# MT3620 Grove Shield

Note:
Exclude Azure Sphere MT3620 development board
## Overview

Azure Sphere MT3620 Development Kit comes with four 2.54mm headers for hardware resources extension from MT3620. MT3620 Grove Shield is an add-on breakout board designed for MT3620 Development kit, which enable users to quickly apply sensors modules - Seeedstudio Groves on MT3620 Development Kit

Azure Sphere SDK has not yet supported ADC and I2C on MT3620. The shield serves as an interface between MT3620 UART port and the external I2C device, like the I2C temperature sensor. The basic function of the shield is helping developer get connected to I2C external device. By using an I2C compatible ADC chip , developer can read the analog data from the shield analog port.

## Features

- Master I2C-bus controller with UART interface
- 12-bit ADC, I2C-compatible serial interface
- 6 Grove connectors
    - 1 x UART
    - 2 x I2C
    - 1 x Analog
    - 4 x GPIO
