Operating system recovery kit for Windows® Embedded 2009 and Windows Embedded 7 operating systems. Kit includes a USB drive.

Product Description

USB drive with factory-installed embedded operating system images for all Valueline, Basicline, and Designline IPC products. This recovery tool only works with systems originally manufactured with either the Windows® Embedded Standard 2009 or Windows Embedded Standard 7 operating systems. It will not work with systems originally built with Windows 7 Professional or Windows XP Professional operating systems. Note that using this tool to re-image a system overwrites all previously stored data. Please download the instructions of how to use this tool.
