

# 👽 Pan-Plug® Category 5e UTP Modular Plugs

- Meet all applicable ANSI/TIA-968-A requirements and exceeds IEC 60603-7 specifications
- Meet requirements of IEEE 802.3af and IEEE 802.3at for PoE applications
- Used in UTPCH series patch cords providing Category 5e performance
- · Patented tangle-free plug latch prevents snags and provides easy release saving time on frequent moves, adds, and changes
- Simplified termination requires no loading bar; guide ramp facilitates easy conductor insertion and termination
- Contacts plated with 50 microinches of gold for superior performance
- Terminate 24 AWG. 100 ohm. stranded or solid conductor with max. conductor insulation diameter of 0.040"

| Part Number | Part Description                 | Std.<br>Pkg.<br>Qty. | Std.<br>Ctn.<br>Qty. |
|-------------|----------------------------------|----------------------|----------------------|
| MP588-L     | 8-position, 8-wire modular plug. | 50                   | 250                  |
| MP588-C     | 8-position, 8-wire modular plug. | 100                  | 1000                 |
| MP588-M     | 8-position, 8-wire modular plug. | 1000                 | 5000                 |

MPT5-8A crimp tool required for termination, available on page B.93 of SA-NCCB51.

### TX5500™ Category 5e F/UTP Shielded Copper Cable

- Exceeds requirements of ANSI/TIA-568-C.2 Category 5e and ISO 11801 2nd Edition Class D channel standards
- Exceeds requirements of ANSI/TIA-568-C.2 Category 5e and IEC 61156-5 Category 5e component standards
- Meets requirements of IEEE 802.3af and IEEE 802.3at for PoE applications
- Cable diameter: Riser 0.241 inch (6.1 mm), Plenum 0.229 inch (5.8mm)
- Installation temperature range: 32°F to 122°F (0°C to 50°C)
- Operating temperature range: -4°F to 140°F (-20°C to 60°C)
- · Descending length cable markings enable easy identification of remaining cable which reduces installation time and cable scrap
- · Cable supplied on a reel

| Part Description                                                                                                                                                                                                                                                                                       | Cable<br>Color                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Std.<br>Pkg.<br>Qty.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Std.<br>Ctn.<br>Qty.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |  |  |  |  |  |

| Category 5e, riser (CMR), 4-pair, F/UTP copper cable. Copper conductors are 24 AWG construction with polyethylene insulation. Conductors are twisted in pairs, surrounded by an overall polyester aluminum foil with a stranded copper drain wire and protected by a flame-retardant PVC jacket.       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 1000                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 20000                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |  |  |  |  |  |
