2>

Thick and robust housing resistant to impact

The SF4B-G series light curtain is enclosed in a 5 mm (0.197 in) thick robust metal case, protecting the workpiece from various types of impact, such as collision or being stepped on.

Stepped on - Kicked

Collision - Impact

Loads applied - Dropped

No guard needed

The robust light curtain can be used without an L-shape or U-shape guard, reducing installation and maintenance.

Front protection cover

The front protection cover protects the sensing surface from welding spatter and other grime, and reduces damage due to collisions. The beam axis adjuster can be attached without removing the front protection cover.

Fully protected sensing surface

The sensing surface is fully protected by narrowing and deepening the exposed area of the sensing surface.

IP67 protected structure

The seamless structure protects the sensor from being exposed to water.

Robust

The inner unit is fully protected with a thick metal case. Impact between the workpiece and the sensor is prevented by narrowing and deepening the exposed area of the sensing surface.

Round design minimizes damage to the workpiece

The case is designed so that shock upon impact is dissipated alleviating potential damage to the workpiece in the event of a collision.

Workpiece not contaminated with paint

The body has a alumite-treated case whereby paint does not stick to the workpiece in the event of a collision.

Enables series connection with standard type possible

The mating cable is standard, allowing the robust and standard types to be connected in series. The mating cable can be removed or attached while the mounting bracket is fixed, allowing easy maintenance.

Mounting bracket for simple & secure installation

The light curtain and the mounting bracket are firmly secured with just two bolts. The light curtain is situated in the center of the mounting bracket, preventing beam axis deviation. The dimple structure makes alignment easy to adjust.

Black and yellow caution tape

Black and yellow striped attention tape is attached to the side of the light curtain, alerting workers to use caution. Hazardous openings are very obvious.

The cylindrical frame construction allows mechanical shock to dissipate upon impact, minimizing severe damage in the event of a collision. This unique design minimizes the possibility of beam axis misalignment and provides a safer workplace.

Impact-friendly structure

A universal design that can be used anywhere in the world

In Europe, America and Japan
PNP output and NPN output
in a single model!

- Europe IEC 61496-1/2, EN ISO 13849-1 and EN 55011, etc,
- North America ANSI/UL 61496-1/2, UL 1998, CSA and OSHA/ANSI, etc,
- South Korea SI-G-35-2005, S2-W-11-2003 (Note)
- China GB 4584 (Note)

Note: Except for SF4B-□G<V2>

Supports both PNP and NPN polarities in a single model

The SF4B series combines PNP transistor output and NPN transistor output in a single model. Overseas equipment that uses PNP, replacement with NPN sensors, factories that are positively grounded, and transfer of equipment overseas are all situations where the control circuits for a single model are suitable for use worldwide.

■ Polarity can be changed easily by changing wiring

When the output polarity setting wire (shielded) is connected to 0 V, PNP output is selected, and when it is connected to 24 V, it switches to NPN output.

PNP / NPN polarity indicator
Either PNP or NPN side lights depending on which is selected.

Global support for press machine / shear (paper cutting machine) safety

Can be widely used for press machines and other types of equipment from Japan, Europe, North America, South Korea, and China.

A unified response time of 14 ms for all models makes setup easy

A fast response time of 14 ms has been achieved regardless of the number of beam channels, the beam axis pitches and the number of units connected in series. This reduces calculation work required for the safety distance.

* This is the characteristic safety distance for the light curtain as defined by ISO 13855. Calculate the safety distance by including the machinery's maximum stopping time. Furthermore refer to the relevant standards of the region where this device is to be used, and then install this device.

* Series connection allows max. 3 sets or a total of up to 192 beam channels.

It is possible to select from among each three types of standard/Robust types according to the worksite

A wide range of variations are available with protective heights of 230 to 1,910 mm (9.055 to 75.197 in (1,270 mm 50.000 in for the finger protection type)). Mixing six types in a series connection is also possible.

Finger protection type	SF4B-F□(G)	Hand protection type	SF4B-H□(G)	Arm / Foot protection type	SF4B-A□(G)
	Minimum sensing object ø14 mm ø0.551 in (10 mm 0.394 in beam pitch)		Minimum sensing object ø25 mm ø0.984 in (20 mm 0.787 in beam pitch)		Minimum sensing object ø45 mm ø1.772 in (40 mm 1.575 in beam pitch)

Muting control function is built into light curtain Safety circuits are selectable

A muting control function is provided to increase both safety and productivity

The light curtain is equipped with a muting control function that causes the line to stop only when a person passes through the light curtain, and does not stop the line when an object passes through. The muting sensors and muting lamps can be connected directly to the light curtain so that an exclusive controller is not required for muting. This both reduces costs and increases safety and productivity.

(excluding SF4B-□-03<V2>)

Override function allows the line to be restarted smoothly after it has stopped while muting control was active

In case the power turns off while the light curtain has been interrupted by an object or in case the line stops before the muting conditions have been established (if only one muting sensor has been interrupted), the line can be restarted smoothly without having to remove the object that is interrupting the light curtain.

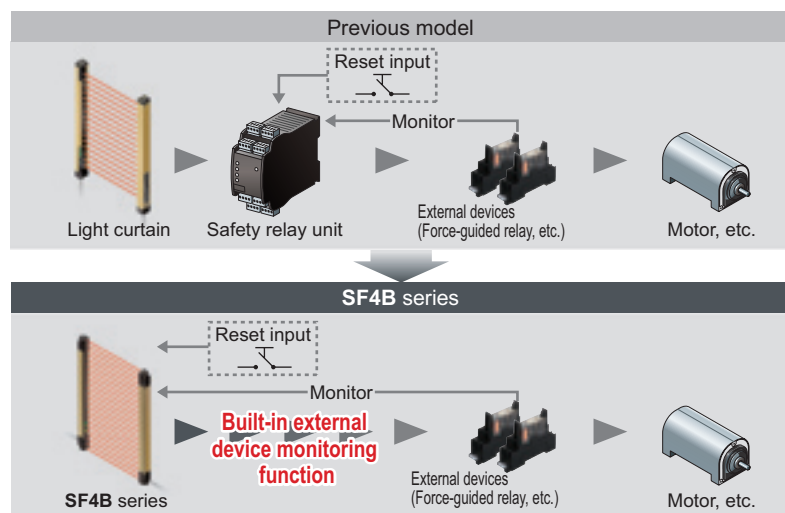

(excluding SF4B-□-03<V2>)

(e.g.) When power turns off while light curtain was interrupted

Equipped with a safety circuit that does not require an exclusive safety relay unit

The light curtain has a built-in external device monitoring function (such as for fused relay monitoring) and an interlock function. The safety circuit is constructed so that a separate safety relay unit is not needed, and the control board has become smaller to help to contribute to lower costs.

- Safety relay
Panasonic Corporation
SF series

Note: Contact the manufacturers for details on the recommended products.

A commitment to design that is easy to use

Beam-axis alignment indicators show the incident light position at a glance

Beam-axis alignment indicators display the beam channels of the light curtain in four blocks. When the beam channel at the bottommost channel (or topmost channel), which is used as a reference for beam-axis alignments, is correctly aligned, the LED blinks red. After this, each block lights red as the beam axes successively become aligned. When all channel beam axes are aligned, all LEDs light green. The display also has a stability indicator (STB) added so that setup can be carried out with greater stability.

Beam channels are displayed in 4 blocks	The bottommost channel beam axis is aligned	Only the beam axes of the two lower blocks are aligned	All channel beam axes are aligned
	 <p>The bottommost LED 'D' is blinking red</p>	 <p>The bottom two LEDs 'C, D' light up in red</p>	 <p>All LEDs 'A to D' light up in green</p> <p>Furthermore, STB display allows the most stable incident light status* to be confirmed.</p> <p>* 140 % or more incident light intensity of control output operation level</p>

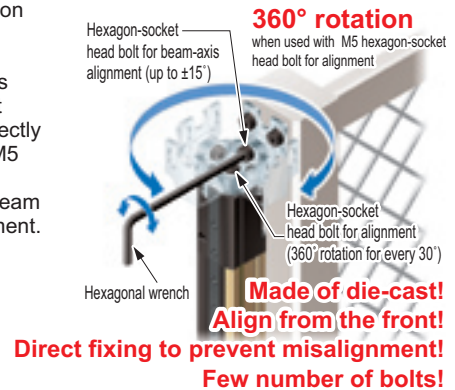

Laser alignment tool for easy installation

The tool performs beam-axis alignment using a laser beam spot. As the tool is battery-operated, it is possible to perform beam-axis alignment before actual powering on the equipment.

Greatly improved ease of installation (excluding SF4B-□G)

The hexagon-socket head bolts used for aligning the beam axis can be tightened from the front of the light curtain. Beam adjustment can be carried out easily while checking on the bolts. Also, the beam-axis alignment part is directly fixed by M5 bolts to prevent beam misalignment.

Easy to distinguish receiver and emitter

Emitter is in gray; receiver is in black. Whether during startup or maintenance, troubles due to incorrect wiring or false recognition can be greatly reduced. Moreover, model No. can be confirmed from the front face of the light curtain.

Mutual interference is reduced without needing for interference prevention lines

The light curtain is equipped with the ELCA (Extraneous Light Check & Avoid) function. Because it automatically shifts the scan timing of the light curtain in order to avoid interference, it is not necessary to wire interference prevention lines between machineries.

Reducing the number of malfunctions caused by extraneous light

Double scanning method and retry processing are two new functions exclusive to our company, which are effective in eliminating the effects of momentary extraneous light from peripheral equipment. The reduction in operating errors caused by extraneous light reduces frequent stopping of machinery.

Options exclusive for light curtain are available for an easy construction of safety circuit

Handy-controller SFB-HC* that enables the user to select a variety of settings **SFB-HC**

Separate muting control function for each beam channel

The handy-controller **SFB-HC*** (optional) can be used to carry out muting control for specified beam channels only. Because individual beam channel can be specified to suit the object, separate guards to prevent entry do not need to be set up.

While muting control is active (line operating)

Line stopped

For example, depending on the height of the object, the muting function can be activated for 10 beam channels starting from the bottom, so that if the 11th or subsequent beam channels are interrupted, it is judged that a person has entered the area and the line stops.

* A handy-controller cannot be used with the **SF4B-□-01<V2>**, **SF4B-□-03<V2>** and the **SF-C14EX-01**.

Any valid beam channels can be selected The SF4B series incorporates a fixed blanking function.

The **SF4B** series is equipped with a fixed blanking function which allows specific beam channels to be selectively interrupted without causing the control output (OSSD) to output the OFF signal. This function is convenient for use with applications in which certain fixed obstacles tend to block specific beam channels. Furthermore, this function provides greater safety as the control output (OSSD) will automatically output the OFF signal if the fixed obstacles are subsequently removed from the sensing area.

Non-specified beam channels can be deactivated The SF4B series incorporates a floating blanking function.

1, 2 or 3 non-specified beam channels can be deactivated. If the number of beam channels that are blocked is less than or equal to the set number of beam channels, then the control output (OSSD) will not output the OFF signal. This function is useful in the event when the positions of obstacles within the sensing area must be changed during object rearrangement, or when an object passes through the light curtain's sensing area.

Note: When the floating blanking function is used, the size of the min. sensing object is changed. Refer to "**PRECAUTIONS FOR PROPER USE**" (p.36) for details.

Auxiliary output has selectable output configuration

Mode No.	Description
0	Negative logic of the control output (OSSD 1, OSSD 2) (factory setting)
1	Positive logic of the control output (OSSD 1, OSSD 2)
2	For emission: output ON, For non-emission: output OFF
3	For emission: output OFF, For non-emission: output ON
4	For unstable incident beam: OFF (Note 1)
5	For unstable incident beam: ON (Note 1)
6	For muting: ON
7	For muting: OFF
8	For beam received: ON, For beam interrupted: OFF (Note 2)
9	For beam received: OFF, For beam interrupted: ON (Note 2)

Notes: 1) The output cannot be used while the fix blanking function, floating blanking function or the muting function is activated.
2) This device outputs the beam received / interrupted state under activating the auxiliary output switching function using the handy controller irrespective of activating other functions, fixed blanking function, floating blanking function, and muting function.

A variety of other functions can be selected

Emission intensity control function

This function reduces the amount of emitting light. The two modes, normal mode and short mode, can be selected. The factory setting is set to the normal mode for the emission intensity control function.

Setting monitoring function

This function allows the user to confirm the details of each light curtain setting.

