## 1-TO-10 CLOCK DRIVER

## DESCRIPTION:

TheFCT3807/A3.3V clock driver is builtusing advanced dual metal CMOS technology. This low skew clock driveroffers 1:10 fanout. The largefanoutfrom a single inputreduces loading on the preceding driver and provides an efficient clock distribution network. TheFCT3807/A offers low capacitance inputs with hysteresis for improved noise margins. Multiple power and grounds reduce noise. Typical applications are clock and signal distribution.
