# **Opticom<sup>™</sup> Pre-Loaded Fibre Drawers**

#### specifications

Pre-loaded fibre drawers provide a pre-configured, ready-to-install system for managing fibre optic terminations, connections and patching in a 1 RU rack mount enclosure. The pre-loaded enclosure accommodates both field termination and field splicing, and supports trunk cable entry via PG style glands, blown fibre glands and metric knockouts with rubber grommets. The pre-loaded enclosure is a two-piece design with a slide-out drawer for full access to all fibre terminations, easy moves, adds and changes and simple installation. The enclosure has silk-screened white areas adjacent to each adapter for individual fibre channel labelling and a similar silk-screen area for overall enclosure labelling. The enclosure has integral mounting brackets suitable for installation in any 19" wide EIA-310/IEC 60297 compatible rack or cabinet.

### technical information

Dimensions:	1.73"H x 17.50"W x 12.13" (43.9mm x 444.5mm x 308.2mm)
Mounting option:	Integral brackets mount to 19" wide EIA-310/IEC 60297 rack rails
Accessories:	Mounting hardware and fibre routing accessory kit included; contains two FMS1 fibre management spools, two 30mm size rubber grommets, one PG11 cable gland, Panduit <sup>™</sup> Pan-Ty <sup>™</sup> Cable Ties and M6 x 1 mounting screws

#### key features and benefits

Pre-loaded with fibre optic adapters	Factory configured with duplex SC, LC or E-2000 adapters for fast and easy cabling and installation
Slide-out drawer	Slides forward a full 300mm for service access to all fibre terminations, connections and splices
Field terminate or fusion splice	Supports both field termination via pot-and-polish or Panduit <sup>™</sup> Opticam <sup>™</sup> Connectors or field splicing (fusion or mechanical) with appropriate slack storage and cable management provisions
Multiple cable entry methods	Trunk and interconnect cable entry via PG11 glands, 5mm blown fibre glands, 20mm knockouts or 30mm rubber grommets
<i>Two-piece, all-metal body construction</i>	Simple and economical installation with no loose components to misplace; improved protection over plastic fibre drawers
Dedicated labelling areas	Silk-screened white labelling areas for individual fibre channel identification plus overall enclosure labelling

#### applications

Opticom<sup>™</sup> Pre-Loaded Fibre Drawers provide a factory configured, ready to install system for managing fibre optic terminations, connections and patching in a variety of applications. The enclosure can serve as a transition from backbone cabling to distribution switching in telecommunications rooms, can act as an interconnect to active equipment switches in a fibre to the zone application, or can be used as a transition enclosure for splicing to service provider trunks and then patching to premise intra-building cabling.

The pre-loaded enclosures can terminate and manage up to 48 fibres in 1 RU depending on configuration and adapter type. Enclosures are pre-loaded with SC, LC or E-2000 style adapters suitable for use with 62.5/125µm (OM1), 50/125µm (OM2 or OM3/OM4) multimode or OS1/OS2 singlemode fibre. The simple two-piece design features a slide-out drawer for full access to all fibre terminations. This supports fast and intuitive installation plus easy moves, adds and changes.
