

RoHS compliant

Very High Sensitivity, 50 mW (nominal operating) Relay with LT style pin layout

FEATURES

 Nominal operating power: High sensitivity of 50mW By using the highly efficient polar magnetic circuit "seesaw balance

magnetic circuit "seesaw balance mechanism", a nominal operating power of 50 mW (minimum operating power of 32 mW) has been achieved. 2. Compact size

15.0(L) × 7.4(W) × 8.2(H) .591(L) × .291(W) × .323(H)

High contact reliability
 High contact reliability is achieved by
 the use of gold-clad twin crossbar
 contacts, low-gas formation materials,
 mold sealing the coil section, and by
 controlling organic gas in the coil.
 *We also offer a range of products
 with AgPd contacts suitable for use
 in low level load analog circuits

(Max. 10V DC 10 mA).
4. Outstanding surge resistance. Surge breakdown voltage between open contacts: 1,500 V 10×160 μsec. (FCC part 68)

Surge breakdown voltage between contact and coil: 2,500 V 2×10 µsec. (Telcordia)

TX-S RELAYS

5. Low thermal electromotive force (approx. 0.3 μV)

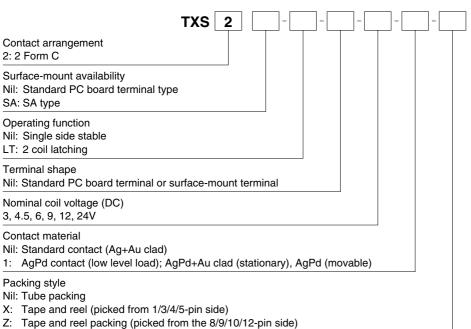

The structure of the mold-sealed body block of the coil section achieves nominal operating power of 50 mW and high sensitivity, along with low thermal electromotive force, reduced to approximately 0.3μ V.

6. Sealed construction allows automatic washing.

TYPICAL APPLICATIONS

- 1. Communications (XDSL, Transmission)
- 2. Measurement
- 3. Security
- 4. Home appliances, and audio/visual equipment
- 5. Medical equipment

(2) Dimensions of plastic reel

2. Automatic insertion

To maintain the internal function of the relay, the chucking pressure should not exceed the values below. Chucking pressure in the direction A: 4.9 N {500gf} or less Chucking pressure in the direction B: 9.8 N {1 kgf} or less Chucking pressure in the direction C: 9.8 N {1 kgf} or less

Please chuck the portion. Avoid chucking the center of the relay. In addition, excessive chucking pressure to the pinpoint of the relay should be avoided.

For general cautions for use, please refer to the "Cautions for use of Signal Relays" or "General Application Guidelines".
