Weather Resistant Polypropylene Spiral Wrap

specifications

Mechanical and chemical attributes of weather resistant polypropylene spiral wrap shall provide cable/hose abrasion protection with a maximum operating temperature of 239°F (115°C) and provide superior resistance to chemical attack when exposed to various concentrations of salts, bases and acids. The material shall be UV stabilized for outdoor weather resistance.

Weather Resistant Polypropylene Spiral Wrap

Outside diameter

0.38" (9.5mm): T38P-C0

Outside diameter

0.50" (12.7mm): ☐

T50P-C0

Outside diameter 1.00" (25.4mm):

T100P-C0

technical information

| Tensile @ yield @ 73°F (psi): | 4000 per ASTM D638 | | | | | |
|----------------------------------------------------------|-------------------------------------------------------------------------------------------------------|------------------------------------------------------------------|--|--|--|--|
| Water absorption (24 hours): | 0.1% per ASTM D570 | | | | | |
| Weathering life expectancy (years)/ UV resistance: | 7 – 9 years/Weather Resistant | | | | | |
| Max. continuous use temperature: | 239°F (115°C) per UL 746B - RTI (Relative Thermal Index) based on mechanical strength without impact. | | | | | |
| Heat deflection temperature @ 1.8 Mpa: | 124°F (51°C) per ASTM D648 ISO 75 -1/-2 | | | | | |
| Chemical resistance: | Salts Hydrocarbons (Gas, Oil, Lubricants) Chlorinated Hydrocarbons Acids Bases Acid Rain | Excellent Good Good Excellent Excellent Excellent | | | | |
| Impact resistance: | Notched Izod Impact per ISO 180, 75 kJ/m² at 23°C, 8.4 kJ/m² at -40°C | | | | | |

key features and benefits

| Polypropylene material | Withstands high temperature conditions 239°F (115°C) required for outdoor applications; resistant to chemical attack when exposed to salts, bases, and acids in various concentrations to maintain performance in harsh conditions | | | | | | |
|---------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|--|--|--|--|
| Black color with ultraviolet inhibitor (UV weather resistant) | Allows product to withstand exposure to sunlight; contributes to weathering life expectancy (7 – 9 years) Provides cable/hose abrasion protection; harnesses multiple cables and hoses into a single manageable bundle, allows breakouts of single/multiple cables | | | | | | |
| Spiral wrap design | | | | | | | |

applications

Weather resistant polypropylene spiral wrap is used to protect cables/hoses in harsh environment applications requiring UV/ weather resistance, and withstand high

temperatures such as in wind turbines and solar applications. Also ideal for applications requiring superior chemical resistance such as in the chemical processing industry.