Protection function

Unless the password is not input, any setting change of the light curtain cannot be allowed. The factory setting is set to invalid for the protect function.

Copy function

Allows settings details to be copied into other light curtains. In the event that the same setting must be input into several different light curtains, this function will reduce the time required for the input of settings.

Muting lamp diagnosis setting

When the muting lamp diagnosis is disabled, the muting function will continue to operate even if the lamp is blown.

* Refer to the **SF4B<V2>** manual for details.

Lineup of exclusive control units

Supports both PNP and NPN polarities **SF-C10 series**

A single unit can be used for PNP / NPN input switching, reducing the number of parts that need to be registered.

Slim type control unit **SF-C13**

Having a thickness of 22.5 mm [0.886 in](#), it can be inserted even into narrow spaces inside panels.

Plug-in connector type control unit **SF-C11**

Connecting to the light curtain is done using plug-in connector connections, which shorten setup and replacement time.

Application expansion unit **SF-C14EX(-01)**

Three safety circuit systems (Light curtain output, Muting control and Emergency stop button) are collected into a single unit.

Robust type control unit **SF-C12**

The strong metal enclosure has a built-in safety relay. It has an IP65 protection structure, so that it can be set up individually without the need to be inserted into a control panel.

Remote I/O unit **SF-CL1T264T**

Connect light curtain and safety components to the safety field network, CC-Link Safety, and a single network is complete while achieving wire-saving.

* Refer to our website or general catalog for details.

PRODUCT CONFIGURATION

Mounting bracket and mating cable are optional.

Standard components (8-core cable)

Component parts

Required	1 Light curtain
	2 Mounting bracket (Optional)
	3 8-core bottom cap cable (Optional)
	4 8-core extension cable (Optional, use for cable extension)
	7 Cable for series connection (Optional, use for connection in series)

Muting control components (12-core cable, with interference prevention wire)

Component parts

Required	1 Light curtain
	2 Mounting bracket (Optional)
	5 12-core bottom cap cable (Optional)
	6 12-core extension cable (Optional, use for cable extension)
	7 Cable for series connection (Optional, use for connection in series)

1 Light curtains Mounting bracket and bottom cap cable are not supplied with the light curtain. Be sure to order them separately.

Differences from standard type

The Robust type SF4B-□G<V2> is different from the standard type SF4B-□<V2> in the following ways:

- Sensing width (protective height) • Profile • Net weight • Mounting bracket
- Large alignment tool • Noncompliant with Japanese and Korean press standard
- Noncompliant with Korean regulations • Noncompliant with Chinese GB standard (acquisition planned)

Other specifications, input/output circuits, and options are common to the standard type.

2 Mounting brackets Mounting bracket is not supplied with the light curtain. Be sure to order it separately.

Designation		Model No.	Description
Rear / side mounting bracket (Material: Iron)	M8 rear mounting bracket	MS-SFB-7-T	For rear direction. Allows the light curtain to be mounted at the rear with one M8 hexagon-socket-head bolt. (4 pcs. per set for emitter and receiver)
	M8 side mounting bracket	MS-SFB-8-T	For side direction. Allows the light curtain to be mounted at the side with one M8 hexagon-socket-head bolt. (4 pcs. per set for emitter and receiver)
	M8 rear / side mounting bracket set	MS-SFB-1-T2	Can be used as either a rear mounting bracket MS-SFB-7-T or a side mounting bracket MS-SFB-8-T depending on mounting direction. (4 pcs. per set for emitter and receiver)
360° mounting bracket (Material: Die-cast zinc alloy) * Light curtain can revolve 360° horizontally.	Standard mounting bracket	MS-SFB-1	Used to mount the light curtain on the rear surface and side surface. (4 pcs. per set for emitter and receiver)
	M8 mounting bracket	MS-SFB-1-T	Allows the light curtain to be mounted at the rear and side with one M8 hexagon-socket-head bolt. (4 pcs. per set for emitter and receiver)
	Pitch adapter bracket	MS-SFB-4	Used as the mounting bracket when changing over a previous light curtain with a protective height of 200 mm 7.874 in or more to the SF4B series. It is installed using two M5 hexagon-socket-head bolts. (4 pcs. per set for emitter and receiver)
	M8 pitch adapter bracket	MS-SFB-4-T	Used as the mounting bracket when changing over a previous light curtain with a protective height of 200 mm 7.874 in or more to the SF4B series. It is installed using one M8 hexagon-socket-head bolt. (4 pcs. per set for emitter and receiver)
Standard L mounting bracket (For SF4B-□G)		MS-SF4BG-1	Mounting is possible behind or at the side of the light curtain. Mount with two M5 bolts or one M8 bolt. (4 pcs. per set for emitter and receiver)
Dead zoneless mounting bracket (Material: Die-cast zinc alloy)		MS-SFB-3	Mounting with no dead zone is possible so that the mounting bracket does not project past the protective height. (4 pcs. per set for emitter and receiver)
Dead zoneless mounting bracket (For SF4B-□G) Material: Mounting bracket ...SPCC (Trivalent chrome plated) Supporting bracket ...PPS		MS-SF4BG-3	Allows light curtains to be installed close together, or in locations with installation restrictions due to equipment columns or jigs. (4 pcs. per set for emitter and receiver)

	For receiver	SFB-CCJ10D-MU	Length: 10 m 32.808 ft Net weight: 680 g approx. (1 cable)		
Cable for series connection		SFB-CSL01	Length: 0.1 m 0.328 ft Net weight: 45 g approx. (2 cables)		
		SFB-CSL05	Length: 0.5 m 1.640 ft Net weight: 95 g approx. (2 cables)		
		SFB-CSL1	Length: 1 m 3.281 ft Net weight: 150 g approx. (2 cables)		
		SFB-CSL5	Length: 5 m 16.404 ft Net weight: 630 g approx. (2 cables)		
Exclusive mating cable for SF-C14EX		SFB-CB05-EX	Length: 0.5 m 1.640 ft Net weight: 95 g approx. (2 cables)		
		SFB-CB5-EX	Length: 5 m 16.404 ft Net weight: 620 g approx. (2 cables)		
		SFB-CB10-EX	Length: 10 m 32.808 ft Net weight: 1,200 g approx. (2 cables)		
Adapter cable		For SF4-AH□ (PNP type)	Length: 0.5 m 1.640 ft Net weight: 110 g approx. (2 cables)		
		For SF4-AH□-N (NPN type)			
		For SF2-EH□ (PNP type)			
		For SF2-EH□-N (NPN type)			

Note: Where the cable color has not been specified precisely, it is black for emitter, gray with black line for receiver, outer diameter is $\phi 6$ mm **0.236 in.**, min. bending radius is R6 mm **R0.236 in.**

For details of mating cable of CC-Link Safety system remote I/O unit with connectors for light curtain **SF-CL1T264T**, refer to website.

ORDER GUIDE

Spare parts (Accessories for light curtain)

Designation	Model No.	Description
Intermediate supporting bracket (Note 1)	MS-SFB-2	Used to mount the light curtain on the intermediate position. (2 pcs. per set for emitter and receiver) Mounting is possible behind or at the side of the light curtain.
Intermediate supporting bracket (Note 2) (For SF4B-□G)	MS-SF4BG-2	Used to mount the light curtain in the intermediate position. (2 pcs. per set for emitter and receiver) Mounting is possible behind or at the side of the light curtain.
Test rod ø14	SF4B-TR14	Min. sensing object for regular checking (ø14 mm ø0.551 in), with finger protection type (min. sensing object ø14 mm ø0.551 in)
Test rod ø25	SF4B-TR25	Min. sensing object for regular checking (ø25 mm ø0.984 in), with hand protection type (min. sensing object ø25 mm ø0.984 in)

- Notes: 1) The number of sets required varies depending on the product.
- 1 set: **SF4B-F□<V2>** Light curtain with 79 to 111 beam channels
 - SF4B-H□<V2>** Light curtain with 40 to 56 beam channels
 - SF4B-A□<V2>** Light curtain with 20 to 28 beam channels
 - 2 sets: **SF4B-F127□<V2>**
 - SF4B-H□<V2>** Light curtain with 64 to 80 beam channels
 - SF4B-A□<V2>** Light curtain with 32 to 40 beam channels
 - 3 sets: **SF4B-H□<V2>** Light curtain with 88 to 96 beam channels
 - SF4B-A□<V2>** Light curtain with 44 to 48 beam channels
- 2) The number of sets required varies depending on the product.
- 1 set: **SF4B-F□G<V2>** Light curtain with 79 to 127 beam channels
 - SF4B-H□G<V2>** Light curtain with 40 to 64 beam channels
 - SF4B-A□G<V2>** Light curtain with 20 to 32 beam channels
 - 2 set: **SF4B-H□G<V2>** Light curtain with 72 to 96 beam channels
 - SF4B-A□G<V2>** Light curtain with 36 to 48 beam channels

Exclusive control units

Designation	Appearance	Model No.	Application cable	Description
Connector connection type control unit		SF-C11	Bottom cap cable: SFB-CB□ Extension cable: SFB-CCJ10□	Use 8-core cable with connector to connect to the light curtain. Compatible with up to Control Category 4. Interference prevention wires and muting function cannot be used.
Robust type control unit		SF-C12	Bottom cap cable: SFB-CB05-MU Extension cable: SFB-CCJ10□-MU	Use 12-core cable with connector to connect to the light curtain. Interference prevention wires can be used. Compatible with up to Control Category 4. Muting function cannot be used.
Slim type control unit		SF-C13	Bottom cap cable: SFB-CCB□(-MU) Extension cable: SFB-CC□(-MU)	Use a discrete wire cable to connect to the light curtain. Muting function and interference prevention wires can be used. Compatible with up to Control Category 4.
Application expansion unit for SF4B series		SF-C14EX	Bottom cap cable: SFB-CB□-EX Extension cable: SFB-CCJ10□	The muting control function and emergency stop input expand the applications of the light curtains. Use exclusive cable to connect to the light curtain. Compatible with up to Control Category 4. The handy-controller SFB-HC cannot be used with SF-C14EX-01 .
Handy-controller non-compatible type		SF-C14EX-01		
CC-Link Safety system remote I/O unit for light curtain (Note)		SF-CL1T264T	Bottom cap cable: SFB-CB□-CL Extension cable: SFB-CCJ10□-CL	This is a remote I/O unit that allows the safety field network "CC-Link Safety" to be connected to the light curtains or the safety components. Use exclusive cable to connect to the light curtain. Compatible with up to Control Category 4. Please contact our office for details.

Note: Refer to the our website for details of the remote I/O unit **SF-CL1T264T**.

SF-C12 spare relay set

A set of spare relays (2 safety relays and 1 removal tool) is available for the safety relay that is built into the **SF-C12**.
Model No.: **SF-C12-RY**

Recommended safety relay

Safety relay
Panasonic Corporation
SF series

Note: Contact Panasonic Corporation for details on the recommended products.

Type		With LED indicator	
Item	Model No.	SFS3-L-DC24V	SFS4-L-DC24V
Contact arrangement		3a1b	4a2b
Rated nominal switching capacity		6 A / 250 V AC, 6 A / 30 V DC	
Min. switching capacity		1 mA / 5 V DC	
Coil rating		15 mA / 24 V DC	20.8 mA / 24 V DC
Rated power consumption		360 mW	500 mW
Operation time		20 ms or less	
Release time		20 ms or less	
Ambient temperature		-40 to +85 °C -40 to +185 °F (Humidity: 5 to 85 % RH)	
Applicable standards		UL, C-UL, TÜV	

OPTIONS

Handy-controller

Designation	Appearance	Model No.
Handy-controller	 * Includes 2 adapter cables	SFB-HC
Cable set for cable type connection		SFC-WNC1

Note: A handy-controller cannot be used with the SF4B-□-01<V2>, the SF4B-□-03<V2> and the SF-C14EX-01.

Pigtailed type

Note: If using a bottom cap cable with discrete wire, please order the **SFB-CC3/CC10** separately. Refer to the instruction manual for the light curtain for details on wiring.

Cable type

Light curtain diagnosis software

Simply input the error number of the light curtain on the screen, and the section of maintenance needed will be located and coping process will be displayed.

* Free download available from our website.

