Structure : Silicon Monolithic Integrated Circuit

Product name : 6ch Video driver ( for DVD )

Type

## BH7856FS

Outer dimensions
Fig. 1 SSOP-A32(Plastic Package)

Block diagram
Fig. 2

Feature

1) Built in LPF with characteristics suited to DVD players and recorders
( $\mathrm{Y}, \mathrm{C}, \mathrm{Y} / \mathrm{C}$ MIX : $6.75 \mathrm{MHz}, \mathrm{Py} / \mathrm{G}, \mathrm{Pb} / \mathrm{B}$, and $\mathrm{Pr} / \mathrm{R}: 13.5 \mathrm{MHz}$ )
2) Built in 6ch video driver (Y, C, Y/C MIX, Py/G, Pb/B, and Pr/R )
3) $75 \Omega \times 2$ Driver (Y, C, Y/C MIX,Py/G, Pb/B and Pr/R)
4) Built in MUTE switch ( double as power save function )
5) Built in S1/S2 circuit
6) Built in selection switch for SCART connector (CVBS,R or $\mathrm{C}, \mathrm{Y}$ output)

OAbsolute Maximum Ratings( $\mathrm{Ta}=25^{\circ} \mathrm{C}$ )

| Parameter | Symbol | Limits | Unit |
| :---: | :---: | :---: | :---: |
| Supply Voltage | VccMAX | 6.0 | V |
| Power Dissipation | Pd | $1.35 * 1$ | W |
| Terminal applied voltage | Vin | $-0.3 \sim \mathrm{Vcc}+0.3$ | V |
| Storage Temperature <br> Range | Tstg | $-55 \sim+125$ | ${ }^{\circ} \mathrm{C}$ |

*1 When mounted on a $100 \mathrm{~mm} \times 100 \mathrm{~mm} \times 1.6 \mathrm{mmt}$ PCB board, the rated values are reduced at $13.5 \mathrm{~mW} /{ }^{\circ} \mathrm{C}$ when temperature exceeds $25^{\circ} \mathrm{C}$. (Glass epoxy substrate)

OOperating Range

| Parameter | Symbol | Limits | Unit |
| :---: | :---: | :---: | :---: |
| Supply Voltage | Vcc | $+4.5 \sim+5.5$ | V |
| Operation Temperature <br> Range | Topr | $-40 \sim+85$ | ${ }^{\circ} \mathrm{C}$ |

* This product is not designed for protection against radioactive rays.

OElectrical characteristics ( $\mathrm{Ta}=25^{\circ} \mathrm{C}, \mathrm{Vcc}=5.0 \mathrm{~V}$ Unless otherwise specified)

| Parameter |  | Symbol | Specification |  |  | Unit | Testing condition |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Min | Typ | Max |  |  |
| Circuit current 1 |  |  | Icc1 | 50 | 75 | 100 | mA | No signal 6ch Active MODE |

* When SEL3 = " $\mathrm{H}^{\prime \prime}$, Py,Pb,Pr block power on without MUTE2=" $\mathrm{H}^{\prime \prime}$, but Py and Pb block are no signal output.
* " $\times$ " express no output. And other output signal from input pin written in table.

OBlock diagram

Fig. 2 Block diagram
Table. 2 Control pin function

| Pin name | State | Function |
| :---: | :---: | :---: |
| SEL1 | H | CVIN $\rightarrow$ CV_Y OUTPUT MODE |
|  | L | MIX(CIN,YIN) $\rightarrow$ CV_Y OUTPUT MODE |
| SEL2 | H | BIAS MODE (Py/G INPUT) |
|  | L | CLAMP MODE (Py/G INPUT) |
| SEL3 | H | SCART OUTPUT MODE |
|  | L | 6ch OUTPUT MODE |
| MUTE1 | H | $\mathrm{C}, \mathrm{CV}, \mathrm{Y}$ BLOCK MUTE OFF |
|  | L | $\mathrm{C}, \mathrm{CV}, \mathrm{Y}$ BLOCK MUTE |
| MUTE2 | H | $\mathrm{Py} / \mathrm{G}, \mathrm{Pb} / \mathrm{B}, \mathrm{Pr} / \mathrm{R}$ BLOCK MUTE OFF |
|  | L | $\mathrm{Py} / \mathrm{G}, \mathrm{Pb} / \mathrm{B}, \mathrm{Pr} / \mathrm{R} \mathrm{BLOCK} \mathrm{MUTE}$ |

