### Application

- · Motor drive
- · Inverter, Converter
- · Photovoltaics, wind power generation.
- · Induction heating equipment.

### Features

- 1) Low surge, low switching loss.
- 2) High-speed switching possible.
- 3) Reduced temperature dependence.

# PCircuit diagram 7 9 8 3,4 6 5 NTC 11 NTC

### Construction

This product is a half bridge module consisting of SiC-DMOSFET and SiC-SBD from ROHM.

### ●Dimensions & Pin layout (Unit : mm)

# ●Absolute maximum ratings (T<sub>j</sub> = 25°C)

Parameter	Symbol	Conditions	Limit	Unit	
Drain-source voltage	$V_{DSS}$	G-S short	1200		
Gate-source voltage(+)	$V_{GSS}$	D-S short	22	V	
Gate-source voltage(-)	V GSS	D-3 short	<del>-</del> 6	]	
G - S Voltage (t <sub>surge</sub> <300nsec)	$V_{GSS\_surge}$	D-S short	-10 to 26		
Drain current *1	I <sub>D</sub>	DC (T <sub>c</sub> =60°C)	300		
	I <sub>DRM</sub>	Pulse (T <sub>c</sub> =60°C) 1ms *2	600		
Source current *1	I <sub>S</sub>	DC (T <sub>c</sub> =60°C)	300	Α	
	I <sub>SRM</sub>	Pulse (Tc=60°C) 1ms *2	600		
Total power disspation *3	Ptot	T <sub>c</sub> =25°C	1875	W	
Max Junction Temperature	T <sub>jmax</sub>		175		
Operating junction temperature	$T_jop$		-40 to150	°C	
Storage temperature	$T_{stg}$		-40 to125		
Isolation voltage	Visol	Terminals to baseplate, f=60Hz AC 1min.	2500	Vrms	
Mounting torque		Main Terminals : M6 screw	4.5	N · m	
		Mounting to heat shink: M5 screw	3.5	14 ' 111	

<sup>(\*1)</sup> Case temperature (T<sub>c</sub>) is defined on the surface of base plate just under the chips.

# Example of acceptable $V_{\text{GS}}$ waveform

<sup>(\*2)</sup> Repetition rate should be kept within the range where temperature rise if die should not exceed T<sub>j max</sub>.

<sup>(\*3)</sup> T<sub>i</sub> is less than 175°C

# ●Electrical characteristics (T<sub>i</sub>=25°C)

- (\*4) Measurement of Tc is to be done at the point just under the chip.
- (\*5) Typical value is measured by using thermally conductive grease of λ=0.9W/(m K).
- (\*6) If the Product is used beyond absolute maximum ratings defined in the Specifications, as its internal structure may be dameged, please replace such Product with a new one.

### Notes

- 1) The information contained herein is subject to change without notice.
- Before you use our Products, please contact our sales representative and verify the latest specifications
- 3) Although ROHM is continuously working to improve product reliability and quality, semiconductors can break down and malfunction due to various factors. Therefore, in order to prevent personal injury or fire arising from failure, please take safety measures such as complying with the derating characteristics, implementing redundant and fire prevention designs, and utilizing backups and fail-safe procedures. ROHM shall have no responsibility for any damages arising out of the use of our Poducts beyond the rating specified by ROHM.
- 4) Examples of application circuits, circuit constants and any other information contained herein are provided only to illustrate the standard usage and operations of the Products. The peripheral conditions must be taken into account when designing circuits for mass production.
- 5) The technical information specified herein is intended only to show the typical functions of and examples of application circuits for the Products. ROHM does not grant you, explicitly or implicitly, any license to use or exercise intellectual property or other rights held by ROHM or any other parties. ROHM shall have no responsibility whatsoever for any dispute arising out of the use of such technical information.
- 6) The Products specified in this document are not designed to be radiation tolerant.
- 7) For use of our Products in applications requiring a high degree of reliability (as exemplified below), please contact and consult with a ROHM representative: transportation equipment (i.e. cars, ships, trains), primary communication equipment, traffic lights, fire/crime prevention, safety equipment, medical systems, and power transmission systems.
- 8) Do not use our Products in applications requiring extremely high reliability, such as aerospace equipment, nuclear power control systems, and submarine repeaters.
- 9) ROHM shall have no responsibility for any damages or injury arising from non-compliance with the recommended usage conditions and specifications contained herein.
- 10) ROHM has used reasonable care to ensure the accuracy of the information contained in this document. However, ROHM does not warrants that such information is error-free, and ROHM shall have no responsibility for any damages arising from any inaccuracy or misprint of such information.
- 11) Please use the Products in accordance with any applicable environmental laws and regulations, such as the RoHS Directive. For more details, including RoHS compatibility, please contact a ROHM sales office. ROHM shall have no responsibility for any damages or losses resulting non-compliance with any applicable laws or regulations.
- 12) When providing our Products and technologies contained in this document to other countries, you must abide by the procedures and provisions stipulated in all applicable export laws and regulations, including without limitation the US Export Administration Regulations and the Foreign Exchange and Foreign Trade Act.
- This document, in part or in whole, may not be reprinted or reproduced without prior consent of ROHM.

Thank you for your accessing to ROHM product informations. More detail product informations and catalogs are available, please contact us.