Light curtain diagnosis software

Y-shaped connector

Type	Appearance	Model No.	Description
Wire-saving Y-shaped connector		SFB-WY1	Wire-saving connector for standard components (8-core cable). Cables of emitter and receiver are consolidated into one cable for wire-saving. Wiring has +24 V, 0 V, OSSD 1, OSSD 2, output polarity setting wire (shield). [Power wire and synchronization wire are connected inside the connector.] [Interlock is disabled (automatic reset).]
Cable with connector on one side		WY1-CCN3	Cable length: 3 m 9.843 ft Net weight: 200 g approx. (1 cable)
		WY1-CCN10	Cable length: 10 m 32.808 ft Net weight: 620 g approx. (1 cable)

By using the Y-shaped connector, the least required wires such as power or safety output are consolidated into one cable. Man-hours taken for wiring is eliminated to the minimum. Construction times as well as wiring mistakes are greatly reduced.

Product configuration

**Extension cable
(1 cable for receiver)**
SFB-CCJ3D (3 m 9.843 ft)
SFB-CCJ10D (10 m 32.808 ft)

**Extension cable
(1 cable for emitter)**
SFB-CCJ3E (3 m 9.843 ft)
SFB-CCJ10E (10 m 32.808 ft)

**Bottom cap cable
(2 cables for emitter and receiver)**
SFB-CB05 (0.5 m 1.64 ft)
SFB-CB5 (5 m 16.404 ft)
SFB-CB10 (10 m 32.808 ft)

Extension cable
SFB-CCJ3D (3 m 9.843 ft)
SFB-CCJ10D (10 m 32.808 ft)

**Y-shaped connector
SFB-WY1**

**Cable with connector on one side
(Common for all models)**
WY1-CCN3 (3 m 9.843 ft)
WY1-CCN10 (10 m 32.808 ft)

Connector pin No.	Description
①	OSSD 2
②	+24 V
③	OSSD 1
④	Not used
⑤	Not used
⑥	Not used
⑦	0 V
⑧	Output polarity setting wire (Shield)

Wiring diagram of control unit SF-C13

<For PNP output (minus ground)>

- Connect the light curtain control outputs OSSD 1 and OSSD 2 to S1 and S2 respectively.

- Notes: 1) The above diagram is when using manual reset. If automatic reset is used, disconnect the lead from X2 and connect it to X3. In this case, a reset (RESET) button is not needed.
 2) Use a momentary-type switch as the reset (RESET) button.
 3) Unused wires must be insulated.

<For NPN output (plus ground)>

- Connect the light curtain control outputs OSSD 1 and OSSD 2 to S4 and S2 respectively and ground the + side.

- Notes: 1) The above diagram is when using manual reset. If automatic reset is used, disconnect the lead from X2 and connect it to X3. In this case, a reset (RESET) button is not needed.
 2) Use a momentary-type switch as the reset (RESET) button.
 3) Unused wires must be insulated.

Note: The model Nos. given above denote a single unit, not a pair of units. 2 units are required for use in mounting to the emitter / receiver. (Except for corner mirror)

Front protection cover

• **FC-SFBH-□**

Protects sensing surface of the light curtain from flying objects such as welding spatter. The operating range reduces when the front protection cover is used.
Note: It is not available for SF4B-□G.

Material: Polycarbonate

Protection bar set

• **MC-SFBH-□**

* It is not available for SF4B-□G.

Rear / side protection bar set

• **MC-SFBH-□-T**

* It is not available for SF4B-□G.

Sensing range

	SF4B-F□	SF4B-H□		SF4B-A□	
		12 to 64 beam channels type	72 to 96 beam channels type	6 to 32 beam channels type	36 to 48 beam channels type
Only emitter installed	0.3 to 6 m 0.984 to 19.685 ft	0.3 to 7.5 m 0.984 to 24.606 ft	0.3 to 6 m 0.984 to 19.685 ft	0.3 to 7.5 m 0.984 to 24.606 ft	0.3 to 6 m 0.984 to 19.685 ft
Only receiver installed	0.3 to 6 m 0.984 to 19.685 ft	0.3 to 7.5 m 0.984 to 24.606 ft	0.3 to 6 m 0.984 to 19.685 ft	0.3 to 7.5 m 0.984 to 24.606 ft	0.3 to 6 m 0.984 to 19.685 ft
Both emitter and receiver installed	0.3 to 5.5 m 0.984 to 18.045 ft	0.3 to 7 m 0.984 to 22.966 ft	0.3 to 5.5 m 0.984 to 18.045 ft	0.3 to 7 m 0.984 to 22.966 ft	0.3 to 5.5 m 0.984 to 18.045 ft

Note: The operating range is the possible setting distance between the emitter and the receiver.

Corner mirror

• **RF-SFBH-□**

Normally for L-shaped or U-shaped installation, 2 or 3 sets of light curtains are needed. With the use of a corner mirror reflecting the light, one set of light curtain is possible for L-shaped or U-shaped installation.

Percent decline of the sensing range

With 1 mirror	Declined to 90 %
With 2 mirrors	Declined to 80 %

79	40	20	FC-SF4BG-H40
95	48	24	FC-SF4BG-H48
111	56	28	FC-SF4BG-H56
127	64	32	FC-SF4BG-H64
-	72	36	FC-SF4BG-H72
-	80	40	FC-SF4BG-H80
-	88	44	FC-SF4BG-H88
-	96	48	FC-SF4BG-H96

Note: The model Nos. given above denote a single unit, not a pair of units. 2 units are required for use in mounting to the emitter / receiver.

Material: Front protection cover ... Polycarbonate
Top / Side / Bottom stopper ... Stainless steel (SUS304)

Sensing range

	SF4B-F□G<V2>	SF4B-H□G<V2>		SF4B-A□G<V2>	
		12 to 64 beam channels type	72 to 96 beam channels type	6 to 32 beam channels type	36 to 48 beam channels type
Only emitter installed	0.3 to 6 m 0.984 to 19.685 ft	0.3 to 7.5 m 0.984 to 24.606 ft	0.3 to 6 m 0.984 to 19.685 ft	0.3 to 7.5 m 0.984 to 24.606 ft	0.3 to 6 m 0.984 to 19.685 ft
Only receiver installed					
Both emitter and receiver installed	0.3 to 5.5 m 0.984 to 18.045 ft	0.3 to 7 m 0.984 to 22.966 ft	0.3 to 5.5 m 0.984 to 18.045 ft	0.3 to 7 m 0.984 to 22.966 ft	0.3 to 5.5 m 0.984 to 18.045 ft

Note: The operating range is the possible setting distance between the emitter and the receiver.

Designation	Model No.	Description
Test rod ø45	SF4B-TR45	Min. sensing object for regular checking (ø45 mm ø1.772 in), with arm / foot protection type (min. sensing object ø45 mm ø1.772 in)
Laser alignment tool	SF-LAT-2N	Allows easy beam axis alignment using easy-to-see laser beam
Laser alignment tool (For SF4B-□G)	SF-LAT-4BG	Allows easy beam axis alignment using easy-to-see laser beam
Caution tape	SF-TP-BG10	Attached to the side of the light curtain to alert workers to hazards (10 m 32.8 ft long)

Laser alignment tool

- SF-LAT-2N

Laser alignment tool (For SF4B-□G)

- SF-LAT-4BG

* Illustration shows standard type light curtain.

Caution tape

- SF-TP-BG10

OPTIONS

Designation	Model No.	Description
Large display unit for light curtain	SF-IND-2	<p>With the auxiliary output of the light curtain, the operation is easily observable from various directions.</p> <p>Specifications</p> <ul style="list-style-type: none"> Supply voltage: 24 V DC $\pm 15\%$ Current consumption: 12 mA or less Indicators: Orange LED (8 pcs. used) [Light up when external contact is ON] Ambient temperature: -10 to $+55\text{ }^{\circ}\text{C}$ $+14$ to $+131\text{ }^{\circ}\text{F}$ (No dew condensation or icing allowed) Material: POM (Enclosure) Polycarbonate (Cover) Cold rolled carbon steel (SPCC) (Bracket) Cable: 0.3 mm² 2-core cabtyre cable, 3 m 9.843 ft long Weight: 70 g approx. (including bracket) <p>I/O circuit diagrams</p> <p><With NPN output type></p> <p><With PNP output type></p>

Large display unit for light curtain

• SF-IND-2

Attaches to top of light curtain. Tighten together the mounting bracket provided with the light curtain **MS-SFB-1/4**, **MS-SFBG-1** and the attached mounting bracket of **SF-IND-2**.

Introduction to sensors that can be used as muting sensors

Compact Photoelectric Sencer
CX-400 Ver.2 SERIES

- World standard size
- Wide variation

Ultra-slim Photoelectric Sensor
EX-10 Ver.2 SERIES

- 3.5 mm **0.138 in** thickness
- Long sensing range: 1 m **3.281 ft** (thru-beam type: **EX-19**)
- *The **EX-20** series that is compatible with M3 mounting screws is also available.

U-shaped Micro Photoelectric Sensor
PM-64 SERIES

- Extremely compact and space saving
- A lineup of quick fitting-up connector type

Rectangular-shaped Inductive Proximity Sensor
GX-F/H SERIES

- Industry longest in stable sensing range
- 10 times the durability (Compared to previous models)
- IP68g protective construction

* Check the specifications for the muting sensors before making a selection. Refer to **"PRECAUTIONS FOR USE"** (p.35~) for details on specifications and installation conditions.

Recommended muting lamps

Manufactured by Maruyasu Dengo Co.,Ltd.
Model No.: BLR-300-C
Note: Contact the manufacturers for details on the recommended products.

Manufactured by IDEC Corporation
Model No.: HW1P-5Q7A

Recommended safety relays

Manufactured by Panasonic Corporation
Model No.: SF series (Safety Relay)
Note: Contact the manufacturers for details on the recommended products.

Light curtain individual specifications

Min. sensing object (Note 4)	\varnothing 14 mm \varnothing0.551 in opaque object	\varnothing 25 mm \varnothing0.984 in opaque object	\varnothing 45 mm \varnothing1.772 in opaque object
Effective aperture angle	\pm 2.5° or less [for an operating range exceeding 3 m 9.843 ft (conforming to IEC 61496-2 / UL 61496-2)]		
Supply voltage	24 V DC \pm 10 % Ripple P-P 10 % or less		
Control outputs (OSSD 1, OSSD 2)	PNP open-collector transistor / NPN open-collector transistor (switching method)		
	<ul style="list-style-type: none"> When selecting PNP output: Max. source current 200 mA, When selecting NPN output: Max. sink current 200 mA Applied voltage: same as supply voltage (When selecting PNP output: between the control output and +V,) (When selecting NPN output: between the control output and 0 V) Residual voltage: 2.5 V or less (When selecting PNP output: source current 200 mA, when selecting NPN output: sink current 200 mA) (when using 20 m 65.617 ft length cable) 		
	Operation mode	ON when all beam channels are received, OFF when one or more beam channels are interrupted (OFF also in case of any malfunction in the light curtain or the synchronization signal)(Note 5,6)	
Protection circuit	Incorporated		
Response time	OFF response: 14 ms or less, ON response: 80 to 90 ms		
Auxiliary output (Non-safety output)	PNP open-collector transistor / NPN open-collector transistor (switching method)		
	<ul style="list-style-type: none"> When selecting PNP output: Max. source current 60 mA, When selecting NPN output: Max. sink current 60 mA Applied voltage: same as supply voltage (When selecting PNP output: between the auxiliary output and +V,) (When selecting NPN output: between the auxiliary output and 0 V) Residual voltage: 2.5 V or less (When selecting PNP output: source current 60 mA, when selecting NPN output: sink current 60 mA) (when using 20 m 65.617 ft length cable) 		
	Operation mode	OFF when control outputs are ON, ON when control outputs are OFF (Factory setting, operating mode can be changed using the SFB-HC handy-controller).	
Protection circuit	Incorporated		
Response time	OFF replay: 34 ms or less, ON replay 110 ms or less		
Interference prevention function	Incorporated (Note 7) (Available only when in series connection for SF4B-□-03<V2>)		
Emission halt function / Interlock function	Incorporated / Incorporated [Manual reset / Auto reset (Note 8)]		
External device monitoring function	Incorporated		
Override function / Muting function	Incorporated (Note 7) (excluding SF4B-□-03<V2>) / Incorporated (Note 7) (excluding SF4B-□-03<V2>)		
Optional functions (Note 9)	Fixed blanking, floating blanking, auxiliary output switching, interlock setting changing, external relay monitor setting changing, muting setting changing, protecting, light emitting amount control		
Environmental resistance	Degree of protection	IP67 / IP65 (IEC)	
	Ambient temperature	-10 to +55 °C +14 to +131 °F (No dew condensation or icing allowed), Storage: -25 to +70 °C -13 to +158 °F	
	Ambient humidity	30 to 85 % RH, Storage: 30 to 95 % RH	
	Ambient illuminance	Incandescent light: 3,500 lx or less at the light-receiving face	
	Dielectric strength voltage	1,000 V AC for one min. between all supply terminals connected together and enclosure	
	Insulation resistance	20 M Ω , or more, with 500 V DC megger between all supply terminals connected together and enclosure	
	Vibration resistance	10 to 55 Hz frequency, 0.75 mm 0.030 in amplitude in X, Y and Z directions for two hours each	
	Shock resistance	300 m/s ² acceleration (30 G approx.) in X, Y and Z directions for three times each	
Emitting element	Infrared LED (Peak emission wavelength: 870 nm 0.034 mil)		
Material	Enclosure: Aluminium, Upper / lower case: Aluminium, Sensing surface: Polycarbonate and Polyester resin, Cap: PBT		
Connecting method / Cable length	Connector / Total length up to 50 m 164.042 ft is possible for both emitter and receiver, with optional mating cables (Note 10)		
Accessories	MS-SFB-2 (Intermediate supporting bracket): (Note 11)	MS-SFB-2 (Intermediate supporting bracket): (Note 11)	MS-SFB-2 (Intermediate supporting bracket): (Note 11)
	MS-SF4BG-2 (Intermediate supporting bracket): (Note 12)	MS-SF4BG-2 (Intermediate supporting bracket): (Note 12)	MS-SF4BG-2 (Intermediate supporting bracket): (Note 12)
	SF4B-TR14 (Test rod): 1 No.	SF4B-TR25 (Test rod): 1 No.	MS-SF4BG-2 (Intermediate supporting bracket): (Note 12)

- Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +20 °C **+68 °F**.
 2) PL_e SIL3 compliant from production in August 2009.
 3) The operating range is the possible setting distance between the emitter and the receiver.
 4) When the floating blanking function is used, the size of the min. sensing object is changed. For details, refer to "Safety distance" (p.36~).
 5) The outputs are not "OFF" when muting function is active even if the beam channel is interrupted.
 6) In case the blanking function is valid, the operation mode is changed. For details, refer to "Safety distance" (p.36~).
 7) Please use 12-core cable.
 8) The manual reset and auto reset are possible to be switched depending on the wiring status.
 9) In case of using optional function, the handy-controller (**SFB-HC**) (optional) is required. However, a handy-controller cannot be used with the **SF4B-□-01<V2>**, **SF4B-□-03<V2>** and the **SF-C14EX-01**.
 10) The cable can be extended within 30 m **98.425 ft** (for emitter / receiver) when two light curtains are connected in series, within 20 m **65.617 ft** when three light curtains are connected in series. Furthermore, when the muting lamp is used, the cable can be extended within 40 m **131.234 ft** (for emitter / receiver).
 11) The intermediate supporting bracket (**MS-SFB-2**) is enclosed with the following models. The number of sets required varies depending on the product.
 1 set: **SF4B-F□<V2>**..... Light curtain with 79 to 111 beam channels, **SF4B-H□<V2>**..... Light curtain with 40 to 56 beam channels, **SF4B-A□<V2>**..... Light curtain with 20 to 28 beam channels
 2 sets: **SF4B-F127<V2>**, **SF4B-H□<V2>**...Light curtain with 64 to 80 beam channels, **SF4B-A□<V2>**...Light curtain with 32 to 40 beam channels
 3 sets: **SF4B-H□<V2>**..... Light curtain with 88 to 96 beam channels, **SF4B-A□<V2>**..... Light curtain with 44 to 48 beam channels
 12) The intermediate supporting bracket (**MS-SF4BG-2**) is enclosed with the following models.
 1 set: **SF4B-F□G<V2>**..... Light curtain with 79 to 127 beam channels, **SF4B-H□G<V2>**..... Light curtain with 40 to 64 beam channels, **SF4B-A□G<V2>**..... Light curtain with 20 to 32 beam channels
 2 sets: **SF4B-H□G<V2>**..... Light curtain with 72 to 96 beam channels, **SF4B-A□G<V2>**..... Light curtain with 36 to 48 beam channels

SPECIFICATIONS

Control units

Item	Model No.	SF-C11 (Note 2)	SF-C12	SF-C13 (Note 2)
Connectable light curtains		SF4B / SF2B series	SF4B series	Light curtains manufactured by Panasonic
Control category		ISO 13849-1 (EN ISO 13849-1, JIS B 9705-1) compliance up to Category 4, PLe standards		
Supply voltage / Current consumption		24 V DC $\pm 10\%$ Ripple P-P 10 % or less / 100 mA or less (excluding light curtain)		
Fuse (rating)		Built-in electronic fuse, Triggering current: 0.5 A or more, Reset after power down		
Enabling path		NO contact $\times 3$ (13-14, 23-24, 33-34)	NO contact $\times 2$ (13-14, 23-24)	NO contact $\times 3$ (13-14, 23-24, 33-34)
Utilization category		AC-15, DC-13 (IEC 60947-5-1)		
Rated operation voltage (Ue) / Rated operation current (Ie)		30 V DC / 6 A, 230 V AC / 6 A, resistive load (For inductive load, during contact protection) Min. applicable load: 10 mA (at 24 V DC) (Note 3)	24 V DC / 1 A, resistive load (For inductive load, during contact protection) Min. applicable load: 15 mA (at 24 V DC)	30 V DC / 4 A, 230 V AC / 4 A, resistive load (For inductive load, during contact protection) Min. applicable load: 10 mA (at 24 V DC) (Note3)
Contact resistance		100 m Ω or less (initial value)	50 m Ω or less (initial value)	100 m Ω or less (initial value)
Contact protection fuse rating		6 A (slow blow)	3 A (slow blow)	4 A (slow blow)
Pick-up delay (Auto reset / Manual reset)		80 ms or less / 90 ms or less	30 ms or less / 30 ms or less	80 ms or less / 90 ms or less
Response time		10 ms or less	14 ms or less	10 ms or less
Auxiliary output		Safety relay contact (NC contact) $\times 1$ (41-42) (Related to enabling path)	Safety relay contact (NC contact) $\times 1$ (31-32) (Related to enabling path)	Safety relay contact (NC contact) $\times 1$ (41-42) (Related to enabling path)
Rated operation voltage / current		24 V DC / 2 A, Min. applicable load: 10 mA (at 24 V DC)	30 V DC / 3 A, Min. applicable load: 15 mA (at 24 V DC)	24 V DC / 2 A, Min. applicable load: 10 mA (at 24 V DC)
Contact protection fuse rating		2 A (slow blow)	3 A (slow blow)	2 A (slow blow)
Semiconductor auxiliary output (AUX)		<Minus ground (Setting for PNP)> <Plus ground (Setting for NPN)> PNP open-collector transistor NPN open-collector transistor	—	PNP open-collector transistor
Output operation		Related to auxiliary output of light curtain	—	ON when the light curtain is interrupted
Excess voltage category		II	III	II
Polarity selection function (Note 4)		Incorporated (Sliding switch allows selection of plus / minus ground) Minus ground: Correspond to PNP output light curtain Plus ground: Correspond to NPN output light curtain	—	Incorporated (Cable connection allows selection of plus / minus ground) Minus ground: Correspond to PNP output light curtain Plus ground: Correspond to NPN output light curtain
Pollution degree		2		
Protection		Enclosure: IP40, Terminal: IP20	IP65	Enclosure: IP40, Terminal: IP20
Ambient temperature		-10 to +55 °C +14 to +131 °F (No dew condensation or icing allowed), Storage: -25 to +70 °C -13 to +158 °F		
Enclosure material		ABS	Die-cast aluminum	ABS
Weight		Net weight: 320 g approx.	Net weight: 1 kg approx.	Net weight: 200 g approx.

- Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +20 °C +68 °F.
 2) SF-C11 and SF-C13 have acquired the Korea S-mark.
 3) If several SF-C11 or SF-C13 units are being used in a line together, leave a space of 5 mm 0.197 in or more between each unit. If the units are touching each other, reduce the rated operating current for safety output in accordance with the ambient operating temperature as shown in the graphs at right.
 4) Please switch the sliding switch to the PNP side for minus ground and to the NPN side for plus ground.
 5) For details of control unit SF-C1□ (SF-C10 series), refer to the website or general catalog.

(Dilating when SF-C11 units are mounted close together)

(Dilating when SF-C13 units are mounted close together)

Item	Model No.	SF-C14EX(-01) (Note 2)
Connectable light curtains		SF4B series
Control category		ISO 13849-1 (EN ISO 13849-1, JIS B 9705-1) compliance up to Category 4, PLe standards
Supply voltage / Current consumption		24 V DC $\pm 10\%$ Ripple P-P 10 % or less / 0.2 A or less (Excluding light curtain and other external connecting device)
Enabling path (Enabling path 1, 2, 3)		PNP open-collector transistor 2 outputs $\times 3$ or NPN open-collector transistor 2 outputs $\times 3$ (selectable using a slider switch)
Operation mode (Output operation)		Enabling path 1: ON when the light curtain is in light receiving condition, OFF when the light curtain is in light interrupted condition (Note 3) Enabling path 2: ON when the light curtain is in light receiving condition or the muting function is valid OFF when the light curtain is in light interrupted condition and the muting function is invalid (Note 3) Enabling path 3: ON when the emergency stop is invalid, OFF when the emergency stop is valid
Response time		OFF response: 14 ms or less (Enabling path 1 and 2: including the response time of the light curtain) ON response: 90 ms or less (auto-reset) / 140 ms or less (manual reset) (Note 4)
Auxiliary outputs (Auxiliary output 1, 2, 3, 4) (Note 5)		PNP open-collector transistor $\times 3$ or NPN open-collector transistor $\times 3$ (selectable using a slider switch) <When PNP output is selected> • Maximum source current: 60 mA or less • Applied voltage: same as supply voltage (between the auxiliary output and +V) • Residual voltage: 2 V or less (at 60 mA source current) <When NPN output is selected> • Maximum sink current: 60 mA or less • Applied voltage: same as supply voltage (between the auxiliary output and 0 V) • Residual voltage: 2 V or less (at 60 mA sink current)
Operation mode (Output operation)		Auxiliary output 1: ON when the muting function is invalid, OFF when the muting function is valid Auxiliary output 2: ON when the override function is invalid, OFF when the override function is valid Auxiliary output 3: ON when the muting lamp is normal, OFF when the muting lamp is error Auxiliary output 4: ON when the light curtain is in light interrupted condition, OFF when the light curtain is in light receiving condition (Note 5)
Muting lamp output		Applicable muting lamp: 24 V DC, 3.6 to 30 W (L1, L2 of each unit)
Protection		Enclosure: IP40, Terminal: IP20
Ambient temperature		-10 to +55 °C +14 to +131 °F (No dew condensation or icing allowed), Storage: -25 to +70 °C -13 to +158 °F
Material		Enclosure: ABS
Connection terminal		Detachable spring-cage terminal
Weight		Net weight: 250 g approx.

- Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +20 °C +68 °F.
 2) SF-C14EX-01 is Handy-controller non-compatible type.
 3) Both enabling path 1 and 2 are OFF when the emergency stop is valid regardless of whether the light curtain is in the light receiving or light interrupted condition.
 4) The auto-reset cannot be used with enabling path 3.
 5) The auxiliary output incorporated in the SF4B series is outputted.
 6) For details of control unit SF-C14EX(-01), refer to the website or general catalog.

