# **General Instructions**

The special feature options covered in this Panelboard estimating procedure are applicable to factory-assembled panelboards only. Do not apply this pricing to ready-toassemble panelboards.

Special features are listed in three major categories:

- Mains
- Branches
- Cabinets

# **Metric Conversion**

Inches (in.) x 25.4 = millimeters (mm).

<sup>[2]</sup> [3] [4]

# Mains and Branches

Class 736, 1130

#### Mains

# Metering—Type 1 Enclosures Only (1200 A Maximum)

Enclosures and Interiors are shipped fully assembled.

NQ, NF and Powerlink™ require a 7-inch left side gutter extension and a 6-inch main end extension for PowerLogic Power Meter applications.

I-Line™ and QMB require a 14-inch side gutter extension for PowerLogic Circuit Monitor and Power Meter applications.

# Current Transformers In Mains (ac only and line side only)[1]

Prices listed are based on transformers having a 5 A secondary and mounted under a separate cover. Apply appropriate charge from the table below

**Table 4.5: Current Transformers** 

Primary Amperes (5 A—Secondary)	Additional Enclosure Height Required [2]
100–1200	6 inches

#### Customer Equipment Space[3]

NOTE: End user must specify end use equipment to be installed.

Available with NQ, and NF lighting panelboards only. Must be opposite the mains end, both main breaker and main lug, to prevent interference with incoming cables. Customer equipment space is not available with thru-feed lugs or sub-feed breakers.

A barrier exists between the equipment space and the panelboard compartment; a separate door is provided as standard (requires 18-inch additional enclosure height).

NOTE: A separate door is not supplied in NEMA 3R/12 construction.

#### **Branches**

# **Keyed Interlocks**

**NOTE:** Not available for use in NQ, NF or I-Line™ HCN panelboards with door. Not available on I-Line™ with door when key interlocked MG/MJ/P/R frame branchmounted circuit breakers are installed. Must use 4-piece trim or NEMA 3R/12.

Keyed mechanical interlocking of two or more circuits is available on request. Individual locks are furnished for each circuit. All locks operate by one key, which can be removed

only when the circuit is locked in the desired position.

I-Line Circuit Breakers — A 3-inch filler adjacent to the circuit is necessary for mounting the interlock; contact your nearest Schneider Electric sales office for assistance with power distribution panelboards with doors. Feature not available on vertically mounted main circuit breaker.

QMB Fusible Switches — Available on 100 A singles (100 A single QMB requires 9 inches of mounting space) through 800 A switches plus LA circuit breaker adapters. Requires 3 inches of branch mounting space per switch for interlock installation.

# Motor Operators—I-Line Circuit Breakers Only

Motor operators provide remote *open, close,* and *reset* control of molded case circuit breakers. Price panelboard from the latest Digest, and, for each motor operator, add per table below. In I-Line panelboards, motor operators require 4.5 inches of circuit breaker mounting space. This can be provided on I-Line main circuit breaker only when the main is branch-mounted and back-fed.

NOTE: Not available in I-Line HCN Panelboards

**Table 4.6: Motor Operators** 

Circuit Breaker Type	Motor Operator Voltage
F-frame	120 Vac
H-frame (3P modules only)	48/60, 110/130, 208/277, 380/480 Vac; 24/30, 48/60, 110/130, 250 Vdc
J-frame	48/60, 110/130, 208/277, 380/480 Vac; 24/30, 48/60, 110/130, 250 Vdc
LA, LH	120 Vac
PG, PJ, PL	48, 110/130, 220/240, 380/480 Vac; 24/30, 48/60, 110/130, 200/250 Vdc

**NOTE:** If the customer is not supplying the motor operator voltage, a control transformer can be supplied.

For NQ, and NF panelboards [2]

<sup>[3]</sup> Feature supported by product selectors in Q2C and EQM.

MH38 Enclosure with 6-inch

MH38 Enclosure with 12-inch Extended Bottom End Gutter and One-Piece Trim

# **Special Features**

### **Cabinets**

**Increased Enclosure Depth** 

# Type 1 Enclosure[4]

8-inch depth (HC26)

12-inch depth (HC32, 42, 44-12-inch only)

#### Type 3R, 5, or 12 Enclosure[4]

8-inch or 12-inch depth

NOTE: No other depths are available.

