## DESCRIPTION

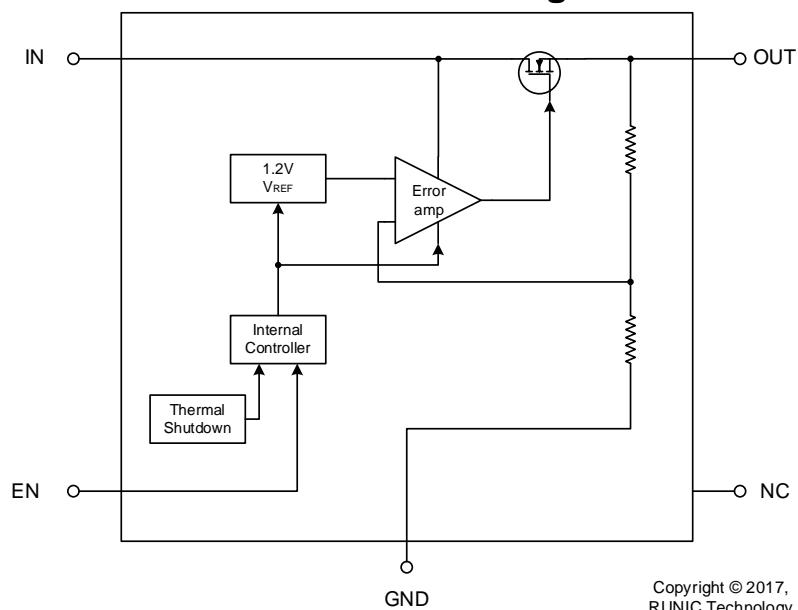

The RS3219 series low-power, low-dropout, CMOS LDO operate from 1.7V to 7.5V input voltage that can supply up to 300 mA of output current. Designed to meet the requirements of RF and analog circuits, the RS3219 series device provides low noise, high PSRR, low quiescent current, and low line and load transient response.

The device is designed to work with a 1- $\mu$ F input and a 1- $\mu$ F output ceramic capacitor.

Other features include a 10nA logic-controlled shutdown mode and thermal shutdown protection.

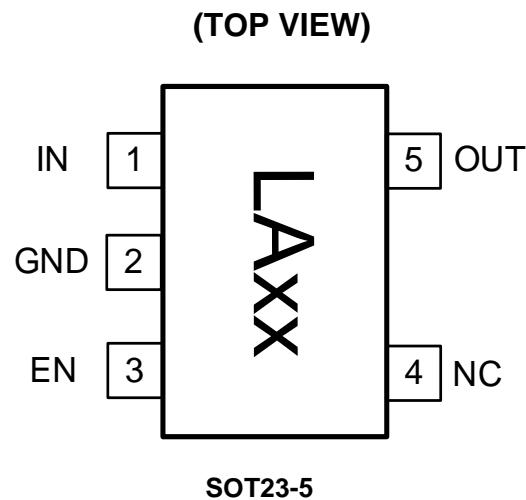

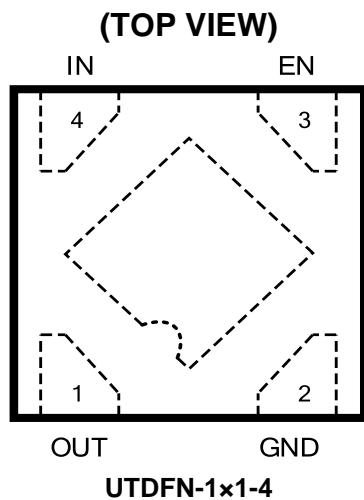

The RS3219 series is available in Green SOT23-3, SOT23-5 and UTDFN-1x1-4 packages. It operates over an ambient temperature range of -40°C to +85°C.