Handy-controller

Item	Model No.	SFB-HC
Supply voltage		24 V DC $\pm 10\%$ Ripple P-P10 % or less (common to light curtain power supply)
Current consumption		65 mA or less
Communication method		RS-485 two-way communications (Specific procedure)
Digital display		4-digit red LED display $\times 2$ (Selected beam channels, setting contents etc. are displayed.)
Function indicator		Green LED $\times 9$ (set function is displayed.)
Functions		Fixed blanking (Factory setting: Disabled) / Floating blanking (Factory setting: Disabled) / Auxiliary output change (Factory setting: Negative Logic of OSSD) / Light emitting amount control (Factory setting: Disabled) / Muting setting change [Factory setting: All beam channels enabled, A = B, Setting of the muting lamp diagnosis function enabled (Ver. 2 or later), Muting sensor output operation setting N.O. / N.O. (Ver. 2.1 or later)] / Interlock setting change (Factory setting: start / restart) / External device monitoring setting change (Factory setting: Enabled, 300 ms) / Override setting changing function 60 sec. (Ver. 2.1 or later) / Setting detail monitoring / Protecting (Factory setting: Disabled)(Factory password setting: 0000) / Initialization / Copy
Ambient temperature		-10 to $+55$ °C $+14$ to $+131$ °F (No dew condensation or icing allowed), Storage: -25 to $+70$ °C -13 to $+158$ °F
Ambient humidity		30 to 85 % RH, Storage: 30 to 85 % RH
Voltage withstandability		1,000 V AC for one min. between all supply terminals connected together and enclosure
Insulation resistance		20 M Ω , or more, with 500 V DC megger between all supply terminals connected together and enclosure
Cable		8-core shielded cable, 0.5 m 1.640 ft long, with a connector at the end (2 cables)
Weight		Net weight: 200 g approx.
Accessories		Adapter cable: 2 cables

Note: Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of $+20$ °C $+68$ °F.

Laser alignment tool

Item	Model No.	SF-LAT-2N / SF-LAT-4BG (For SF4B-□G)
Supply voltage		3 V (LR6 battery $\times 2$ pcs.)
Battery		1.5 V (LR6 battery) $\times 2$ pcs. (replaceable)
Battery lifetime		30 hours approx. of continuous operation (LR6 battery, at $+25$ °C $+77$ °F ambient temperature)
Light source		Red semiconductor laser: Class 2 (IEC / JIS / FDA) (Max. output: 1 mW, Peak emission wavelength: 650 nm 0.026 mil) (Note 2)
Spot diameter		10 mm 0.394 in approx. (at 5 m 16.404 ft distance)
Ambient temperature		0 to $+40$ °C $+32$ to $+104$ °F (No dew condensation), Storage: 0 to $+55$ °C $+32$ to $+131$ °F
Ambient humidity		35 to 85 % RH, Storage: 35 to 85 % RH
Material		Enclosure: ABS, Mounting part: Aluminum
Weight		Net weight: 200 g approx. (including batteries)
Accessories		LR6 battery: 2 pcs.

Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of $+20$ °C $+68$ °F.

2) As for FDA regulation, the product complies with 21 CFR 1040.10 and 1040.11 based on Laser Notice No. 50, dated June 24, 2007, issued by CDRH under the FDA.

Corner mirror

Item	Model No.	RF-SFBH-□
Attenuation rate of sensing range		With one mirror: Declined to 90 %, With two mirrors: Declined to 80 % (When used in combination with the SF4B series)
Environmental resistance	Ambient temperature	-10 to $+55$ °C $+14$ to $+131$ °F (No dew condensation or icing allowed), Storage: -25 to $+70$ °C -13 to $+158$ °F
	Ambient humidity	30 to 85 % RH, Storage: 30 to 95 % RH
	Vibration resistance	10 to 55 Hz frequency, 0.75 mm 0.030 in amplitude in X, Y and Z directions for two hours each
	Shock resistance	300 m/s ² acceleration (30 G approx.) in X, Y and Z directions for three times each
Material		Enclosure: Alminium, Mounting bracket: Stainless steel, Mirror (rear surface mirror): Glass, Side cover: EPDM
Accessories		Intermediate supporting bracket: 1 set (RF-SFBH-40/48/56/64), 2 sets (RF-SFBH-72/80/88/96)

Note: Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of $+20$ °C $+68$ °F.

I/O CIRCUIT AND WIRING DIAGRAMS

I/O circuit diagram

<In case of using I/O circuit for PNP output>

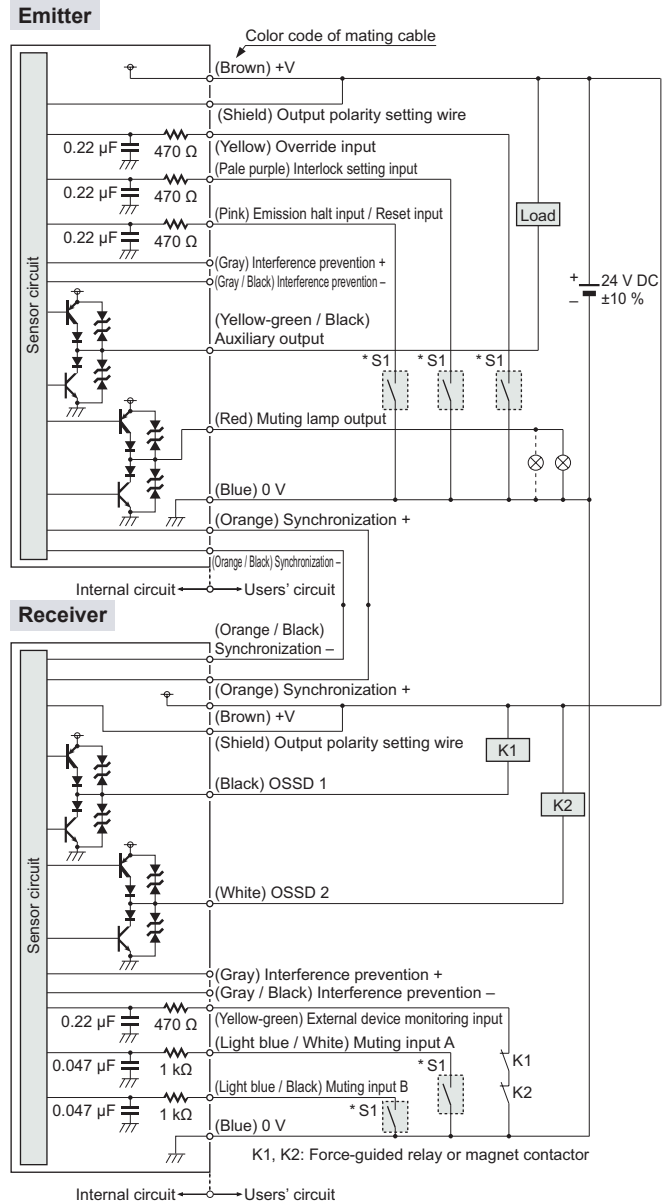

Note: The above diagram is when using a 12-core cable. If an 8-core cable is used, the red, yellow, gray, gray / black, light blue / white and light blue / black lead wires are absent.

* S1

- Switch S1
- Emission halt input / Reset input
For manual reset
Vs to Vs - 2.5 V (sink current 5 mA or less): Emission halt (Note 1)
Open: Emission
For automatic reset
Vs to Vs - 2.5 V (sink current 5 mA or less): Emission (Note 1)
Open: Emission halt
 - Interlock setting input, Override input, Muting input A / B, External device monitoring input
Vs to Vs - 2.5 V (sink current 5 mA or less): Enabled (Note 1)
Open: Disabled

Note: Vs is the applying supply voltage.

<In case of using I/O circuit for NPN output>

Note: The above diagram is when using a 12-core cable. If an 8-core cable is used, the red, yellow, gray, gray / black, light blue / white and light blue / black lead wires are absent.

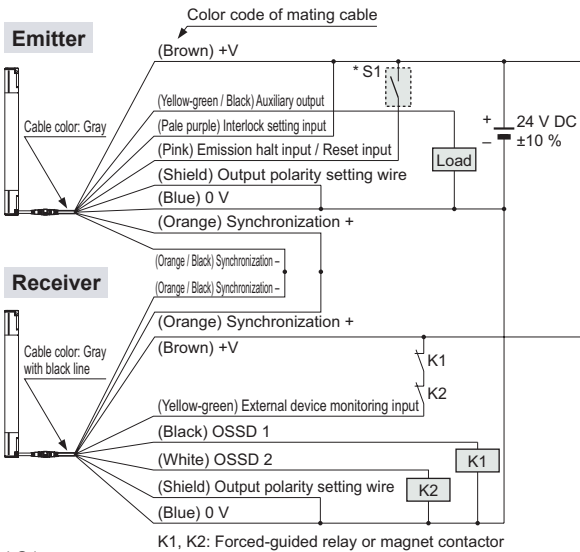

* S1

- Switch S1
- Emission halt input / Reset input
For manual reset
0 to +1.5 V (source current 5 mA or less): Emission halt
Open: Emission
For automatic reset
0 to +1.5 V (source current 5 mA or less): Emission
Open: Emission halt
 - Interlock setting input, Override input, Muting input A / B, External device monitor input
0 to +1.5 V (source current 5 mA or less): Enabled
Open: Disabled

Connection example

Standard components (8-core cable): Interlock function “enabled (manual reset)”, external device monitoring function “enabled”

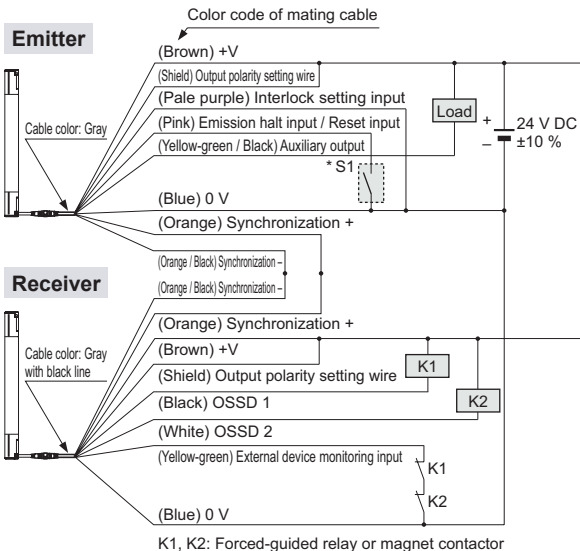

<In case of using I/O circuit for PNP output>

* S1
 Switch S1
 • Emission halt input / Reset input
 For manual reset
 Vs to Vs – 2.5 V (sink current 5 mA or less): Emission halt (Note)
 Open: Emission
 For automatic reset
 Vs to Vs – 2.5 V (sink current 5 mA or less): Emission (Note)
 Open: Emission halt

Note: Vs is the applying supply voltage.

<In case of using I/O circuit for NPN output>

* S1
 Switch S1
 • Emission halt input / Reset input
 For manual reset
 0 to +1.5 V (source current 5 mA or less): Emission halt
 Open: Emission
 For automatic reset
 0 to +1.5 V (source current 5 mA or less): Emission
 Open: Emission halt

The diagram at left shows the configuration when using PNP output, interlock function “enabled (manual reset)” and external device monitoring function “enabled”.

In case of setting the interlock function to “disabled (automatic reset)”

* Refer to the SF4B<V2> manual for details of the interlock function.

In case of setting the external device monitoring function to “disabled”

* Refer to the SF4B<V2> manual for details of the external device monitoring function.

The diagram at left shows the configuration when using NPN output, interlock function “enabled (manual reset)” and external device monitoring function “enabled”.

In case of setting the interlock function to “disabled (automatic reset)”

* Refer to the SF4B<V2> manual for details of the interlock function.

In case of setting the external device monitoring function to “disabled”

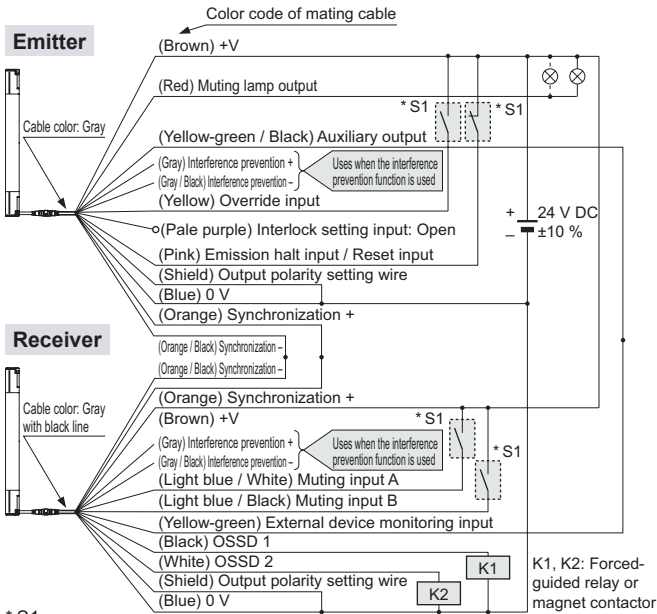

* Refer to the SF4B<V2> manual for details of the external device monitoring function.

