

Selection diagram

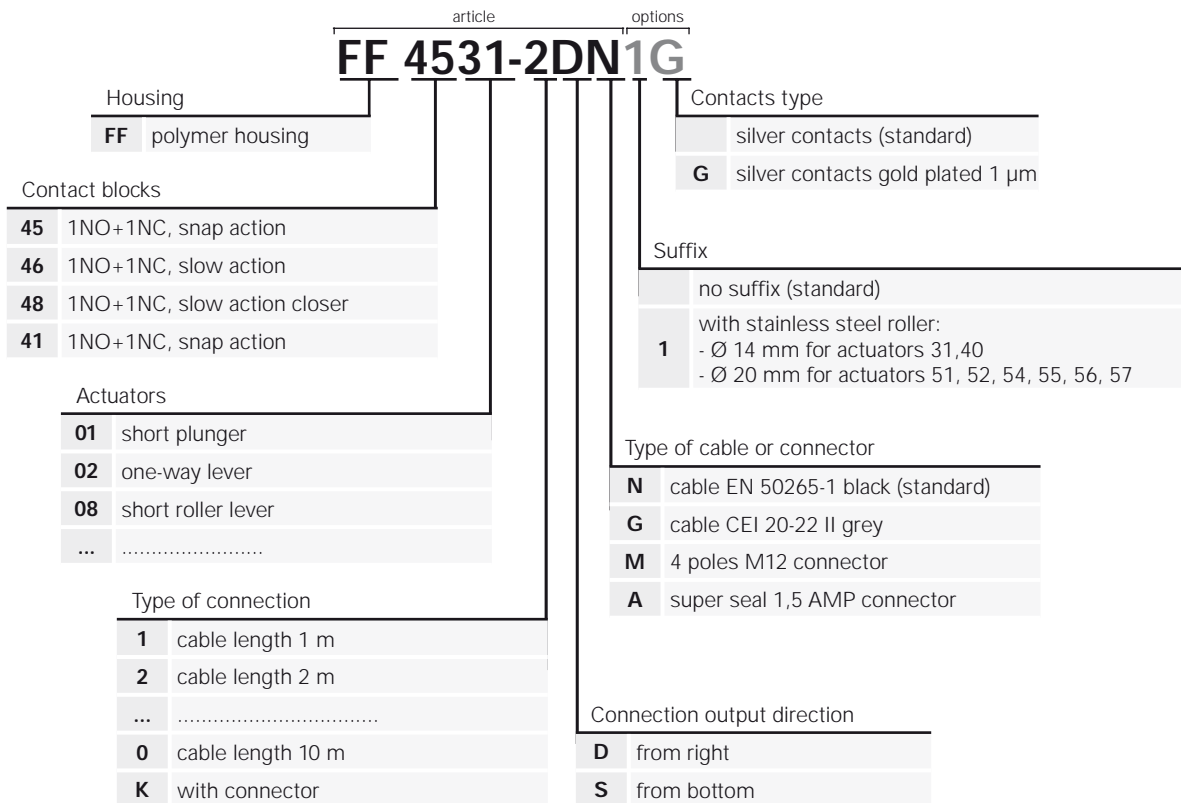

● product option
 → accessory sold separately

Code structure

Attention! The feasibility of a code number does not mean the effective availability of a product. Please contact our sales office.

Main data

- Polymer housing, cable output from right or from bottom
- 2 integrated cable types available
- Versions with M12 connector from right or from bottom suitable for safety applications ⊕
- Connector AMP version
- Protection degree IP67
- 4 contact blocks available
- 24 actuators available

Markings and quality marks:

Approval IMQ: CA02.02391
 Approval UL: E131787
 Approval UL: 2007010305230004

Housing

Made of glass-reinforced polymer, self-extinguishing, shock-proof thermoplastic resin and with double insulation □

Version with cable integrated with 4x 0.75 mm² wires length 2 m, other lengths on request.

Versions with 4 poles M12 integrated connector suitable for safety applications ⊕
 Protection degree: IP67

General data

Ambient temperature: See table on page 2/118
 Max operating frequency: 3600 operations cycles¹/hour
 Mechanical endurance: 20 million operations cycles¹
 Assembling position: any
 Vibrations holding: 20 gn (10...500 Hz) according to IEC 60068-2-6
 Shock holding: 50 gn (11 ms) according to IEC 60068-2-27
 (1) One operation cycle means two movements, one to close and one to open contacts, as foreseen by IEC 947-5-1 standard.

