# Regulated Converter

- Wide input voltage range (32-96VDC)
- Water & dust proof (IP67), robust and reliable
- Operating temperature range: -40°C to +90°C
- Protections: Input Reverse Polarity Protection, Input UVLO, Output OCP, SCP, OVP, OTP
- Parallel operation capability
- Control ON/OFF function

### Description

The RMOD500-W DC-DC converter is ideally for the use in all off-highway electric vehicles. This family is an extremely robust plug & play module with 500 Watts, which generates the isolated  $V_{out} = 12,4 / 13,7 / 24,5VDC$  low voltage network from the traction battery level. The wide input voltage range 32-96V covers the common 48V and 80V battery voltages in this off-highway segment. Thanks to the waterproof and dust proof housing construction, the devices can directly be connected mechanically and thermally to the chassis (i.e. at any point on the vehicle) and operate reliably even under the most adverse conditions.

### Selection Guide

Part Number	Input Voltage Range [VDC]	nom. Output Voltage [VDC]	max. Output Current [A]	Efficiency min. <sup>(1)</sup> [%]
RMOD500-60-13.7SW	32-96	13.7	36.5	89.5
RMOD500-60-13SW/OR	32-96	13	38.5	89.5

**PARALLEL OPERATION**

Parallel operation is possible with all combinations DC/DC converter versions providing they have the same rated input voltage. Use the same wire length for each power supply (star connection) and energize all units at the same time to avoid triggering overload protection. For operation with more than two power supplies in parallel operation, please contact RECOM technical support for advice.
