

μClamp0501P μClamp® 1-Line ESD Protection

PROTECTION PRODUCTS

Description

μClamp[®] series of TVS arrays are designed to protect sensitive electronics from damage or latch-up due to ESD and surge. They feature large cross-sectional area junctions for conducting high transient currents. They offer desirable characteristics for board level protection including fast response time, low operating and clamping voltage, and no device degradation.

 μ Clamp0501P is in a 2-pin SLP1006P2 package, measuring 1.0 x 0.6 x 0.5mm. Leads are spaced at a pitch of 0.65mm and are finished with lead-free NiPdAu. Each device will protect one uni-directional line operating at 5 volts. They may be used to meet the ESD immunity requirements of IEC 61000-4-2 (±15kV contact & ±20 air discharge). The combination of small size and high ESD surge capability makes them ideal for use in applications such as cellular phones, industrial equipment, and portable instrumentation.