Connection example

Muting control components (12-core cable, with interference prevention wires): Interlock function "disabled (automatic reset)", external device monitoring function "disabled"

<In case of using I/O circuit for PNP output>

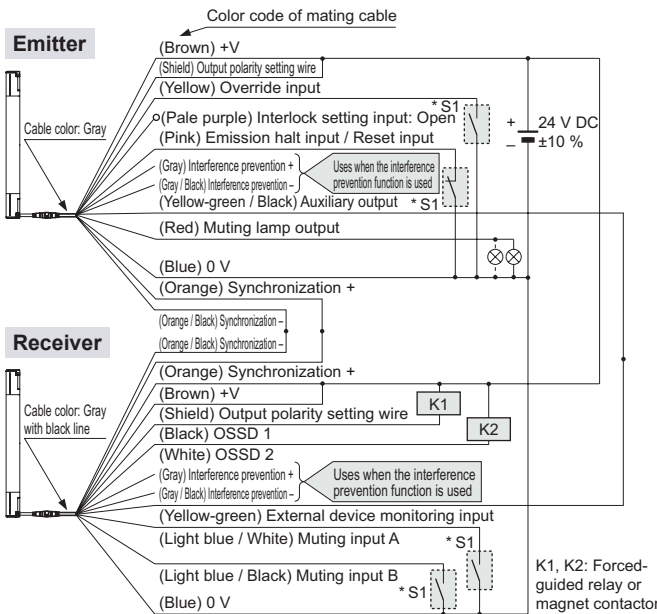

* S1

Switch S1

- Emission halt input / Reset input
For manual reset
Vs to Vs - 2.5 V (sink current 5 mA or less): Emission halt (Note), Open: Emission
For automatic reset
Vs to Vs - 2.5 V (sink current 5 mA or less): Emission (Note), Open: Emission halt
- Override input, Muting input A / B, External device monitoring input
Vs to Vs - 2.5 V (sink current 5 mA or less): Enabled (Note), Open: Disabled

Note: Vs is the applying supply voltage.

<In case of using I/O circuit for NPN output>

* S1

Switch S1

- Emission halt input / Reset input
For manual reset
0 to +1.5 V (source current 5 mA or less): Emission halt, Open: Emission
For automatic reset
0 to +1.5 V (source current 5 mA or less): Emission, Open: Emission halt
- Override input, Muting input A / B, External device monitoring input
0 to +1.5 V (source current 5 mA or less): Enabled, Open: Disabled

The diagram at left shows the configuration when using PNP output, interlock function "disabled (automatic reset)" and external device monitoring function "disabled".

In case of setting the interlock function to "enabled (manual reset)"

- When the interlock function is "enabled (manual reset)", the override function cannot be used.

* Refer to the SF4B<V2> manual for details of the interlock function.

In case of setting the external device monitoring function to "enabled"

* Refer to the SF4B<V2> manual for details of the external device monitoring function.

The diagram at left shows the configuration when using NPN output, interlock function "disabled (automatic reset)" and external device monitoring function "disabled".

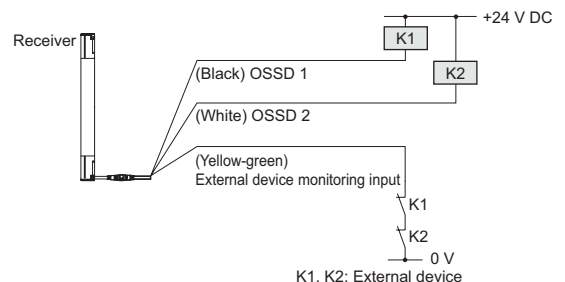

In case of setting the interlock function to "enabled (manual reset)"

- When the interlock function is "enabled (manual reset)", the override function cannot be used.

* Refer to the SF4B<V2> manual for details of the interlock function.

In case of setting the external device monitoring function to "enabled"

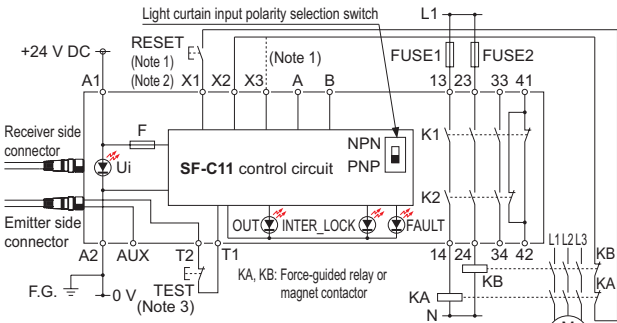

* Refer to the SF4B<V2> manual for details of the external device monitoring function.

SF-C11

SF4B series wiring diagram (Control Category 4)

For PNP output (minus ground)

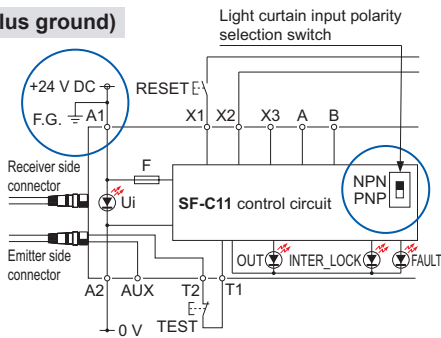

- Set the light curtain input polarity selection switch to the PNP side and ground the 0 V line.

- Notes: 1) The above diagram is when using manual reset. If automatic reset is used, disconnect the lead from X2 and connect it to X3. In this case, a reset (RESET) button is not needed.
 2) Use a momentary-type switch as the reset (RESET) button.
 3) Emission halt occurs when the test (TEST) button is open, and emission occurs when the test (TEST) button is short-circuited. If not using the test (TEST) button, short-circuit T1 and T2.

For NPN output (plus ground)

- In the above diagram, set the light curtain input polarity selection switch to the NPN side and ground the + side.

When SF-C11 is connected to the light curtain, be sure to use the following mating cable.
SFB-CB□, SFB-CCJ10□

Terminal arrangement diagram

Terminal	Function
A1	+24 V DC
A2	0 V
13-14, 23-24, 33-34	Enabling path (NO contact × 3)
41-42	Auxiliary output (NC contact × 1)
X1	Reset output terminal
X2	Reset input terminal (Manual)
X3	Reset input terminal (Automatic)
A	Not used
B	Not used
T1	Test output terminal
T2	Test input terminal
AUX	Semiconductor auxiliary output

Pin layout for light curtain connectors

Connector pin No.	Emitter side connector	Receiver side connector
①	Interlock	OSSD 2
②	+24 V DC	+24 V DC
③	Emission halt	OSSD 1
④	Auxiliary output	EDM (External relay monitor)
⑤	Synchronization wire +	Synchronization wire +
⑥	Synchronization wire -	Synchronization wire -
⑦	0 V	0 V
⑧	Shield wire	Shield wire

SF-C12

SF4B series wiring diagram (Control Category 4)

For PNP output (minus ground)

- Set the two light curtain input polarity select switches to the PNP side and connect the FG terminal to the 0 V line.

- Note: The above diagram is when using manual reset. If automatic reset is used, connect a normally closed type pushbutton switch between T1 and T2 and leave between X1 and X2 open.

For NPN output (plus ground)

- In the above diagram, set the two light curtain input polarity selection switches to the NPN side and connect the F.G. terminal to the + side.

When SF-C12 is connected to the light curtain, be sure to use the following maing cable.
SFB-CB05-MU, SFB-CCJ10□-MU

Terminal arrangement diagram

Terminal	Function	Terminal	Function
FG	Frame ground (F.G.) terminal	R+	Interference prevention wire - (Receiver side)
A2	0 V	R-	Interference prevention wire + (Receiver side)
A1	+24 V DC	E+	Interference prevention wire - (Emitter side)
13-14, 23-24	Enabling path (NO contact × 2)	E-	Interference prevention wire + (Emitter side)
31-32	Auxiliary output (NC contact × 1)	T2	Emission halt input terminal
FB4	External relay monitor terminal 2	T1	terminal
FB3	External relay monitor terminal 1	X2	Automatic reset / manual reset selection terminal
FB2	External relay monitor terminal 2	X1	Manual reset: X1 - X2 short-circuited
FB1	External relay monitor terminal 1		

Pin layout for light curtain connectors

Note: Input and output for pin Nos. ⑪ and ⑫ are not used by this product.

Connector pin No.	Emitter side connector	Receiver side connector
①	Interlock	OSSD 2
②	+24 V DC	+24 V DC
③	Emission halt	OSSD 1
④	Auxiliary output	EDM (External relay monitor)
⑤	Synchronization wire +	Synchronization wire +
⑥	Synchronization wire -	Synchronization wire -
⑦	0 V	0 V
⑧	Shield wire	Shield wire
⑨	Interference prevention wire +	Interference prevention wire +
⑩	Interference prevention wire -	Interference prevention wire -
⑪	(Override input)	(Muting input 1)
⑫	(Muting lamp output)	(Muting input 2)

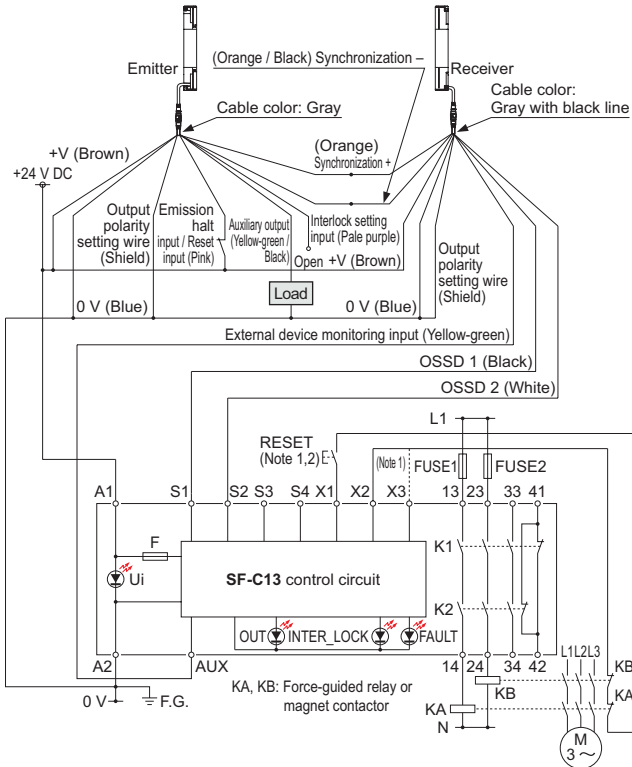

I/O CIRCUIT AND WIRING DIAGRAMS

SF-C13

SF4B series wiring diagram (Control Category 4)

For PNP output (minus ground)

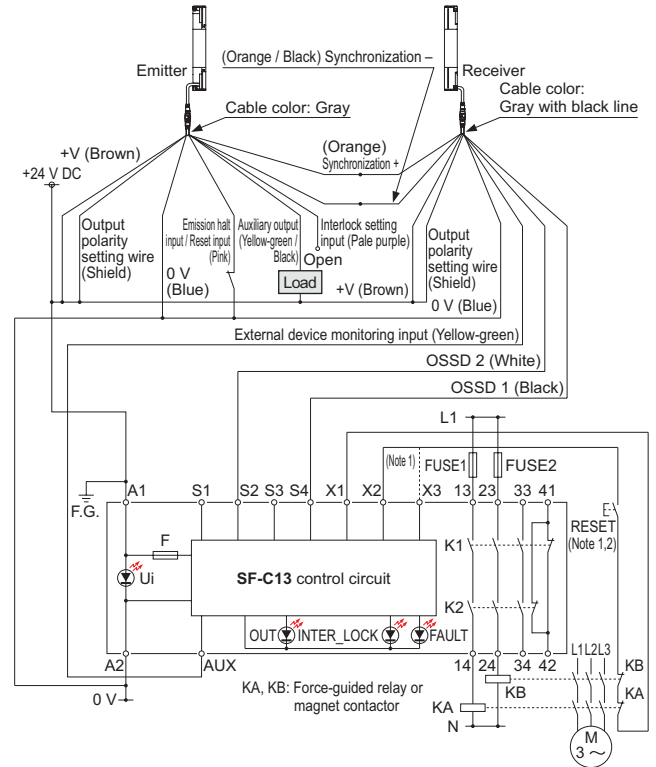

- Connect the light curtain control outputs OSSD 1 and OSSD 2 to S1 and S2 respectively.

