## TA35 Rocker 2Pole

#### Circuit Breaker for Equipment thermal, Rocker actuation, 2 pole

illuminated Green transparent White, lettered

Description

- Snap-in version

- 2-pole

- Thermal circuit breaker

- Positively trip-free release

Different rocker coloursWide current range

Unique Selling Proposition - Unique UL rating of 277 VAC

- Finely graded rated currents

- IP65 with optional cover

- Method of operation acc. to IEC: S-type

- High configurability (rocker colours, lettering, illumination)

non-illuminated white

illuminated Red transparent

#### See below: Approvals and Compliances

#### Applications

- Power tools
- Medical and laboratory equipment
- Industrial appliances
- Equipment for construction
- Cleaning equipment
- Commercial and household kitchen appliances
- Industrial Power
- Industrial lighting arrays

#### Other versions on request - White front cover

#### **Approvals and Compliances**

Detailed information on product approvals, code requirements, usage instructions and detailed test conditions can be looked up in Details about Approvals

SCHURTER products are designed for use in industrial environments. They have approvals from independent testing bodies according to national and international standards. Products with specific characteristics and requirements such as required in the automotive sector according to IATF 16949, medical technology according to ISO 13485 or in the aerospace industry can be offered exclusively with customer-specific, individual agreements by SCHURTER.

# TA35 Rocker 2Pole

### Approvals

The approval mark is used by the testing authorities to certify compliance with the safety requirements placed on electronic products. Approval Reference Type: TA35

| Approval Logo               | Certificates  | Certification Body | Description                              |
|-----------------------------|---------------|--------------------|--|
| NE .                        | VDE Approvals | VDE                | VDE Certificate Number: 40019754         |
| c <b>FL</b> <sup>°</sup> us | UL Approvals  | UL                 | UL File Number: E71572                   |

| 8.0                                  | 0.0142                           |  |  |
| 10.0                                 | 0.0109                           |  |  |
| 12.0                                 | 0.0086                           |  |  |
| 13.0 *                               | 0.0072                           |  |  |
| 14.0 *                               | 0.0072                           |  |  |
| 15.0 *                               | 0.0056                           |  |  |
| 16.0 *                               | 0.0056                           |  |  |
| 18.0 *                               | 0.0052                           |  |  |
| 20.0 *                               | 0.0052                           |  |  |
| * 3-Pole max. 12 A                   |                                  |  |  |

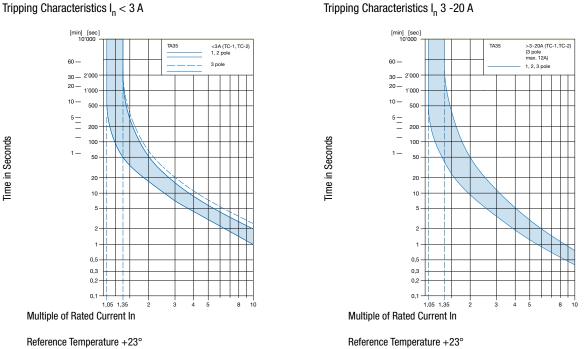

#### Effect of ambient temperature

The units are calibrated for an ambient temperature of  $+23^{\circ}$ C. To determine the rated current for a lower or higher ambient temperature, use a correction factor (typical value) from the table below:

| Ambient Temperature [°C] | Correction factor |  |
|--------------------------|-------------------|--|
| -30                      | 0.76              |  |
| -20                      | 0.81              |  |
| 0                        | 0.90              |  |
| +23                      | 1.00              |  |
| +40                      | 1.03              |  |
| +50                      | 1.04              |  |
| +60                      | 1.06              |  |
|                          |                   |  |

Example: Rated current = 5 A, Environmental temperature = 50 °C --> Correction factor = 1.04, Resulting current = 5.2 A --> Fount to next higher rated current: 6 A
