SOLDER PROCEDURE

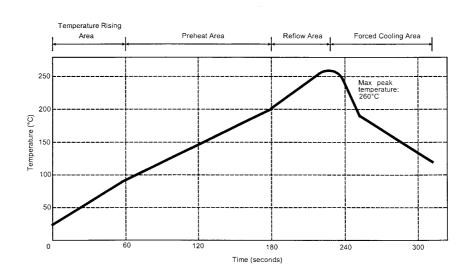

1. Deposition of solder paste 'Sn Ag4 Cu0.5' on mounting zone by screen printing application. We recommend a low residue flux.

We advise a thickness of 200 microns (7.800 microinch).

Verify that the edges of the zone are clean.

- 2. Placement of the receptacle on the mounting zone. Video camera is recommended for the positioning of the component. Adhesive agents must not be used on the receptacle.
- 3. Soldering by infra-red reflow. Below, please find the typical profile to use.
- 4. Cleaning of printed circuit boards by CFC solvents (or a substitute product according the United Nation's environmental programm)
- 5. Checking of solder joints and position of the component by visual inspection.

TEMPERATURE PROFILE