- Notes: 1) The above diagram is when using manual reset. If automatic reset is used, disconnect the lead from X2 and connect it to X3. In this case, a reset (RESET) button is not needed.
 2) Use a momentary-type switch as the reset (RESET) button.

For NPN output (plus ground)

- Connect the light curtain control outputs OSSD 1 and OSSD 2 to S4 and S2 respectively and ground the + side.

- Notes: 1) The above diagram is when using manual reset. If automatic reset is used, disconnect the lead from X2 and connect it to X3. In this case, a reset (RESET) button is not needed.
 2) Use a momentary-type switch as the reset (RESET) button.

Terminal arrangement diagram

Terminal	Function
A1	+24 V DC
A2	0 V
S1 to S4	Light curtain control output (OSSD) input terminal
AUX	Semiconductor auxiliary output
X1	Reset output terminal
X2	Reset input terminal (Manual)
X3	Reset input terminal (Automatic)
13-14, 23-24, 33-34	Enabling path (NO contact × 3)
41-42	Auxiliary output (NC contact × 1)

Use a separate terminal block to carry out wiring for light curtains that cannot be connected to the SF-C13.

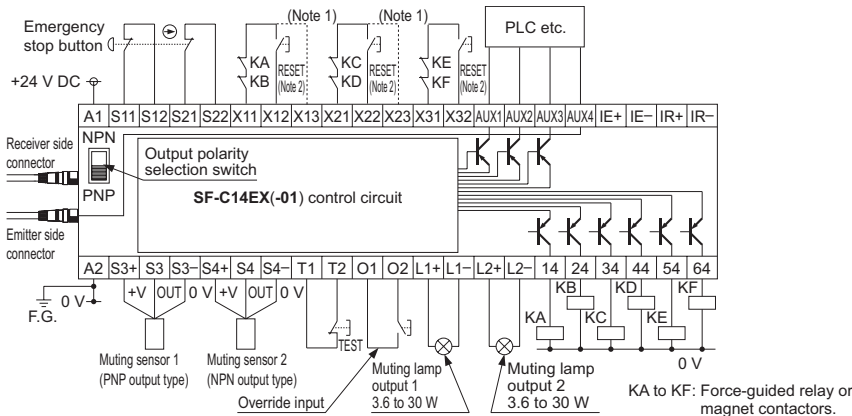

When SF-C13 is connected to the light curtain, be sure to use the following discrete wire mating cable.
SFB-CCB□(-MU), SFB-CC□(-MU)

SF-C14EX(-01)

SF4B series wiring diagram (Control Category 4)

For PNP output (minus ground)

- Set the output polarity selection switch to the PNP side and ground the 0 V line.

- When SF-C14EX is connected to the light curtain, be sure to use the following mating cable. **SFB-CB□-EX, SFB-CCJ10□**
- If the NO (Normally Open) contact switch is used as a muting sensor, wire it as shown in the figure below.

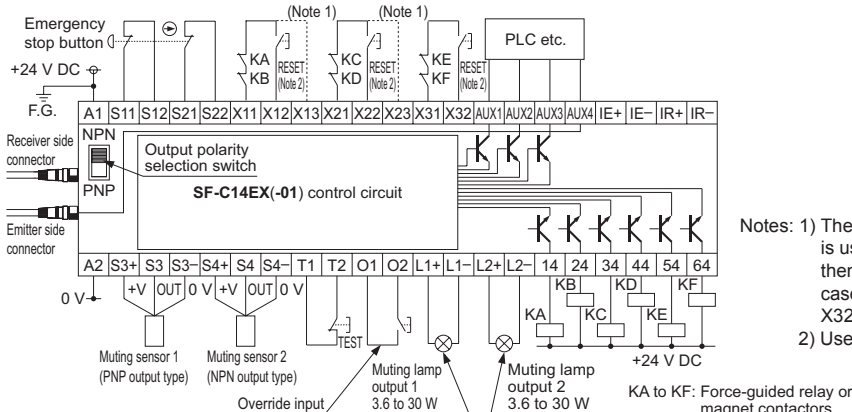

- If the emergency stop button is not used, short-circuit between the terminals S11 to S12 and S21 to S22 directly.

Notes: 1) The above diagram is when using manual reset. If automatic reset is used, disconnect the lead from X12 and X22, and connect them to X13 and X23, as shown by the dotted lines. In this case, a reset (RESET) button is not needed. Terminals X31 to X32 are for manual reset only.
 2) Use a momentary-type switch for the reset (RESET) button.

For NPN output (plus ground)

- Set the output polarity selection switch to the NPN side and ground the side of the power supply input.

Notes: 1) The left diagram is when using manual reset. If automatic reset is used, disconnect the lead from X12 and X22, and connect them to X13 and X23, as shown by the dotted lines. In this case, a reset (RESET) button is not needed. Terminals X31 to X32 are for manual reset only.
 2) Use a momentary-type switch for the reset (RESET) button.

Terminal arrangement diagram

Terminal	Function	Terminal	Function
14	Enabling path 1, Beam received / Beam interrupted output of the light curtain	S11	Emergency stop contact input
24		S12	2 NC input
34	Enabling path 2, light curtain output including the muting function	S21	Between S11 and S12
44		S22	Between S21 and S22
54	Enabling path 3	X11	Enabling path 1 reset input
64	Emergency stop output	X12	X11 - X12: Manual reset
S3+	Muting sensor input 1 (PNP output type)	X13	X11 - X13: Automatic reset
S3	S3+, S3-: Power supply	X21	Enabling path 2 reset input

⑧	Shield wire	Shield wire

PRECAUTIONS FOR PROPER USE

Refer to the manual on our website for details.

Interlock function

- The selection of manual reset / automatic reset is available by applying the interlock input wiring. The interlock becomes available by selecting manual reset. (Refer to the **SF4B<V2>** manual for details.)

Emission halt function

- This function stops the emission process of the emitter. You can select whether emission is on or halted by means of the connection status for the emission halt input / reset input wire (pink).
- During emission halt, the control outputs (OSSD 1, OSSD 2) become OFF status.
- By using this function, malfunction due to extraneous noise or abnormality in the control outputs (OSSD 1, OSSD 2) and the auxiliary output can be determined even from the machinery side.
- Normal operation is restored when the emission halt input / reset input wire (pink) is connected to 0 V or +V. (Refer to the **SF4B<V2>** manual for details.)

Auxiliary output (Non-safety output)

- This light curtain incorporates the auxiliary output (yellowgreen / black) for the non-safety output. The auxiliary output is incorporated with the emitter. (Refer to the **SF4B<V2>** manual for details.)

External device monitoring function

- This is the function for checking whether the external safety relay connected to the control outputs (OSSD 1, OSSD 2) perform normally in accordance with the control outputs (OSSD 1, OSSD 2) or not. Monitor the contacting point "b" of the external safety relay, and if any abnormality such as deposit of the contacting point, etc. is detected, change the status of the light curtain into lockout one, and turn OFF the control outputs (OSSD 1, OSSD 2). (Refer to the **SF4B<V2>** manual for details.)

Muting function

- This function turns the safety function of this light curtain into disabled temporarily. When the control outputs (OSSD 1, OSSD 2) are ON, this function is available for passing the workpiece through the sensing area of the light curtain without stopping the machinery. The muting function becomes valid when all the conditions listed below are satisfied. However, this function cannot be used with the **SF4B-□-03<V2>**.
 - ① The control outputs (OSSD 1, OSSD 2) shall be ON.
 - ② The incandescent lamp with 3 to 10 W shall be connected to the muting lamp output (red).
 - ③ The output of the muting sensors A and B shall be changed from OFF (open) to ON. At this time, the time difference occurred by changing the output of the muting sensors A and B into ON status shall be within 0.03 to 3 sec.
- The following devices, photoelectric sensor with semiconductor output, inductive proximity sensor, position switch on N.O. (Normally open) contact, etc. are available for applying to the muting sensor.
- In case of using the muting function, please order 12-core cable. (Refer to the **SF4B<V2>** manual for details.)

Override function

- This function sets the safety function of this light curtain enabled forcibly. When using the muting function, the override function can be used to start the machinery at times such as when the control outputs (OSSD 1 and OSSD 2) are OFF or when the muting sensors are ON when the line is to be started. The override function becomes valid when all the conditions listed below are satisfied. However, this function cannot be used with the **SF4B-□-03<V2>**. (Refer to the **SF4B<V2>** manual for details.)

Series connection

Connectable up to 3 sets of light curtains (however, 192 beam channels max.) (Refer to the **SF4B<V2>** manual for details.)

Parallel connection

Connectable up to 3 sets of light curtains (Refer to the **SF4B<V2>** manual for details.)

Series and parallel mixed connection

Connectable up to 3 sets of light curtains (however, 192 beam channels max.) (Refer to the **SF4B<V2>** manual for details.)

Wiring

Refer to the applicable regulations for the region where this device is to be used when setting up the device. In addition, make sure that all necessary measures are taken to prevent possible dangerous operating errors resulting from earth faults.

- Make sure to carry out the wiring in the power supply off condition.
- Verify that the supply voltage variation is within the rating.
- If power is supplied from a commercial switching regulator, ensure that the frame ground (F.G.) terminal of the power supply is connected to an actual ground.
- In case noise generating equipment (switching regulator, inverter motor, etc.) is used in the vicinity of this sensor, connect the frame ground (F.G.) terminal of the equipment to an actual ground.
- Do not run the wires together with high-voltage lines or power lines or put them in the same raceway. This can cause malfunction due to induction.

Part description and function

- (Refer to the **SF4B<V2>** manual for details.)

Others

- Do not use during the initial transient time (2 sec.) after the power supply is switched on.
- Avoid dust, dirt and steam.
- Take care that the light curtain does not come in direct contact with water, oil, grease, or organic solvents, such as, thinner, etc.
- Take care that the light curtain is not directly exposed to fluorescent light from a rapid-starter lamp or a high frequency lighting device, as it may affect the sensing performance.

PRECAUTIONS FOR PROPER USE

- When this device is used in the “PSDI mode”, an appropriate control circuit must be configured between this device and the machinery. For details, be sure to refer to the standards or regulations applicable in each region or country.
- To use this product in the U.S.A., refer to OSHA 1910. 212 and OSHA 1910. 217 for installation, and in Europe, refer to EN 999 as well. Observe your national and local requirements before installing this product.

- This catalog is a guide to select a suitable product. Be sure to read instruction manual attached to the product prior to its use.
- Both emitter and receiver are combined adjusted on factory setting, please apply both emitter and receiver with the same serial No. The serial No. is indicated on the plates of both emitter and receiver. (Indicated under model No.)

- Make sure to carry out the test run before regular operation.
- This safety system is for use only on machinery in which the dangerous parts can be stopped immediately, either by an emergency stop unit or by disconnecting the power supply. Do not use this system with machinery which cannot be stopped at any point in its operation cycle.

Sensing area

- Make sure to install this product such that any part of the human body must pass through its sensing area in order to reach the dangerous parts of the machinery. If the human body is not detected, there is a danger of serious injury or death.
- Do not use any reflective type or retroreflective type arrangement.
- Furthermore, facing several receivers towards one emitter, or vice versa, could produce a non-sensing area or cause mutual interference, which may result in serious injury or death.

Correct mounting method

Wrong mounting method

Safety distance

- Calculate the safety distance correctly, and always maintain a distance which is equal to or greater than the safety distance, between the sensing area of this light curtain and the dangerous parts of the machinery. (Please check the latest standards for the equation.) If the safety distance is miscalculated or if sufficient distance is not maintained, there is a danger of serious injury or death.
- Before designing the system, refer to the relevant standards of the region where this device is to be used and then install this device. Also, the below calculation is valid only when the intrusion direction is perpendicular to the sensing area. In case the intrusion direction is not perpendicular to the sensing area, be sure to refer to the relevant standard (regional standard, specification of the machine, etc.) for details of the calculation.

The sizes of the minimum sensing objects for this device vary depending on whether or not the floating blanking function is being used. Calculate the safety distance with the proper size of the minimum sensing object and appropriate equation.