OPin number/Pin name

| No. | Pin name |
| :---: | :---: |
| 1 | Vcc1 |
| 2 | S1 |
| 3 | S2 |
| 4 | CIN |
| 5 | MUTE1(OFF/ON) |
| 6 | CV IN |
| 7 | SEL1(CV/MIX) |
| 8 | Y IN |
| 9 | BIAS |
| 10 | SEL2(BIAS/CLAMP) |
| 11 | Py/G IN |
| 12 | TEST |
| 13 | $\mathrm{Pb} / \mathrm{B}$ IN |
| 14 | MUTE2(OFF/ON) |
| 15 | Pr/R IN |
| 16 | Vcc2 |
| 17 | Pr/R_C OUT SAG |
| 18 | Pr/R_C OUT |
| 19 | GND |
| 20 | Pb/B OUT SAG |
| 21 | Pb/B OUT |
| 22 | GND |
| 23 | Py/G OUT SAG |
| 24 | Py/G OUT |
| 25 | GND |
| 26 | YOUT SAG |
| 27 | YOUT |
| 28 | SEL3 (SCART OUT/6ch OUT) |
| 29 | CV_Y OUT SAG |
| 30 | CV_Y OUT |
| 31 | S-DCOUT |
| 32 | COUT |

O Cautions on use
(1) Absolute maximum ratings

This IC may be damaged if the absolute maximum ratings for the applied voltage, temperature range, or other parameters are exceeded. Therefore, avoid using a voltage or temperature that exceeds the absolute maximum ratings.
If it is possible that absolute maximum ratings will be exceeded, use fuses or other physical safety measures and determine ways to avoid exceeding the IC's absolute maximum ratings.
(2) GND voltage

Make setting of the potential of the GND terminal so that it will be maintained at the minimum in any operating state. Furthermore, check to be sure no terminals are at a potential lower than the GND voltage including an actual electric transient.
(3) Thermal design

Ensure sufficient margins to the thermal design by taking in to account the allowable power dissipation during actual use modes.
(4) Shorting between pins and mounting errors

When mounting the IC chip on a board, be very careful to set the chip's orientation and position precisely.
When the power is turned on, the IC may be damaged if it is not mounted correctly.
The IC may also be damaged if a short occurs (due to a foreign object, etc.) between two pins, between a pin and the power supply, or between a pin and the GND.
(5) Operation in strong magnetic fields

Note with caution that operation faults may occur when this IC operates in a strong magnetic field.
(6) Place the power supply bypass capacitor as close as possible to the Vcc pin (PIN1, PIN16).
(7) When not using a sag correction circuit

Connect the sag correction pin and output pin as closely as possible.
There is a danger of high frequency oscillation.
Also make the distance from the output pin (OUT pin, SAG pin) to the $75 \Omega$ resistance as short as possible.
(8) When using a sag correction circuit

Make the length of the output pin (OUT pin, SAG pin) and capacitor as short as possible.
There is a danger of high frequency oscillation.
Also make the distance from the output pin (OUT pin, SAG pin) to the $75 \Omega$ resistance as short as possible.
If these cautions is not observed in board layout, connect a capacitor ( $0.01 \mu \mathrm{~F} \sim 0.1 \mu \mathrm{~F}$ ) as short as possibl

## Notes

No copying or reproduction of this document, in part or in whole, is permitted without the consent of ROHM Co.,Ltd.

The content specified herein is subject to change for improvement without notice.
The content specified herein is for the purpose of introducing ROHM's products (hereinafter "Products"). If you wish to use any such Product, please be sure to refer to the specifications, which can be obtained from ROHM upon request.

Examples of application circuits, circuit constants and any other information contained herein illustrate the standard usage and operations of the Products. The peripheral conditions must be taken into account when designing circuits for mass production.

Great care was taken in ensuring the accuracy of the information specified in this document. However, should you incur any damage arising from any inaccuracy or misprint of such information, ROHM shall bear no responsibility for such damage.

The technical information specified herein is intended only to show the typical functions of and examples of application circuits for the Products. ROHM does not grant you, explicitly or implicitly, any license to use or exercise intellectual property or other rights held by ROHM and other parties. ROHM shall bear no responsibility whatsoever for any dispute arising from the use of such technical information.

The Products specified in this document are intended to be used with general-use electronic equipment or devices (such as audio visual equipment, office-automation equipment, communication devices, electronic appliances and amusement devices).

The Products specified in this document are not designed to be radiation tolerant.
While ROHM always makes efforts to enhance the quality and reliability of its Products, a Product may fail or malfunction for a variety of reasons.

Please be sure to implement in your equipment using the Products safety measures to guard against the possibility of physical injury, fire or any other damage caused in the event of the failure of any Product, such as derating, redundancy, fire control and fail-safe designs. ROHM shall bear no responsibility whatsoever for your use of any Product outside of the prescribed scope or not in accordance with the instruction manual.

The Products are not designed or manufactured to be used with any equipment, device or system which requires an extremely high level of reliability the failure or malfunction of which may result in a direct threat to human life or create a risk of human injury (such as a medical instrument, transportation equipment, aerospace machinery, nuclear-reactor controller, fuel-controller or other safety device). ROHM shall bear no responsibility in any way for use of any of the Products for the above special purposes. If a Product is intended to be used for any such special purpose, please contact a ROHM sales representative before purchasing.

If you intend to export or ship overseas any Product or technology specified herein that may be controlled under the Foreign Exchange and the Foreign Trade Law, you will be required to obtain a license or permit under the Law.
