DESCRIPTION

The RS842X families of products offer high voltage (36V) operation and rail-to-rail output, as well as excellent speed/power consumption ratio, providing an excellent bandwidth (5MHz) and slew rate of 3V/us. The op-amps are unity gain stable and feature an ultra-low input bias current.

The devices are stable at capacitance up to 300pF. The input can operate normally within the negative power rail to 2V below of the positive power rail. The RS842X families of operational amplifiers are specified at the full temperature range of -40°C to $+125^{\circ}\text{C}$ under single power supplies of 4.4V to 36V or dual power supplies of $\pm 2.2\text{V}$ to $\pm 18\text{V}$.
