## Additional Applications; 5-3300MHz (QPC6742-4001A EVB)

Notes:

1. L1-L5 optimized for return loss for mid band. For applications with $\mathrm{F}_{\mathrm{MAX}}<1.8 \mathrm{GHz}$, reduce the value of L1-L5 to 2.2 nH or less. Depending on application return loss limits, it may also be acceptable to use a single series inductor on RFC.
2. C4-C8 optimized to trim return loss at 3.3 GHz . For applications with $\mathrm{F}_{\mathrm{MAX}}$ of 1.8 GHz or lower, $\mathrm{C} 4-\mathrm{C} 8$ should be deleted.
3. Isolation can be optimized by maximizing ground between RF Ports and using coplanar RF tracks to U1.
