## PE42823

### **Document Category: Product Specification**

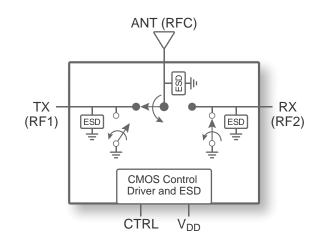

### UltraCMOS® SPDT RF Switch, 700 MHz-6 GHz

#### **Features**

- Excellent single-event peak power handling of 51 dBm LTE
- Exceptional linearity performance across all frequencies
  - Input IP3: 70 dBmInput IP2: 105 dBm
- Extended operating temperature of +105 °C
- 1.8V/3.3V TTL compatible control
- High ESD performance of 4.5 kV HBM on RF pins to ground
- Packaging 16-lead 3 x 3 x 0.75 mm QFN

Figure 1 • PE42823 Functional Diagram

## **Applications**

- 4G/4.5G wireless infrastructures
- Pre-5G/5G massive MIMO systems
- · TDD-based RF transceivers

### **Product Description**

The PE42823 is a HaRP<sup>TM</sup> technology-enhanced  $50\Omega$  SPDT RF protection switch designed for use in high power and high performance wireless infrastructure applications such as macrocells supporting frequencies up to 6 GHz.

This switch features high linearity, which remains invariant across the full supply range. The PE42823 also features exceptional isolation, fast switching time and is offered in a 16-lead  $3 \times 3 \times 0.75$  mm QFN package. In addition, no external blocking capacitors are required if 0 VDC is present on the RF ports.

The PE42823 is manufactured on Peregrine's UltraCMOS® process, a patented advanced form of silicon-on-insulator (SOI) technology.

Peregrine's HaRP technology enhancements deliver high linearity and excellent harmonics performance. It is an innovative feature of the UltraCMOS process, offering the performance of GaAs with the economy and integration of conventional CMOS.

## **Absolute Maximum Ratings**

Exceeding absolute maximum ratings listed in **Table 1** may cause permanent damage. Operation should be restricted to the limits in **Table 2**. Operation between operating range maximum and absolute maximum for extended periods may reduce reliability.

#### **ESD Precautions**

When handling this UltraCMOS device, observe the same precautions as with any other ESD-sensitive devices. Although this device contains circuitry to protect it from damage due to ESD, precautions should be taken to avoid exceeding the rating specified in **Table 1**.

#### Latch-up Immunity

Unlike conventional CMOS devices, UltraCMOS devices are immune to latch-up.

Table 1 • Absolute Maximum Ratings for PE42823

| Parameter                 | Condition  | Min         | Тур | Max  | Unit |
|---------------------------|--|-------------|-----|------|------|
| Power supply voltage      |  | -0.3        |     | 5.5  | V    |
| Voltage on CTRL input     |  | -0.3        |     | 3.6  | V    |
| Voltage on LS input       |  | -0.3        |     | 3.6  | V    |
| Storage temperature range |  | <b>–</b> 65 |     | 150  | °C   |
| Input power, avg:         | Tx mode, 10-second duration,                                   |             |     |      |      |
| 700 –1800 MHz             | 8dB PAR LTE signal   |             |     | 43   | dBm  |
| 1801–3800 MHz             | No power applied to off-<br>terminated port. No hot switching. |             |     | 42.5 | dBm  |
| 3801-6000MHz              |  |             |     | 42   | dBm  |
| ESD voltage HBM:          |  |             |     |      |      |
| RF pins to GND            | Human body model (MIL-STD 883 Method 3015).                    |             |     | 4500 | V    |
| All pins                  | (2 3.2 333 Modiod 33 10).                                      |             |     | 4000 | V    |
| ESD voltage CDM, all pins | Charged device model (JEDEC JESD22-C101).                      |             |     | 1250 | V    |

# **Recommended Operating Conditions**

**Table 2** lists the recommending operating conditions for the PE42823. Devices should not be operated outside the recommended operating conditions listed below.

Table 2 • Recommended Operating Conditions for PE42823

| Parameter                   | Min  | Тур | Max  | Unit |
|-----------------------------|------|-----|------|------|
| Power supply voltage        | 2.3  |     | 5.5  | V    |
| Power supply current        |      | 120 | 200  | μA   |
| Control voltage high        | 1.17 |     | 3.6  | V    |
| Control voltage low         | -0.3 |     | 0.6  | V    |
| Control current             |      |     | 10   | μA   |
| Operating temperature range | -40  | +25 | +105 | °C   |

# **Electrical Specifications**

**Table 3** provides the PE42823 key electrical specifications @ +25  $^{\circ}$ C,  $V_{DD}$  = 2.3–5.5V, unless otherwise specified.

Table 3 • PE42823 Electrical Specifications

| Parameter             | Path     | Condition                             | Min | Тур  | Max  | Unit |
|-----------------------|----------|---------------------------------------|-----|------|------|------|
| Operational frequency |          |                                       | 700 |      | 6000 | MHz  |
