Hall IC

## **PT3612** Hi-sensitivity Hall-effect Latch

TO92-3L (UA)

P/N: PT3612-XX-X

#### Applications

- DC brushless motors
- CAM shaft sensors
- · Rotating speed measurement
- Magnetic encoders
- Automotive systems
- Home appliances
- Home safety

#### Features

- 3.8V to 24V wide operation voltage
- High sensitivity
- Built-in dynamic offset cancellation
- Small size
- · High balance and low thermal drift magnetic sensing
- Lead length 18.7mm (UL type)

#### **Ordering information**

• PT3612-PA-T Package(PA):UA or UL or LH Temperature(T): A or K

# TO92-3L (UL) SOT23-3L (LH)

#### **General Specifications**

The PT3612 is designed for magnetic actuating using a bipolar magnetic field. The built-in dynamic offset cancellation of pre-amplifier stage achieves optimal symmetrical magnetic sensing. This Hall effect IC is optimal for DC brushless fan application. The

supply voltage range is from 3.8V to 24V and the maximum output current is 50mA.

This Hall effect sensor IC integrate the sensor, pre-amplifier with dynamic offset cancellation and the hysteresis comparator in single chip. The architecture block diagram is shown in Fig. 1.

- Specifications of any and all PROLIFIC products described or contained herein stipulate the performance, characteristics, and functions of the described products in the independent state, and are not guarantees of the performance, characteristics, and functions of the described products as mounted in the customer's products or equipment. To verify symptoms and states that cannot be evaluated in an independent device, the customer should always evaluate and test devices mounted in the customer's products or equipment.
- PROLIFIC Technology Inc. strives to supply high-quality high-reliability products. However, any and all semiconductor products fail with some probability. It is possible that these probabilistic failures could give rise to accidents or events that could endanger human lives, that could give rise to smoke or fire, or that could cause damage to other property. When designing equipment, adopt safety measures so that these kinds of accidents or events cannot occur. Such measures include but are not limited to protective circuits and error prevention circuits for safe design, redundant design, and structural design.
- In the event that any and all PROLIFIC products described or contained herein fall under strategic products (including services) controlled under the Foreign Exchange and Foreign Trade Control Law of Taiwan, such products must not be exported with our obtaining export license from the Ministry of international Trade and Industry in accordance with the above law.