Increased Side Gutters (Type 1 Enclosures Only)

NOTE: Available on MH enclosures (right or left) in 3, 6 and 12-inch added widths, 26-inch wide HC enclosures up to a maximum of 14 additional inches and 32-inch wide HC enclosures up to a maximum of 10 additional inches. Not available on 42-inch wide HC enclosures.

No barrier will be supplied unless specified.

Includes one-piece trim.

Provide extended side gutters.

#### Steel Barrier in Enclosure

**NOTE**: The enclosure will be extended on one side only. If extension is required on both sides, contact your nearest Schneider Electric sales office for assistance.

# **Extended Top and Bottom End Gutters**

NOTE: Available for Type 1 enclosures only

# Type MH Enclosures

6-inch, 12-inch, 18-inch or 24-inch extension. Includes one-piece trim.

# Type, HCM Enclosures

9-inch extension. Includes standard panel trim and enclosure extension cover.

#### Type HCP, HCR-U Enclosures

12-inch extension. Includes standard panel trim and enclosure extension cover.

#### Type QMB Enclosures

38-inch W x 11.5-inch D may have a 6-inch maximum increased end gutter. This is the only QMB enclosure with an increased end gutter option. Available only with a four-piece

For lengths other than those listed above, refer to the Wireway section on page 4-8.

# Drip Hoods[4]

Surface-mounted-only panelboard

# **Special Finishes**

NOTE: The standard finish of the enclosure fronts is ANSI 49. The enclosures are galvanized steel.

# ANSI 49 Enclosure[4]

# ANSI 61 Front or Enclosure [4]

### Front and Enclosure with Polyester Acrylic Powder Paint Finish

Provides increased salt spray performance in coastal areas and increased resistance to **UV** fading

# Special or Custom Paint for Trim and/or Enclosure

# Free-standing Enclosures (welded base channels) [5]

Supports extending out front and back, welded to bottom of enclosure

NC38S with Yale Lock Installed

Common Trim Front for Use with Multiple-Section Panelboards Mounted Side-By-Side

# **Special Trims**

Hinged Trim [6]

# **Hinged Trim with Outer Door Lock**

**NOTE:** Outer door lock, must be priced with hinged trim. For door-in-door trim, use hinged trim with outer door lock.

#### Stainless Steel Trim Fronts [6]

NQ 20-inch-wide flush and surface

NF flush and surface

I-Line HCM—Standard trim with door

I-Line HCP—Standard trim with door

#### **Special Locks**

#### **Padlock Hasp**

For hasp, staple and standard lock (padlock not included)

### Special Locks

On trim with a 3-point latch, special locks will be installed as a secondary latch. Special locks include Corbin 60, Corbin 15767, GE 75, Yale® 511S and Best 5L7RL2-626. For all other locks, contact your nearest Schneider Electric sales office for assistance.

Standard key change, Corbin 60, Corbin 15767 or GE 75[6]

Standard key change, Yale 511S[6]

Standard key change, Best 5L7RL2-626/6/

Quarter turn fasteners

NOTE: Special locks for all HC trims and NF panelboards with three-point latches, will be installed as secondary locks. Special locks are not available on I-Line™ 42inch and 44-inch wide panelboards or QMB type panelboards. Many key configurations can be accommodated with our standard Square D™ brand lock. Contact your nearest Schneider Electric sales office for assistance.

# **Multi-Section Panels**

Equal-Height Enclosures[6]

NQ. and NF

I-Line or QMB

### Common Trim in Place of Two Individual Fronts[6]

Used to cover two equal-height enclosures mounted side-by-side.

# **Sheared on Inside Edges**

Allows enclosures to be butted together.

in place below an MH26 enclosure.

completely installed.

MH38 enclosure with 12–inch wireway and Mono-Flat™ trim with 12-inch wireway cover

#### Panel Skirt for Standard Width Panelboards [7]

Panel skirts are intended for cosmetic purposes only; they are meant to hide cables which are enclosed in conduit.

Do not use a panel skirt as a wireway; see the Wireway section below.

NOTE: Panel skirts are for Type 1 surface-mounted applications with standard depth and width, Square D™ brand enclosures only.

