

Positive Thermal Coefficent Diodes

SMD2920P030~300 Series

The SMD2920 Series PTC provides surface mount overcurrent protection for applications where space is at a premium and resettable protection is desired.

Features

- RoHS compliant, lead-free and halogen-free
- Fast response to fault currents
- Compact design saves board space
- Low resistance
- Low-profile
- · Compatible with high temperature solders

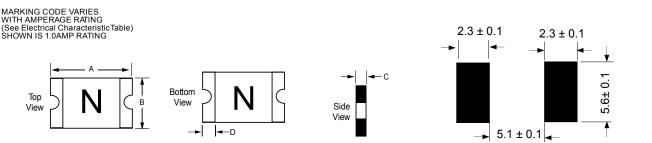

Applications

- USB peripherals
- Disk drives
- CD-ROMs
- Plug and play protection for motherboards and peripherals
- · Mobile phones battery and port protection
- · Disk drives

Dimension

- PDAs / digital cameras
- Game console port protection

Ihold = Hold current: maximum current device will pass without tripping in 20°C still air.

Itrip = Trip current: minimum current at which the device will trip in 20°C still air.

Vmax = Maximum voltage device can withstand without damage at rated current (Imax)

Imax = Maximum fault current device can withstand without damage at rated voltage (Vmax)

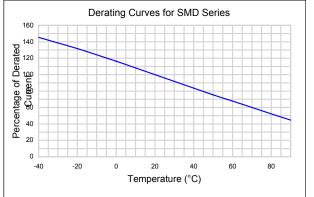

Pd = Power dissipated from device when in the tripped state at 20°C still air.

Rmin = Minimum resistance of device in initial (un-soldered) state.

- Recommended reflow methods : IR, vapor phase oven, hot air oven.
- · Devices are not designed to be wave soldered to the bottom side of the board.
- Recommended maximum paste thickness is 0.25 mm (0.010 inch).
- · Devices can be cleaned using standard method and solvents. Note : If reflow temperatures exceed the recommended profile, devices may not meet the performance requirements.
