LC Fiber Optic Connectors

specifications

LC small form factor (SFF) field polish connectors with rear pivot latch shall be TIA/EIA-604 FOCIS-10 compatible. LC simplex and duplex connectors shall be field terminable. The fibers shall terminate in 1.25mm ceramic ferrules with non-optical disconnect functionality and an average insertion loss of 0.1dB per mated pair for multimode and singlemode fiber.

technical information

Standards requirements:	TIA/EIA-604 FOCIS-10 compatible; exceeds TIA/EIA-568-B.3 requirements
Fiber compatibility:	62.5/125μm OM1, 50/125μm OM2,10Gig [™] 50/125μm laser optimized OM3/OM4 and 9/125μm OS1
Fiber cable type:	900μm tight-buffered fiber recommended 250μm coated fiber, by using F250BT-C 250 micron fiber build-up tube kit or FO6CB or FO12CB fan-out kit
Jacketed cable size:	1.6mm – 2.0mm jacketed cable
Ferrule type:	Zirconia ceramic
Insertion loss:	0.1dB average (multimode and singlemode)
Return loss:	>20dB (multimode), >40dB (singlemode)

key features and benefits

Rear pivot latch design, robust construction	Longer beam reduces deflection during mating and unmating to reduce latch fatigue, leading to longer cycle life		
Anti-snag latch	Low profile latch resists cable snagging		
Wide "positive grip" thumb latch	Multi-grooved, full body width thumb latch improves grip for better control during matings/unmatings; promotes fast, easy MACs (moves, adds, changes) in high-density applications		
Audible "click" upon successful mating	Provides user with a definitive signal of successful connector mating		
Field installable duplex clip with integrated polarity markers	Allows fast, easy field polarity changes without tools; quick identification of polarity		
One connector body design for both simplex and duplex applications	A single connector design is used for both simplex and duplex patch cords and inside the wall applications to simplify installation		
Protective cap locks onto connector latch with audible "click"	Protective cap automatically locks onto connector latch, completely covering connector end; prevents ferrule end face damage by providing protection from contamination and impact		
Anaerobic adhesive field installation	Simplifies and reduces installation time by 50% compared to heat cured epoxy terminations; curing oven/time not required		
Rugged body construction	Stable performance under side loads for improved reliability		
Independent free-floating ferrules	Ensures physical fiber contact for consistent low return loss, unlike unitary multi-fiber ferrule connectors		
1.25mm ceramic ferrules	Provide the highest durability for repeated matings		

applications

Panduit LC Fiber Optic Connectors provide a rugged solution for high-density telecommunication rooms, LANs, public networks and fiber-to-the-desk applications. LC simplex and duplex connectors are used for equipment cross-connects or interconnects in backbone, horizontal and

work area applications for high-speed data transmissions. The high-density design and 1.25mm ferrules double the port density (compared to SC connectors) to reduce space requirements on racks, enclosures, panels and faceplates.

LC Fiber Optic Connectors

performance information

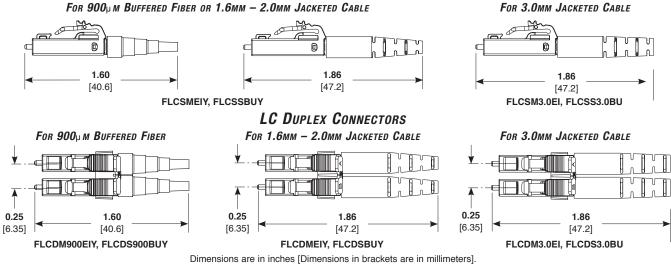

Test Parameter	Description	Result
Qualification test suite (TIA/EIA-568-B.3 requirements)	Complete testing protocol per TIA/EIA-568-B.3 using TIA/EIA FOTPs that include mechanical, environmental and optical test sequences	Compliant; exceeds TIA/EIA-568-B.3 requirements
Connector intermatability	Dimensional and material compliance to TIA/EIA standards	All connectors are FOCIS compatible with TIA/EIA-604-3