Table 4.7: Panel Skirts

# Panels to Fit Existing Enclosures

Panelboard interiors and special fronts can be furnished to fit existing enclosures. First, Panelboard interiors and special from can be furnished to fit existing enclosures. First price the complete panel along with the appropriate price adder from below. Next, photocopy the Retrofit Existing Enclosure data sheet found on page 4-12, record the required dimensions on the photocopy and forward it with your order to the nearest Schneider Electric sales office. For interiors requiring vented enclosures, contact your nearest Schneider Electric sales office for assistance.

NOTE: Existing enclosure depth on flush installations must be measured from inside surface of enclosure to outer wall or plaster surface.

# **Special Fronts**

Existing enclosure the same depth as or deeper than our standard.

NOTE: Elevating brackets to be supplied by customer for existing enclosures deeper than our standard.

Existing enclosure shallower than our standard. Requires an enclosure extension (surface applications) or

à formed front (flush applications). A hinged trim front option is not available for these

NOTE: A formed front is available on NQ (225 A max.) and, NF (250 A max.). When a flush front is required for an existing enclosure that is shallower than our standard, be sure to indicate the position of the enclosure with respect to the wall in which it is mounted. This is required in order to determine whether an enclosure extension with a flat front should be supplied, or whether a flush formed front is more applicable. The interior must be centered in the enclosure and, if the enclosure is deeper than our standard, the interior must be leveled within the enclosure. The existing enclosure for NQ and, NF panels cannot be more than 3.0 inches shorter than the standard enclosure. Minimum width is 17 inches. Special trims that are manufactured to fit an existing enclosure will be within ± 0.25 inches of the specification. Refer to the table below for standard enclosure depths and for the maximum depth for which no special mounting brackets are required.

Table 4.9: Panelboard Enclosure Depths

Panelboard Type	Standard Enclosure Depth	Maximum Enclosure Depth for which No Special Mounting Brackets Required
NQ standard width—main lugs only	5.75 inches	5.75 inches
NQ standard width—main circuit breaker	5.75 inches	5.75 inches
NF	5.75 inches	5.75 inches
I-Line™—Maximum F, H or Q-frame branch circuit breaker	6.5 inches	7.25 inches
I-Line—Maximum J-frame branch circuit breaker	8.25 inches	9.0 inches
I-Line—Maximum P or R-frame branch circuit breaker	9.25 inches	10.25 inches

# **Space Heater**

NOTE: Enclosure, interior and trim ship fully assembled. 120 V is standard. Top feed applications only.

NQ and NF require 18 inches equipment space in NEMA 3R/12 constructions.

NQ and NF require 6 inch bottom end gutter in NEMA 1 construction.

Unwired (provisions for wiring to external source)

Wired (with overcurrent device, thermostat)

# Table 4.18: Replacement Keys

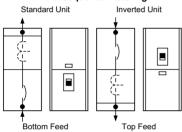

Application	Catalog No.
For use on all locks except those on stainless steel enclosures	LP9618
Locks on stainless steel enclosures	80106-456-01

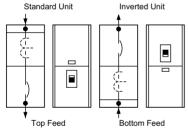

Panelboards that meet 1984 NEC® Wire Bending Space are Series E1. Fronts 56 inches or higher on 250 A maximum interior require two locks. Front 74 inches or higher on 600 A maximum interior require two locks. Fronts require two locks.

**Cold Sequence Metering** 

# **Hot Sequence Metering**

# **Main Circuit Breaker and Current Transformer Compartment** Service Entrance Equipment Hot or Cold Sequence Metering, Top or Bottom Feed, Indoor Construction at 600 Volts

General: Suitable for use as service entrance equipment on AC systems. Listed by Underwriters' Laboratories.

Service: 1Ø3W, 3Ø3W, 3Ø4W, rated up to 600 Vac maximum.

**Metering:** [1] Current transformer compartment with provisions for installing bar type current transformers. For window type current transformers, order bus link kit from Table 4.19 Product Selection Table, page 4-11.

Standard unit is factory assembled for bottom feed cold sequence or top feed hot sequence metering applications. The unit is field convertible for bottom feed hot sequence or top feed cold sequence metering. Refer to instruction bulletin 80105-113-0x, CTC Wall-Mounted Metering Equipment, for field conversion details.

Mains: Main disconnects provided. 400-800 A: MJP. 1000-1200 A: PJP. Handle lock-off attachment provided for main circuit breaker as standard.