In conformity with standards:

IEC 60947-5-1, EN 60947-5-1, IEC 60204-1, EN 60204-1, EN 1088, EN ISO 12100-1, EN ISO 12100-2, IEC 529, EN 60529, NFC 63-140, VDE 0660-200, VDE 0113, CENELEC EN 50013.

Approvals:

IEC 60947-5-1, UL 508, GB14048.5-2001

In conformity with requirements requested by:

Low Voltage Directive 2006/95/EC, Machinery Directive 2006/42/EC and Electromagnetic Compatibility 2004/108/EC.

Positive contact opening in conformity with standards:

IEC 60947-5-1, EN 60947-5-1, VDE 0660-206.

Installation for safety applications:

Use only switches marked with the symbol ⊕. The safety circuit must always be connected with the **NC contacts** (normally closed contacts: see "internal connections" on page 2/118) as stated in the **standard CEI EN 60947-5-1, encl. K, par. 2**. The switch must be actuated with **at least up to the positive opening travel** shown in the travels diagrams on page 6/8. The switch must be actuated **at least with the positive opening force**, shown in brackets, underneath each article, near the value of the min. force.

⚠ If not expressly indicated in this chapter, for the right installation and the correct utilization of all articles see requirements indicated from page 6/1 to page 6/8.

Electrical data		Utilization categories				
with cable	Thermal current (I _{th}):	10 A	Alternate current: AC15 (50...60 Hz)			
	Rated insulation voltage (U _i):	500 VAC 600 VDC	U _e (V)	120	250	400

	Pollution degree:	3	Direct current: DC13			
			U _e (V)	24	125	250
			I _e (A)	2,5	0,55	0,27

Data type approved by IMQ and CCC

Rated insulation voltage (Ui): 500 VAC / 250 VAC (with connector)
 Thermal current (Ith): 10 A / 4 A (with connector)
 Protection against short circuits: fuse 10 A 500 V type aM
 Protection degree: IP67
 MA terminals (seamed clamps)
 Pollution degree 3
 Utilization category: AC15 / DC13 (with connector)
 Operation voltage (Ue): 400 VAC (50 Hz) / 24 VDC (with connector)
 Operation current (Ie): 3 A / 2,5 A (with connector)
 Forms of the contact element: Zb
 Positive opening of contacts on contact block 45, 46, 48
 In conformity with standards: EN60947-1, EN 60947-5-1 and subsequent modifications and completions, fundamental requirements of the Low Voltage Directive 73/23 EEC and subsequent modifications and completions.

Please contact our technical service for the list of type approved products.

Data type approved by UL

Utilization categories: Q300 (69 VA, 125-250 VDC)
 A600 (720 VA, 120-600 VAC)
 Data of the housing type 4X, 6 (indoor use only)
 In conformity with standard: UL 508

Please contact our technical service for the list of type approved products.

Adjustable levers

In switches with revolving lever it is possible to adjust the lever with 10° steps for the whole 360° range. The positive transmission is always guaranteed thanks to the particular geometrical coupling between the lever and the revolving shaft as prescribed for safety applications by the German standard BG-GS-ET-15.

Overturning levers

It's possible to fasten the lever on switches on straight or reverse side, maintaining the positive coupling. In this way it is possible to obtain two different work plans of the lever.

Rotating heads

According to different versions, it is possible to rotate the head in 90° or 180° steps.

Internal connections

4 poles M12 safety connectors ☺

Pizzato Elettrica manufactures 4 poles connector integrated with a safety switch, complying with requirements of standard IEC 947-5-1. Its high insulation voltage Ui 250 VAC allows to mark it as suitable for safety applications ☺.

By interposing spacers between the switches, it is possible to join two or more prewired switches, preventing them from moving one against the other.

10 pcs packs

Article	Description
VF CA...M	Female wired connectors

General data:

- Self locking ring nut
- High flexibility wire suitable for dynamic laying applications (copper class 6)
- Gold plated contact (resistance < 5 mΩ)
- Connector body in polyurethane

See page 5/2

(1) Positive opening only with lever adjusted on the max. See page 2/51
