

Description

The 10D series provides an ideal circuit protection solution for DC voltage applications by offering higher surge ratings than ever before available in such small discs. The maximum peak surge current rating can reach up to 3.5KA(8/20 μ s pulse) to protect against high peak surges, including indirect lightning strike interference, system switching transients and abnormal fast transients from the power source.

Features

- >High surge current handling capability.
- >High energy absorption capability.
- >Wide operating voltages ranging from 10Vrms to 680Vrms.
- >Fast response time of less than 25ns, instantly clamping the transient over voltage.
- >Low clamping voltages, providing better surge protection.
- >Low capacitance values, providing digital switching circuitry protection.
- >High insulation resistance, preventing electric arcing to the adjacent devices or circuits.

Application

- >Surge protection of consumer equipment
- >Surge protection of communication, measuring and controller instrument
- >Surge protection in electronic home appliances, gas and petroleum appliances