Refer to Digest pages 7-36—7-42 for field installable accessories.

Enclosure: Front accessible, totally enclosed, gray baked enamel finish. Available as indoor construction only. Dimensions—78 in. H x 26 in. W x 14.3 in. D.

NOTE: Not EUSERC approved. For EUSERC approved Speed-D switchboards, see Digest pages 11-4 and 11-5. Service Applications

Table 4.19: Product Selection Table[2]

System	Service Voltage (AC)	Ampere Rating of Main	Catalog Number
		400 A	CTC364CU
	600 V Max.	600 A	CTC366CU
1Ø3W, 3Ø3W, 3Ø4W		800 A	CTC368CU
		1000 A	CTC3610CU
		1200 A	CTC3612CU
Bus link kit—used when installing window-type current transformers [3]			SS4BLC

Table 4.20: Lug Table

	· ·		
	Ampere Rating	Main Circuit Breaker Lug Wire Range [4]	Ground Lug
ĺ	400 A	(3) 3/0-500 kcmil Al or Cu	`
	600 A	(3) 3/0–500 kcmil Al or Cu	
_	800 A	(3) 3/0-500 kcmil Al or Cu	#6 AWG-300 kcmil Al or Cu
	1000 A	(4) 3/0–500 kcmil Al or Cu	
	1200 A	(4) 3/0-500 kcmil Al or Cu	

Field conversion is the customer's responsibility, only the standard configuration is built by the factory.

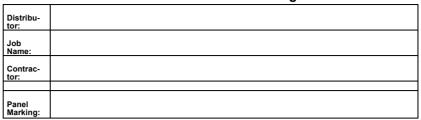

[2] Must specify feed (top or bottom) and sequence (hot or cold) at the time of order.

[3] Kits required per 3Ø application: 400-600 A-Order one kit 800-1200 A-Order two kits

CT bus lugs and neutral lugs are identical to the main circuit breaker lugs.

# **Data Sheet for Panelboards to Retrofit Existing Enclosures**

The following dimensions are necessary for quotation and production of a panel to fit an existing enclosure. Provide dimensions in inches only.

# **Existing Flush-Mounted Enclosures**

- Height dimension "A":
- Width dimension "B":
- · Depth dimension "C":
- Flange width dimension "D":
- If enclosure is not flush with Plaster Line, dimension "E": Existing Surface-Mounted Enclosures
- Height dimension "A":
- · Width dimension "B":
- Depth dimension "C":
- Flange dimension may be either dimension "D" or "F" (select one)
  - Dimension "D":
  - Dimension "F":NOTE: Trims are furnished so that the interior must be centered within the enclosure.

If the enclosure is deeper than the standard panelboard enclosure for the required type of panelboard, *customer-supplied mounting brackets may be necessary to bring the interior out to the front of the enclosure.* 

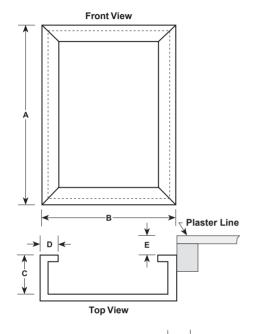

If interior requires a vented enclosure, contact your nearest Schneider Electric sales office for assistance.

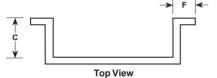

This data sheet is also available on-line

- Go to http://intranet.us.schneider-electric.com
- Click on U.S. Business, then select Sales & Marketing Home from the pulldown menu
- On the Sales & Marketing page, select Support and Resources
- On the Support and Resources page, select Mentor from the Tools options
- On the Mentor page, select Mentor Order Quality from the Mentor Application options
- When the Mentor order page appears, type in a project name in the Project Name: field, an 8-character number in the Q2C # field and your name in the Prepared by: field. Click on the box next to Panelboards, and then click on the Next—> button at the top of the page.
- On the Panelboards Mentor page, click on the box next to Trims to Fit, and then click on the

Next-> button at the top of the page.

- When the File Download window appears, click on the Open option.
- When the Mentor document opens, click on the Trims to Fit Data Sheet link at the bottom of the page.
- When the File Download window appears, click on the Open option to display the data sheet, or click the Save option to save the data sheet to your hard drive.