Size of minimum sensing object when applying floating blanking function

	Min. sensing object when applying floating blanking function			
	Invalid	Setting (Note)		
		1 beam channel	2 beam channels	3 beam channels
SF4B-Ft(G) (Min. sensing object ø14 mm ø0.551 in)	ø14 mm ø0.551 in	ø24 mm ø0.945 in	ø34 mm ø1.339 in	ø44 mm ø1.732 in
SF4B-Ht(G) (Min. sensing object ø25 mm ø0.984 in)	ø25 mm ø0.984 in	ø45 mm ø1.772 in	ø65 mm ø2.559 in	ø85 mm ø3.346 in
SF4B-At(G) (Min. sensing object ø45 mm ø1.772 in)	ø45 mm ø1.772 in	ø85 mm ø3.346 in	ø125 mm ø4.921 in	ø165 mm ø6.496 in

Note: Refer to p.10 for details of the floating blanking function. However, the floating blanking function cannot be used with the SF4B-□-01<V2>, the SF4B-□-03<V2> and SF-C14EX-01.

For use in Europe (EU) (as EN 999)] (Also applicable to ISO 13855 / JIS B 9715)

**For intrusion direction perpendicular to the sensing area
<In case that the minimum sensing object is ø40 mm ø1.575 in or less>**

- Equation ① $S = K \times T + C$
 S: Safety distance (mm)
 Minimum required distance between the sensing area surface and the dangerous parts of the machine
 K: Intrusion velocity of operator's body or object (mm/sec.)
 Normally taken as 2,000 (mm/sec.) for calculation
 T: Response time of total equipment (sec.)
 $T = T_m + T_{SF4B}$
 T_m: Maximum halting time of machinery (sec.)
 T_{SF4B}: Response time of the SF4B<V2> series (sec.)
 C: Additional distance calculated from the size of the minimum sensing object of the light curtain (mm)
 However, the value of “C” cannot be less than 0.
 $C = 8 \times (d - 14)$
 d: Minimum sensing object diameter (mm)

PRECAUTIONS FOR PROPER USE

Refer to the manual on our website for details.

- For calculating the safety distance “S”, there are the following five cases.
First calculate by substituting the value $K = 2,000$ (mm/sec.) in the equation above. Then, classify the obtained value of “S” into three cases, 1) $S < 100$, 2) $100 \leq S \leq 500$, and 3) $S > 500$. For Case 3) $S > 500$, recalculate by substituting the value $K = 1,600$ (mm/sec.). After that, classify the calculation result into two cases, 4) $S \leq 500$ and 5) $S > 500$. For details, refer to the instruction manual enclosed with this product. For calculating “Tm” (maximum halt time of the machinery), use a special device called a “brake monitor”.
When this device is used in the “PSDI mode”, an appropriate safety distance “S” must be calculated. For details, be sure to refer to the standards or regulations applicable in each region or country.

<In the case that the minimum sensing object is $\phi 40$ mm $\phi 1.575$ in or more>

- Equation $S = K \times T + C$
S: Safety distance (mm)
K: Intrusion velocity of operator’s body or object (mm/sec.)
Taken as 1,600 (mm/sec.) for calculation
T: Response time of total equipment (sec.)
 $T = T_m + T_{SF4B}$
Tm: Maximum halting time of machinery (sec.)
TSF4B: Response time of the SF4B<V2> series (sec.)
C: Additional distance calculated from the size of the minimum sensing object of the light curtain (mm)
 $C = 850$ (mm) (Constant)

For use in the United States of America (as per ANSI B11.19)

- Equation ② $S = K \times (T_s + T_c + T_{SF4B} + T_{bm}) + D_{pf}$
S: Safety distance (mm)
Minimum required distance between the sensing area surface and the dangerous parts of the machine
K: Intrusion velocity {Recommended value in OSHA is 63 (inch/sec.) $\approx 1,600$ (mm/sec.)}
ANSI B11.19 does not define the intrusion velocity “K”. When determining “K”, consider possible factors including physical ability of operators.
Ts: Halting time calculated from the operation time of the control element (air valve, etc.) (sec.)
Tc: Maximum response time of the control circuit required for functioning the brake (sec.)
TSF4B: Response time of light curtain (sec.)
Tbm: Additional halting time tolerance for the brake monitor (sec.)
The following equation holds when the machine is equipped with a brake monitor.
 $T_{bm} = T_a - (T_s + T_c)$
Ta: Setting time of brake monitor (sec.)
When the machine is not equipped with a brake monitor, it is recommended that 20 % or more of $(T_s + T_c)$ is taken as additional halting time.
Dpf: Additional distance calculated from the size of the minimum sensing of the
SF4B-F□(G)<V2>: $D_{pf} = 23.8$ mm **0.937 in**
SF4B-H□(G)<V2>: $D_{pf} = 61.2$ mm **2.409 in**
SF4B-A□(G)<V2>: $D_{pf} = 129.2$ mm **5.087 in**
 $D_{pf} = 3.4 \times (d - 0.276)$ (inch)
 $\approx 3.4 \times (d - 7)$ (mm)
d: Minimum sensing object diameter 0.552 (inch) ≈ 14 (mm) SF4B-F□(G)<V2>
Minimum sensing object diameter 0.985 (inch) ≈ 25 (mm) SF4B-H□(G)<V2>
Minimum sensing object diameter 1.772 (inch) ≈ 45 (mm) SF4B-A□(G)<V2>

Output waveform [Control outputs (OSSD 1, OSSD 2) ON]

- Refer to the SF4B<V2> manual for details.

Influence of reflective surfaces

- Refer to the SF4B<V2> manual for details.

Handy-controller

This device enables to set each function using the handy-controller **SFB-HC** (optional). (However, a handy-controller cannot be used with the SF4B-□-01<V2>, the SF4B-□-03<V2> and the SF-C14EX-01.) Among the functions, the contents related to the safety distance such as the size of the minimum sensing object and response time are varied depending on the setting condition. When setting each function, re-calculate the safety distance, and make enough space larger than the calculated safety distance. Failure to do so might cause the accident that the device cannot stop quickly before reaching the dangerous area of the machinery, resulting in the serious injury or death.

- Refer to the instruction manual enclosed with the handy-controller for details of the function settings for using handy-controller **SFB-HC** (optional).

Troubleshooting

- Refer to the SF4B<V2> manual for details.

Corner mirror

- Be sure to carry out maintenance while referring to the instruction manual for the SF4B series of light curtains.
- Do not use if dirt, water, or oil, etc. is attached to the reflective surface of this product. Appropriate sensing range may not be maintained due to diffusion or refraction.
- Make sure that you have read the instruction manual for the corner mirror thoroughly before setting up the corner mirrors and light curtains, and follow the instructions given. If the equipment is not set up correctly as stipulated in the instruction manual, incident light errors may result in unexpected situations which may result in serious injury or death.
- Please download the instruction manuals from our website.
- Light curtain SF4B series cannot be used as a retroreflective type. Avoid installing the light curtain as a retroreflective type when this product is applied.
- The mirror part of this product is made of glass. Note that if it is broken, the glass shards may fly apart.
- Do not use if crack or breakage appears on the reflective surface of this product. Proper sensing range may not be maintained due to diffusion or refraction.
If crack or breakage appears on the reflective surface of this product, replace the product.
- When adjusting beam channels with a laser alignment tool, etc., take sufficient care that the laser beam reflected by this product does not enter the eyes.
- Failure to follow the above items may result in death or serious injury.

Protection bar set for rear / side mounting MC-SFBH-□-T assembly dimensions

Mounting drawing for the light curtain on which the front protection unit (MC-SFBH-□-T) is mounted.

Rear mounting

MC-SFBH-□-T(L)

MC-SFBH-□-T(R)

Side mounting

MC-SFBH-□-T(L)

MC-SFBH-□-T(R)

Material: Mounting bracket ...Iron (Trivalent chrome plated)
 Protection barAluminum

Two brackets (one pc. each of R type and L type),
 one protection bar
 [Two pcs. each of M5 (length 18 mm 0.709 in)
 hexagon-socket-head bolts, M5 (length 20 mm 0.787 in)
 hexagon-socket-head bolt are attached.]

MS-SFB-2

Not available for the robust type SF4B-□G<V2>

Intermediate supporting bracket (Accessory for light curtain)

Material: Die-cast zinc alloy

Note: The intermediate supporting bracket (MS-SFB-2) is enclosed with the following products. The quantity differs depending on the product as shown below:

- 1 set: SF4B-F□<V2> ... Light curtain with 79 to 111 beam channels
SF4B-H□<V2> ... Light curtain with 40 to 56 beam channels
SF4B-A□<V2> ... Light curtain with 20 to 28 beam channels
- 2 sets: SF4B-F127<V2>
SF4B-H□<V2> ... Light curtain with 64 to 80 beam channels
SF4B-A□<V2> ... Light curtain with 32 to 40 beam channels
- 3 sets: SF4B-H□<V2> ... Light curtain with 88 to 96 beam channels
SF4B-A□<V2> ... Light curtain with 44 to 48 beam channels

MS-SF4BG-2

Intermediate supporting bracket (Accessory for light curtain)

Rear mounting

Side mounting

Material: SPCC

Note: The intermediate supporting bracket MS-SF4BG-2 is enclosed with the following products. The quantity differs depending on the product as shown below:

- 1 set: SF4B-F□G<V2> ... Light curtain with 79 to 127 beam channels
SF4B-H□G<V2> ... Light curtain with 40 to 64 beam channels
SF4B-A□G<V2> ... Light curtain with 20 to 32 beam channels
- 2 sets: SF4B-H□G<V2> ... Light curtain with 72 to 96 beam channels
SF4B-A□G<V2> ... Light curtain with 36 to 48 beam channels

DIMENSIONS (Unit: mm in)

The CAD data in the dimensions can be downloaded from our website.

MS-SFB-3

Not available for the robust type SF4B-□G<V2>

Dead zoneless mounting bracket (Optional)

Main body

Material: Die-cast zinc alloy

Four bracket set
Four M5 (length 25 mm 0.984 in)
hexagon-socket-head
bolts and four spacers are attached.

L-shaped mounting

Mounting adjustment range

The adjustment range of the light curtain angle is up to ±15 degrees.

Note: The finger protection type has a beam pitch of 10 mm 0.394 in, which produces a dead zone. Additional measures will be required, such as using a protection cover.

MS-SF4BG-3

Dead zoneless mounting bracket (Optional)

Main body

It is only available for the robust SF4B-□G<V2>.

Material: Dead zoneless mounting bracket ... SPCC (Trivalent chrome plated)
Dead zoneless supporting bracket ... PPS

Mounting adjustment range

The adjustment range of the light curtain angle is up to ±10 degrees.

MS-SFB-4

Pitch adapter bracket (Optional)

Not available for the robust type SF4B-□G<V2>

Material: Die-cast zinc alloy

Four bracket set
Four M5 (length 18 mm 0.709 in)
hexagon-socket-head bolts are attached.

MS-SFB-4-T

Not available for the robust type SF4B-□G<V2> M8 pitch adapter bracket (Optional)

Material: Die-cast zinc alloy

Four bracket set
 [Four M5 (length 18 mm 0.709 in)
 hexagon-socket-head bolts are attached.]

MS-SFB-7-T MS-SFB-1-T2 (Rear mounting)

M8 rear mounting bracket (Optional) M8 rear / side mounting brackets set (Optional)

Not available for the robust type SF4B-□G<V2>

Material: Iron (Trivalent chrome plated)

Four bracket set
 [Four M5 (length 18 mm 0.709 in)
 hexagon-socket-head bolts are attached.]

Mounting adjustment range

MS-SFB-8-T MS-SFB-1-T2 (Side mounting)

M8 side mounting bracket (Optional) M8 rear / side mounting brackets set (Optional)

Not available for the robust type SF4B-□G<V2>

MS-SFB-8-T(R)

MS-SFB-8-T(L)

Mounting adjustment range

Material: Iron (Trivalent chrome plated)

Four bracket
 (two pcs. each of R type and L type) set
 [Four M5 (length 18 mm 0.709 in)
 hexagon-socket-head bolts are attached.]

DIMENSIONS (Unit: mm in)

The CAD data in the dimensions can be downloaded from our website.

SF-C11 Control unit (Optional)

SF-C12 Control unit (Optional)

SF-C13 Control unit (Optional)

SF-C14EX(-01) Application expansion unit (Optional)

SFB-HC Handy-controller (Optional)

SFB-WY1 Y-shaped connector

Net weight: 35 g approx.

SF4B

DIMENSIONS (Unit: mm in)

The CAD data in the dimensions can be downloaded from our website.

SF-LAT-2N Laser alignment tool (Optional)

It is not available for the robust SF4B-□G<V2>.

SF-LAT-4BG Laser alignment tool (Optional)

It is only available for the robust SF4B-□G<V2>.

SF-IND-2 Large display unit for light curtain (Optional)
