RJ45 Plug Latch Guard

specifications

The RJ45 plug latch guard with a pull tab shall protect and prevent the accidental removal of RJ45 plugs installed in high density areas such as switches, servers and high density patch panels by securing the latch on the plugs. The plug latch guard shall include a "pull tab" for easy access and removal. It shall be compatible with but not limited to Panduit Cat 5e and Cat 6 UTP modular plugs.

technical information

Dimensions:	2.0" (49.89mm) L x .5" (13.84) W x .5" (13.84) W
Operating temperature:	-10° C to 60° C (14° F to 140° F)
Storage temperature:	-40° C to 70° C (-40° F to 158° F)
Material:	Polypropylene (PP); UL94V0 rated (milky white color)
RoHS compliance:	Compliant

key features and benefits

|	
Pull tab	Patent-pending feature that allows easy removal of the guard from the plug without disconnecting the plug
Visible status lights	The innovative design allows visibility of status lights or any information etched on the servers, jack modules and plugs
Keys not required	This product does not require a key for removal, saving time while still preventing accidental removal
Multiple installation options	Can be mounted in two different ways based on usage and preference
Latch Protection	Prevents unintended latch disengagement on adjacent patch cords
Multiple Colors	Available in three colors: Milky White, Red and Yellow. Red can be used to indicate "Do Not Touch" and Yellow to indicate "Proceed with caution"

applications

RJ45 Plug Latch Guard has an innovative (patent pending) design which prevents the loss of network connectivity/data due to the accidental disconnection of plugs in high density spaces around switches, servers, and patch panels. Access to these high density places pose a challenge and may result in disconnection of neighboring patch cords by becoming disturbed and or jostled.

The RJ45 Plug Latch Guard includes a pull tab and a main body which is designed to protect patch cords by wrapping around the plug and securing it in place when installed. Patch cords can only be detached after the latch guard is removed by pulling on the tab which is easily accessible. This user-friendly product allows easy installation and removal of the guard from the plug thus saving time and money.
